Send For a Sample Copy
Of The NEW
Daily Pacific Builder

The only daily construction newspaper affording complete coverage of the construction activities in Central and Northern California, featuring work contemplated, bids wanted, bids opened, contracts awarded, sub-bids wanted and sub-contracts let on all types of building construction, bridges, dams and harbor works, irrigation projects; machinery and equipment; water works and supplies business opportunities, building permits, building contracts, mechanics' liens, acceptances, etc., etc.

Keep informed on construction developments in Central and Northern California and the major projects in Southern California, the states of Oregon, Washington, Nevada and Arizona.

The new DAILY PACIFIC BUILDER will afford a service that serves—both in Quality and Quantity. You, as a member of the construction fraternity, should not be without it.

Subscription price \$1.50 per month, or \$15.00 a year, payable in advance.

Send for free sample copy today.

\$12,548,929 IS BUILDING EXPENDITURE IN SAN FRANCISCO FOR PAST SIX MONTHS

Building construction undertaken in San Francisco during the month of June involved a expenditure of \$2,232,809, bringing the activities of the past six months to \$12,548,929. During the month of June, 565 permits were granted, making the total number of permits for the six month period register 2,411.

June, 1929, operations called for 585 permits having a valuation of \$3,303,317.

Frame building construction, mostly homes, proved the biggest unit of the June operations, 142 permits being issued. Public building construction, two projects, followed with a \$691,695 expenditure. Alterations, additions and repairs to standing structures called for an expenditure of \$324,175.

Following is a complete tabulation of the June, 1930, activities as compiled by John B. Leonard, superintendent of the Bureau of Building In-

Class	No. of P'mts	Cost
A	1	\$ 40,000
B	4	165,000
C	17	243,550
Frames	142	768,889
Alterations	399	324,175
Public Bldgs.	2	691,695

Total 565 \$2,232,809
Compilation of the figures for the first six months of each year for the past five years, shows the 1930 operations as the lowest on record, both in the number of permits issued and estimated valuation.

S. F. BUILDERS ENJOY ANNUAL EXCHANGE SMOKER

Members of the San Francisco Builders' Exchange celebrated the annual banquet and buffet-luncheon of that organization last Thursday evening. A record crowd was on hand to enjoy a program of entertainment with something doing every minute.

Charles Smith, plastering contractor, with his tenor voice carried off highest honors on the entertainment program.

Miss Carmen Brock entertained with songs, followed by Hal Burmeister in vaudeville selections.

Comic songs with guitar accompaniment were featured by E. Westerland and vocal selection by R. Swall. Operatic selection were offered by Mr. Tognally.

An Egyptian dance by Miss Alma Warsel and a Hula dance by Miss Irene Cortway were features of the evening's entertainment.

Miss Jessie Douglas accompanied the various artists on the piano.

Following the entertainment a buffet luncheon was served and festivities continued until midnight.

William H. George, president of the exchange, announced the entertainment features assisted by Emil Hlogberg, chairman of the Exchange Entertainment Committee.

STOCKTON DEEP WATER PROJECT BIDS ARE ASKED

Bids will be considered August 26 by Major J. R. D. Matheson, U. S. District Engineer at Sacramento, for the construction of levees along the San Joaquin River, in connection with the Stockton Deep Water Project.

The specifications are prepared for two contracts, one for dragline dredging, and one for clamshell dredging. Four types of levees are to be constructed.

The specifications divide the work into several units. Those for drag line work call for removal of an estimate of 478,800 cubic yards and construction of 47,625 linear feet of levee between Mormon channel and Burns cut-off; removal of 268,700 yards and construction of 46,650 feet between Burns Cut-off and Turner's Cut; removal of 50,000 yards and construction of 3300 feet of levee between Hog Island and Head ranch; and removal of 66,100 yards and construction of 44 and Mandeville Island.

Total yardage to be moved by the dragline dredgers will be \$63,600.

The clam shell work calls for removal of 1,827,700 yards between Mormon Channel and Turner's Cut; 325,400 yards from Turner's Cut to Spud Island; and 464,000 yards between the west end of the McDonald Tract and Camp 8, Venice Island. Total yardage will be 2,617,100.

STATE EXCHANGE TO MEET IN RICHMOND AUGUST 30

Richmond will act as host to the annual convention of the California State Builders' Exchange, August 30. As that date precedes a holiday, a large attendance is expected from every section of the state, Harry R. Cayford, secretary of the state organization, announces.

Sessions will begin at 9 A. M. on the 30th, and continue throughout the day and evening, with an enjoyable social program being planned for the "in between" hours of the day.

This convention will mark the completion of the incorporation of the state body, and election of 11 directors who will serve under the new regime will be held. These directors will name the officers for the coming year.

Incorporation was considered a necessary step to further the interests of the Builders' Exchange movement in California, and to bring about effective co-operation with the National Association of Builders' Exchanges. Much more can be accomplished through unification of effort, and it is expected that the coming convention will be the largest ever held by the California State Builders' Exchange.

Marin Lumber Supply Company plant at Sausalito suffered a \$15,000 fire loss June 30.

ROAD TO PROSPERITY IS OUTLINED BY STEEL CHIEF

Speech of Chas. F. Abbott, Executive Director, American Institute of Steel Construction, Inc., at the Convention of the Steel Founders Society of America, Greenbriar, Va., June 27, 1930.

A casual analysis of our industrial situation will show conclusively that in the majority of instances reasonable returns are not being obtained. Our country's most valuable possessions rest in its natural resources, valuable in peace times as well as during emergencies. Why, then, should we permit our oil, lumber, coal, cotton and mineral deposits to be taken from our preserves and disposed of at a loss or without a reasonable profit?

Under such conditions our financial institutions are facing real hazards, possible unemployment and satisfactory wage adjustments, our transportation systems feel the pinch. In fact, the welfare of all of our people is vitally concerned unless industry is capable of receiving a fair return on its capital investment.

Should we question any number of industrial leaders we will find many reasons given that are preventing profitable operation. Some of them are attributable to inadequate legislation or obsolete laws; others are based upon individual selfishness, obsolete plants and machinery, and inefficient management and methods of distribution. No doubt all these contribute to the causes but the fact remains that no authentic information has been produced on this question that concerns national progress and welfare.

The seriousness of the situation so closely allied to public interest should command the appointment of a council or commission to consist of representatives of finance, labor, industry and economists that would give intensive study to the situation and develop the real causes through fact-finding, and then publish them as a semi-official endorsement which could be received by the public as the result of an impartial study of competitive men, able and capable of determining causes. With such information at hand, a program of remedy or relief could be prepared and such action taken as might be deemed advisable to insure or encourage profitable operation.

Today, industry is confronted with the Sherman Anti-Trust Law that is uncertain in its applications and its interpretations. Some of the restrictions were passed about forty years ago to cover conditions existing at that time but which are now obsolete. Unsatisfactory interpretations of the present law are confusing and no doubt contribute to the failure of industry to apply proper methods of control.

Industry experienced a sign of relief in the Codes of Trade Practice suggested by the Federal Trade Commission and energetically took advantage of the opportunity only to be informed that the Department of Justice did not approve the rules in their entirety and, therefore, the Code of Trade Practice movement was thrown into a state of chaos and so far without any of the benefits that were thought possible.

Undoubtedly legislation is not alone responsible for there are many evils that should be eliminated through the initiative of each industry itself as well as by each individual through a spirit of cooperation to promote better methods and eliminate the unethical, unfair, competitive relations now also, gather too disastrous to business.

Over-production is one of the greatest hazards under present-day conditions. Plant capacities increased for

An appeal for greater industrial cooperation was voiced before the convention of the Steel Founders Society of America by Charles F. Abbott, Executive Director of the American Institute of Steel Construction, at Greenbriar, Va. Mr. Abbott advocated the creation of a national commission of business men to study the causes of the lack of profits, and an appeal to President Hoover to appoint such a commission.

"A casual analysis of our industrial situation will show conclusively that in the majority of instances reasonable returns are not being obtained. Our country's most valuable possessions rest in its natural resources. Why should we permit our oil, lumber, coal, cotton and mineral deposits to be taken from our preserves and disposed of at a loss or without a reasonable profit?"

"The seriousness of a situation so closely allied to public interest should command the appointment of a council or commission to consist of representatives of finance, labor, industry and economists that would give intensive study to the situation and develop the real causes through fact-finding, and then publish them with semi-official endorsement which could be received by the public as the result of an impartial study of competent men. With such information at hand, a program of remedy or relief could be prepared and such action taken as might be deemed advisable to insure or encourage profitable operation."

war purposes were in excess of consumption possibilities in peace times and yet there are many inspired by a degree of selfishness who are attempting to operate at a 100% capacity in the belief that mass production will solve their problems when consumption figures fall far below this capacity output. Such a condition inspires competitive rivalry and methods that are ruinous to prices and fair profits. This policy is unsound and uneconomical and against public welfare. It would seem reasonable that some change in the present legislation could be brought about in order that production could be controlled in conformity with consumption possibilities and without the destructive influences of overproduction.

The whole question is one that concerns every industry and it should be approached by a coordinated undertaking that would include all the interests involved. Unless initiative is assumed by industry, then it is possible that we may experience a form of regulation or governmental control in order to insure prosperity. No farsighted business man wishes to encourage governmental interference in industry; yet if industry itself is to fail in its responsibility the government will undoubtedly insist upon some action to eliminate the deficiencies.

It is suicidal to run to Congress every time we have a business problem. That is merely inviting paternalism, and paternalism is the rape of individual opportunity. Businessmen must learn how to regulate themselves if they wish to avoid state socialism. Individual opportunity is eco-

nomic freedom, it has been truly said, and if we deliberately sacrifice that we will be headed on the road to Russification, we will sacrifice our political freedom.

It is recognized as the right of the American consumers to have full liberty in purchasing such goods as they think they have need for. We have no right to deny those goods to anyone who wishes to buy, and neither have we any right under the law to prevent the marketing of goods by any competitor. A monopoly is considered prima facie evidence as a restraint of trade because its intentions are believed to be for the purpose of curtailing production, and of depriving the public of something that it may have need of.

A manufacturer has just as much right to legal protection as has the consumer. He should be accorded as much protection from the vicious acts of his competitors as are consumers.

The thousands of industrial cooperative organizations are now in existence and are in a position through well prepared programs and mechanism and personnel to contribute to a large extent in any undertaking designed to encourage more profitable operation. They constitute the logical leadership but under existing uncertainties they are fearful to pursue any activity that might be questioned. Their proper activities should be clearly defined, and they should be permitted to function in a constructive manner. The only practical plan to bring about the desired relief is for industry to take the initiative, coordinate their thoughts and requirements into a plan based upon fact-finding and then insist upon the relief that is essential to their permanency and future prosperity.

Why should we organize a trade association? Why should I join and contribute time and money? Should there be any doubt of the answer, the view of the conditions confronting us?

The facts are convincing. We have left the days when individuals could fight each other and prosper. We have entered a new economic era where cooperation among competitors offers the only hope of meeting the new and changed conditions.

The steel pipe manufacturers have no organization and complete reliance is placed upon individual effort to prevent the displacement of steel pipe by competition. As a result of this lack of cooperation a large volume of business is lost, due to the more active unified effort on the part of competing organized industries.

Owen D. Young, Chairman of the Board of the General Electric Company, has said that the solution of business problems lies in group action.

Charles M. Schwab made the statement that would be cooperation among the various elements of the steel industry would be worth more than a billion dollars.

Those few remaining industries that are still in a state of disorganization, are groping in the dark, while the effective work of a competitive organized industry is creating excess plant capacities for them as markets decline by substitution of products. Destructive competition follows as a logical conclusion, prices become demoralized and profits are dissipated. Programs of standardization, simplification, education and reduced costs become impossible. The new era with its intriguing crosscurrents and influences will-

mately will lead these few delinquent industries into a condition of chaos.

There is only one answer and that is to move ahead as times and conditions change and to move so fast that competing industries are left behind. There are too many sitting with corpses in business today. What they need is new business, new enthusiasm, and new life. This is not a time when individuals can supplant the need for organized, cooperative effort.

Here is a responsibility that must not be overlooked and that it is a serious one no well informed business man will deny. There is only one possible way to proceed. Industry must organize, clean its house and fight or find itself hopelessly confused if responsibility is to be left to individual action.

Those who refuse to join their industry organization who refuse cooperation and prefer to go-it-alone can well afford to consider just what may be in store in the future if their insistence upon riding free is to be continued.

It is these few individuals in each industry that present the real hazards against the successful operation of all trade organizations. They are the weak links in the chain. There is more to be done through self-respecting cooperation than through that kind of competition which exists between yeggmen and even they have a standard code which they recognize. Unfortunately, there is to be found a small minority that refuse any cooperative action, and who prefer to ride while the other fellows pay. They are the small, disgruntled group that retards the progress and prevents constructive work. They feel that they are gaining while they actually lose.

In some foreign countries the law compels membership in their industrial organizations. From an economic standpoint this requirement is constructive. The non-cooperator in these days is a real obstruction of sound conditions. His isolated position, his refusal to do his part to advance his industry and his eagerness to take undue advantage of all the constructive work being accomplished by his competitors stamps him as an obstructionist. Banking institutions could well afford to recognize this liability as distinguishing between the majority who are enhancing credit risks while the indifference of the small minority encourage bad conditions that impair profits and credits.

There is ample proof that a thorough organization of our industries is essential if we are to experience prosperity and to preserve it.

There are many questions that can receive attention in constructive programs of trade organizations, among which are the following:

- Standardization and Simplification
- Codes of Trade Practice
- Code of Standard Practice
- Standard Specification
- Educational Meetings
- Standard Handbook
- Cooperative Advertising
- Research
- Uniform Cost System
- Sales Training

It is not my purpose to develop all the results that are possible, but I will emphasize some of them.

Research—Research, for the purpose of developing new uses and broadening the market is one of the most important of all activities. If conducted by an organized industry, the expense to each individual is not a large item though the benefits are very great.

As a result of Research the American Institute of Steel Construction has developed the battled steel plate floor construction, the use of steel in residences and is furthering a program to develop the practical use of steel in dams, and in other large potential markets.

This is one of the means of meeting the excess capacity problem, by stimulating a greater consumption by the development of new uses. The application of research to technical problems not only tends to reduce costs, but to make possible more intelligent and economical uses.

Costs—Extreme pressure to obtain business has resulted in price-cutting reaching a point where only the relatively few most efficient plants earn a reasonable profit and even their margin has lately been seriously jeopardized as a result of unrestricted competition. Under such highly competitive conditions there comes a time when the margin between irreducible costs and profits with the most efficiently operated concerns finally narrows to the point where prices will not recede further. There is no need for any cost figures when selling prices are to be fixed by a system of outguessing competition.

The principal purpose of obtaining accurate costs is to establish a base upon which profits may be added. The sum total then becomes the sales price. This method eliminates all consideration of what competition may do and is the only process than can insure successful operation. The acceptance of more constructive methods is essential before there can be any need for cost prices. Eventually this need will become recognized. Profits will then become the incentive with less consideration devoted in trying to guess what price competition may quote.

The use of accurate costs advances intelligent competition. Inaccurate costs, obsolete equipment or inefficiency in operation develops the ignorant, destructive form of competition from which the best organized concerns become infected wherever ignorance prevails.

The plants operating on the basis of the highest efficiency are the most useful advocates of distributing intelligent cost data and the collection of statistics realizing that their participation serves as the most effective means of influencing others who may be operating ill-advisedly from weakening the market or indulging in destructive competition.

The practical approach to the problem rests in education, to bring about a complete recognition of the vital need for profits which becomes possible only when all members accept and apply the means by which profits can be obtained. This method calls for control to be vested in costs upon which selling prices will be based.

The acceptance of a Uniform System of Cost Accounting would standardize methods and place all on an equal basis. Reduction in costs will then depend upon improved methods and the elimination of waste and lower prices will go to those who become the most efficient. This is as it should be as personal initiative and ability can then become a spirit of rivalry between management and those that manage the best can profit the most. Intelligence supersedes ignorance and competition regains the stimulating influence necessary to a healthy business condition.

Salesmanship—One of the most important problems in business today is selling, based upon a fair price to the customer and which will yield a reasonable profit to the manufacturer. Cut out all the frills and the solution of the problem rests with each individual seller. He can solve that problem to his own satisfaction and to his own financial success if he refuses to be bluffed into a sale at a price which will not cover his costs and a reasonable profit.

"That is fine," you say, "but I must meet my competitor's price or lose the business. I know my competitor is selling below cost and I have got to meet his price." And that is exactly where we begin to dig the graves. Is it necessary to sell at cost or at a loss for no other reason than the fear that if you don't, the other fellow will?

Is capacity production at a net loss more desirable than 60 or 80% output at a profit? If one competitor wastes his capital assets, must every other seller in competition match his destructive, ignorant policy? The fact that there are many in every line who are making a profit proves that knowledge and self restraint are not without their rewards.

There are concerns in highly competitive industries that are displaying that courage year in and year out. True, they may not have the big volume but they have not been drowned in red ink!

Destructive competition and the absence of approved selling methods have brought many customers to the point where they regard low price as the only consideration in their purchases. The falsity of this conception is apparent to all of us, but if it is to be dissipated we must give salesmanship the same consideration they give all the other elements of business.

It takes courage to look a carload order square in the face and say "No" if the order is not in accord with your established terms and prices. Of course, you can't get all orders without price being the inducement in some cases, but there are many other factors worth talking about. When the price is once submitted, there should be no further concessions. That is salesmanship.

Real salesmanship begins when prices have been established on a basis of total cost plus a reasonable profit and when orders are obtained without concessions affecting either terms or prices. The difficult part of salesmanship is not in selling to people who have already made up their minds to buy at the price quoted, but in selling to those who either do not want to buy or who are not willing to pay a fair price.

Study the selling policies of the automobile industry and you will find them well standardized. The prices and terms established by each company are the same to all. There are no secret rebates. The buyer has confidence in the industry because he knows that when he is ready to buy he can make his purchase without feeling that haggling with the salesman might have resulted in a better price.

Compare this policy with that of an industry where there is no standardization in selling policy. Each sales proposal is subject to varying terms and prices for the same article. Imagine the state of mind of the buyer, his confusion and lack of confidence, his inability to find a dependable basis for a comparison of values. How can he possibly determine whether he has obtained the best price? In the former instance, public interest is protected and confidence sustained. In the latter, public welfare is disregarded, confidence is displaced by uncertainty, and waste exacts a penalty that in the end the public must pay. There is no essential difference between the sale of an automobile, structural steel, steel castings, a toothpick, or an airplane.

To sell steel castings successfully we must not only talk about their superior qualities, we must dramatize them. We must build up our case.

point by point, and prove superiority. We must focus attention to tests, and demonstrate convincingly the reasons why steel castings are the best of all for certain purposes. We must point out their economy, their durability, and prove that their use over a period of years represents the lowest ultimate cost.

In a number of industries there is actually severe trade depression, due largely to inefficient methods that have obliterated all semblance of salesmanship. If the tendency in this direction continues at the present rate, it threatens to develop into trade prostration of the worst kind. The best hope of checking this trend lies in convincing sales executives that volume should not be the sole aim of business.

We must learn that fair volume, coupled with fair profit, is far more desirable than maximum volume coupled with minimum profit or no profit at all. Price-cutting is a direct result of unreasonable selfishness for business. Minds filled with rancor, hate and jealousy and suspicion, will be met with similar mistrust. Confidence and faith in one another, as Judge Gary stated, is vital, if progress is to be made.

A successful plan to remove the destructive, unfair business conditions existing within an industry is to fill it so full of constructive, fair methods that there will be no chance for the evil practices to flourish.

There is altogether too much competition in this country on poor quality. Poor quality businesses are not making expenses as a general rule. The solution is to produce a quality article, trademark it, guarantee its purity and quality, and then advertise it intelligently.

Why worry about the price-cutter? Every time he cuts a price, he is only adding to his own difficulties. Why not let him do all the worrying?

We must not talk prices and say that we can beat our competitor's prices. We must talk quality and service for the consumer is willing to pay the price if you can convince him on the two vital factors of quality and service.

Price is entirely a mental reaction. It is too high if the customer thinks it is and it is cheap if that reflects what he thinks. It is our duty to create in the customer's mind, the belief that our price is right, and that we are asking him only what we are entitled to get.

It is a very easy thing to reduce prices below a reasonable minimum, but it is an extremely difficult proposition to bring prices back to a level where reasonably profitable returns are to be experienced.

The buyer who is interested in the prosperity of his company must recognize that his ability to succeed depends upon his success to sell the merchandise of his company at a profit. He is not only a buyer but he should have an equal interest in the problem of selling. To jeopardize the interests of his principal sources of supply, forcing prices below cost in a vain attempt to obtain a cut-price or concession is the direct means of undermining the whole business structure.

The buyer and the seller are as dependent upon each other as are the producer and distributor of the product. In the long run, buyer and seller alike will be adversely affected by any influence which undermines the stability of the other. The best assurance for the consistent prosperity and progress of both and of American business as a whole, lies in active

co-operation to foster constructive influences and stamp out those such as price-cutting which are responsible for destructive competition that menaces the welfare of all concerned.

There is a failure in some industries on the part of some to fully recognize the economic position of the small plant or customer. In the steel industry the mills should not overlook the fact that the small concerns are the missionaries working the highways and byways, developing new customers for steel products, educating and promoting a steel consciousness. It is these small concerns that solicit the small orders but in the aggregate they represent a large and important volume. The larger unit is not equipped mentally or in any other way to extend service to these smaller users, therefore, reliance must be placed upon the smaller organizations.

We must not forget that the backbone of American industry consists of the small companies, the retailers and similar units. Their rights and preservation should be completely recognized by defined policies that are fair and in keeping with conditions.

In some of the distributing industries there is a tendency on the part of some of the larger concerns to look with disfavor upon the small competitor. Trade organizations have taught them that extermination does not pay. They might be successful in exterminating one group today only to find another crop tomorrow less controllable and less subject to education. A far better policy is to recognize the ones already in existence and by constructive leadership subject them to helpful education and thereby preserve the spirit of co-operation as reflected by the industry. The public and the ultimate consumer must be made conscious of steel for castings. They must be made acquainted with the merits and advantages of steel for castings and their superiority should be convincingly emphasized.

The industry or concern who fails to place proper valuation upon public opinion as the controlling factor in our industrial progress will be outstripped by a more alert competitive material.

Advertising—To supplement efficient selling and the promotion of the market for steel castings you must not overlook the importance of a public undertaking and recognition of the merits and advantages as exemplified in the use of steel itself. The ultimate consumer can be influenced to express a preference if he has first been convinced on the point of superiority.

There are many available records of success in advertising highly technical products and the list is a long one. Steel in buildings, bridges, refrigerators, automobiles, railway cars, furniture, ball bearings, and other uses are all included in the list. The regrettable part is that the user, not the producer, of steel is doing most of the advertising for the steel industry. These constructors recognize the value of emphasizing steel as an important sales argument.

With proper study and under efficient supervision advertising can be applied to any commodity no matter how technical its character may be or whether or not it loses its identity as a component part of a product that includes other materials. In the last analysis it is the customer, consumer or the public that says whether castings will be of steel or some other competitive product.

Assessments—There are altogether

too many who still look upon organization assessments as an item of expense. During dull periods the treasurer, or some other official not thoroughly informed in regard to marketing conditions, is inclined to reduce expenses and begins with the trade organization. There are others who refuse support because they feel they can gain while the other fellow pays.

Here is where we must begin with our education. If members of an industry are to hold fast to the idea that assessments are items of expense instead of an investment, then we might just as well abandon all idea of co-operative effort.

Assessments are usually obtained by a nominal charge levied on shipments and they should represent in the neighborhood of 1 per cent on gross sales. Small and insignificant charges make no impression one way or the other, except that they strike the treasurer as being items of expense. The way to make them stick is to levy assessments that are large enough to be felt. That is the only means of developing the investment consciousness.

In most organizations assessments are considered as an item of cost and included within the sales price. The customer pays and the amounts are then transferred to your institute whose Board of Directors invest them in a constructive program that benefits the entire industry, as well as each individual.

What difference does it make whether the assessments amount to 20 cents or 50 cents per ton, as long as all pay on a proportionate basis? In any event, 20 or even 50 cents per ton is sold on a competitive factor one way or the other, and the company that refuses to pay loses far more than it gains.

The intelligent farmer realizes that he can not succeed by plowing the ground and reaping the harvest and doing nothing else. He attaches great importance to the fertilization and to scientific soil promotion. He recognizes the need of returning to the soil a part of that which he has taken out. Moses in his law-giving wisdom demanded a tithe. It is the same in industry. We must be willing to pay for what we get or we will continue a policy of starvation, and in the end, we will find that we have no business at all. Markets must be promoted and protected, new uses must be developed. It would be impossible for any single company to undertake such an activity because of the large expense involved.

When business men will give heed to the obvious way out of their difficulties, they will be in a better position to plan intelligently. When industry holds fast to the fundamental law of profitable business it will become profit-minded and that is a long way toward the goal of success. There is no substitute, however, for individual responsibility and no hope of effective co-operation without it.

The era of narrow, selfish individualism is passing. We must enter upon a new era of co-operation and cordial understanding between buyer and seller, producer and distributor and the individual units of our various industries. Only upon such a foundation can a sound economic structure be erected. Individuals and organizations alike must learn that neglect of the spirit of "live and let live" so ably expounded by Judge Gary, produces little but friction, heat, rancor, and impairment of earnings.

THE OBSERVER

What He Hears and Sees on His Rounds

An improvement in the supply of capital now available for real estate loans in comparison with the supply available six months ago is reported by the National Association of Real Estate Boards following the completion of its 15th semi-annual survey of the real estate market, a survey made by the Association from the collected reports of 423 local real estate boards representing the principal cities of the United States and Canada.

This improvement in the supply of available capital, the National Association points out, indicates that the fundamental problem for increased construction—the problem of supplying funds for wise building projects—is now presenting itself as a less difficult one, probably due to the fact that capital is less disproportionately diverted directly or indirectly into speculative fields and will tend to be placed increasingly at the disposal of the home builder.

Comparing the situation today and six months ago, when the first results of the stock market debacle were being felt, the report shows that today 30 per cent of the cities report an equilibrium between supply and demand in real estate mortgage loans and capital, 48 per cent report that desirable loans are seeking capital and 22 per cent report that in the mortgage money market capital is seeking loans. The report six months earlier showed that in 53 per cent of the cities real estate loans were seeking capital; 19 per cent reported a surplus of capital seeking investment, and 28 per cent reported equilibrium between supply and demand.

In the present survey no effort was made to gather statistics on the actual amount of money now available for construction in the various cities reporting. The National Association is now engaged in an investigation to determine just what sums are now ready to be used for building purposes.

Alexander Legge, chairman of the Federal Farm Board, suggested to the National officers of the Mortgage Bankers Association of America in session at Chicago June 21 that a definite program of co-operation be developed between the Board and farm mortgage bankers throughout the country.

"Mortgage bankers in your organization lending millions of dollars of insurance funds on the security of farm lands are in a strategic position to assist the farmer directly and to help the Farm Board keep in direct touch with farm problems," said Mr. Legge. "The Farm Board looks favorably upon the appointment of a Committee properly representative of mortgage bankers and insurance company investors to advise the Board with reference to economic questions involving land utilization and trends in agricultural finance."

Declaring that acreage reduction is vitally necessary to the success of the Marketing Act, Mr. Legge cited a leading manufacturer's statement recently that farm production should not be controlled or restricted. "This manufacturer, at the time, was running his own factory at 70% capacity. If he were running at 100% capacity, as he advises the farmer to do, he would be broke in twelve months," he observed.

In line with Mr. Legge's proposals the Mortgage Bankers authorized ap-

pointment of the Contact Committee suggested, and a plan of co-operation will be carried into effect immediately.

The services performed by trade associations have become an almost indispensable factor in business success, Hugh P. Baker, manager of the Trade Association Department of the Chamber of Commerce of the United States, told the members of the National Association of Purchasing Agents at their 15th annual convention in Chicago last week.

The trade association, he said, has become a permanent part of American business life. "Conditions are such in industry today," he declared, "that if for any reason the association serving a particular industry were wiped off the map, in six months doubtless the industry would have to come together again for unified action in meeting its common problems."

"There is plenty of evidence," he continued, "that the trade association has come to stay. In this connection, it is interesting to note the changing attitude of the bankers of the country toward trade associations. More and more the bankers are coming to determine the credit to be extended business men upon the basis of the ability of the business men to get together with his competitors for the sound upbuilding of the business or the industry of which he is a part. Bankers are less and less interested in the little fellow or the big fellow who thinks he can run his business off in a corner by himself without affecting his competitors or without affecting his industry. The fact that the American banker is recognizing the importance of the trade association, is evidence enough that he thinks the trade association has come to stay. Another evidence of the permanency of the trade association is the fact that no large industry in this country is without a trade association."

Eight European nations will be visited by students of the School of Architecture of the University of Southern California who go on the annual "vagabond" summer tour sponsored by the Trojan Institution, according to the itinerary announced today. The trip will be conducted under the direction of Dean Arthur C. Weatherhead and Prof. S. Raymond Johnson of the S. C. architectural faculty.

The latest trend in modern architecture will be studied by the mobile students in various cities and countries, emphasis being placed on American work as contrasted with that of other nations. Six units of credit will be granted those who pass an examination following completion of the tour.

Important points of interest in the Trojan itinerary include Paris, Versailles, Madrid, Seville, Rome, St. Gothard, Heidelberg, Brussels, The Hague, and London. Washington, D. C., and other eastern cities will be visited on the return journey.

Foreign schools to be visited are the Paris Beaux-Arts, the Fontainebleau summer school, and the American Academy in Rome.

The "class" will return to Los Angeles about August 15.

In addition to S. C. students the group will include some architects and draftsmen who are not interested in making the trip for college credit.

Low money rates and mounting contracts for public construction activities were seen among the more favorable factors in a non-committal analysis of current business conditions made in public last Monday by Julius H. Barnes, chairman of the national business survey conference.

"Our conviction is that interested individual judgment should form its own opinion, without being influenced by any attempt at interpretation," Barnes said.

He pointed out that rediscount rates at the New York Federal Reserve Bank are the lowest that have ever prevailed in the system. Customers' rates at commercial banks have declined on a par with two years ago, he noted.

Barnes reported that for the year to June 26th, public works and public utilities construction exceeded last year's volume by over \$110,000,000. As against this gain, however, his statement showed a decrease of more than \$110,000,000 in non-residential building fell behind \$500,000,000. Total building contracts for all classes this year to June 26th were disclosed at \$2,375,000,000, against \$2,864,000,000 for 1920.

May foreclosures and delinquencies on mortgages were materially reduced under a year ago.

Usual May decline in bank savings negligible this year. Increase shown for first part of June.

Fewer delinquencies in collections on installment purchases.

Petroleum production has been curtailed almost to the level recommended by the federal oil conservative board.

The report brought to light unfavorable features as well, notably the 6 per cent decrease in car loadings in the first twenty-three weeks of 1930; May automobile production 30 per cent under May a year ago; declines in iron and steel output and drops in metal prices.

The Portland Cement Association, which has been conducting an intensive safety campaign for a number of years, is now under way for its 1930 campaign. The rules have been issued, and the awards will be made to the winning plants at the spring meeting. Each winning plant will be invited to send delegates. The Association has decided that a lost-time accident must be defined as one in which the injured loses more than the remainder of the shift or day in which the accident occurred, and in determining whether a given accident is chargeable, the committee shall be guided by the rulings of the California State Industrial Accident Commission.

The safety work of the various mills is planned to fit the particular operation. In some plants the safety committee includes the foremen and department heads, with the plant doctor and nurse. These committees hold monthly meetings. The foremen are expected to invite a few men to each meeting. General plant safety meetings are held at intervals of several months, and at such times two or three departments are shut down and the men brought together for twenty or thirty minutes for safety talks.

New orders of fabricated structural steel in May, as reported to the Department of Commerce by the principal manufacturers were 75 per cent of capacity as compared with orders of 53 per cent of capacity in April, and 59 per cent a year ago. Shipments of fabricated-structural steel in May represent 70 per cent of the capacity of firms reporting this item as against 76 per cent in April and 81 per cent a year ago.

HERE — THERE — EVERYWHERE

Roy Eakle was re-elected president of the Richmond Builders' Exchange at the tenth annual banquet meeting of that organization last Thursday night. Frank Mero was elected first vice-president; Carl Overaer, second vice-president; P. M. Sanford, secretary of the board; and James Walker, treasurer. Other directors are Andrew Nelson, E. H. Higgins and Jas. Walker.

Construction of dwelling, office and industrial buildings in Germany shows a decline in 1929 of 11 per cent from the figures reached in 1928, and it is estimated that the 1930 figures will probably be 20 to 25 per cent below the figures of 1928. According to an official estimate, dwellings are 80,000 short of the existing demand, but lack of capital is making new house construction difficult.

Failure of private builders to follow the lead of public works and public utilities in expanding building operations shown by figures reported to the U. S. Department of Commerce is nullifying the efforts of the administration to ameliorate the unemployment situation.

So badly has residential construction slumped so far this year that all gains by public works and utilities construction have been wiped out.

For the five months ended with May construction contracts awarded in 37 states aggregated \$2,037,000,000, a decline of \$449,000,000, or 18 per cent, below the total for the corresponding period last year, despite the fact that contracts for public works and utilities, totaling \$538,000,000, an increase of \$101,000,000, or 21 per cent over last year, broke all existing records.

Total construction awards in these states so far this year are the lowest since 1921, according to figures compiled by the department today, and residential building contracts, totaling only \$483,000,000, a drop of \$431,000,000 or 47 per cent, from 1929, are lower than they have been for many years.

Non-residential contracts for commercial, industrial, education and certain other classes of building, but not including public works, totaled \$1,012,000,000, a drop of \$118,000,000, or 11 per cent, and were the lowest for the same period of any year since 1925.

Comparing current figures with averages for the previous five years, it was pointed out at the department, shows a decline of 19 per cent in all contracts. Residential contracts are 55 per cent below the average and non-residential awards 4.5 per cent below, this being only partially offset by the increase of 35 per cent in public works and utilities.

NAPA COUNTY GOES 5-DAY WEEK FOR BUILDERS

The five-day week will be adopted for Napa and surrounding communities as a result of an agreement reached by a committee of the Building Trades Council and directors of the Napa County Building Exchange. The plan, which will take the place of the present system whereby members of building trades work a half day on Saturdays, will go into effect Monday, July 14, according to C. C. Mooney, secretary of the Council.

Trades affected by the plan are electricians, plumbers, carpenters, painters, mill workers, brick layers and all others engaged in the building industry. The present scale of wages will prevail, according to Mooney.

ALONG THE LINE

Clyde Laird, for the past seven years investigator for the district attorney's office in Contra Costa County, a licensed surveyor and engineer, has filed his nominating papers for the office of county engineer. The office is now held by R. R. Arnold.

Vladimir O. Oglou, 1710 Franklin St., Oakland, has been granted a Provisional Certificate to practice architecture in California, by the State Board of Architectural Examiners, Northern District, it is announced by Albert J. Evers, Secretary of the state body.

Bradford Pump Manufacturing Co., of San Jose, has appointed Euk L. Baughn sales manager. Mr. Baughn was formerly San Francisco district manager for the Byron Jackson Pump Co.

John L. Vincenz, deputy county surveyor of Fresno County, has been appointed postmaster at the new Meadow Lakes Postoffice, according to word from Washington. Vincenz is secretary of the Meadow Lakes Company, operators of the Meadow Lakes resort on the Fresno Lakes Highway above Anberry.

The fact that unnecessary noise presents a serious problem in receiving increasing recognition from various individuals and organizations. An account is given in the June issue of the Monthly Labor Review of the results of some of the studies and experiments dealing with the effects of noise on working efficiency. It has been shown that excessive noise reduces efficiency and that the practical effect of the use of quieting treatment for workrooms or the elimination or lowering of the disturbing noises has been an increase in output or a reduction in the number of errors. Experiments carried out in the psychological laboratory of Colgate University in which the effect of noise on the working efficiency of four expert typists was measured, showed that under quietest conditions the increase in speed amounted to 7.4 per cent for the fastest typist, while the average energy expenditure of the four persons was reduced nearly 30 per cent.

GENERAL BUILDING CONTRACTOR OFF THE PRESS

The new contractors' publication recently announced by F. W. Dodge Corporation has been mailed to its readers.

The first issue features articles by such prominent persons as William Joshua Barney, President of the Barney-Eylers Construction Co., T. B. Seales of the Geo. A. Fuller Construction Co., Stanley Newman, prominent Boston Waterproofing engineer, John Russell Jr., safety engineer for Public Service Production Co., and others. The new magazine is profusely illustrated and gives evidence of being the subject of much artistic care and attention. It features a 16-page portfolio of interesting progress photographs of building construction.

Theodore Crane, Associate Professor of Building Construction at Yale University is the editor of General Building Contractor.

TRADE NOTES

The International Steel Company of Seattle and Hickok & Hickok of Portland and San Francisco have consolidated and have adopted the name of Pacific H. B. A. Steel Company, Inc. The Seattle office is located at 292 First Ave. South. Offices and warehouses will be maintained in Portland and San Francisco also.

Hercules Motors Corp., Canton, Ohio, has named Walter F. Radtke, Pacific Coast sales representative with headquarters in San Francisco. Radtke formerly represented the Hercules interests in the Mid-Continent states.

Independent Pneumatic Tool Co., Chicago, Ill., has purchased the Co-chise Rock Drill Mfg. Co. of Los Angeles, which will operate as a unit of the Independent Company. There will be no change in personnel or methods. The plant of the Co-chise company will be expanded and its products will be incorporated in the present line of the Independent Company.

Zemco Electric Manufacturing Company, Ltd., of Alameda, has been incorporated and will engage in the manufacture and sale of electrical apparatus and materials. Directors of the concern, which is capitalized at 1000 shares, no par value, are J. M. and Ethel Zarwell of Alameda and W. E. Padfield of Oakland.

TRADE LITERATURE

The Rigid Conduit Section of the National Electrical Manufacturers Association sets forth in a new booklet the merits of rigid conduit as a means of providing a maximum protection for all wiring systems, and claims this product the only type of raceway which is not limited in use by any restrictive requirements and regulations. Copies of this booklet are given free upon request to George H. Sicard, secretary, Rigid Conduit Section, 603 Gas & Electric Building, Utica, N. Y.

PLUMBERS LICENSE FEE AT FRESNO TO BE RAISED

Probability of an increased city license fee for master plumbers of Fresno loomed with the receipt by Commissioner of Finance William Glass of a communication requesting such a move.

Glass said that the present city license fee of the plumbers is \$10 annually. It is expected that this fee would be raised to \$100 annually.

The move is being made against "pirate" plumbers who do free lance work about the city without maintaining a headquarters or paying city taxes. Approximately thirty-five master plumbers would be effected by the increase.

Information received in Fresno from other sections of the state shows that other cities are charging a high license fee in order to protect their local plumbers, Glass said.

ARCHITECT'S PART IN STATE WORK DESCRIBED BY DRAFTSMAN

Like any other art, craft, science, business or profession, the architectural practice of the present day is a product of evolution, says Harry W. Dellaven, chief architectural draftsman of the State Department of Public Works, in California Highways and Public Works. The appropriation of the title Architect was the result of a gradual process. Today an architect is a professional person whose occupation consists in originating and supplying artistic and scientific data preliminary to and in connection with the construction of buildings, their appurtenances and decorations; in supervising the operations of contractors, and in preparing contracts between owners and contractors.

Probably no one man could unite, with any great degree of excellence, all the attributes which could be alleged as essential to the complete architect. This ideal state is attained through the acquisition of an organization of specialists, competent in all the technical requirements of the building industry. Such is the Division of Architecture of the State Department of Public Works.

It is this organization that supplies the architectural service required by fifty different points of activity controlled by the state. Many of these points are institutions, and in effect are small cities with very unusual type of buildings required for their particular need. The accumulation of data on this specialized service renders this office more efficient in the production of the drawings and specifications for subsequent buildings at a much less office expenditure than was charged against the first.

There is an average of approximately \$10,000 worth of business produced daily by the Division of Architecture. The method in which part of this business is produced is after this manner:

Executing preliminary studies for all state buildings and developing the problems;

Investigating and selecting materials of construction, both concealed and exposed;

Preparing working drawings in detail, including scale and full-size detail. This method shows the contractor exactly what is required, and permits us to push the contractor to the limit after the contract is awarded and robs him of the usual excuse for delays, "Waiting for Details";

Designing and selecting fixed and movable furniture;

Interpreting building laws, etc.

The following subdivisions are found in the Division of Architecture: Structural Design, Mechanical Design, Electrical Design, Surveying, Estimating, Specifications, and Superintendents of Construction.

The buildings constructed by the state are mostly of the one- and two-story type, built of reinforced concrete or brick because of their use and the nature of their occupants. State buildings of all kinds are noted as suitable for their purpose—strong, substantial and durable. They are the acknowledged criteria of good construction. This office has always given the first consideration to the importance of these factors.

Architecture may be defined as the art of building beautifully and constructing soundly. There is no formula that produces good architecture

The architectural draftsman plays an important part in making a design a success, as it is he who develops the working drawings. He must be able to interpret in building terms the designer's idea in the form of drawings that the contractor can understand. Each set of drawings are thoroughly checked before being sent out for bids. This eliminates any chance of costly extras due to mistakes or misunderstanding on the part of the contractor as to just what is required.

The drawings for most of the buildings are made on tracing cloth in ink, and after all prints have been made, are filed as a permanent record. Should any change be made during construction, it is noted on the original drawings that a change order has been issued. In this way future alterations or additions can be made without making trips to the job and measuring the existing work, which saves considerable time.

In some instances the work is done by day's labor or inmate labor, and the Division of Architecture acts in the same capacity as general contractor, ordering all material. In this case, requisition drawings are made showing shape and quantity of material required for such as mill-work, sheet metal, ornamental iron, cast stone, terra cotta, etc., and bids are taken for each material separately.

The final link in our service to the state is superintendence. We make this a real service.

STEEL JOIST INDUSTRY TO MEET AT CLEVELAND

Representatives of all interests in the steel joist industry will meet in general conference under the auspices of the Division of Simplified Practice of the Bureau of Standards, Department of Commerce, at the Hotel Hollenden, Cleveland, Ohio, July 15, to discuss a tentative simplified practice recommendation covering the sizes of and the allowable loads for steel joists. In the past, much confusion has arisen in the design of this product because joists made by the different manufacturers varied notably in capacity. Designers, therefore, could not completely specify this type of construction without naming the product of some particular manufacturer. It is felt by those who have compiled the tentative table of sizes and allowance loads that its use will prove helpful to all concerned.

NOTED ELECTRICAL ENGINEER JOINS U. OF C. FACULTY

Announcements of the appointment of Dr. Leonard Franklin Fuller as leading professor of electrical engineering, effective July 1, is made by President W. W. Campbell. A search for an electrical engineer with credentials corresponding to the requirements of the position to be filled by Dr. Fuller, has been conducted by the university administration during the past nine months.

Dr. Fuller was graduated as a mechanical engineer from Cornell University, and he holds the degree of doctor of philosophy from Stanford University. He has had an extensive engineering service with leading cor-

porations engaged in the manufacture of electrical apparatus, and with well-known telegraph and radio corporations. He is at present vice-president of the Federal Telegraph Company with headquarters in Palo Alto. He is engaged in directing the development of the technical and economic features of improved plans for conducting short-wave radio communication between stations separated by great distances.

The appointment of Prof. Fuller is one of several steps recently taken by the University to carry out the plan of reorganizing the administration of the engineering colleges, as approved by the Regents of the University at their stated meeting in May.

PAVING LEVY SYSTEM IN OAKLAND TO CHANGE

Walter N. Frickstad, city engineer of Oakland, has advised the city council that he will put into effect a new method in levying assessments for paving or similar work.

Frickstad explained that paving has become expensive, through the restriction of competition, royalty paving and construction of unnecessarily expensive types of pavement. Much property has been confiscated because of high assessments.

Up to this time, corner lots have been assessed for full frontage on both streets. Hereafter the rate will be levied only on the side of the residence, Frickstad declared.

Relief for the corner lot brings assessments below the point of confiscation and will tend to increase assessments against interior lots. Out of plain justice, the dues of one group should not be allowed to confiscate the property of others.

COMING HALF-YEAR PROMISES "GREAT RESULTS"—HOOVER

President Hoover announces that public works construction during the first six months of the year totaled \$1,700,000,000, exceeding by over \$200,000,000 the boom year of 1929.

In a radio address from the White House study to the governors' conference at Salt Lake City on June 30, the chief executive said the second half of the year "promises even greater results" and asserted the "splendid endowment of our country of fortitude, courage, boundless energy and resources, together with the unity of effort is the guarantee of recuperation."

"To definitely organize so as to prevent the activity in public works from receding like other activities in depression, and to speed them up in anticipation of future needs so as to alleviate unemployment in such a time is a new experiment in the economic life of the first importance," Mr. Hoover said in thanking the governors for their co-operation following the stock market depression of last fall.

RAGNER MONSON BANKRUPT

Ragner Monson, San Francisco builder, has filed a voluntary schedule in bankruptcy in the Federal Court placing his debts at \$208,913. Assets are set at \$377,000, of which \$299,000 is said to be in real estate. Principal secured creditor is the Western Building and Loan Company, 1920 Broadway, Oakland, with a \$121,150 claim.

PORTLAND LICENSE ORDINANCE AT STANDSTILL

Portland's building contractors' licensing ordinance is still in practical suspension and there is at present no indication that the proposed new ordinance, modeled after the California state license law, will be adopted for some time to come. As the situation now stands anyone who applies to the city license bureau for a contractor's license can have it without examination or meeting any qualification requirements other than the payment of a \$10 fee.

The virtual suspension was caused by a considerable amount of dissatisfaction on the part of contractors with the operation of a classification section inserted by a revision of the ordinance and with a bond requirement section. The council repealed both the classification and bonding sections and the entire examining board resigned.

A new contractors' ordinance was drawn up by a committee of builders and later, at the suggestion of the chief of the city bureau of licenses, remodeled in line with the California law. This seems to be fairly satisfactory to all but one group of contractors. They and the author of the latest draft have been told to get together by the commissioner of public works, who says hat nothing will be done with the ordinance until they come back with an agreement.

BULLARD-DAVIS ORGANIZES SUBSIDIARY COMPANY

Bullard-Davis, Inc. (Del.) a subsidiary of Davis Emergency Equipment Co., 67 Wall St., New York City, manufacturers and distributors of first aid and safety equipment, announce the formation of a wholly-owned subsidiary company: Davis Emergency Company, Ltd., 1268 Mission St., San Francisco.

This office will be under the management of Herbert Brendlen.

This company is the exclusive Western representative for the sale of first aid kits and supplies, gas protection equipment, linemen's safety equipment and trouble finders, which are manufactured by the Davis Emergency Equipment Company, Inc.

The California company will also act as representatives for the following products sold by Bullard-Davis, Inc. (Del.) Miscellaneous safety equipment, safety clothing and safety shoes.

The former representative in the 11 Western states, was the separate corporation of Bullard-Davis, Inc., of California.

Neither the E. D. Bullard Company, successor to Bullard-Davis, Inc., of California, nor Mr. E. W. Bullard are new in any way connected with the long established Bullard-Davis, Inc. (Del.) and the Davis Emergency Equipment Company, Inc.

CERAMIC GLAZING SUBJECT TO TESTS

Greater durability of ceramic glazes may result from recent tests made at the Bureau of Standards, according to a statement issued by the Department of Commerce. The test was developed for the purpose of comparing the strains existing between glazes or other ceramic finishes and the bodies to which they are applied, according to the statement, which follows in full text:

A new test has been developed by the Bureau of Standards for comparing the strains existing between different glazes or other ceramic finishes and the bodies to which they are applied. By its use these strains may be so adjusted that the finishes will be in sufficient compression to prevent crazing from subsequent expansion of

the body without causing initial slivering.

The new test is particularly valuable because the measurements are made on combinations of glaze and body prepared and treated almost exactly like those intended for regular use and because of the simplicity and cheapness of the apparatus required. A modification of the test provides a comparison of the moisture expansions of different bodies.

FIVE-DAY WEEK SATISFACTORY AT SACRAMENTO

"Apparently the five-day week in Sacramento is working out with little or no friction," says L. S. Patterson, Secretary of the Sacramento Builders' Exchange. "Practically all building trades mechanics have been idle the past three Saturdays and to date there has been no serious objections from the contractors. In several instances it has been necessary to carry on emergency work or to clean up work started before the five-day week became effective. In each case permission to work has been granted."

BUILDERS ORGANIZE AT SAN LUIS OBISPO

Twenty-one representatives of the construction industry attended a meeting in San Luis Obispo County last week and formed the San Luis Obispo County Builders' Exchange. During the business session K. J. Hanak, secretary, was authorized to canvass the county for new members and to explain the purposes and aims of the builders' exchange to those who affiliate.

2630 CORPORATIONS IN STATE LOSE BUSINESS RIGHTS

Approximately 2600 California corporations forfeited their right to do business in this state when Secretary of State Frank C. Jordan struck their names from the state rolls.

Non-payment of state taxes was the reason for their losing their franchises. They were delinquent in payment of the 4 per cent net income tax levied on banks and corporations.

The total delinquencies do not amount to more than \$100,000, records of the companies showed, with most of them relatively small concerns.

MONTEREY PRESIDIO WILL GET NEW CONSTRUCTION

Keeping pace with the general building activity on the peninsula, the United States Government is preparing to spend approximately \$180,000 for new construction at the Monterey Presidio.

By this expenditure the government hopes to prepare the military reservation for concentration of all summer training camps at the Presidio.

Colonel J. L. Topham, post quartermaster, announces that a \$20,000 contract for erection of a unit of six latrines and one small latrine has been awarded to S. H. Hooke. Work will get under way immediately.

At the same time Colonel Topham announced that contracts totaling \$25,000 had been awarded to the Pacific Gas & Electric Company for the installation of mains, and to the Arrowsmith Company of San Francisco for installation of gas heaters and appliances.

On June 25 bids were opened for the erection of two cavalry stables to cost \$20,000.

STEEL REINFORCING BARS UP FOR SIMPLIFICATION

A proposal to revise the simplified practice recommendation on Steel Reinforcing Bars is now before the manufacturers, distributors, and users of this product for their consideration and signed acceptance, according to an announcement just made public by the Division of Simplified Practice of the Bureau of Standards, Department of Commerce.

The original recommendation, adopted by all interests, effected a reduction in the number of cross-sectional areas of reinforcing bars from 32 to 11. The equivalent cross-sectional area for each of the 11 sizes retained was expressed to three decimal places.

The revision, proposed by the standing committee of the industry, will limit the equivalent cross-sectional areas of the bars to two decimal places.

This modification was recommended as a means of further simplifying the work of engineering design where reinforced concrete is used and if accepted by the industry will be effective September 2, 1930.

FORTLAND ARCHITECTS AWARD-ED POSTOFFICE PROJECT

Morris H. Whitehouse and Associates, architects of Portland, Ore., have been commissioned to proceed with working plans for the proposed new postoffice and federal courts building to be erected at Portland, according to word from Washington, D. C. The cost of the proposed structure is set at \$1,237,500. The building will cover a ground area of 116,000 square feet and will house the postoffice, federal court chambers and other important branches of the Federal Government.

JOINS ASSOCIATION

Union Supply Company of Monterey has been admitted to membership in the Associated Leaders of Lumber and Fuel Dealers of America, it is announced by H. A. Hansen, manager of the Monterey Concern. The Union Supply Company now will have all merchandise bonded at to correct count, grade and weight. They will also be able to offer complete financing of home building and remodeling.

DIAMOND MATCH COMPANY IS TO REORGANIZE

According to word from New York, directors of the Diamond Match Company have determined to proceed with the preparation of a plan for reorganization and recapitalization of the company. President Fairbairn announced. He said it is expected the plan, which the board is convinced will benefit stockholders, will be submitted to the stockholders during the latter part of the summer.

PROTEST CONTRACT AWARD

Protests against the award of contracts for city supplies to Los Angeles firms, in direct competition with San Francisco firms, are on file with the Supplies Committee of the Board of Supervisors.

Frank Brown, business agent of the Molders' Union, told the committee that the city water department had recommended the acceptance of the bid of a Los Angeles firm to supply \$20,000 worth of pumps for the wells now being sunk in the Sunset District.

The committee took the matter under advisement.

GENERAL ELECTRIC COMPANY OFFERS UNEMPLOYMENT INSURANCE

General Electric Co. has just offered an unemployment insurance plan for its employees which is available to any of the company's works upon affirmative vote of 60% of the eligible employees. The plan is contributory—the company and workers sharing cost equally. Employees contribute 1% of their earnings so long as they are making 50% or more of average full-time earnings. Payments to contributing employees temporarily laid off, will be 50% of their average full-time earnings; or, if they are working part time, the difference between actual earnings and 50% of average full-time wages. Maximum payment is \$20 per week for not more than 10 weeks in any consecutive 52.

If payments from the fund should rise to 100% or more of normal receipts all employees of the works, and the general and district commercial men, general manufacturing, engineering, and administrative employees will be required to contribute to the fund until the emergency is over. All employees of one year continuous service are eligible to participate.

The plan provides that 3% of the contributions paid into the fund will be available for relief of employees and former employees in need; up to 2% may be used for loans to participating employees; 70%, together with all emergency payments and interest

on funds, will be available for unemployment relief. The fund will be administered by a trust giving equal representation to the company and participating employees. General Electric guarantees 5% interest on funds, will pay administrative expenses the first two years.

Coincident with announcement of the plan, Gerard Swope, G. E.'s president, made public a set of regulations given to various works managers for the stabilization of activities and prevention of involuntary unemployment. When business is increasing administrative officers are directed: to increase working force slowly, but to use overtime before doing so; to transfer employees between departments to care for temporary emergencies; to postpone maintenance work as much as possible.

When work begins to fall off plant managers are directed: to cease hiring; to cut out overtime; to transfer employees between departments; to build for stock; to expedite maintenance and renewal work; to cut normal work-week down to 50% if necessary; to drop new employees with less than one year of service—single persons with no dependents—first, when other means fail; always to give at least one week's notice and to notify employees whether layoffs are temporary or permanent.

NEW TAX FORMULAS FOR ADJUSTING MOTOR VEHICLE RATES URGED BY ENGINEER

When you paid your last motor vehicle registration fees, did you stop to consider whether the amount was an equitable proportion of the total of taxes you paid for the use of the highways?

Charles F. Marvin, Jr., mechanical engineer of the U. S. Bureau of Standards, has worked out a simple method of distributing equitably the total motor-vehicle tax levy as determined by the State. Mr. Marvin's method apportions among the various classes of vehicles and among the units within a class tax payments corresponding as nearly as possible to the amount and character of the use of the public streets and highways by each vehicle. His system also includes a workable basis for levying fuel tax and registration fees. Results of his investigations are printed in the May issue of "Public Roads," the official research magazine of the Bureau of Public Roads, U. S. Department of Agriculture.

Mr. Marvin uses three formulas in which he substitutes certain values which have been arrived at after careful investigation of relative costs to the State resulting from operation of average vehicles of different gross weights and which allow for the relative economic and social desirability of the different weights of vehicles as units of transportation. The first formula is for the total of motor vehicle tax payments. Subtraction of the annual proceeds of the fuel tax gives the amount to be collected in registration fees.

The total tax on a vehicle, he holds, should depend on three major factors entering into the use of the highways—the weight imposed upon the road surface by the vehicle and its load, the number of miles it travels during the taxable period, and the type of

tire with which the vehicle is equipped. So important in the matter of taxation is the gross weight of the loaded vehicle that it is a primary factor in Mr. Marvin's formulas. His formulas provide a gradual and consistent variation in tax throughout the whole range of gross weights.

As the actual gross weight of a vehicle varies with the number of passengers or the quantity of goods carried and also depends on the character of the equipment and the amount of fuel, oil, and water in the tanks, it is necessary for the State to designate what the taxable gross weight of any given vehicle will be.

To distribute taxes fairly not only according to gross weight, but also according to miles traveled, it is most equitable Mr. Marvin believes, to collect as much of the tax as is reasonable in the form of a fuel tax.

Solid tires are considered more destructive to roads than pneumatics on a similar vehicle. Consequently, a somewhat higher tax for solid tires is justified, Mr. Marvin believes. These tires have little effect on fuel consumption and the difference must be made up in the registration fees. For registration fees he considers most equitable a formula which gives a gradually increasing difference in tax for the heavier vehicles, and suggests a higher value for the algebraic expression representing solid tires than for pneumatic.

According to the registration fee formula, the equation determines small fees for light cars, which are taxed equitably by the fuel tax alone, and is chiefly effective for the heavier trucks and busses for which the fuel tax is inadequate.

Mr. Marvin's method of tax distribution permits a wide range of tax schedules to take care of the various

classes of vehicles and is readily adaptable to the requirements of any State. The formulas may be modified to suit changing conditions, and without alteration of the basic method of rating vehicles or the system of collecting fees. He believes that for some years to come, the three factors—weight, miles traveled, and tire type—may be used as the basis for rating all vehicles and for determining fees in all States. However, it will not be reasonable to use the same amounts or ranges of fees everywhere and for all time. Costs of highway construction, the types of road, and the total mileage of roads, vary from State to State and from time to time.

In working out the formulas, Mr. Marvin has acted on the theory that an equitable tax system is one that will distribute the cost among the different vehicles in such a manner that each vehicle is assessed according to the justification for taxing it. He believes the greatest justification for taxing is to defray the expenses incurred by the State as the result of the operation of motor vehicles. The first approximation to an equitable system, he assumes, would be one which would tax each vehicle in proportion as that vehicle is responsible for these expenses.

Taxes should also be imposed, Mr. Marvin says, so that they will penalize, wherever possible, those vehicles which are inefficient in their use of the highway or of the Nation's fuel resources. In each State taxes should determine for itself how much it wishes to spend on highways and what percentage of this amount should be financed by motor vehicle taxes.

The fuel tax possesses several advantages over registration fees, chief of which is that it automatically taxes a vehicle directly in proportion to the number of miles traveled. It brings more revenue per mile from the heavy truck than it does from the light passenger car, and taxes the fully loaded vehicle more than the empty one. The vehicle that is overweight, overpowered, and which has an inefficient engine and improperly adjusted carburetor, or excessive friction in any of its parts, pays a higher tax per mile than the well-designed and well-cared for vehicle of the same capacity.

At present there is no generally accepted basis for determining the amounts of fees for the various classes of vehicles or for the units within a class. Neither is there any agreement as to how the total tax levied by a State should be apportioned between the fuel tax and registration fees. Each State has selected its own method of levying fees with the result that at the present time vehicles are rated variously according to chassis weight, unladen weight, capacity, gross weight, horse-power, piston displacement, value, tire width, or tire type, as well as on several different combinations of two or more of these characteristics. Some States rate passenger cars and trucks on the same basis. All States impose fuel taxes of from 2 to 6 cents a gallon, but there is no consistent relation between the amounts of the fuel taxes and the amounts of registration fees.

IN NEW QUARTERS

The Vibbs Company of California, manufacturer of paint spraying equipment, etc., with head office and factory at Toledo, Ohio, is occupying new quarters at 831 Howard Street, San Francisco. According to A. O. Narveson, Pacific Coast manager, the company outgrew its former location at 512 Mission Street, and floor space has been increased 100% by this removal. The concern is carrying a much larger stock, and all the Pacific Coast States are served from this Western branch.

 Architect—Irvine & Ebbets, Call
 Bldg., San Francisco.

BONDS

GILROY, Santa Clara Co., Cal.—
 Gilroy Grammar School District will
 call election at once to vote a direct
 tax to secure funds to finance re-
 modeling of Church Street School.

CALISTOGA, Napa Co., Cal.—
 Trustees of the Calistoga Grammar
 School District contemplate election
 to vote bonds to finance erection of
 a new school. Previous election was
 defeated by a slight majority.

AUBURN, Placer Co., Cal.—City
 defeats proposal to issue bonds of
 \$7000 to finance erection of a head-
 quarters building for the fire depart-
 ment and \$33,000 to finance erection
 of a city hall and memorial building.

LE GRAND, Merced Co., Cal.—Le
 Grand High School District defeats
 proposal to issue bonds of \$75,000 to fi-
 nance construction of an auditorium,
 gymnasium and shop building at the
 high school grounds.

MARYSVILLE, Yuba Co., Cal.—Lin-
 da School District defeats proposal to
 issue bonds of \$9500 to finance erec-
 tion of two-classroom addition to pres-
 ent school.

FRESNO, Fresno Co., Cal.—Orange
 Center School District defeats propo-
 sal to vote bonds of \$3500 to finance

repairs and wing addition to the
 present school.

CHURCHES

Plans Being Prepared.
CHURCH Cost, \$100,000
SACRAMENTO, Sacramento Co., Cal.
 39th and J Sts.
 Two-story brick church.
 Owner—Roman Catholic Bishop (St.
 Stephen's Parish).
 Architect—Harry Devine, California
 State Life Bldg., Sacramento.
 Bids will be taken in about 4 weeks.

Preparing Working Drawings.
CHURCH Cost, \$30,000
NORTH OAKLAND, Alameda Co.
 Two-story frame and brick veneer
 church (auditorium to seat 570).
 Owner—Colored Baptist Church.
 Architect—Chas. W. McCall, 1404
 Franklin St., Oakland.

Plans Being Prepared.
CHURCH Cost, \$—
MADERA, Madera Co., Cal.
 Church educational unit.
 Owner—First Baptist Church, Madera
 Architect—Geo E. Merrill (Denomina-
 tional Architect), New York City.
 New York.

FACTORIES AND WARE- HOUSES

Contract Awarded.
WAREHOUSE Cost, \$43,778
SAN JOSE, Santa Clara Co., Cal.
 Race St. and Moorepark Ave.
 One-story reinforced concrete ware-
 house.
 Owner—United States Products Corp.,
 Premises.
 Architect—Binder & Curtis, 35 W-
 San Carlos St., San Jose.
 Contractor—R O. Summers, 17 N-
 First St., San Jose.

Contract Awarded.
PACKING SHED Cost, \$8172
SALINAS, Monterey Co., Cal.
 One-story vegetable packing shed.
 Owner—Monterey County Ice & De-
 velopment Co., Salinas.
 Architect—None.
 Contractor—E. M. Britt and Angus
 L. Vitelle, Salinas.

A Demonstration of the SKILSAW PORTABLE ELEC- TRIC HAND SAW

Will solve your cutting problems.
 (Four Models, 1/2 to 1 h. p.)

 1267

Plans Being Completed.
PLANT Cost, 1st unit, \$50,000
SAN JOSE, Santa Clara Co., Cal.
 Berryessa Road (15-acre site).
 One and two-story reinforced con-
 crete meat packing plant.

Owner—Continental Packing Co., Ltd.
 (represented by W. H. Luhrback,
 and Geo. F. Cokely), 1217 Park
 Ave., San Jose.
 Architect—Lescher & Mahoney, Pho-
 nix, Arizona.

Bids will be taken in one week by
 owner.
 All communications should be ad-
 dressed P. O. Box 334, San Jose.

Reinforcing Steel Contract Awarded.
BUILDING Cost, \$25,000
SAN FRANCISCO. N Mission St. bet.
 Fifth and Sixth Sts.

Two-story reinforced concrete build-
 ing.
 Owner—Mrs. T. Lyons.
 Architect—G. F. Ashley, 525 Market
 Street.
 Contractor—G. P. W. Jensen, 320 Mar-
 ket St.

Reinforcing Steel—W. C. Hauck Co.,
 289 San Bruno Ave.

As previously reported, excavation

awarded to Sibley Grading & Teaming

Co., 165 Landers St.

MODESTO, Stanislaus Co., Calif.—
 Until July 9, 7:30 P. M., bids will be
 received by H. E. Gragg, city clerk, to
 construct pump station. Certified
 check 10% payable to Mayor required
 with bid. Plans obtainable from Frank
 Rossi, city engineer.

Preparing Plans.
WAREHOUSE Cost, \$70,000
SAN PEDRO, Los Angeles Co., Cal.
 Ocean and Seaside Aves.
 Four-story reinforced concrete Class
 A warehouse (100x100 feet).

Owner—Crescent Wharf & Ware-
 house Co., Berth No. 233, San
 Pedro.
 Architect—J. C. Longueville, 1616
 Chelsea Road, San Marino.

Electrical Contract Awarded
MFG. PLANT Cost, \$35,000
SAN FRANCISCO. S Harrison St. W
 First St.

Two-story reinforced concrete manu-
 facturing plant.
 Owner and Builder—James Hjul, 128
 Russ St.

Plans by Owner.
 Lessee—Dalmo Mfg. Co., 449 Bryant
 Street
 Electric Work—Coney & Kuchel Elec.
 Works, 454 5th St.

As previously reported, plumbing
 awarded to Rodoni-Becker Co., 455
 10th St.

Contracts Awarded
CHEMICAL PLANT Cost, \$5,000,000
NICHOLS, Contra Costa Co., Cal.
 Near Pittsburg on 613 acre site.
 Chemical plant (comprising group of
 fireproof structures).

Owner—Shell Chemical Co. (subsidiary
 company of Shell Oil Co., San
 Francisco).

Architect—Eng. Dept. of Owner, Shell
 Oil Bldg., San Francisco.
 Contractor—George Wagner, Inc., 181
 South Park, San Francisco.

Electric Work—O. H. Armstrong Co.,
 2850 Howard St., San Francisco.

Contracts awarded on a portion of
 the work only.

Sub-Contracts Awarded
FACTORY Cost, \$80,000
BERKELEY, Alameda Co., Cal. No. 735 Zrayson Street.

Alterations to Class A factory.
 Owner—Philadelphia Quartz Co., Sixth and Grayson Sts., Berkeley.

Plans by Owner.
 Contractor—W. E. Lyon, 354 Hobart St., Oakland.

Concrete Materials—Contra Costa Building Material Co., 808 Gilman St., Berkeley.

Corrugated Asbestos Roofing—Johns-Manville Sales Corp., 159 New Montgomery St., San Francisco.

Structural Steel—Moore Drydock Co., Balfour Bldg., San Francisco.

Reinforcing Steel—McGrath Steel Co., 250 San Bruno Ave., San Francisco.

Sub-bids are wanted on glass and brick work.

OAKLAND, Calif.—Kenyon Electric Co., 626 13th St., at \$5,000 awarded contract by City of Oakland Port Commission, 424 Oakland Bank Bldg., for electric wiring for light and power at 9th Ave. Pier.

Low Bidder On Concrete Pile Driving.
INDUSTRIAL BLDG. Cost, \$—
SAN FRANCISCO. SE Russ St. and Howard St.

Three-story reinforced concrete industrial building.
 Owner—Eng-Skell Co., 208 Mission St.
 Engineer—A. C. Grewank, 208 Mission Street.

Low Bidder—M. B. McGowan, 74 New Montgomery St.

Work is being done by day's labor on 1-story wood and tile shed, 4,000 feet square. Roofing bids will be taken shortly.

WAREHOUSE Cost, \$45,000
 including equipment
LIVE OAK, Sutter Co., Cal.
 Fireproof warehouse and processing plant.

Owner—Walnut Growers Assn., N. F. Todd, President, Live Oak.
 Architect—Albert C. Martin, Higgins Bldg., Los Angeles.

Work will be started in about thirty days

Plans Being Figured—Bids Close July 15.

WAREHOUSE Cost, \$65,000
FRESNO, Fresno Co., Cal. R and Inyo Streets.

Two-story and basement brick distributing plant and warehouse, (100x150 feet).

Owner—United Grocers Inc. (J. B. Rhodes, Mgr.), Fresno.

Architect—Swartz & Ryland, Brix Bldg., Fresno.

Contract Awarded.
CLEANING WORKS Cost, \$3500
 (Machinery) \$5000

SAN JOSE, Santa Clara Co., Cal.
 One-story cleaning and dyeing works.
 Owner—De Luxe Dyeing & Cleaning Works, L. Seeliger, Prop.

Architect—None.

Contractor—A. M. Jensen, Los Gatos

Sheet Metal and Ventilating—Fred Berryman.

Preparing Working Drawings.

CREAMERY Cost, \$—
SAN FRANCISCO Eighteenth and York Sts. (137-62x200 ft.)

Two-story and basement Class B concrete creamery (foundations laid for two additional stories to be added later).

Owner—Challenge Creamery & Butter Assn., 807 Montgomery St., San Francisco.

Architect—Dodge Riedy, Pacific Bldg., San Francisco.

Bids will be taken in three or four weeks.

Completing Plans.
FACTORY Cost, \$25,000
OAKLAND, Alameda Co., Cal. 46th and Telegraph Aves.

Two-story reinforced concrete factory and warehouse.

Owner—Margaret Burnham Candy Co., 3800 Piedmont Ave., Oakland.

Plans by George Koster, 2355 Leavenworth St., San Francisco.

Bids will be taken in 17 days.

Plans To Be Prepared.
PLANT Cost, 1st unit, \$50,000

SAN JOSE, Santa Clara Co., Cal. Berryessa Road (15-acre site).

Meat packing plant (reinforced concrete construction).

Owner—Continental Packing Co., Ltd., (represented by W. H. Luhrback, and Geo. F. Cokely, San Jose).

Architect—Not Given.

More definite information will be given shortly.

GARAGES AND SERVICE STATIONS

Sub-Contracts Awarded.
GARAGE Cost, \$31,900

WATSONVILLE, Santa Cruz Co., Cal.
 One-story concrete garage.

Owner—W. W. Bendell, 213 Main St., Watsonville.

Architect—A. W. Story, Pajaro Valley Bank Bldg., Watsonville.

Contractor—F. T. Willstrom, Watsonville.

Reinforcing Steel—Soule Steel Co., Rio-alto Bldg., San Francisco.

Plumbing, Sheet Metal and Roofing—P. J. Freiermuth Co., Watsonville.

Painting—Jack Seekins, Watsonville.

Plastering—Robert Orr, Watsonville.

Glass—Central Hardware & Glass Co., 613 4th St., San Francisco.

Electric Wiring—Justrite Elec. Co., Watsonville.

Steel Rolling Doors—Kennerson Mfg. Co., 361 Brannan St., San Francisco.

Steel Sash—Fenster Window Co., Hunter-Dulin Bldg., San Francisco

Plans To Be Prepared.
GARAGE Cost, \$70,000

SACRAMENTO, Sacramento Co., Cal.
 Ninth St. bet. H and I Sts.

Fireproof garage and service station.

Owner—Austin J. Brennan, Goldfield, Nevada.

Architect—Selected.

Agents—Guer & Harrigan, 900 7th St., Sacramento.

More definite information will be given within a few days

Plans Completed.
GARAGE Cost, \$33,000

OAKLAND, Alameda Co., Cal. 26th and Webster Sts.

Two-story reinforced concrete garage and salesroom (100x200 ft.)

Owner—Fred E. Reed, Inc.

Architect—Reed & Corlett, Oakland Bank Bldg., Oakland.

Bids will be called for as soon as financing arrangements are completed

Construction To Start Soon.
GARAGE Cost, \$70,000

SACRAMENTO, Sacramento Co., Cal.
 9th St. bet. H and I Sts.

One-story brick garage and service station.

Owner—Austin J. Brennan, Goldfield, Nevada.

Plans by Mr. Look, Sacramento.

Contractor—Mr. Rae, premises.

GOVERNMENT WORK AND SUPPLIES

HAWTHORNE, Nevada.—National Electrical Supply Co., Washington, D. C., at \$2,784 (Item 2x) awarded contract by Bureau of Yards and Docks, Navy 11-partment, to furnish and install refrigerators and machines at the Naval Ammunition Depot, Hawthorne, Nev. Smoot-Holman Co., Inglewood, Calif., at \$1,140 awarded contract for show cases in connection with same project. Work provided for under Spec. No. 6146.

WASHINGTON, D. C.—Bids are being received by Bureau of Supplies and Accounts, Navy Department, Washington, D. C., to furnish and deliver miscellaneous supplies and equipment as noted in the following schedules, further information being available from the Navy Department Officer, 100 Harrison St., San Francisco:

Bids Open July 8

Western yards, steel and iron, sch. 3655.

Western Yards, rubber hose and washers, sch. 3654.

Mare Island, 1 motor-driven plate banding roll, sch. 3669.

Bids Open July 15

Mare Island, 400,000 lbs. white lead, sch. 3662.

Mare Island, 3300 lbs. copper tubing, sch. 3695.

Mare Island, 7000 lbs. dry cuprous oxide, sch. 3664.

Boston, Brooklyn and Mare Island, 8 motor-driven vegetable peeling machines and spares, sch. 3667.

Mare Island, 6 laundry washing machines, sch. 3681.

Puget Sound, 1 joggling hydraulic press, 1 do, sch. 3682.

Western yards, sheet rolled zinc, sch. 3674.

Western yards, tungsten and high speed steel hacksaw blades, sch. 3657.

Mare Island, 1 air motor-driven timber sawing machine, sch. 3678.

Bids Open July 18

Fuel oil for U. S. Navy reserve storage, navy yard, Pearl Harbor, T I., sch. 3700.

Bids Open July 22

Mare Island, 15,000 lbs. rolled manganese nickel, sch. 3707.

PRESCOTT, Arizona.—Following is a partial list of prospective bidders to erect postoffice, bids for which will be opened July 14 by Supervising Architect, Treasury Department, Washington, D. C.:

James T. Taylor, 1st National Bank Bldg., Ft. Worth, Texas.

English Const. Co., 1311 H Street, N. W., Washington.

Chas. Tottis, Prescott, Ariz.

Devault & Delitrick, Inc., Massillon Road, Canton, Ohio.

Walter Petersen, Wilkinson Bldg., Omaha, Nebr.

Yeager & Sons, Danville, Va.

E. Kahler (1) \$1460; (2) \$1240.

R. P. Paoli (1) \$1490; (2) \$639.

Piedmont Pacific Painting & Decorating Co. (1) \$1498; (2) \$897.

D. Krueger & Epstein (1) \$1550; (2) \$940.

D. E. Burgess (1) \$1564; (2) \$774.

Joel Johnson (1) \$3500; (2) \$1850.

SAN FRANCISCO — Automatic Sprinkler Corp. of America, 513 California Street, at \$1162 submitted lowest bid to Constructing Quartermaster, First Mason, for automatic sprinkler system, to be installed in Film Vault Bldg. No. 27, at Letterman General Hospital.

Following is a complete list of bids:
Automatic Sprinkler Corp. \$1162
Globe Automatic Sprinkler Co. 1210
Fred W. Snook 1330
P. L. Burr 1398
Bids held under advisement.

SACRAMENTO, Cal.—Until July 8, 3 P. M., under Order No. 2132, bids will be received by U. S. Engineer Office, California Fruit Bldg., to furnish and deliver 137 tons of steel sheet piling (cut to 10-ft. lengths). Material will be used for driving a wall approximately 1,300-ft. long and 10-ft. deep. Further information obtainable from above.

SAN FRANCISCO.—Until July 7, 2 P. M., bids will be received by U. S. Forest Service, Ferry Bldg., to furnish and deliver two light auto delivery and three 1½-ton trucks. Further information obtainable from above.

SACRAMENTO, Cal.—Until July 9, 3 P. M., under Order No. 2143, bids will be received by U. S. Engineer Office, California Fruit Bldg., to furnish and deliver powder suitable for blasting in water, together with tape, explosives and blasting caps. Further information obtainable from above.

SACRAMENTO, Cal.—Until July 7, 3 P. M., under Order No. 2131, bids will be received by U. S. Engineer Office, California Fruit Bldg., for hire of sternwheel towboat and hire of barge for a period of 60 days for work in the Sacramento river between Sacramento and Colusa.

SAN FRANCISCO—Malott & Petersen, 3221 20th St., at \$554 awarded contract by Constructing Quartermaster, Fort Mason, for magnesite flooring for general mess hall No. 10 at Letterman General Hospital.

SAN FRANCISCO—Jones Bros. Asbestos Roof Co., 370 2nd St., at \$345 awarded contract by Constructing Quartermaster, Fort Mason, for asbestos roofing for building No. 38 at Letterman General Hospital.

HAWTHORNE, Nevada —Until July 2, under Specification No. 6162, bids will be received by Bureau of Yards and Docks, Navy Department, Washington, D. C., to install fire alarm system consisting of call boxes, accessory equipment and wiring at Naval Ammunition Depot, Hawthorne, Nevada, Naval Ammunition Depot. Deposit of \$10 required for plans obtainable from above.

STOCKTON, San Joaquin Co., Cal.—Until August 26, 3 P. M., bids will be received by U. S. Engineer Office, California Fruit Bldg., Sacramento, to construct certain levees or embankments by dragline excavators, along the San Joaquin River, at and below Stockton, in connection with the San Joaquin River and Stockton Channel project. This work under Circular Proposal No. 30-272, Specifications 1670. Deposit of \$3.50 required for plans obtainable from above office.

STOCKTON, San Joaquin Co., Cal.—Until August 26, 3 P. M., bids will be received by U. S. Engineer Office, California Fruit Bldg., Sacramento, under Circular Proposal No. 30-270, Specifications No. 1668, to construct certain levees or embankments by clamshell dredges along the San Joaquin River, below Stockton, in connection with the construction of the San Joaquin River and Stockton Channel project. Specifications obtainable from above office on deposit of \$3.50, returnable.

SAUSALITO, Marin Co., Cal.—Constructing Quartermaster, Fort Mason, San Francisco, is preparing plans for installation of approximately 7000 ft. of gas mains between Sausalito and Fort Baker.

SAN FRANCISCO—Malott & Petersen, 3221 20th St., at \$554 submitted lowest bid to Constructing Quartermaster, Fort Mason, for magnesite flooring for general mess hall No. 10, at Letterman General Hospital.

Following is a complete list of bids: Malott & Petersen, \$554; Fibrestone

Roofing Co., \$690; Marosky Co., \$758; Fred P. Oelerich, \$1,089; Sinclair Mfg. Co., \$1,122. Bids held under advisement.

Owner.—Interstate Recreation Corp., Ltd., J. E. Munjar, Phelan Bldg., San Francisco, president.

Architect.—Joseph L. Stewart, Federal Reserve Bank Bldg., San Francisco.

Bids will be taken in about 2 weeks.

SACRAMENTO, Cal.—Veterans Affiliated Council has petitioned the county supervisors to erect a veterans' building at a cost of \$450,000 under a 5-year tax program. The necessary funds could be raised by a tax rate of 3 mills on each dollar of the annual assessed valuation, according to the committee's plan. The county's assessed property valuation each year amounts to \$450,000,000 and the sum for veteran buildings would be \$90,000 a year. An additional tax levy of one-eighth mill to secure an annual maintenance fund of \$18,750 is also proposed.

An advisory committee from the veterans' organizations would act to supervise construction, the plan states. The Sacramento structure would house all veteran bodies, as well as an auditorium, banquet room and clubrooms.

Bids To Be Taken Within One Week.

GYMNASIUM Cost, \$35,000 VALLEJO, Solano Co., Cal. York and Santa Clara Sts.

One-story gymnasium (type of construction not decided (30x56-ft.))

OAKLAND, Cal. — Until July 7, 4:30 P. M., bids will be received by G. B. Hegardt, Secretary, City Port Commission, 424 Oakland Bank Bldg., to furnish and install complete automatic sprinkler system, fire hose piping and domestic water piping in Transit Shed No. 1, Brooklyn Basin, foot of Ninth Ave. Certified check 10% required with bid. Plans obtainable from secretary on deposit of \$5, returnable. Bond in full amount of contract price required of the successful bidder.

HUNTINGTON BEACH, Cal.—Merritt-Chapman & Scott Corp., 720 Wilmington Ave., San Pedro, (S. P. 2880) was awarded contract by city council June 27, at \$110,991 for (1) constructing an extension to the present pier. The extension will be 500 feet in length by 25 ft. wide, of reinforced concrete construction with concrete piling. The repairs will be of concrete with necessary piling, and a Gunite coating 1½-in. thick over practically the entire existing portion of the pier.

Contract Awarded.

TRANSIT SHED Cost, price, \$104,715
OAKLAND, Alameda Co., Cal. Outer Harbor.
 400 ft. extension to terminal wharf.
 Owner—City of Oakland Port Commission, G. B. Hegardt, secretary 424 Oakland Bank Bldg., Oakland.
 Plans by Eng. Dept. of Owner.
 Contractor—Schuler & McDonald, 9th Ave. Pier, Oakland.

MISCELLANEOUS CONSTRUCTION

SAN FRANCISCO, Cal. — Until July 10, 5 P. M., bids will be received by H. G. Denton, city clerk, for
 (1) Construct comfort station in McKinley Park and
 (2) Construct comfort station in William Curtis Park.

Dean & Dean, California State Life Bldg., Sacramento, architects.
 Bond of 50% of the contract price required of the successful bidder.
 Plans on file in office of clerk.

Contract Awarded.

AMUSEMENT BLDG. Cost, \$6000
SAN JOSE, Santa Clara Co., Cal. Humboldt St. near Sixth St.
 Wood amusement building.
 Owner—San Jose Tennis Club
 Architect—Blinder & Curtis, 35 N. San Carlos St., San Jose.
 Contractor—B. H. Painter, Gordon Ave., San Jose.

AVON, Contra Costa Co., Cal.—Chicago Bridge & Iron Works, Rialto Bldg., San Francisco, awarded contract by Associated Oil Co. to furnish and install 1500-gal. oil storage tank.

Western Pipe & Steel Co., 444 Market St., San Francisco, awarded contract to furnish and install four 1000-gal. and six 500-gal. tanks.
 The tanks will be installed in Tract No. 3 at Avon. The total cost of construction is placed at \$50,000.

SAN FRANCISCO—McGee Sales Agency, 75 Fremont St. at \$550 awarded contract by Board of Fire Commissioners to raze side and front walls of Boilers 7 and 8 of Pumping Station No. 1 and the installation of plibrico jointless fire brick or equal.

Metal Partition Contract Awarded.
FIELD HOUSE Cont. price, \$64,126
SAN FRANCISCO, Portola Playground
 Pelton and Hamilton Sts.

One-story playground field house (steel frame, wood and plaster construction).
 Owner—City and County of San Francisco (Playground Commission).
 Architect—Gardner Dailey, Room 610, 425 Mason St.

Contractor—Jacks and Irvine, 74 New Montgomery St.
Metal Partitions—Price Building Specialty Co., 683 Howard St.
 As previously reported, structural steel awarded to Judson Pacific Co., 609 Mission St.

Other awards will be made shortly.

OAKLAND, Cal.—Until July 3, 12 noon, new bids will be received by Frank C. Merritt, city clerk, to furnish and deliver stone, stone chips and rock screenings for various Municipal Departments for fiscal year. Bids received for these materials on June 12 were rejected as being too high. Specifications on file in office of the city clerk.

Plans Being Completed.

LAVATORIES Cost, \$6000
SACRAMENTO, Sacramento Co., Cal. McKinley Park, Wm. Land Park, and City Plaza.

Three one-story frame lavatories
 Owner—City of Sacramento.
 Architect—Chas. F. Dean (formerly of Dean & Dean), California State Life Bldg., Sacramento.

Bids will be called for shortly.

SACRAMENTO, Cal.—Following bids received by State Dept. of Architecture for constructing cattle corral at the State Fair Grounds. Plans prepared by Geo. B. McDougall, State Architect, Public Works Building, Sacramento:
 Guth & Fox, 1516 27th St., Sacra-

mento	\$4,566
T. B. Hunt, Sacramento	4,988
G. W. Kopp, Sacramento	5,238
Wm. Murrell, Sacramento	5,294
M. R. Petersen, Sacramento	5,570
P. F. Bender, Sacramento	5,685
C. J. Hopkinson, Sacramento	5,588

Bids held under advisement.

DELANO, Kern Co., Cal.—Until July 8, S. P. M. bids will be received by Frank Pancer, clerk, Delano Joint Union High School District, to furnish and install lawn sprinkler system at high school. Specifications obtainable from George R. Scott at high school.

GROSVILLE, Butte Co., Cal.—County supervisors reject bids to furnish 30,000 tons of crushed rock and sand for use in connection with highway improvements. The material will be purchased in the open market as required by J. A. Bumgarner, county engineer.

BUSINESS OPPORTUNITIES

SAN FRANCISCO—Names and addresses of the individuals or firms concerned in these opportunities will be furnished on request to the Business Opportunity Department of Daily Pacific Builder, 545-547 Mission Street.

20250.—Tent Pegs, San Francisco. Partly is inquiring for the names of importers of tent pegs.

20253.—Representative, Bressoux lez Liege, Belgium. Manufacturers of mining equipment desire an agent in San Francisco.

20262.—Tile, Valencia, Spain. Manufacturer of Manises tiles wishes a local agent.

LOS ANGELES, Cal.—D. F. Fearling, 2001 Veteran Ave., Los Angeles, desires to contact firm wishing representation in Southern California of any staple line, builders' hardware or automotive specialties preferred.

AERIAL TRAMWAYS TO BE MARKETED HERE

The recent appointment of the American Steel & Wire Company as sole licensees of the Bilechert-Zuegg Systems for the marketing of aerial tramways for passenger transportation provides for the first time for the development of construction projects of this nature in America. General contractors therefore may be called upon to bid on this type of construction in a number of scenic resorts in the mountains of the West.

The American Steel & Wire Company as a subsidiary of the United States Steel Corporation is engaged in activity for developing this tramway system and has prepared literature for its promotion.

EIGHT FACTORS COVER QUALITY IN BUILDING

"Conditions in the building industry which have reduced an important business to a mere price-cutting orgy, too often preventing reliable contractors from any proper consideration, may be reduced to eight factors, all more or less interlacing," states the Master Builders' Association of Boston. "These factors, and their pernicious effect, are not occasional influences, but are badly affecting a very large majority of public work as let by Federal, State or municipal authorities, and are extending more and more into so-called private work.

"The results of improper building construction are a rapid depreciation, an abnormally large upkeep cost, and a lack of satisfaction on the part of the owners. The effect upon the community is felt in taxes necessary to provide these continuing costs which are larger than necessary, and in rentals, which must be higher for

the same reasons. A Federal commission, a part of the Department of Commerce Committee on Waste in Industry, recently reported strongly against the very widespread lack of proper quality in building construction.

"The eight factors to which most of the low quality in building is attributable follow, the first being the outstanding factor, while the others are contributing factors:

"1. The use of contractors who by reason of inexperience, inadequate finances or improper business methods are unreliable.

"2. Belief that architects can control the quality of result regardless of the contractor.

"3. Belief that contract documents can protect the owner and assure a proper result.

"4. Belief that the contract bond affords a protection to the owner.

"5. Dependence upon lien laws which tend to enable irresponsible contractors to obtain business credit.

"6. Tendency of dealers in material to extend business credits unduly in order to increase sales.

"7. Improper practices of both general and sub-contractors, including 'shopping bids' and withholding payments, by general contractors to sub-contractors.

"8. Improper materials and workmanship."

ARIZONA LUMBER INDUSTRY

At the 13th annual meeting of the Lumbermen's Club of Arizona, John A. Johnson of Phoenix, gave some interesting figures on the lumber industry in that state.

Johnson said that the yearly cut of Arizona mills averages about 160 million feet, with approximate value of \$500,000,000. The annual expenditures of the milling companies is about \$4,300,000. The state has about 12 billion feet of standing timber under government control, with five billion feet of it held by the Indian Bureau. On 46,000 acres the state of Arizona owns 230 million feet, giving a gross of about 13 billion feet. There are 26 mills in Arizona, with 95 per cent of the cut coming from four large mills at Williams, Flagstaff, Standard and McNary. These larger mills represent an investment of about \$100,000,000, and employ close to 3,000 men. They operate 170 miles of railroad, with 17 locomotives and about 300 logging cars. About \$400,000 a year is paid for timber purchases from the state and government and about \$100,000 in taxes. Approximately 60 per cent of the total output of Arizona mills is shipped out of the state.

The general session of the 53rd annual convention of the National Electric Light Association will close in San Francisco today. Thousands of delegates are present representing every phase of the electric industry. A total of around \$120,000,000 invested in public utilities throughout the country is represented here by noted engineers and technicians, prominent utility and manufacturing company executives and other nationally known figures.

Perhaps the easiest way to measure the importance of electric energy to industry is to try to visualize, were it possible, what chaos would confront us if the use of this great force was suddenly denied us. A hint of what the consequences would be can be had on those rare occasions when "the power's off" with everything motionless and the progress of all business slackened immeasurably. It is equally impossible to appraise the contribution to business and society that is constantly being made by those of the

electric profession. It has taken less than fifty years to produce what we have today and with that short period of time as a back sight it would require a colossal ego to forecast developments during the next half century. So it is to such groups as the National Electric Light Association the Daily Pacific Builder bids a sad adieu.

PRENTICE CONSTRUCTION COMPANY IN NEW QUARTERS

Prentice Construction Co., formerly located at 2063 Webster street, Oakland, has moved to larger quarters at 4055 San Pablo Ave., Oakland.

The Prentice Company entered the general contracting business last February and due to a steady trend of business was forced to secure larger office and storage quarters. The new location affords adequate warehouse facilities for materials and equipment and is served by a spur track.

George D. Prentice is general manager of the company which is now handling all types of general construction including steel frame, concrete and wood construction.

METALS UNDER REPEATED STRESS STUDIED

Bulletin No. 208 of the Engineering Experiment Station of the University of Illinois records the results of a study of the development of slip lines, strain lines, and cracks in metal subjected to repeated stress. The metals studied were Armco iron, 0.20 carbon steel, chrome-nickel steel, stainless iron, brass, monel metal, and duralumin. Fatigue tests were carried out using rotating-beam specimens. Each specimen had two turned down sections, each subjected to the same range of stress. When one side broke the other, although unbroken, evidently had been subjected to repeated stress sufficiently high to cause structural damage, to which the name "fatigue damage" was given. The unbroken part of the specimen presumably was fatigue damaged along part of its length, but for the portion not turned down was undamaged. By turning down part of the undamaged portion of the specimen to the size of the fatigue-damaged portion there was formed a tension (or torsion) specimen. Thus it was possible to study the behavior under various tests of the same metal with and without fatigue damage.

The bulletin contains a description of the materials, test specimens, and apparatus used, the test data, and a discussion of the results. It also includes numerous micrographs and macrographs which were taken during the progress of the tests. From these it was possible to study the formation of slip lines, strain lines, and fatigue cracks.

Copies of Bulletin No. 208 may be obtained without charge by addressing the Engineering Experiment Station, Urbana, Illinois.

Validity of the city ordinance restricting structures in the Marina District, San Francisco, to a height of forty feet was upheld again by the State District Court of Appeal June 30 in denying an appeal filed by the Moana Hotel Company seeking authority to build a ten-story hotel.

The ordinance was declared to be not unreasonable or arbitrary.

The matter has been before the Supreme Court once, and twice before the Appellate Court, the ordinance being upheld each time.

Engineering News Section

BRIDGES

PLACER CO., Cal.—Lord & Bishop, Sacramento, at \$57,816 awarded contract by State Highway Commission to construct undergrade crossing under the tracks of S. P. Ry. near Emigrant Gap, consisting of two concrete abutments with wing walls and grading and surfacing roadway between abutments with crusher run base and untreated crushed gravel or stone surfacing.

REDDING, Shasta Co., Cal.—J. E. Fitzsimmons, Lodi, at \$1,500 awarded contract by county supervisors to construct bridge over Cow Creek near the Eldridge place. Other bids were: R. B. McKenzie, Gerber, \$1750; Rolla Arbuckle, Anderson, \$1767; J. P. Brennan, Redding, \$2090; Wm. Stephens, Redding, \$2779.70.

SAN JOSE, Santa Clara Co., Calif.—Until July 7, 5 P. M., bids will be received by C. B. Goodwin, city manager, to construct reinforced concrete bridge over Guadalupe river at Auzaers Ave. Certified check 10% payable to city required with bid. Plans obtainable from City Engineer Wm. Popp on deposit of \$10, of which \$5 is returnable.

TEHAMA AND SHASTA COUNTIES, Cal.—C. W. Wood, Stockton, at \$135,058 awarded contract by State Highway Commission to construct undergrade crossing bet. one mile south of Cottonwood and Cottonwood, consisting of two reinforced concrete abutments and a ballasted subfloor and about 0.9 mile roadway to be graded and paved with cement concrete.

NEVADA CO., Calif.—Bodenhamer Const. Co., San Diego, at \$55,751 awarded contract by State Highway Commission to construct overhead crossing over tracks of S. P. R. R. near Yuba Pass consisting of one 112 ft. deck plate girder span, one 66 ft. deck plate girder span, one 54 ft. deck plate girder span, all on concrete piers, and 279 lin. ft. timber trestle approach on framed bents and rubble masonry abutments.

EL DORADO CO., Calif.—As previously reported, bids will be received July 16 by State Highway Commission to construct reinforced concrete girder bridge over South Fork of the American River at Riverton, composed of one 60-ft. span and two 54-ft. spans on concrete piers and bents and grade and surface approaches with untreated gravel or stone. Project involves: 6 sta. clear and grub; 2550 cu. yds. rdwy. excav. without class; 300 cu. yds. struc. excav.; 1900 sta. yds. overhaul; 550 cu. yds. class A and 12 cu. yds. class E cem. conc.; 80,000 lbs. reinf. steel; 2600 lbs. cast steel rockers and bearings, 450 cu. yds. untreated crushed gravel or stone surf.; 25 M gallons water for surfacing; 80 lin. ft. 18-in. corr. metal pipe; 300 cu. yds. light riprap; 1 existing bridge to be removed; 9 sta. finish rdwy.; 1330 lin. ft. move and reset property fences; 1 lot miscellaneous items of work. State will fur. corr. metal pipe.

SANTA ROSA, Sonoma Co., Cal.—W. L. Proctor, Santa Rosa, at \$5,998.50 awarded contract by county

supervisors to construct two reinforced concrete culverts on the Adobe to Eureka school road near Petaluma.

SANTA ROSA, Sonoma Co., Cal.—R. Press Smith, Santa Rosa, at \$1408 awarded contract by county supervisors to construct reinforced concrete culvert on Skaggs Spring road.

SANTA ROSA, Sonoma Co., Cal.—A. Soda at \$1031 awarded contract by county supervisors to construct reinforced concrete culvert in Washington Street in the First Supervisor District.

SAN MATEO COUNTY, Calif.—Bids will be asked shortly by State Highway Commission for improvements in connection with highway underpass at Colma. At present the underpass is 66 ft. wide. It will be widened to 108 ft. with two 6-ft. sidewalks. The cost, estimated in the neighborhood of \$100,000, will be borne equally by the Southern Pacific Railroad and the state.

FRESNO, Fresno Co., Cal.—M. Madsen, 247 Maple St., Fresno, at \$3189 submitted low bid to city council to construct bridge over Dry Creek in Glenn Ave. Will be 24-ft. span, 52 ft. wide; reinforced concrete. Taken under advisement until June 30.

LOS GATOS, Santa Clara Co., Cal.—Until July 21, 8 P. M., bids will be received by Donna M. Winning, town clerk, to construct culvert in New York Ave. Certified check 10% required with bid. Plans on file in office of clerk.

REDDING, Shasta Co., Cal.—Tentative budget has been prepared by the county supervisors providing \$43,779 for the construction and maintenance of bridges during coming fiscal year. Of the total amount, \$20,000 will cover maintenance.

LOS ANGELES, Cal.—General Engineering Corp., Ltd., 740 S. Broadway, Los Angeles, at \$204,820 submitted low bid to Board of Public Works to construct Washington St. Bridge over Los Angeles river, between Soto and Harriet Sts. Will be 310 ft. in length consisting of five reinf. conc. girder spans, each 62 ft. center to center; roadway 56 ft. wide with two 5 ft. walks. Involves approx. 536,224 lbs. reinf. steel; 6975 cu. yds. Class F concrete; 11,136 lin. ft. conc. piling, 15 ft. long.

SAN FRANCISCO—Streets Committee of Board of Supervisors has approved \$250,000 appropriation to finance city's cost in the construction of the Third street bridge over the Channel. The State Board of Harbor Commissioners has agreed to provide an additional \$150,000 in the project.

FRESNO, Fresno Co., Cal.—M. Madsen, 247 Maple St., Fresno, at \$3189 awarded contract by city council to construct bridge over Dry Creek in Glenn Ave. Will be 24 ft. span, 52 ft. wide; reinforced concrete.

DREDGING, HARBOR WORKS & EXCAVATIONS

SACRAMENTO, Cal.—Until July 8, 2 P. M., under Order No. 2132, bids will be received by U. S. Engineer Office, California Fruit Bldg., to furnish and deliver 137 tons of steel sheet piling (cut to 10-ft. lengths). Material will be used for driving a wall approximately 1,300-ft. long and 10-ft. deep. Further information obtainable from above.

LOS ANGELES, Cal.—Standard Dredging Co., Central Bldg., awarded contract at \$71,640 by Los Angeles harbor department for dredging Fish Harbor and entrance channel, involving the removal of 300,000 cu. yds. of material. Spec. No. 855.

OAKLAND, Cal.—Until July 24, 3 P. M., bids will be received by U. S. Engineer Office, Customhouse, San Francisco, for dredging in Oakland Harbor. Specifications obtainable from above office.

STOCKTON, San Joaquin Co., Cal.—Until August 26, 3 P. M., bids will be received by U. S. Engineer Office, California Fruit Bldg., Sacramento, to construct certain levees or embankments by dragline excavators, along the San Joaquin River, at and below Stockton, in connection with the San Joaquin River and Stockton Channel project. This work under Circular Proposal No. 30-272, Specifications 1670. Deposit of \$3.50 required for plans obtainable from above office.

STOCKTON, San Joaquin Co., Cal.—Until August 26, 3 P. M., bids will be received by U. S. Engineer Office, California Fruit Bldg., Sacramento, under Circular Proposal No. 30-270, Specifications No. 1668, to construct certain levees or embankments by clamshell dredges along the San Joaquin River, below Stockton, in connection with the construction of the San Joaquin River and Stockton Channel project. Specifications obtainable from above office on deposit of \$3.50, returnable.

MACHINERY AND EQUIPMENT

EL CERRITO, Contra Costa Co., Cal.—Following bids taken under advisement by city trustees to furnish and deliver a 2-ton truck for the street department: J. E. French Co., \$2890; International Harvester Co., \$3491.75; La France-Republic Co., \$2532 and \$3328; Mack Motor Co., \$3670.50; Auto Car Co., \$3462; Moreland Motor Co., \$3059.50; General Motors Co., \$2776.70 and \$2627.50 and Fugel Motor Co., \$3222.

TULARE, Tulare Co., Calif.—Until July 11, 7:30 P. M., bids will be received by C. E. Harper, clerk, Tulare Union High School District, to furnish and deliver one automobile chassis and one school bus body. Certified check 10% payable to clerk required at high school. With bid. Spec. obtainable from clerk.

LINDEN, San Joaquin Co., Calif.—Until July 17, 8 P. M., bids will be received by Linden Union High School District, to furnish and deliver one 45-passenger school bus, using Ford Model AA truck chassis with Fabco No. 60 frame extension and P and C body or equal. Specifications and further information obtainable from clerk of district at Linden.

GUADALUPE, Santa Barbara Co., Cal.—Until July 10, 8:30 P. M., bids will be received by Floyd V. Pitts, clerk, Guadalupe Joint Union High School District, to furnish and deliver two 6-cylinder motor busses, two- to three-ton capacity with a seating capacity of 45 to 50 adult persons. Seats to be built lengthwise with double seats in center. Both busses to be fully equipped. Bidders to furnish specifications. Further information obtainable from clerk.

SAN FRANCISCO.—Until July 7, 2 P. M., bids will be received by U. S. Forest Service, Ferry Bldg., to furnish and deliver two light auto delivery and three 1½-ton trucks. Further information obtainable from above.

SAN BRUNO, San Mateo Co., Cal.—M. Belli & Co., Sausalito, San Francisco, at \$2132 awarded contract by city trustees to furnish and deliver one G. M. G. 1½-ton Model T-25 truck; payment of \$400 on delivery, balance in 4 equal installments over a period of 15 months.

OAKDALE, Stanislaus Co., Cal.—Until July 11, 8 P. M., bids will be received by E. M. Kimball, Clerk, Oakdale Union High School District, to furnish and deliver ferry truck, chassis suitable for mounting passenger body of 58-passengers. Separate bids will be considered for body. Specifications and further information obtainable from J. O. Gossett, principal at high school.

SAN FRANCISCO.—Utilities Committee of Board of Supervisors contemplates election to vote bonds of \$380,000 to finance purchase of 20 new cars for Municipal Railway to be used in connection with H street line to serve the Coast League baseball games to be opened in the new grounds at 16th and Potrero Ave. next April.

CLOVIS, Fresno Co., Cal.—Until July 14, 7 P. M., bids will be received by Ben McKay, clerk, Clovis Union High School District, to furnish and deliver one school bus complete; 35- to 45-passenger capacity; with dual tires on rear wheels; 6-cylinder motor. Certified check 10% required with bid. Specifications and further information obtainable from clerk.

BAKERSFIELD, Kern Co., Cal.—Until July 14, 7:30 P. M., bids will be received by William Gleason, Clerk, Kern County Union High School District, to furnish and deliver one student bus chassis and one student bus body. Specifications and further information obtainable from clerk.

RAILROADS

RICHMOND, Contra Costa Co., Cal.—Higgins and Marshall, Richmond, awarded contract by United Commercial Co., San Francisco, for grading in connection with spur tracks to serve the Ford plant on the Richmond Inner Harbor.

LONG BEACH, Cal.—Until 2:30 P. M., July 5, bids will be received by the city council for furnishing and delivering to the city f. o. b. Municipal Pier No. 1, Inner Harbor, Long Beach, track material and special work in accordance with specifications No. H. D. 42. Specifications may be obtained upon deposit of \$10. Certified check or bond, 10%. G. L. Buck, city manager.

OAKLAND, Cal.—U. S. Steel Products Co., Russ Bldg., San Francisco, at \$3100 awarded contract by City Port Commission to furnish and deliver track materials in connection with Ninth Ave. pier.

MISCELLANEOUS SUPPLIES AND MATERIALS

OAKLAND, Cal.—Following contracts awarded by city council to furnish materials and services for fiscal year 1930-31: Baird Brush Mfg. Co., street brushes, \$24 per dozen; Standard Oil Co., engine distillate, 10 and one-tenth cents per gallon including tax; E. K. Wood Lumber Co., Douglas fir at \$1 per thousand feet; Eureka Mill & Lumber Co., redwood at \$1.75 per thousand feet; Pacific Coast Aggregates, Inc., mixed concrete, \$5.75 to \$6.34 per cubic yard; Oakland Building Material Co., dry concrete mix, \$1.40; Standard Oil Co., Kerosene, \$1.35 per gallon; California Corrugated Culvert Co., corrugated iron pipe and culvert materials; James O. Bell, street refuse containers, \$5.97 each; American Rubber Manufacturing Co., fire hose, 75 cents per foot; Smith, Emery & Co., furnishing storage and making compression tests on concrete cylinders, \$1.90 per test.

RESERVOIRS AND DAMS

BOULDER DAM.—The bill providing \$10,600,000 for immediate construction work in the Boulder Canyon dam has passed the Senate and now awaits

the signature of the president. It is probable that the state of Arizona will file suit directed against such construction as soon as the bill has been signed.

PIPE LINES, WELLS, ETC.

SAUSALITO, Marin Co., Cal.—Constructing Quartermaster, Fort Mason, San Francisco, is preparing plans for installation of approximately 7000 ft. of gas mains between Sausalito and Fort Baker.

SEWERS AND SEWAGE DISPOSAL PLANTS

SAN FRANCISCO.—Bureau of Engineering, Department of Public Works, 3rd Floor, City Hall, is completing plans for Section D of the Alameda Storm Drain in Industrial street from Toland St. to Oakdale Ave. and Section C in Industrial St. from Bay Shore Blvd. to Toland St.

GRASS VALLEY, Nevada Co., Cal.—Until July 1, 7:30 P. M., bids will be received by Bertha C. Fuller, City Clerk, to furnish materials to construct approximately 2000 ft. of sewer, involving:

- 1—Furnishing about 1550 feet of "Standard Vitrified Salt Glazed Sewer Pipe," 6 in. diameter, and 150 ft. of iron pipe, 6 in. diameter.
- 2—All the material and appurtenances for 8 manholes.
- 3—One flush tank.

Separate bids are wanted for digging trenches and laying above sewer. Certified check 10% payable to city required with bid. Specifications and further information obtainable from city clerk.

RICHMOND, Contra Costa Co., Cal.—Until July 7, 8 P. M., bids will be received by A. C. Faris, city clerk, (479) to construct combined storm and sanitary sewers in Dock Ave., bet. 10th St. and east termination of Dock Ave., etc., involving salt glazed vitrified clay pipe; centrifugally cast reinforced concrete pipe; cast iron pipe; salt glazed vitrified clay sewer pipe in timber cradle on piles and in concrete pipe jackets on piles; centrifugally cast reinforced concrete pipe in reinforced concrete cradle on piles; manholes; overflow structures; storm water inlets, etc. Estimated cost \$117,000. 1911 Act. Certified check 10% payable to city required with bid. Plans obtainable from City Engineer E. A. Hoffman.

OAKLAND, Cal.—Until July 3, 12 noon, bids will be received by Frank C. Merritt, city clerk, to furnish sewer pipe to city for remainder of fiscal year ending June 30, 1931. Bond of \$1000 required of successful bidder. Specifications on file in office of clerk.

SAN LEANDRO, Alameda Co., Cal.—City council has started proceedings for a new sewer link to serve the entire south section of the city; estimated cost \$50,000; 24-in. pipe will probably be specified.

PHOENIX, Ariz.—The \$317,000 sewer bond issue carried at the recent election. Bids for the purchase of the bonds will be received about Aug. 5.

LOS ANGELES, Cal.—Martin Simunovich, 3305 W 66th St., awarded contract by the board of public works at \$171,800 on Type No. 2 to construct Section No. 34-B of the North Luffall Sewer from Riverside Dr. and Woodman Ave., to Kester Ave. and Bur-

LOS ANGELES, Cal.—Dalmatin and Nikevich, 841 W 62nd St., Los Angeles, were awarded contract by the board of public works at \$203,631 on Type No. 2 to construct Section No. 34-A of the North Outfall Sewer, from Laurel Canyon Blvd. and Woodbridge Lane to Riverside Drive and Woodman Ave., involving: 5533.19 ft. 57-in. semi-elliptical conc. sewer, inc. tunnels, curves, etc., Inc. resurf.; 5330.54 ft. 51-in. semi-elliptical conc. sewer, etc., Inc. resurf.; 2427.05 ft. 39-in. semi-elliptical conc. sewer, inc. tunnels and inc. all resurf.; 20 ft. 24-in. vit. pipe sewer, Inc. resurf.; 7 ft. 18-in. do.

WATER WORKS

WHITTIER, Los Angeles Co., Cal.—Until 7:30 P. M., July 7, bids will be received by the city council for a deep well pump equipped for belt drive, pulley diameter 18-in. with 20-in. face, discharge above floor, maximum diameter of bowls 15-in., designed to lift 300 inches of water 40 feet and 11 ft. P. M., or 60 feet at 970 revolutions per minute, complete with 60 feet of water column and 10 feet of suction pipe, f. o. b. Whittier. For further particulars, bidders will communicate with M. R. Bowen, Water Superintendent, 205 North Greenleaf Ave., Whittier. Certified check or bond, 10%. Debbie E. Allen, city clerk.

LOS ANGELES, Cal.—Until 10 A. M., July 9, bids will be received by the Los Angeles harbor department for pumping equipment, motors, etc., for Fish Harbor salt water supply line. Spec. No. 861. The work includes furnishing and installing three 5000 G. P. M. centrifugal pumps, one 250-gallon centrifugal pump, motors, vacuum pumps and incidental work. Information obtained from the harbor engineer, San Pedro. Burt Edwards, general manager.

MODESTO, Stanislaus Co., Calif.—Until July 9, 7:30 P. M., bids will be received by H. E. Gragg, city clerk, to construct pump station. Certified check 10% payable to Mayor required with bid. Plans obtainable from Frank Rossi, city engineer.

SAN FRANCISCO—Until July 14, 3 P. M., under Proposal No. 610, bids will be received by Leonard S. Leavy, city purchasing agent, 270 City Hall, to furnish and deliver 200 fire hydrants complete and 400 extra hydrant bodies for Fire Department. Specifications and further information obtainable from above.

See call for bids under official proposal section in this issue.

PLAYGROUNDS & PARKS

CLOVERDALE, Stanislaus Co., Cal.—Bids will be asked shortly by city trustees for improvements in connection with water distributing system and for which \$15,000 is available.

STREETS AND HIGHWAYS

PALO ALTO, Santa Clara Co., Cal.—Ferlolo and Bettini, Palo Alto, at \$8,858.16 awarded contract by city council to construct sidewalks in Mayfield district. Other bids: A. Soda & Son, San Francisco, \$9,929.87; N. M. Ball, Porterville, \$10,860.

RIVERSIDE COUNTY, Calif.—Until July 22, 2 P. M., bids will be received by C. H. Sweetser, district engineer, U. S. Bureau of Public Roads, 461 Market St., for oil processing 15.5 miles of Idyllwild National Forest Highway, Route 72, in San Bernardino National Forest, involving:

15.5 miles prepare roadway; 365,000 gals. asphalt. oil (furnish and apply);

15.5 miles road mixing & compacting oil treated surface;

193 right of way monuments. Plans obtainable from above office on deposit of \$10, checks for same to be made payable to Federal Reserve Bank of San Francisco.

BAKERSFIELD, Kern Co., Cal.—council starts proceedings to pave thirteen blocks of streets; from 11th and H Sts., to 14th, between 14th to J St.; north on J St. to cemetery; beginning at 16th and G Sts., thence west to J St., in addition to other streets in the east section of the city.

BAKERSFIELD, Kern Co., Calif.—A sum of \$146,000 has been divided by the Board of Supervisors among the four road districts of the county, \$10,000 coming from the general road fund of the state and \$136,000 from the motor vehicle fund. Of the \$10,000 general road fund the division was made as follows: The first district receives \$5000, and districts Nos. 2 and 4 each receive \$2500. The division of the motor vehicle fund was made as follows: The first district receives \$68,000; district No. 2, \$34,000; No. 3, \$6500 and No. 4, \$27,500. The money will be used in improving and maintaining county roads.

SAN FRANCISCO—Bureau of Engineering, Department of Public Works, 3rd Floor, City Hall, is completing plans to grade and pave Section B of the Sunset Blvd., between 30th and 37th Ave., from Santiago St. to Sloat Blvd., and Section D between Noriega and Irving Sts.

OROVILLE, Butte Co., Cal.—County supervisors reject bids to furnish 30,000 tons of crushed rock and sand for use in connection with highway improvements. The material will be purchased in the open market as required by J. A. Bumgarner, county engineer.

SAN JOAQUIN CO., Calif.—As previously reported, bids will be received July 16 by State Highway Commission to grade and pave with asphalt concrete 1.4 miles bet. Forest Lake and north boundary. Project involves: 15,500 cu. yds. rdwy. excav. without classification; 160,500 sta. yds. overhaul; 415 cu. yds. struc. excav.; 7440 sq. yds. subgrade for pave; 130 cu. yds. class A cem. conc. (struc.); 11,600 lbs. bar

reinfr. steel (struc.); 6430 tons asphalt conc.; 170 tons untreated crushed gravel or stone surf. in place (road approaches); 8100 sq. yds. asphalt binder; 10 M gals. water applied to surf.; 500 bbls. fuel oil (shoulders and road approaches); 14 lin. ft. 12-in. 215 lb. pipe; 18-in. and 60 lin. ft. 36-in. corrugated metal pipe; 59 lin. ft. corr. metal pipe (clean and relay); 0.7 M ft. b.m. redwood timber, dense select all-heart struc. grade; move and reset 5 conc. headwalls; 360 cu. yds. remove and dispose of cement conc. in existing pave, and struc.; 0.4 mi. new hog-tight property fence; 74 sta. finish rdwy.; 5 monuments. State will fur. corr. metal pipe and cast steel frames and covers for drop inlets.

LYON COUNTY, Nevada—Until July 9, 2 P. M., bids will be received by State Highway Commission, Carson City, to furnish asphaltic fuel oil, apply and mix with crushed rock or crushed rock gravel surface on 11.72 miles between Yerington and Wilson's. Certified check 5% required with bid. Plans on file in office of U. S. Bureau of Public Roads, 461 Market St., San Francisco, and obtainable from S. C. Durkee, State Highway Engineer, Carson City, on deposit of \$15 of which \$10 is returnable.

EUREKA COUNTY, Nevada—Until July 9, 2 P. M., bids will be received by State Highway Commission, Carson City, to grade, construct structures and oil surface, 11.65 miles between Hay Ranch and Eureka. Certified check 5% required with bid. Plans on file in office of U. S. Bureau of Public Roads, 461 Market St., San Francisco, and obtainable from S. C. Durkee, State Highway Engineer, Carson City, on deposit of \$15 of which \$10 is returnable.

GUSTINE, Merced Co., Cal.—City Engineer A. E. Cowell is preparing plans to improve unpaved streets in the residential section with gravel surface, oiled treated. Approximately \$50,000 will be expended in the work.

SAN CARLOS, San Mateo Co., Cal.—Town trustees declare intention (30-4) to improve portions of Arroyo Ave., Chestnut St., Elm St., etc., involving grading; cem. conc. curbs, walks, gutters; 4-in. waterbound rock macadam pave. with 3-in. asphalt. conc. surface; salt glazed ironstone pipe sanitary sewers with wyes; cem. conc. storm water sewers. 1911 Act Bond Act 1915. Hearing July 2. Julius M. Edling, city clerk.

OAKDALE, Stanislaus Co., Calif.—City trustees declare intention (7) to improve portions of 4th Ave., 3rd Ave., 2nd Ave., etc., involving grading; pave with 2-in. oil treated crushed gravel or stone. 1911 Act Bond Act 1915. Hearing July 7. C. E. Wood, city clerk.

SAN LUIS OBISPO COUNTY, Cal.—Until July 23, 2 P. M., bids will be received by State Highway Commission to grade and pave with cement concrete 3.0 miles between San Luis Obispo and foot of the Cuesta Grade.

See call for bids under official proposal section in this issue.

SAN RAFAEL, Marin Co., Cal.—City council declares intention (513) to improve portions of Jewell St., Acacia Ave., Palm Ave., etc., involving grading; ironstone pipe main sewers and side sewers; hyd. concrete manholes; corr. iron pipe culverts; hyd. conc. and corr. iron arch culverts; hyd. conc. and corr. iron arch culverts; hyd. conc. catchbasins; pave with stone sub-base with hyd. concrete surface; hyd. conc. curbs and gutters. 1911 Act. Bond Act 1915. Hearing July 14. H. K. Brainerd, city manager. Eugene W. Smith, city clerk.

SAN FRANCISCO—Until July 2, 2:30 P. M., bids will be received by S. J. Hester, Secretary, Board of Public Works, to improve Harrison St., bet. Second and Essex Sts., involving grade; armored conc. curbs; 2-course conc. sidewalks; 12-in. vit. clay pipe sewers with wyes; side sewers; brick manholes; vit. pipe culverts; concrete and asph. concrete pavements. Certified check 10% payable to Clerk of the Bd. of Sups. required with bid. Plans obtainable from Bureau of Engineering, 3rd Floor, City Hall.

SANTA ROSA, Sonoma Co., Cal.—Until July 15, 3 P. M., bids will be received by Ney L. Donovan, city clerk, (1613) to improve Ridgway Ave. bet. Mendocino Ave. and Cleveland Ave., involving grading; 4-in. macadam base with 3-in. asph. conc. surf.; hydraulic concrete curbs and gutters. 1911 Act. Bond Act 1915. Certified check 10% payable to city required with bid. Plans on file in office of clerk.

SANTA ROSA, Sonoma Co., Cal.—Until July 15, 3 P. M., bids will be received by Ney L. Donovan, city clerk, (1612) to improve Vason Street bet. King and Wright Sts., involving grading; 4-in. macadam base; 3-inch asphaltic concrete surface pavement; hyd. cem. conc. curbs, walks and gutters. 1911 Act. Bond Act 1915.

Certified check 10% payable to city required with bid. Plans on file in office of clerk.

WASHOE COUNTY, Nevada.—Isbell Const. Co., Fresno, Calif., and Carson City, Nev., at \$44,888.56 submitted low bid to U. S. Bureau of Public Roads, San Francisco, for grading Section B, Route 1, Lake Tahoe National Forest Highway, in Tahoe National Forest, Washoe County, Nev., 2.36 miles, involving: 18 acres clearing; 57,000 cu. yds. excav. unclass.; 400 cu. yds. struc. excav.; 18,500 sta. yds. over-haul; 2.56 mi. finish earth graded rd.; 122 cu. yds. conc. in place; 9500 lbs. reinf. steel; 942 lin. ft. corr. metal pipe in place; extra work, maintenance of existing road and sections accepted for trace est. \$1000; 50 right-of-way monuments in place. Other bids were: T. E. Connolly, S. F., \$54,642.32; Fennell Co., Inc., Sacramento, \$65,464.21; engineer's est., \$52,572.35.

DOUGLAS COUNTY, Nevada.—Isbell Const. Co., Carson City, at \$53,221.71 submitted low bid to U. S. Bureau of Public Roads, San Francisco, to grade 2.58 miles of Section C, Route 3, Glenbrook National Forest Highway, Tahoe National Forest, in Douglas County, Nev., involving: 62,361 cu. yds. unclass. excav.; 230 cu. yds. struc. excav.; 12,338 sta. yds. over-haul; 2.58

miles finish earth graded rd.; 35 cu. yds. class B and 30 cu. yds. class C cem.; 3500 lbs. reinf. steel; 1150 lin. ft. corr. metal pipe (in place); maintenance of existing road and sections accepted for traffic, est. cost \$1000; haul and pile logs; 64 right-of-way monuments. Other bids: T. E. Connolly, San Francisco, \$62,139; Fennell Co., Inc., Sacramento, \$70,043.39; engineer's estimate, \$49,969.16.

KERN COUNTY, Calif.—As previously reported, bids will be received July 15 by State Highway Commission to surface with untreated crushed gravel or stone, 13.9 miles bet. 1½-mi. east of Cottonwood Creek and Democrat Springs. Project involves: 21,000 cu. yds. rdwy. excav. without class; 4000 cu. yds. gutter excav.; 20,000 sta. yds. over-haul; 25,000 cu. yds. imported borrow; 500 cu. yds. struc. excav.; 35,000 tons oil treated crushed gravel or stone surf.; 1000 tons screenings (seal coat); 600 bls. fuel oil (seal coat); 880 lin. ft. 18-in. corr. metal pipe; 250 cu. yds. rubble masonry walls; move and reset 1500 guard rocks; 734 sta. finish rdwy. State will fur. corr. metal pipe.

MODOC COUNTY, Calif.—As previously reported, bids will be received July 16 by State Highway Commission to grade and surface with untreated crushed gravel or stone, 1.4 miles bet. 3 miles and 4.4 miles east of Alturas. Project involves: 41,500 cu. yds. rdwy. excav. without class; 340,000 sta. yds. over-haul; 150 cu. yds. struc. excav.; 2350 cu. yds. untreated crushed gravel or stone surf.; 140 M. eals. water applied to surf.; 8 cu. yds. class A cem. conc. (struc.); 310 lbs. bar reinf. steel (struc.); 220 lin. ft. 18-in. and 72 lin. ft. 24-in. corr. metal pipe; 75 sta. finish rdwy.; 28 monuments. State will fur. corr. metal pipe.

SANTA CRUZ CO., Cal.—O. A. Lindberg, Stockton, at \$127,229 awarded contract by State Highway Commission to grade and surface about 2.6 miles bet. Waterman Switch-back and Saratoga Gap with bituminous treated waterbound macadam.

SAN JOAQUIN CO., Calif.—Larsen Bros., Galt, at \$42,388 awarded contract by State Highway Commission to grade and widen about 3.3 miles bet. Houston School and Forest Lake with cement concrete and crusher run base.

SAN JOAQUIN CO., Calif.—Larsen Bros., Galt, at \$38,726 awarded contract by State Highway Commission to grade and surface about 1.8 miles bet. French Camp and Stockton with crushed gravel or stone.

SISKIYOU CO., Calif.—Basalt Rock Co., Napa, at \$5,547.20 awarded contract by State Highway Commission to furnish and apply heavy fuel oil on 21 miles along Klamath river lateral between Shasta river and Walker.

SAN FRANCISCO—Until July 2, 2:30 P. M., bids will be received by S. J. Hester, Secretary, Board of Public Works, to improve crossing of Head and Sargent Sts., involving armored concrete curbs; concrete walks; brick catchbasins; vit. clay pipe sewers; 6-in. Class F conc. base pave with 2-in. asph. conc. surface. Est. cost \$2400. Certified check 10% payable to Clerk, Board of Sups. required with bid. Plans obtainable from Bureau of Engineering, 3rd Floor, City Hall.

SAN FRANCISCO—Until July 2, 2:30 P. M., bids will be received by S. J. Hester, Secretary, Board of Public Works, to improve Tara St.,

bet. Mt. Vernon Ave. and Ridge Lane, including intersection, involving grade; armored conc. curbs; 8-in. vit. clay pipe sewers with manholes; wyes; pave with 6-in. Class E concrete. Certified check 10% payable to Clerk of the Board of Supervisors required with bid. Plans obtainable from Bureau of Engineering, 3rd Floor, City Hall.

OAKLAND, Cal.—Until July 3, 12 noon, new bids will be received by Frank C. Merritt, city clerk, to furnish and deliver stone, stone chips and rock screenings for various Municipal Departments for fiscal year. Bids received for these materials on June 12 were rejected as being too high. Specifications on file in office of the city clerk.

DEL NORTE CO., Cal.—Engelhart Paving & Const. Co., Eureka, at \$11,417.50 awarded contract by State Highway Commission to grade 0.5 mile of realignment on Redwood Highway in vicinity of Richardson Creek.

SANTA ROSA, Sonoma Co., Cal.—George French Jr., Stockton, at \$3265 awarded contract by county supervisors for 10½ miles of surfacing from Healdsburg to Napa Highway through Knights Valley.

KING CITY, Monterey Co., Cal.—City council declares intention (No. 6) to improve portions of First St., involving grading; hyd. conc. curbs; 5-in. hyd. cem. conc. pavement. 1911 Act. Bond Act 1915. Hearing July 16. J. A. Wasson, city clerk.

PACIFIC GROVE, Monterey Co., Cal.—Until July 17, 7:30 P. M., bids will be received by W. G. Stubbs, city clerk (3207) to improve Laurel Ave. between Lighthouse and Laurel Aves., involving grading; cement concrete curbs and gutters, 2-in. asph. conc. pave; two conc. catchbasins; 4-in. vit. clay lateral sewer. Bond Act 1915. Imp. Act 1911. Certified check 10% payable to city required with bid. Plans on file in office of clerk.

MARYSVILLE, Yuba Co., Cal.—City council declares intention (37) to improve portions of 12th St., E St., B Street, involving removal of concrete curbs and sprinkler system, remove trees, grading; pave with 2½-in. asph. conc. base with 1½-in. Warrentite-Eit surface; conc. curbs; gutters. 1911 Act. Bond Act 1915. Hearing July 14. Chester O. Gates, city clerk.

KING CITY, Monterey Co., Calif.—City council declares intention (5) to improve portions of Mildred Ave., 7th and Bissett Sts., etc., involving grading; 5-in. hyd. conc. pave; hyd. cem. conc. curbs; catchbasins; gutters. 1911 Act. Bond Act 1915. Hearing July 16. J. A. Wasson, city clerk.

SACRAMENTO, Cal.—W. H. Larsen, Galt, at \$39,942 awarded contract by county to improve Mills Orchard Highway from Maxwell-Sites road to the unincorporated town of Sites, a distance of 4.04 miles involving 6300 tons asphaltic concrete paving.

LOS ANGELES, Cal.—Griffith Co., L. A. Railway Bldg., Los Angeles, at \$571,592 submitted low bid to Board of Public Works to improve 8th St., bet. Figueroa St. and Windsor Blvd., involving in the main grading, \$72,900; conc. and asph. conc. pavement; storm drain and appurtenances, \$47,500; san. sewers, \$45,000; reconstruct lighting system, \$10,000; construct new lighting system, \$95,000, etc.

MARIN COUNTY, Cal.—Until July 23, 2 P. M., bids will be received by State Highway Commission to grade and surface with bituminous macadam, 1.3 miles between Belvedere Crossing and Tiburon.

See call for bids under official proposal section in this issue.

OFFICIAL PROPOSALS

STATE OF CALIFORNIA

DEPARTMENT OF PUBLIC WORKS

DIVISION OF HIGHWAYS

NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received at the office of the State Highway Engineer, Public Works Building, Sacramento, California, until 2 o'clock P. M., on July 23, 1930, at which time they will be publicly opened and read, for construction in accordance with the specifications therefor, to which special reference is made, of portions of State Highways, as follows:

Marin County, between Belvedere Crossing and Tiburon (V-Mr-52-A), about one and three-tenths (1.3) miles in length, to be graded and surfaced with bituminous macadam.

San Luis Obispo County, between San Luis Obispo and the foot of Cuesta grade (V-SLO-2-D), about three (3.0) miles in length, to be graded and paved with Portland cement concrete.

Proposal forms will be issued to only those Contractors who have furnished verified statement of experience and financial condition in accordance with the provisions of Chapter 644, Statutes 1929, and whose statements so furnished are satisfactory to the Department of Public Works. Bids will not be accepted from a Contractor to whom a proposal form has not been issued by the Department of Public Works.

Plans may be seen, and forms of proposal, bonds, contract and specifications may be obtained at the said office, and they may be seen at the offices of the District Engineers at Los Angeles and San Francisco, and at the office of the District Engineer of the district in which the work is situated. The District Engineers' offices are located at Eureka, Redding, Sacramento, San Francisco, San Luis Obispo, Fresno, Los Angeles, San Bernardino and Bishop.

A representative from the district office will be available to accompany prospective bidders for an inspection of the work herein contemplated, and Contractors are urged to investigate the location, character and quantity of work to be done, with a representative of the Division of Highways. It is requested that arrangements for joint field inspection be made as far in advance as possible. Detailed information concerning the proposed work may be obtained from the district office.

No bid will be received unless it is made on a blank form furnished by the State Highway Engineer. The special attention of prospective bidders is called to the "Proposal Requirements and Conditions" annexed to the blank form of proposal, for full directions as to bidding, etc.

The Department of Public Works reserves the right to reject any or all bids or to accept the bid deemed

for the best interests of the State.
DEPARTMENT OF PUBLIC WORKS,
DIVISION OF HIGHWAYS
C. H. PURCELL,
State Highway Engineer.
Dated June 25, 1930.

NOTICE TO CONTRACTORS

SEALED BIDS will be received by Geo. B. McDougall, State Architect, Public Works Building, 11th and P Sts. Sacramento, California, up until 2 o'clock P. M., Tuesday, July 22, 1930, thereafter on said day to be publicly opened and read for the construction of a reinforced concrete dam for the Preston School of Industry, near Ione, California.

The dam will measure 192'-0" at the crest and approximately 25'-0" at the highest point and involves approximately 600 cubic yards of reinforced concrete.

Plans and specifications are on file for examination in the office of the Division of Architecture, Public Works Building, Sacramento, and also at Room 1025 Associated Realty Building, Los Angeles, and at the principal California Cities Builders' Exchange Offices.

Plans, specifications, and proposal forms may be secured by licensed Contractors who have qualified or who will qualify by furnishing a verified statement of experience and financial condition as required by the provisions of Chapter 644, Statutes 1929, and whose statements so furnished are satisfactory to the Department of Public Works. Questionnaire forms may be secured from the Division of Architecture.

Bids will not be accepted from a Contractor to whom a proposal form has not been issued and all bids must be on proposal forms supplied by the State.

Requests for plans shall be accompanied by a deposit of twenty-five (\$25.00) dollars. Check shall be made payable to the Department of Public Works, Division of Architecture. Deposit will be returned upon receipt of the set in good condition, at Sacramento Office of the Division within 30

days after opening bids, otherwise it will be forfeited to the State.

All bids must be filed at the office of the State Architect on or before the time heretofore stated and in accordance with the "Rules for Bidding" accompanying the proposal form.

No bid will be considered unless cash, a bidder's bond made payable to the State of California, or a certified check made payable to the "State Engineer, Department of Public Works," in the sum of at least ten per centum (10%) of the amount of the bid is enclosed with the bid.

The Division of Architecture, State Department of Public Works, reserves the right to reject any or all bids and to waive any informality in any bid received.

STATE SUPERVISORS CONVENTION

Supervisors from all sections of the state together with business leaders and state officials, guests of A. B. C. Dohrmann, Past President, Director of the California State Chamber of Commerce at dinner, Yosemite Valley, Thursday evening discussed all phases of California's economic problems, and gave mutual pledges and co-operation to bring about their early solution.

Following Dohrmann's remarks in which he asked for united action to insure California's immediate future, there was a ready response from all groups.

Among the speakers were: Supervisors Jefferson E. Peyser, San Francisco County; Stanley Abel, Chairman of Board, Kern County; Sidney Groves, Chairman of Board, Los Angeles County; Tom Hurley, San Diego County; W. A. Collins, Chairman of Board, Fresno County; B. B. Meek, Director, State Department of Public Works; N. H. Sloane, General Manager, California State Chamber of Commerce; Milton Esberg and R. H. Shainwall.

Supervisor Peyser in his remarks said:

A "Pittsburg" Automatic Water Heater installed in the Home indicates high quality throughout.

Recommended and specified by all the leading architects, plumbers and builders.

Consider the high merit of the Pittsburg coupled with "Pittsburg Perfect Service."

"Hot water quick as a wink."

Pittsburg Water Heater Co.

Makers of "Pittsburg Automatic"—"Bungalow Automatic"

Storage Systems and "Lyon" Tank Water Heaters.

SEND FOR CATALOGS

"The machine-consolidation-merger age has brought to use new problems to solve. This era of super business carries with it responsibility which we as citizens must face without disregarding the fundamental laws of economics. We have witnessed the business complex of entire California communities change in the last few years by the newer methods of doing business.

"The radio, the automobile, and the airplane, have all aided in erasing the imaginary provincial boundaries referred to as city or county lines, and we are fast becoming tolerant of each others' problems as we learn that they differ only in degree from our own."

Topics discussed were Conservation, Aviation, Agriculture, Street and Highway Safety, Road Development, and Industry.

L. A. ARCHITECTS AWARDED FIRST PRIZE IN COMPETITION

The prize-winning designs in the Lehigh Airport Competition will be exhibited in the Architects' Building Material Exhibit at Fifth and Figueroa Sts., Los Angeles. This was the first national competition for designs of modern airports and the local exhibit is being sponsored by the Southern California Chapter of the National Aeronautic Association.

A. C. Zimmerman and William H. Harrison, Los Angeles architects, were awarded first prize in the competition, and their design was particularly commended by the jury because of its logical use of all elements for the comfort and convenience of passengers and aviators. In this design the visitors and passengers reach the airport through a broad plaza at the junction of two important boulevards, where provision has also been made for underground approach of a subway or railway. The approach plaza is developed as a signified park and is provided with parking space for automobiles. The passenger terminal has a waiting room similar to that of a railway station with ticket and information booths, baggage rooms, restaurant and lunch counter, news stand and similar facilities. Provision was also made for mail, express and freight handling with offices for immigration, customs and public health officials controlling all the incoming passengers from foreign ports.

This competition contributed two significant things to America's newest transportation industry. First, it crystallized the attention of the professional world, including architects, engineers and city planners, on the many problems of airport design. Second, it resulted in the presentation of many valuable suggestions, in pictorial and plan form, which will help to create public appreciation of what an airport should be.

Of the 257 designs submitted in the competition, 16 were awarded prizes, and of these the first prize and three of the honorable mentions were won in California.

A nine-ton block of onyx, said to be the largest produced from the quarries at Santa Catarina, Lower California, in the 30 years of operation there, was brought to San Diego recently aboard the power schooner Pinole.

The block of onyx, when taken from the quarry, weighed 22 tons and is believed to be the largest block of its kind ever mined. Another block of onyx, weighing 13 tons, also had to be cut up before it could be loaded aboard the Pinole. The nine-ton block is to be manufactured into bath tubs.

WILL STANDARDIZE PROCEDURE IN CONSTRUCTION CREDIT PLAN

The object of the Cleveland meeting is to standardize procedure and to adopt certain identical promotional methods so that the full strength of the various groups may be used in launching new bureaus, in supporting those already in existence, and in providing a rational interchange of credit information, Mr. Harding says.

Among the subjects taken up at the meeting are methods of financing the promotional work; the exchange of delinquent account information on a national basis, and the preparation and training of promotional and operating executives for the new credit stabilization movement.

The plan is in harmony with that adopted by the executive board of the Associated General Contractors at its meeting in Washington on April 30, for a national credit structure for all branches of the construction industry, including, in addition to local credit bureaus in the building industry, statewide credit stabilization movements in the engineering construction field. Both types are co-operating with the Bureau of Contract Information, Inc., at Washington, to the extent of forwarding delinquent account reports so that the bureau may act as a national clearing house for credit information.

Definite steps to check cut-throat competitive bidding and loose credit practices, which have been so detrimental to the construction industry during the past few years, will be taken at a meeting of representatives of the Associated General Contractors of America, the National Building Supply Dealers' Association, and nearly a score of nationally organized subcontractor groups, held at Cleveland, O., this week, according to E. J. Harding, assistant general manager of the Associated General Contractors.

Co-operative utilization of both selling and buying power in the enforcement of standard credit policies, thru the bringing together of all existing associations, both local and national, to curb unwarranted extension of credit, is the basis of the plan which is expected to be launched at the meeting.

The program is based on work already accomplished in the establishment of credit bureaus in the building field, which includes a score or more of operating trade bureaus developed following the drawing up of the credit stabilization plan by the Allied Construction Industries Committee two years ago.

Send For a Sample Copy
Of The NEW
Daily Pacific Builder

The only daily construction newspaper affording complete coverage of the construction activities in Central and Northern California, featuring work contemplated, bids wanted, bids opened, contracts awarded, sub-bids wanted and sub-contracts let on all types of building construction, bridges, dams and harbor works, irrigation projects; machinery and equipment; water works and supplies business opportunities, building permits, building contracts, mechanics' liens, acceptances, etc., etc.

Keep informed on construction developments in Central and Northern California and the major projects in Southern California, the states of Oregon, Washington, Nevada and Arizona.

The new DAILY PACIFIC BUILDER will afford a service that serves—both in Quality and Quantity. You, as a member of the construction fraternity, should not be without it.

Subscription price \$1.50 per month, or \$15.00 a year, payable in advance.

TARIFF TO BENEFIT THE BRICK INDUSTRY

"The brick industry will profit by the new Tariff Law," says the current issue of the monthly digest of the Common Brick Manufacturers' Association.

"This industry was asleep when the Tariff Law of 1922 was being written and an active enemy of the industry was influential in getting brick on the free-list without opposition.

"The wide difference in the standard of living, as between some of the European countries and the United States, brought the brick industry in the vicinity of the New York market into a most unfortunate position. Brick was manufactured in Belgium, transported by boat to New York, and placed on the dock at a price below the actual cost of production in the Hudson River plants. Foreign importers were building up a fine business with no profit, however, to American builders or home owners.

"The industry united and thoroughly awakened to the danger of spreading importations to all ocean and gulf ports and caused brick to be included in the new Tariff Bill.

"The duty of \$1.25 per thousand on all building brick became effective by the signing of the Bill by President Hoover. This has not yet affected the price of brick even in the New York market, and there is no possibility of the duty exerting the slightest influence elsewhere in the United States.

"New York is one of the largest producing markets in the world and more than 40 manufacturing plants in the Hudson Valley have ceased to operate, either permanently or temporarily, since foreign brick came into the market. Competitive conditions can be depended upon to prevent any advantage being taken of a duty on brick as is evidenced by the fact that the duty has not yet been reflected in the price of brick to the consumers in the Metropolitan area.

"The activities in New York are not more than 50 per cent of the volume of a year ago. The sales in Chicago, Detroit, Boston, and other large centers are similarly reduced. The shipments of brick are about in proportion to the volume of construction as compared with the conditions a year ago.

"Current reports show practically one-half of the plants closed down. There is a seasonal improvement, however, in the amount of brick shipped as compared with earlier months of the year, but as yet there is nothing to indicate immediate return to normal. Basic conditions must improve before there will be a betterment in construction."

The Philippine Hardwood Export Association has officially adopted the standard grading rules of the National Hardwood Lumber Association of the United States, according to information received from G. C. Howard, American trade commissioner at Manila.

LUMBERMEN AGREE ON NEW PRICE POLICY

"An Individual firm price policy" for lumber sales as a basic program for the entire lumber industry, was unanimously approved by representative lumbermen, meeting at Tacoma, Wash., July 2, under the auspices of the West Coast Lumbermen's Association.

With the approval of the individual firm price policy in principle went the recommendation that the chairman appoint a committee to work under the direction of Col. W. B. Greeney, secretary-manager of the association, to be submitted not later than July 15 to the industry for consideration.

The plan approved in principle does not contemplate price agreements between mills, association officials stated.

It means, it was announced, that each mill, if it approved the idea of a firm price basis for its sales, issues a printed list of prices for the various items it manufactures and then sells only on this list until it is supplanted in the regular way by another listing.

JADWIN HEADS NEW FEDERAL POWER BODY

Lieutenant General Edgar Jadwin, who as chief of army engineers gained an intimate knowledge of the country's waterways, has been selected by power commission, General Jadwin retired seven months ago from the post in which he supervised the development of waterway and worked out the Mississippi flood control program. In his new post he will pass upon applications to develop power resources in navigable streams and on public lands.

Jadwin has agreed to accept the appointment. His nomination, with those of the other four commission members will be sent to the Senate in special session this summer for confirmation.

When two members have taken office the new commission will supplant the old one, which has as its members the Secretaries of War, Interior and Agriculture, and which, since 1920, has supervised the expenditure of about \$250,000,000 for power developments.

At the beginning of the present session of Congress President Hoover recommended establishment of a new power group, because the three Secretaries were not able to give power matters the attention they merited.

J. R. Shields, city building inspector of Sacramento, reports the issuance of 163 permits during the month of June for improvements, involving an expenditure of \$175,622, bringing the total for the past six months to 786 permits for work costing \$1,774,830 as compared with 818 permits for the corresponding period in 1929, when the total operations called for an expenditure of \$2,336,950.

SOUND CREDIT AIM OF GENERAL CONTRACTORS

National establishment of sound credit policies for the entire building construction industry is expected to be effected through one of two alternate promotional plans tentatively agreed upon by the ways and means committee of the Allied Building Construction Industries at its meeting in Washington, June 23, according to E. J. Harding, a member of the committee and assistant general manager of the Associated General Contractors of America.

Both plans adequately provide for organizing, financing and maintaining nationally affiliated local credit bureaus in every important city of the country. Mr. Harding states. The plans will be submitted July 22 and 23 at Chicago, to the next conference of the Allied Building Construction Industries, comprised of some fifteen more independent national associations of general contractors, subcontractors and building supply dealers united for the cooperative utilization of both selling and buying power in the enforcement of standard credit policies.

The ways and means committee, made up of Mr. Harding, Frank Dunning of Cleveland, representing the National Builders' Supply Association, and Edward McDonnell, of Detroit, representing the Contracting Plasterers' International Association, also expects to work out prospective budgets required to achieve specific objectives and to submit them to the Chicago meeting. The committee was appointed at the meeting of the Allied Building Construction Industries, June 5, at Cleveland, when the nation-wide campaign to eliminate loose credit practices was launched.

One of the plans worked out by the committee contemplates the raising of a revolving fund through the participating national associations, which fund would be used to train field men and organize the local units and which would be repaid when the local bureau became self-supporting.

The alternate plan would utilize the services of staff members of the various participating associations in promoting the local bureau and placing them soundly on their own resources. Each plan provides for a managing director of credit bureau promotion to guide and coordinate the efforts of the field men and their relations with the Bureau of Contract Information, Inc., at Washington, which is to serve as a national clearing house of construction credit information.

The committee is to confer again before the Chicago conference and will develop further details in what contractors and building supply men generally believe to be the most important promotional drive that has been undertaken in the building construction industry in years.

STATEMENT OF CONDITIONS IN CONSTRUCTION INDUSTRY

By Julius H. Barnes, Chairman of National Business Survey Conference

Julius H. Barnes, chairman of the National Business Survey Conference, in a statement on business conditions throughout the country, says of the construction industries:

For the year to June 20, non-residential building was less than last year by a little more than \$110,000,000, or 9%; public works and public utilities exceeded last year's volume by a little over \$110,000,000, or approximately 20%; but residential building fell behind by nearly \$500,000,000. The comparative figures for contracts awarded during these periods were: non-residential building—this year, \$1,136,000,000 against \$1,246,000,000 last year; public works and public utilities—this year, \$648,000,000 against \$572,000,000 last year; residential building—this year, \$554,000,000 against \$1,045,000,000 last year.

Total building contracts for all classes this year to June 2 were \$2,375,000,000, against \$2,864,000,000 for 1929 and \$3,275,000,000 for 1928. (The building contract figures are from the F. W. Dodge Corporation).

May permits for additions, alterations, and repairs in 295 cities show 2% increase in value for May over April, and April for these same cities was 7% greater than March.

Awards of concrete pavement to June 14 totaled 73,925,716 square yards as compared with 65,473,233 to June 15, 1929, and 71,446,632 to June 16, 1928. Contracts awaiting award are 24% above 1929 and 11 per cent above 1928 on the same dates.

Concrete road yardage continues to exceed by a substantial margin road awards in any previous year, being 27% greater than 1929 and 21% greater than 1928. Street and alley yardage still falls short of previous records in nearby years.

Shipments of cement in May increased 30% over April and 3% above May, 1929. Production exceeded shipments only slightly.

The lime industry is more than 13% below last year. Shipments of chemical lime are at the same level as last year, but the demand for lime for construction purposes continues low. Agricultural lime is dormant at this season.

Shipments of crushed stone, sand and gravel are running 5 to 10% below the same period of last year. The demand for road construction purposes is about the same as last year, but railroad ballast orders have been considerably curtailed.

Structural Steel

In the early weeks of June inquiries for structural steel were in good volume, representing the highest tonnage reached in a year and a half. In May new orders placed increased sharply over new orders for April, although approximately 12% under new orders in May, 1929. Shipments in May, reflecting conditions earlier in the year, were under April and also under May last year.

Orders for concrete bars during the year to date totaled 152,000 tons, as contrasted with 160,000 tons in the corresponding portions of 1929.

Shipments of sanitary-ware followed the lag in residential building, being substantially smaller in May this year than in May, 1929.

Shipments of porcelain plumbing

fixtures in the first five months of 1930 were 45% below shipments for the same period of 1929, and shipments of plumbing and heating supplies were 50% below.

May shipments of plate glass were 16% below May, 1929, while production was 2% lower and stocks were larger.

During the past few weeks the production of lumber has declined steadily and at present is 20% below the same date last year. Shipments and orders continue below production and west coast mills are operating at less than 60% capacity.

The average price index for building materials shows a slight softening in June as compared with May for sand, crushed stone, cement, common brick, and lumber, with gravel, structural steel, and hollow tile remaining firm or increasing slightly.

Iron and Steel Industries

Pig iron production for the first five months of 1930 was 14.5% below production in the corresponding part of 1929,—this part of 1929 having a record production,—and being 15,387,000 tons was within 10,000 tons of production during the first five months of 1928, a good year. The daily average production in May of this year was within 1% of the daily average production in May, 1928, and within 5% of the daily average in May, 1927, but 17% below May, 1929, which was a record for May.

Output of steel ingots in the first five months of 1930 was 20,352,000 tons, this amount being exceeded in a like period only in three earlier years.

Specifications during May for steel to be used in shipbuilding increased to 40,000 tons. Gas and lime pipe mills with few exceptions have orders on their books which will carry them at capacity to the end of the year, the aggregate being in excess of 1,600,000 tons. Orders received by such mills in May and June to date have exceeded 500,000 tons, a record figure for such a period.

The level of iron and steel prices declined somewhat further in May and the first week of June, but for several weeks has now remained stationary at a point approximately 10% below the level in May, 1929, and 4% below the level at the middle of 1928.

Indices show employment in the iron and steel industry slightly less in May than in April, and at almost exactly the same point as in May, 1928, but 10% under May, 1929, and with payrolls about 4% under May, 1928, and 19% under May, 1929.

Hardware

Sales of hardware at retail, as reported by 900 dealers through their national association, were on the average 4% under sales in May, 1929. Manufacturers of items of hardware that are seasonal have now brought their operations to the 1929 level, but those making items for use in construction are operating approximately at 65%. Payrolls of manufacturers of hardware in all of its forms show about 7% more employees than in May, 1928, but 13% less, payroll disbursements, and 11% fewer em-

ployees and 24% smaller payroll disbursements than in May 1929.

Machinery

The machinery industry as a whole is operating between 65 and 70% of capacity, with inquiries and orders in May less than in April. Exports of construction, metal-working, and oil well and refining machinery for the first five months of 1930 averaged approximately 25% over exports in the corresponding part of 1929.

Orders in May for machine tools were 25% under April, reaching their lowest point since November, 1927. Shipments in May were 16% less than in April. Unfilled orders on the books at the end of May represented something less than 2 months' work at the May rate of production. Employment indices showed larger forces than in 1928 but payrolls about 12% less, both employment and payrolls being substantially less than in May, 1929.

Heavy machinery builders' activities represent about 70% of capacity.

Electrical Manufacturers

Activity in electrical machinery in May of this year continued below the level in the corresponding part of 1929 but was approximately 20% over the level in the corresponding period of 1928. The May level of activity was lower than in any of the preceding months this year.

Electrical refrigeration continues active, but radio sales and sales of other appliances are seasonally at a low point.

STANDARD DESIGNING OF HOMES IS STUDIED

A certain amount of standardization in the planning and designing of homes would open up increased possibilities for marketing standardized lumber and other building materials, it was stated orally June 24 by the chief of the lumber division, Axel H. Oxholm, of the Department of commerce, says the U. S. Daily.

Frequently the designer does not consider the standard sizes of width and length of lumber, and therefore in actual construction the next size must be cut down, resulting in considerable waste, he said. The manufacturer of ready cut lumber for building purposes endeavors to manufacture the lumber items of a house to exact sizes required in an effort to reduce hand sawing on the job to a minimum.

Mr. Oxholm pointed out that a sawmill or woodworking plant catering to this business has little difficulty in finding outlets for practically all sizes of lumber produced. The movement of lumber manufacture is rapidly gaining ground and eventually will reduce the cost of construction, it was explained.

According to Mr. Oxholm, the local designer or builder will not need to cramp his style or individuality, since in most instances it makes little difference whether the width of a room is 14 feet or 14 feet 2 inches.

It is evident, Mr. Oxholm said, that 2 inches in excess of a standard length means the purchase of the next longest even length and the waste of 2 inches of good lumber.

BILLION DOLLARS AVAILABLE FOR "NON-SPEC" HOME BUILDING

There is nearly a billion dollars "praying" to be borrowed for non-speculative home construction and ready to be passed out over the counters tomorrow morning in 46 cities in the United States. Herbert U. Nelson, executive secretary of the National Association of Real Estate Boards, today told the Association directors assembled in Toronto, Canada, for the organization's 23rd annual convention.

San Francisco has \$52,000,000 ready for such a purpose. Los Angeles has \$22,000,000 and San Diego has \$6,000,000, Nelson declared.

People who have been saying that money is tight in the United States just haven't been around to their brokers lately, for if they want it for sound building projects, they probably will be ushered right into the president's private office, said Mr. Nelson.

Because the Association felt that resumption of building asked by President Hoover had been delayed due to a "timidity" on the part of the public to ask for construction loans, a survey on what is actually available in 46 widely separated cities was completed by the Association a week ago, said Mr. Nelson.

The survey, which is supported by documentary evidence from individual banks and mortgage houses, revealed that \$843,712,000 can be loaned "at once" in these 46 cities for non-speculative building. Lending institutions in Chicago reported the highest figure available, the returns from that city totaling \$300,000,000 ready to be loaned for this purpose.

Pointing out that much of the unemployment in the States has been due to a country-wide curtailment of residence and other construction, which has affected not only the building trades workers, but the thousands of employees of factories manufacturing materials and equipment used in building, Mr. Nelson stated that the stock market crash of last fall and the subsequent business depression has "scared" people throughout the country from asking for construction loans.

"The man in the street is still talking hard times and really doesn't believe he could raise very much money for home building or any other construction enterprise in which he might be interested," said Mr. Nelson. "If you asked the average fellow if this is a good time for home buying or building, he would gloomily say, no! Yet it is a good time, always is a good time, when mortgage money is available.

"We have believed for some weeks that the tide was turning and that money was again ready for sound building projects, especially for home building of a non-speculative character. For this reason we made a very careful survey only last month on what is available, not for the fall, or for the year, but what is available this very minute, in 46 cities, scattered from coast to coast.

"Inquiries addressed to local banks, mortgage houses, and representatives of insurance companies and others usually having funds to lend for such purposes, stressed the point that we only wanted figures on non-speculative projects. It is only a resumption of building of this character

which will produce steady incomes and good returns on investments that will aid business conditions. The financing of speculative enterprises or shaky projects which might fail to give the investors fair earnings would only add to the depression. Hundreds of the reporting financial institutions stated that their funds were ready but only for sound enterprises.

"Invariably these institutions, some of which bear names nationally known, expressed great preference for the individual home owner, and declared that all of their available funds could be secured by dependable people undertaking home ownership.

"The returns, which were collected and checked by the local real estate boards in the cities where the surveys were made, also made it plain that these institutions understood that general totals for the cities were to be made public and that people would be urged to call upon them for funds up to these amounts, perhaps at once. It is significant that even very small towns show an adequate amount available for home construction and other building, so that all and people everywhere can undertake home ownership immediately if the money is not in the large towns, they wish to do so.

PISTOR, STEEL CHIEF, SAILS FOR EUROPE

George E. J. Pistor of the Hay Foundry & Iron Works, New York, and treasurer of the American Institute of Steel Construction, sails next Thursday aboard the Hamburg-American liner, New York, for a two months tour of Europe. Incidentally Mr. Pistor will represent the Institute at a number of important meetings abroad while he is away.

On July 18 he is scheduled to deliver an address at the hall of the Institute of Mechanical Engineers, London, on the art and the economics of skyscrapers. Preceding the address Mr. Pistor will be entertained at luncheon by the British Steelwork Association at the Grosvenor Hotel, London. Supplementing the speech will be shown a motion picture film illustrating the method of building a skyscraper in the United States. The audience will consist of British steel mill representatives, fabricators, engineers and others interested in construction work.

On July 21 Mr. Pistor will address a joint meeting of the Royal Institution of Engineers and the Association of Dutch Architects at The Hague, Holland. Following this Mr. Pistor will proceed to Duesseldorf, Germany, as the guest of the Stahlwerks-Verband, A. G., whose officials and associates he will address on July 23.

Returning via France Mr. Pistor has been requested by the Office Technique Pour L'Utilisation De L'Acier to address the French Structural Steel interests in Paris on August 20. On September 1 he will attend the International Congress of Steel Construction at Liege, Belgium, where an international array of structural interests has been called under the auspices of the Belgium Government.

HERE — THERE — EVERYWHERE

San Jose Brick and Tile Co. and Nils E. Johnson, general contractor, have filed applications for membership in the San Francisco Builders' Exchange.

Although building activities in Roseville, Placer county, are at their lowest ebb, the carpenter's union has demanded a raise in pay. The union wage has been boosted from \$8 to \$9 a day, effective September 1. The five-day week will go into effect immediately.

Settlement of all but nine death claims out of more than 400 and of all demands for losses for personal property and property damages of all kinds arising out of the St. Francis dam disaster of March 13, 1928, has been announced. The cost to the city of Los Angeles will be about \$7,000,000, which includes \$1,000,000 used at the time of the disaster for relief work.

Carl Richards was elected president of the Master Painters and Decorators Kesterton Lumber Company, operating a plant at Dorris, Siskiyou county, suffered a \$775,000 fire loss June 28. Approximately 12,000,000 feet of stocked lumber was destroyed.

To determine the proportion of the structural steel output used in buildings, bridges, other heavy structures and light structural work, the Census Bureau, at the request of the American Institute of Steel Construction, is making a special survey covering 1928 and 1929. Although structural steel bookings and shipments are currently reported, no comprehensive information has been available on the type of construction in which this tonnage is used.

Association of San Jose at the semi-annual meeting of that organization July 2. Other officers elected were: Harry Loose, vice-president; C. E. Humphrey, second vice-president; H. E. Hunter, secretary; Dan Leonardi, sergeant-at-arms; Chas. Lynds, statistician.

W. D. Allen of Palo Alto was elected president of the National Retail Hardware Association at the annual convention at St. Louis June 27. Others chosen were: Thomas B. Howell, Richmond, Va., vice-president, and H. P. Sheels, Indianapolis, managing director.

Bar cards showing new standard billing weights for reinforcing steel are being distributed by the Concrete Reinforcing Steel Institute, Chicago, Ill.

Improved Havemeyer steel joists, which are now made by welding together specially designed twin-tee hot-rolled shapes as top and bottom chords with plain round bars as web members, are described in a 24-page illustrated booklet issued by the Concrete Steel Co., New York City. Design instruction, specifications and load tables for use in steel joist floor construction are also included.

The total value of building permits issued in Seattle for the first six months of the current year involved an expenditure of \$16,332,380, as compared with \$20,508,300 for the corresponding period in 1929.

ALONG THE LINE

A. Emory Wishon has been elected vice-president and general manager of the Pacific Gas and Electric Company.

Frank A. Morrell, 46, for ten years city electrical inspector at Stockton, died at his home in that city, Sunday, July 6. Death was due to heart trouble.

H. E. Wood, city building inspector of El Cerrito, Contra Costa county, has submitted his resignation to the city council. His successor has not yet been appointed.

After studying architecture in Europe for the past four years, Ray G. Herold of San Jose, plans to open an office in the San Francisco Bay District for the practice of architecture.

F. W. McCarson and George D. Macomber, candidates for the office of county surveyor of Stanislaus County, told of their qualifications for that office at a recent meeting of the Modesto Chapter, American Association of Engineers.

Fresno took the first step towards municipal ownership of gas and electric utilities when C. C. Van Valkenburgh, Jr., city engineer, was instructed to secure options on gas property from which a sufficient quantity of natural gas may be obtained for the gas and power generation needs of the city's consumers.

Theodore M. Matson, formerly resident engineer of the San Francisco Traffic Survey Committee, who prepared the basic data for the McClintock traffic report, has been appointed assistant traffic engineer of Philadelphia, it is announced by Ralph W. Robinson, executive secretary of the Traffic Survey Committee. Robinson received word of Matson's appointment in a letter from McClintock announcing the windup of a traffic survey made for Kansas City. Matson is a graduate of Stanford University and for two years was research engineer for the Pacific Gas and Electric Company.

TRADE NOTES

Victor G. Paulsen, for the past five years with the Pacific Portland Cement Company, has been appointed Pacific Coast representative for the Atlas-White Cement Co. Paulsen will maintain headquarters at the San Francisco Builders' Exchange.

Flanagan Machinery Co., Inc., formerly located at 321 Clay Street, is occupying new quarters at 522 Fourth St., Oakland. The need to meet demand for increased production and the installation of new and more modern equipment, necessitated the move.

A. Leschen Rope Company, manufacturers of wire rope and wire rope tramways, with head office and factory at St. Louis, Missouri, and Pacific Coast offices, formerly located in the Monadnock Building, has just taken larger quarters in the new building at 529 Fourth St., San Francisco, where one floor and mezzanine is occupied. It is anticipated facilities will be increased 75% to 100% in the new location. The San Francisco office is headquarters for Pacific Coast states, and branch stock is maintained in Portland Seattle and Los Angeles.

JUNE BUILDING TOTALS

Following is a compilation of building permit totals of the principal cities in the Pacific Coast area for the month of June, 1930, and for comparison, those of June, 1929, as reported by building department executives in the cities listed:

City	CALIFORNIA		
	No.	June, 1930	June, 1929
Alameda	71		
Alhambra	65	\$ 71,576	\$ 134,116
Anaheim		144,250	150,290
Bakersfield		68,010	33,270
Berkeley	53	111,622	95,528
Beverly Hills	132	197,802	355,885
Burbank	93	576,050	572,215
Burlingame	33	65,760	115,970
Carmel	12	39,150	91,162
Chula Vista	17	16,100	10,395
Colton	9	13,850	47,235
Coronado		15,000	3,350
Culver City	3	16,077	8,045
Emeryville		63,551	45,126
Eureka	6	17,730	8,200
Fresno	45	46,735	235,490
Fullerton	37	109,682	114,549
Glendale	91	50,695	14,405
Hayward	101	407,915	559,248
Huntington Park	42	46,883	850
Inglewood	37	157,205	301,545
Long Beach	407	96,450	37,675
Los Angeles	2,524	1,004,575	1,019,420
Los Gatos	6	5,485,188	8,002,185
Modesto	25	3,200	17,445
Monrovia	15	25,019	42,632
Montebello	8	22,300	38,800
Monterey	22	11,175	11,775
National City	17	60,792	186,705
Oakland	306	8,517	22,540
Ontario	29	883,199	933,692
Orange	9	29,350	18,720
Pacific Grove	12	16,750	59,100
Palo Alto	32	21,735	15,500
Palos Verdes Estates	3	415,938	115,075
Pasadena	271	37,500	45,600
Petaluma	12	1,261,834	896,931
Piedmont	63	16,800	21,320
Pomona	17	37,043	118,952
Redlands	17	57,429	45,695
Redwood City	25	39,659	36,610
Richmond	34	55,330	49,110
Riverside	42	30,710	76,740

THE OBSERVER

What He Hears and Sees on His Rounds

Electrical and plumbing regulations in South San Francisco will be uniform with those in other cities of San Mateo county, with the adoption of an ordinance last week by the city council.

Mr. Unlicensed Contractor and Sub-Contractor. The bogey man will get you if you don't watch out.

General contractors and sub-contractors who are operating in the State of California without a permit issued (since July 1) by the State Department of Professional and Vocational Standards, are not within the law.

Those general contractors and sub-contractors who are now legally licensed should check up and make sure that everyone with whom they are doing business has his license. Material dealers should do likewise. Their contractor customers must have licenses as the material dealer is equally liable with the contractor under the law.

REMEMBER—an unlicensed contractor has no standing in court.

John B. Leonard, superintendent of the Bureau of Building Inspection of the San Francisco Department of Public Works, has instructed his force to issue no permits to contractors unless they produce their state licenses. Building inspectors in his department have been directed to check up in the field on contractors and sub-contractors.

If you have not secured a state license since July 1, 1930, do so now.

The state license law has been in effect for a year. It has been sufficiently advertised. Contractors and sub-contractors operating without a license do so at their own risk.

Applications for new licenses or renewals may be filed with the State Department of Professional and Vocational Standards in the Phelan Building, San Francisco, or with the Registrar of Contractors, State Capitol Building, Sacramento. The license fee is \$5 a year.

Total contract awards for building and engineering construction during the first five months of 1930 were 18 per cent smaller than in the like 1929 period. This decline may be attributed practically in its entirety to the slump in the housing division, since the declines in commercial and industrial construction are about offset by expanded activities in public works and utilities and other fields of a semi-public nature, says the Standard Statistics Company, of New York, in a current survey, parts of which follow:

"The prospects are that second half year results in relation to 1929 levels will compare more favorably than those for the first six months. However, this possibility rests largely on the sharpness of last year's recession, rather than on any fundamental improvement to be expected during the remainder of this year. For the full twelve months, on the basis of a probable closing of the gap between levels of 1929 and 1930, during the August-December period, it is to be expected that the decline from last year will be somewhat lower than that previously indicated, probably amounting to some 10 to 12 per cent.

"In the building materials division, cement and gypsum products are the most favorably situated. Consumption of cement is fully up to the levels of a year ago, in spite of the building recession, sales being stimulated by the abnormal volume of public works construction. Gypsum sales naturally have declined, but the price advances since last year improve the earnings prospects for producers."

During the month of June, 1930, the Los Angeles city building department issued 2524 permits with an estimated valuation of \$5,485,138, as compared with 2325 permits with an estimated valuation of \$8,002,185 for the same month a year ago and 2772 permits with an estimated valuation of \$7,141,950 for May, 1930. Los Angeles' building total for the first six months of 1930 was \$39,712,901 as compared with \$54,071,599 for the corresponding period in 1929.

J. Elmer Morgan, editor of the Journal of the National Education Association, predicts the four-hour working day. The rapid rate of replacement of men by machines makes it reasonable to believe the working week gradually will be shortened.

"The unemployment problem is not going to solve itself," says the Ferguson Cross Section.

"In former days when folks shrugged their shoulders at poverty and piously murmured, 'the poor we have always with us,' our thinking did not go much deeper than bread-line sob stuff.

"Now that we recognize that the payroll is the yardstick of prosperity, there is likely to be some united effort of a constructive sort to ally or remove preventable causes of unemployment.

"What our workers need, after all, is not sympathy or charity, but assurance of an opportunity to earn the money to buy what they need.

"One thing is certain—something will be done about it, either by business through co-operative research or by the government. Idle plants and loss of valuable organization are too heavy a tax for business to ignore. On the other hand, the health and comfort of one hundred and twenty-five million people offers to legislators a tempting opportunity to step in with further government regulations of business.

"Some great interest or group of interests may soon decide to establish a foundation to make a new and thorough study of the problems of seasonal unemployment, the question of what to do with older workers, and how to use those who are displaced by machinery. Recommendations from a body supported by industrial capital will be accepted and put into effect with less friction and disturbance than will edicts enforced by government action.

"It looks like our move"

While the recovery of general business from last Autumn's sudden depression still lags unseasonably, engineering construction activities in most departments maintain a fair pace, though well below that required by construction budgets set up last Winter, says Engineering News-Record. But housing and for that matter all building—is at a low ebb, as it was last year, in spite of the fact that the supply of banking and commercial money is much more free and interest rates much lower than they were in 1929. Men in close contact with building operations say that they expect the second half of the year to show greater activity in large commercial building, while no one is similarly optimistic about residential work. Neither of the two fields enjoys the same credit facilities as mercantile business, though commercial building is closer to the general money market than is residential building. If money or credit were made available to these fields as readily as to industry and commerce, they would probably show a sharp improvement. Creation of an organized financial system to supply credit to the building industry is, in fact, the greatest need of the present banking structure. It should not be beyond the powers of men who are ready to build up credit systems of thousands of millions on the basis of railway and utility properties.

H. H. Cobb and Charles Lee, Jr., have been refused master plumber licenses to operate in the city of Fresno.

City Commissioner of Finance Glass refuses to issue licenses to the men on the ground that they do not possess state and city certificates as required by city ordinances.

S. F. EXCHANGE PICNIC PLANS BEING COMPLETED

Arrangements are being completed by the Entertainment Committee of the San Francisco Builders' Exchange for the first annual basket-lunch picnic to be held in Mitchell Canyon, at the foot of Mt. Diablo, Contra Costa County, Sunday, July 20, it is announced by W. H. George, president of the exchange.

Committees have outlined a program of athletic events in addition to barnyard golf, swimming, dancing and games for the kiddies. Barbecued meat and hot coffee will be served by the exchange.

Those planning to attend the picnic are requested to notify the secretary's office how many will be in their party, that arrangements might be made to provide sufficient amusement and food for all.

U. S. OPENS FIELD OFFICE IN PANAMA TO AID HIGHWAY

To cooperate with the Governments of the Central American countries in making preliminary surveys to determine the most desirable route for an inter-American highway, the Bureau of Public Roads is opening a field office in Panama City, the U. S. Department of Agriculture announces.

E. W. James, chief of the Division of Highway Transport of the bureau, who is in charge of organizing the work sailed for Panama June 21.

Thomas A. Forbes and D. Tucker Brown, Senior Highway Engineers and Marcel J. Russard, Assistant Highway Engineer, will constitute the bureau force of the Panama City field office.

Congress authorized this cooperative effort and appropriated \$50,000. The Inter-American Highway Congress in October, 1929, held at the invitation of the Republic of Panama in Panama City to discuss the road problems that each country would have to solve to make possible a connecting road, asked the Pan American Union to appoint an inter-American highway commission of from three to eight members from the participating countries to carry on the work of planning and constructing such a trunk line. Delegates from each of the Central American republics and from the United States attended the Congress.

The Bureau of Public Roads will cooperate with the Commission the department explains, and will assist in making surveys only as the several countries request such help. Five of them, Costa Rica, Nicaragua, Guatemala, Salvador and Panama, have requested assistance or indicated their adherence to the plan. Guatemala, Costa Rica and Panama have asked for assistance. Mexico has already planned a route from the Rio Grande at Laredo, Texas to the Guatemalan frontier at Suchiate, which will be constructed as rapidly as funds permit, and will cooperate to the degree that the interests of the country dictate.

FORM SUBSIDIARY

Warren Brothers Company, paving contractors, announce the formation of the Warren Brothers Financia Corporation, to deal in securities primarily acquired in connection with its foreign and domestic business, and the Warren Municipal Securities, Inc., a wholly owned subsidiary of the corporation. The latter company will deal exclusively in domestic, tax-exempt securities, whereas, Warren Brothers Financial Corporation will largely engage in foreign financing in connection with Warren Brothers Co.'s activities. The corporation, of which Charles R. Gow is president, has main offices in Cambridge, Mass.

RESIGNS POSITION RATHER THAN CUT SALARIES

Disagreeing with a salary policy proposed by the new administration of the Pickering Lumber Co., D. H. Steinmetz, vice president and general Pacific Coast manager for the past 30 years, resigned at Sonora, July 2.

Steinmetz said he had planned to retire but his disagreement with a policy which would have cut the salaries of hundreds of workmen led him to decide to resign immediately.

Mrs. Zoe Louise Pickering, widow of W. A. Pickering, is the sole owner of the \$40,000,000 lumber industry. Since Pickering's death last month a board of control has been in progress of reorganization at Kansas City.

With Steinmetz' resignation, J. C. Rassenfoss, manager of the Standard plant, and B. J. Ziegler, manager of the Tuolumne plant, left by airplane for Kansas City.

CHEMICALLY TREATED WOOD DOOR DEFEATS FIRE

Columbia University, through Prof. Albin H. Beyer of the testing laboratories of that institution, gave its approval to the latest method of flame-proofing wood when laboratory tests of the process were made recently at the plant of Henry Klein & Company, Elmhurst, L. I.

A two inch thick door of the wood held back smoke and flames six times as long as did a metal-covered door carrying the label of the Fire Underwriters' Laboratories. The protracted immunity of wood to fire is accomplished by impregnating lumber under high pressure with a secret chemical preparation. When attacked by fire, this chemical throws off a gas which kills fire on the same principle as a fire extinguisher.

In each row of cells of the wood are deposited minute chemical crystals. As one row of cells comes in contact with the flames it offers temporary resistance to the fire and is in turn supported by the millions of rows of cells behind it.

The test was conducted for Henry Klein, manufacturer, who invented the process. The metal-covered and the wooden doors were set in the sides of a large furnace, the flames sweeping their interior faces.

The metal-covered door quickly became untouchably hot, passing 120 degrees in about three minutes, and in fifteen minutes passing 660 degrees. The wood door's exterior reached 160 degrees after thirty minutes and at the end of forty-five minutes was still under 150 degrees. It did not go over 200 degrees at any time.

In the metal-covered door, after ten minutes smoke poured through the joints in heavy clouds and flames appeared. The wooden door held back both smoke and flames for a full hour until it was less than one-eighth of an inch thick.

Prof. Beyer said that the definite fire resistance of the wood is attained by the proper control of the impregnation of the chemicals. He said the door used in the test was made of treated wood, the complete processing of which took about four and a half months, first by air drying and kiln drying, then impregnation, and then air drying and kiln drying again after the treatment.

K. C. IRON WORKERS STRIKE FOR INCREASED WAGE

Members of the Kansas City iron workers union demanding \$12 a day instead of \$10.50, went on strike July 1. Work was halted on the first million dollar unit of the Southwestern Bell Telephone Company's long distance exchange building.

The builders' association, comprising local contractors, sought an injunction in circuit court to prevent the iron workers from striking, and from attempting to obtain an increase of the wage scale.

Under a contract to run two years, signed March 11 by building trades representatives and contractors, the iron workers would receive \$10.50 a day and an increase to \$11 a day Jan. 1, 1931.

N. Y. TO RESTRICT BUILDING BOND RATES

To provide incentive for the initiation of public construction projects, Albert Conway, New York State Superintendent of Insurance, announces that the rates for public contract bonds for all departments and divisions of the State of New York should not exceed one-half of one per cent of the contract price for annum for Class A construction and one per cent of the contract price for any period up to 24 months with annual renewal thereafter at one-half of one per cent on the amount of unfinished contracts at each annual renewal for Class B construction.

This action on the part of the State superintendent of insurance was taken as a result of a recent announcement that an investigation would be made by him of the rates charged for contract bonds in order to see if the charges could not be reduced as a measure to reduce the costs of construction and to assist in relieving unemployment.

PRESERVING POPLAR TREE

The Leatherwood Lumber Co., operating sawmills on Leatherwood Creek several miles from Cornettsville, Ky., is preserving what is believed to be one of the largest yellow poplar trees in the state, or perhaps in the entire country. The tree in question is 36 feet in circumference and 12 feet in diameter, and is yet quite well preserved. It is tall and stately, being over 125 feet to its first branch. To preserve the mammoth tree to posterity, ample protection is being given it. The company has marketed recently a number of big yellow poplar trees, some of them 8 and 10 feet in diameter.

EMPLOYEES GET STOCK.

E. T. Crane, Jr., head of Crane Company, plumbing supplies manufacturers, has distributed \$4,000,000 worth of the concerns' stock among employees.

The gift was made from Crane's personal holdings and was his third since 1926. The total value of the stock amounted to \$10,000,000.

Employees who have been with the company ten years or more, about 5,000 in number, were beneficiaries.

BANKRUPT

The Latham Square Corporation of Oakland, which filed a voluntary petition in bankruptcy May 10, on July 1 filed its schedule in United States District Court, showing assets of \$1,516,266 and liabilities of \$1,146,089. The principal creditor is the American Trust Company.

Building News Section

APARTMENTS

Plans Being Prepared.

APARTMENTS Cost, \$45,000
SAN FRANCISCO. SE 14th Ave. and
Taraual St.

Three-story frame and stucco apts.
(six 2-room and six 3-room apts.;
brick basement).

Owner—Harry J. Rock.

Architect—Irvine & Ebbets, Call Bldg.
Bids will be taken in about 2 weeks.

Plans Being Prepared.

APARTMENTS Cost, \$75,000
SAN FRANCISCO. NW Divisadero &
Jefferson.

Three-story frame and stucco apts.
(Spanish type; brick basement; 15
3-room apts.)

Owner—Viggo Rassmussen, 2230 Fran-
cisco St.

Architect—Irvine & Ebbets, Call Bldg.
Bids will be taken in about 2 weeks.

Construction Temporarily Postponed.

ALTERATIONS Cost, \$6000
ALAMEDA, Alameda Co., Cal.
Alter present residence for apts.

Owner—Mrs. H. W. Bridges.

Architect—Guy L. Brown, American
Bank Bldg., Oakland.

As previously reported, lowest bid
was submitted by James Fennelly, 2300
Mitchel St., Oakland.

Ornamental Iron Contract Awarded.

APARTMENTS Cost, \$75,000
BURLINGAME, San Mateo Co., Cal
El Camino Real.

Three-story and basement frame and
stucco apartments.

Owner—Philip Webster, 2401 Fulton
Ave., Berkeley.

Architect—Edwards & Schary, 605
Market St., San Francisco.

Contractor—Daly Bros., Burlingame.
Ornamental Iron—Patterson & Koster
Iron Works, 230 13th St., San
Francisco.

As previously reported concrete ma-
terials awarded to H. E. Casey, 307
E St., San Mateo; reinforced con-
crete to W. C. Hauck, 230 San Bruno
Ave., S. F.; lumber to San Mateo
Planing Mill, 501 5th St., San Mateo;
plumbing to Morrison & Blair, 415
Villa Terrace, San Mateo; heating to
P. H. Phillips; steel sash to Michel &
Pfeiffer Iron Works, Harrison and
Tenth Sts., S. F.

Plans To Be Prepared.

APARTMENTS Cost, \$—
SANTA BARBARA, Calif. 322 East
Micheltorena St.

Three-story frame and stucco apts.
(20 apts.)

Owner—L. M. Holman, 1426 Garden
St., Santa Barbara.

Architect—Not Selected.

Plans Completed.

APARTMENTS Cost, \$75,000
STOCKTON, San Joaquin Co., Cal.
American and Lindsay Streets.

Three-story brick apartments (30 2
and 3-room apts.)

Owner—Mrs. Francis Gardner.

Architect—Ralph Morrell, Union
Bldg., Stockton.

As soon as financing arrangements
are completed project will go ahead.

Sub-Figures To Be Taken.

APARTMENTS Cost, \$250,000
SAN FRANCISCO. N Vallejo and
W Franklin Streets.

Six-story concrete apartments (2
basements; 48 3 and 4-room apts.)

Owner and Builder—W. Van Herick,
50 Laguna St., San Francisco.

Engineer—J. G. Little Co., 251 Kear-
ny St., San Francisco.

Sub-bids will be taken in about two
weeks.

Sub-Contracts Awarded

APARTMENTS Cost, \$50,000
SAN FRANCISCO. S Jefferson St.
192 E Broderick St.

Three-story and basement frame and
stucco apartments (12 3 and 4-
room apts.)

Owner—J. French.

Plans by D. E. Jackle, Call Bldg., San
Francisco.

Contractor—Standard Bldg. Co., 268
Castaneda Ave., San Francisco.
(Mr. Carl Gehlert).

Lumber—Loop Lumber Co., Foot of
16th St., Central Basin, S. F.

Plumbing—Higgins & Krause, 730
Tehama St., San Francisco.

Heating—Rodoni-Becker Co., 455 10th
St., San Francisco.

Electric Wiring—Johnson Electric
Co., 758 Monterey Blvd., S. F.

Concrete—Golden Gate Concrete Co.,
2271 Turk St., San Francisco.

Bids are being taken on interior
and exterior plastering, interior tile
work, sash, doors, mill work, brick
work (brick veneer front), hardwood
floors, window shades and finish
hardware.

Incinerator Contract Awarded.

APARTMENTS Cost, \$75,000
BURLINGAME, San Mateo Co., Cal
El Camino Real.

Three-story and basement frame and
stucco apartments.

Owner—Philip Webster, 2401 Fulton
Ave., Berkeley.

Architect—Edwards & Schary, 605
Market St., San Francisco.

Contractor—Daly Bros., Burlingame.

ELECTRIC HAMMERS ELECTRIC DRILLS GRINDERS, BUFFERS

PETER H. NELSON

Labor Saving Portable Electric
Tools.

1222 Mission St. Underhill
San Francisco 1267

Owner—Joseph Hagan, 1708 Sacra-
mento Street.

Architects—Henry C. Smith and A. R.
Williams, Humboldt Bank Bldg.

Bids will be called for in about three
or four weeks.

Preparing Plans.

APARTMENTS Cost, \$21,000
MONTEREY, Monterey Co., Cal. De-
vine and Wave Sts.

Two-story frame and stucco apart-
ments (Nine 2- 3- and 4-room
apts.)

Owner and Builder—Wade Halstead,
1176 Harrison St., Monterey.

Architect—W. W. Hastings, Pryor
Bldg., Monterey.

BONDS

MILPITAS, Santa Clara Co., Cal.—
Election will be held July 12 in Mil-
pitas School District to vote direct

tax of \$5,000 to finance school im-
provements. Trustees of district are:
A. L. Pashote and Joseph A. Sprang-
ler.

CERES, Stanislaus Co., Cal.—Until
July 15 bids will be received by coun-
ty supervisors at Modesto for the pur-
chase of the \$75,000 bond issue of the

Ceres School District; proceeds of the
sale to finance erection of a new school
building, plans for which are being
completed by Architect W. H. Weeks,
Hunter-Dulin Bldg., San Francisco;
1756 Franklin St., Oakland, and Bank
of Italy Bldg., San Jose.

LAKEPORT Lake Co., Cal.—Election
will be held July 13 in Sulphur
Bank School District to vote bonds of

\$8,000 to finance school improvements.
Trustees of the district are: Luella B.
Carr, Albert F. Welbert and A. L.
Story.

ALTURAS, Modoc Co., Cal.—Election
will be held July 23 in Willow
Ranch School District to vote bonds

of \$2,000 to finance school improve-
ments. Trustees of the district are: J.
M. Thompson, W. D. Bishop and J. A.
Koskela.

SAN MATEO, San Mateo Co., Cal.—
Election will be held July 12 in Rav-
enswood School District to vote direct

tax to finance school improve-
ments. Trustees of the district are:
J. P. Neffing and E. R. Talt.

SIAFTER, Kern Co., Cal.—Rich-
land School District will hold elec-
tion July 7 to vote bonds of \$10,450

for additions to Richland School.

CHURCHES

Preparing Working Drawings.

CHURCH Cost, \$50,000
POMONA, Los Angeles Co., Cal. Gibbs
and Alvarado Sts.

Masonry church (auditorium to seat
300; 118x160-ft.)

Owner—St. Paul's Episcopal Church
(Rev. Betram A. Warren, pastor).

Architect—Carleton M. Winslow, Ar-
chitects' Bldg., Los Angeles.

Working Drawings Being Prepared.
CHURCH Cost, \$20,000

EUREKA, Humboldt Co., Cal.
One-story redwood church (Colonial
type)

Owner—First Methodist Church.
Architect—Rollin S. Tuttle, Box C, Los Gatos.
Bids will be taken in about 60 days.

Contract Awarded.
ALTERATIONS Cost, \$11,000
STOCKTON, San Joaquin Co., Cal.
Alterations and additions to Temple.
Owner—Congregation Khyim Ahaavim.
Architect—None.
Contractor—L. S. Peletz, 1660 West Acacia Ave., Stockton.

Funds Raised—Plans To Be Prepared.
CHURCH Cost, \$3000
GAREHNVILLE, Humboldt Co., Cal.
Presbyterian Church.
Owner—Eel River Presbyterian Parish Church, Rev. Harold G. Morehouse pastor, Garberville.
Architect Not Yet Selected.

Bids Closed—To Be Awarded July 10.
CHURCH Cost, \$—
DUNSMUIR, Siskiyou Co., Cal.
Two-story and basement concrete church.
Owner—Roman Catholic Bishop, Sacramento.
Architect—Harry Devine, California State Life Bldg., Sacramento.
Low Bidder—J. P. Brennan, Redding, \$15,835.

Complete bid listing:
J. P. Brennan.....\$15,835
B. Kelley.....16,339
Lindgren & Swinnerton, S. F.....16,449
R. B. McKenzie, Red Bluff.....17,590
Campbell Const. Co.....18,346
Schwartz & Company.....18,570
Contract to be awarded July 16.

Completing Plans.
CHURCH Cost, \$30,000
NORTH OAKLAND, Alameda Co.
Two-story frame and brick veneer church (auditorium to seat 570).
Owner—Colored Baptist Church.
Architect—Chas. W. McCall, 1404 Franklin St., Oakland.
Plans will be ready for bids in ten days.

FACTORIES AND WAREHOUSES

Contract Awarded.
PACKING HOUSE Cost, \$20,000
VISALLA, Tulare Co., Cal.
Packing house (80x110-ft.).
Owner—Klink Citrus Growers Assn.
Architect—None.
Contractor—Chas. Godfrey, Visalla.

Plans Being Completed.
SHED Cost, \$90,000
SAN FRANCISCO, Pier No. 1
One-story shed, reinforced concrete construction; steel columns, wood roof.
Owner—State Board of Harbor Commissioners.
Engineer—Frank White Ferry Bldg., San Francisco.
Plans will be ready for bids in about two weeks.

Sub Contract Awarded
ALTERATIONS Cost, \$64,000
SAN FRANCISCO, Eighteenth and Shotwell streets
Alterations and additions for distributing office building (reinforced concrete).

Owner—Pacific Gas & Electric Co., 425 Market St., San Francisco
Architect—Eng. Dept. of Owner.
Contractor—H. H. Larsen, 64 South Park St., San Francisco.

Orn. & Mis. Iron & Structural Steel.
Sullivan Iron Works, 780 Brannan Street.

Plumbing: J. J. McLeod, 1246 Golden Gate Avenue.

Heating: George Frankel, 445 Stevenson St.

Reinforced Steel: W. S. Wetenhall, 11th & Wisconsin Sts.
Sub. bids being taken on all other portions of the work.

Sub-Bids Being Taken.
ADDITIONS Cost, \$12,000
SAN FRANCISCO, S Harrison St., E Fourth St.
Two-story concrete addition to building.
Owner—Milo Coffee Company.
Engineer and Builder—James Hjul, 128 Russ St.

Plans Being Figured—Bids Close July 14th.
WAREHOUSE Cost, \$45,000
including equipment

BUSINESS OPPORTUNITIES

John P. Reiff of Reiff & Co., Drexel Bldg., Philadelphia, Pa., is anxious to represent any staple line manufactured in this territory. If interested, communicate with him direct.

Noblitt-Sparks Industries, Indianapolis, Ind., manufacturers of an electric water heater are anxious to secure an agency in this territory for its product. If interested, communicate with Mr. Dee S. Lenfesty, treasurer of the company, at the above address.

JORGENSEN COMPANY HOUSED IN NEW QUARTERS

The largest and one of the best equipped plants in Northern California for the handling of tool, alloy and special steels has just been completed and opened by the Earl M. Jorgensen Company at 534 Second St., Oakland, according to J. V. Coulter, district manager for the concern.

Ten thousand square feet of floor space is afforded by the new warehouse which is fitted with the latest and most modern apparatus for handling the special Bethlehem steels for which the company is the exclusive California distributor.

The buildings, warehouse and offices represent an investment of \$50,000 and are a monument to the success that has attended the establishment of the company in Oakland more than two years ago.

Among the features of the warehouse equipment are huge electrically operated doors and the only scale on the Coast graduated by one pound that will weigh from one to 10,000 pounds.

GETS PATENT RIGHTS

Erl H. Richardson of San Francisco, manufacturer of Richardson Fireplace Forms, is the recipient of patents from the United States Government. After four years of constant work through the Patent Office, a patent was issued Richardson covering many important improvements and an entirely new principle of controlling and conserving fireplace radiation. The patented Richardson Fireplace Form is both an improved damper and guide to determine what the mason and bricklayer will do to the most vital parts of chimney and fireplace. It insures proper proportioning of essential parts to the opening width and height.

Engineering News Section

BRIDGES

COLUSA COUNTY, Cal.—Frederickson & Watson, 354 Hobart St., Oakland, at \$18,127 awarded contract by State Highway Commission to construct three concrete girder bridges: one over Salt Creek, 1 mile north of Williams, consisting of two 26-ft. 6-in. spans; one over Freshwater Creek, 1½ mile north of Williams, consisting of three 25-ft. spans; a third across Green Valley Slough, 4 miles north of Williams, consisting of two 21-ft. 6-in. spans.

TURLOCK, Stanislaus Co., Calif.—A public hearing will be held at Stockton July 10 by Major J. R. D. Matheeson, U. S. Army District Engineer, California Fruit Bldg., Sacramento, on proposed Patterson bridge project, involving construction of a 200-ft. fixed span across the San Joaquin river west of Turlock. The project is backed by the Turlock and Modesto Chambers of Commerce and other interests in the vicinity.

SAN LUIS OBISPO, San Luis Obispo Co., Cal.—Irving L. Ryder, San Luis Obispo, at \$11,495 awarded contract by city council to construct reinforced concrete cement bridge, with wing walls and a reinforced cement concrete retaining wall at entrance to San Luis Obispo High School grounds over San Luis Obispo Creek at Ida Street near Marsh St.

NAPA, Napa Co., Cal.—Harry Thorsen, St. Helena, at \$6291.60 awarded contract by county supervisors to construct drainage structures in Berryessa Valley along line of road to be improved. Complete list of bids follows:

Harry Thorsen.....	\$6291
Wiggins & Kaiser.....	7169
Geo. French Jr.....	7209
Simon Lenz & Son.....	7363
Frank Gaggero.....	8367
W. L. Proctor.....	8369

NAPA, Napa Co., Cal.—E. W. Petersen, Oakland, at \$3,367 awarded contract by county supervisors to construct steel bridge over Napa river near Barro Station. Complete list of bids follows:

E. W. Petersen.....	\$3,367
C. C. Gildersleeve.....	3,499
Chas. H. Gildersleeve.....	3,542
Harry Thorsen.....	3,557
W. L. Proctor.....	3,639
R. P. Smith.....	3,804
Pacific Const. Co.....	9,379

COLUSA COUNTY, Cal.—Following bids received July 2 by State Highway Commission to construct a reinforced concrete girder bridge over Bear creek about 28 miles west of Williams, consisting of seven 31-ft. spans on concrete bents:

R. B. McKenzie, Gerber.....	\$19,956
Geo. J. Ulrich, Modesto.....	22,792
Whipple Eng. Co., Monrovia.....	25,400

SISKIYOU COUNTY, Cal.—Following 3 low bids received July 2 by State Highway Commission to construct a reinforced concrete bridge across the Shasta river about 7½ miles north of Yreka, consisting of two 200-ft. open spandrel arch spans, two 40-ft. girder spans and two 32-ft. girder spans:

Rocca & Colletti, San Rafael..... \$9,884
Ward Eng. Co., San Francisco 102,283
M. B. McGowan, San Francisco 103,977
Bids held under advisement.

SISKIYOU COUNTY, Cal.—Following bids received July 2 by State Highway Commission to construct a reinforced concrete girder bridge across the Klamath river about 10 miles north of Yreka, consisting of four 80-foot spans and two 72-foot spans on concrete piers:

Rocca & Colletti, San Rafael.....	\$37,779
Pacific Bridge Co., Portland.....	77,985
Ward Eng. Co., San Francisco.....	80,589

Bids held under advisement.

SAUSALITO, Marin Co., Cal.—Jasper-Stacy Co., 216 Pine St., San Francisco, at approximately \$600,000 awarded contract by T. A. Tomasini to construct timber, steel and concrete toll bridge over Richardson Bay between Sausalito and Belvedere. E. L. Cope, engineer, Hunter-Dulin Bldg., San Francisco.

YUBA CITY, Sutter Co., Cal.—Consulting Engineer Edward von Geldern, Second and C Sts., Yuba City, is making surveys to rebuild Sacramento-Northern subway trestle in Yuba City to provide parallel lanes of traffic to and from the city by way of the Feather River Bridge. Tentative plans provide that the railway, city and county share the cost of the improvements.

SAN RAFAEL, Marin Co., Cal.—County supervisors vote to join highway district for construction of Russian River bridge at Jenner. The cost of the bridge is placed at \$195,000 of which Marin County will pay \$12,500; Sonoma County, \$90,000; San Francisco, \$15,000 and Mendocino County, \$12,500.

MODESTO, Stanislaus Co., Cal.—County Surveyor J. H. Hoskins is making surveys for proposed Oakdale bridge over Stanislaus river. The project will involve approximately 1600 tons of steel and will cost \$160,000 in addition to a mile and a quarter of highway, estimated at \$29,000 additional. State aid will be sought to finance construction.

REDDING, Shasta Co., Cal.—Bids will be asked shortly by county supervisors to construct two bridges on road between Keswick and Iron Mountain; wood and concrete construction, one over Spring Creek ¼ mile east of site of former Keswick smelter site and another over Keswick Creek, ¼ mile north of Keswick.

TRINITY COUNTY, Cal.—Following are three bids received July 9 by State Highway Commission, to construct bridge across Trinity River near Douglas City, consisting of two 125-ft. steel deck truss spans with concrete deck, four 56-ft. reinforced concrete girder spans and two 30-ft. reinforced concrete girder spans. Whittle Engineering Co., Monrovia..... \$83,000
F. J. Maurer & Son, Eureka..... \$5,010
M. B. McGowan, San Francisco..... \$6,754

SANTA BARBARA COUNTY, Cal.—Until July 30, 2 P. M., bids will be received by State Highway Commission to construct reinforced concrete girder bridge over Nojoqui Creek, 7½ miles south of Zaca, composed of four 42-ft. 6-in. spans on concrete bents and an abutment.

SACRAMENTO, Cal.—County Supervisors of Sacramento and Yolo are conferring on proposed construction of railroad-automobile bridge over Sutter Slough near Courtland. The Western Pacific and Sacramento Northern Railroads will share the cost with the counties if the Interstate Commerce Commission authorizes the construction of the Holland R. R. extension to Ryde.

SEATTLE, Wash.—U. S. Steel Products Co. Seattle, at \$1,247,888 awarded contract by State Highway Commission to construct steel superstructure of new Aurora Ave. bridge.

SAN CARLOS, San Mateo Co., Cal.—Until July 15, 8 P. M., bids will be received by Julius M. Edling, city clerk, to construct reinforced concrete culverts, as follows:

One 3 ft. by 10 ft. reinforced concrete box culvert on Arroyo Ave. at intersection of Walnut St. over Pulgas Creek; one 5 ft. by 6 ft. reinforced concrete box culvert on Elm St. over Pulgas Creek; one 5 ft. by 6 ft. reinforced concrete box culvert on Chestnut St. over Pulgas Creek; one 5 ft. by 6 ft. reinforced concrete box culvert on Cedar St. over Pulgas Creek, and one 13 ft. by 13 ft. reinforced concrete box culvert on Stanford Lane over Cordilleras Creek at east end of Stanford Lane.

Certified check 10% payable to city required with bid. Plans on file in office of clerk.

SAN JOSE, Santa Clara Co., Cal.—Frank Neves, 891 Harrison St., San Jose, at \$15,433 submitted low bid to city council to construct reinforced concrete bridge over Guadalupe river at Anzures Ave. Complete list of bids follows, the two lowest being taken under advisement:

Frank Neves.....	\$15,433
Thermotte Constr. Co.....	16,694
John D. Carlson.....	17,895
Carl N. Swenson.....	17,900
Wiggins & Kaiser.....	19,720

SAN JOSE, Santa Clara Co., Cal.—Collins & Martin, San Jose, at \$9794 awarded contract by county supervisors to construct wooden Pratt truss bridge in Hellyer Ave. over Coyote Creek, Supervisor District. Following is a complete list of bids received:

Kenyon Bros.....	\$10,807
Thermotte Constr. Co.....	11,423
George G. Wood.....	11,450
Wm. Radtke.....	12,356
Frank Neves.....	12,473
J. E. Fitzsimmons.....	12,950
John D. Carlson.....	13,062
C. C. Gildersleeve.....	14,000
John W. Williams.....	14,500
Surveyor's estimate.....	10,900

DREDGING, HARBOR WORKS & EXCAVATIONS

ALAMEDA, Alameda Co., Cal.—See "Miscellaneous Construction," this issue. Yatch harbor improvements proposed by Curtis-Wright Airport Corp.

IRRIGATION PROJECTS

CALIFORNIA.—Following permits granted during the month of June, 1930, by the State Department of Public Works, Division of Water Rights, Sacramento, to appropriate water:

Permit 3492, Application 6435 (San Bernardino Co.). Issued to J. F. Gore, Beverly Hills, for 0.1 c.f.s. from unnamed spring, for irrigation on forty acres. Est. cost \$750.

Per. 3493, App. 6564 (Trinity Co.). A. S. Keck and W. H. Badley, Burnt Ranch, Calif., for 0.3 c.f.s. from unnamed spring for mining, water to be returned to Trinity river. Est. cost, \$500.

Per. 3494, App. 6599 (Inyo Co., J. F. Chrysler and E. H. Cook, Lone Pine, Calif., for 0.925 c.f.s. from Carrol creek for irrigation and domestic on 20 acres. Est. cost, \$300.

Per. 3495, App. 5073 (Inyo Co.), H. W. Eichbaum, Avalon, Calif., for 0.008 c.f.s. from Lower spring in Emigrant Canyon, for domestic use. Est. cost \$150.

Per. 3496, App. 5336 (Inyo Co.), H. W. Eichbaum, Darwin, Calif., for 0.001 c.f.s. from unnamed seepage water, for domestic use. Est. cost, \$3000.

Per. 3497, App. 6453 (Del Norte Co.) E. F. Raymond, Crescent City, for 5 c.f.s. from Patrick's creek, for power. Est. cost \$1500.

Per. 3498, App. 6556 (El Dorado Co.) A. E. Rasor care A. J. Harder, atty., 312 Ochsenr Bldg., Sacramento, for 54.8 acre-feet per annum from Rock creek, for mining. Est. cost \$2000.

Per. 3499, App. 6557 (El Dorado Co.) A. E. Rasor care A. J. Harder, atty., 34.2 acre-feet per annum from Rock creek, for irrigation of 10 acres. Est. cost \$2000.

Per. 3500, App. 6558 (El Dorado Co.) A. E. Rasor care A. J. Harder, atty., 34.2 acre-feet per annum from Rock creek, for recreation and domestic. Est. cost \$2000.

Per. 3501, App. 5286 (Inyo Co.) J. I. Crowell, R. F. D. No. 1, Box 60, Van Nuys, Calif., for 0.025 c.f.s. from Keane springs, for mining, milling and domestic. Est. cost \$7,000.

Per. 3502, App. 6664 (Sutter Co.) J. R. Suter, Cannam, Sutter Co., Cal., for 1.94 c.f.s. from Sacramento river for irrigation 154,967 acres. Est. cost \$5000.

Per. 3503, App. 4752 (Riverside Co.) Palm Valley Water Co. care C. L. McFarland, atty., Evans block, Riverside, for 1.5 c.f.s. from Snow creek, for domestic use. Est. cost \$81,000.

Per. 3504, App. 6436 (Siskiyou Co.) C. W. Fay, 4181 Lincoln Ave., Oakland, for 3 c.f.s. from Mill creek, for mining and domestic use. Est. cost, \$75.

Per. 3505, App. 6512 (Sonoma Co.) J. M. Fernandez, Box 490, Sonoma, for 0.22 c.f.s. from Sonoma Creek, for irrigation. Est. cost \$825.

Per. 3506, App. 6284 (Mono Co.) T. H. McKee, Bishop, Calif., for 3000 gallons per day from unnamed spring, for domestic use. Est. cost, \$350.

Per. 3507, App. 6129 (Tuolumne Co.) Sierra and S. F. Power Co., care P. M. Downing, 1st vice-president and general manager, P. G. & E. Co., 245 Market St., San Francisco, for 5360 acre-feet per annum from South Fork Stanislaus river, for power (3332 l.h.p.) Est. cost \$380,000.

Per. 3508, App. 6130 (Tuolumne Co.) Sierra and S. F. Power Co., 245 Market St., San Francisco, for 5360 acre-feet per annum from South Fork of Stanislaus river, for irrigation and domestic, 3500 acres. Est. cost \$380,000.

Per. 3509, App. 6540 (Placer Co.) Mrs. Eva Harness and R. Longley, Loomis, Calif., for 0.26 c.f.s. from Secret Ravine, for irrigation, 37 acres. Est. cost, \$850.

CALIFORNIA.—Following applications for permits to appropriate water were filed with the State Department of Public Works, Division of Water Rights, during the month of June, 1930:

Application 6690 (Trinity Co.) C. M. Salyer care C. A. Paulsen, Weaver, Calif., for 25 c.f.s. from Hawkins creek tributary to Trinity river, for mining and domestic purposes. Est. cost \$5000.

App. 6691 (Plumas Co.) J. W. McKee and M. J. Reld, Meadow Valley, Calif., for 12,000 gallons per day from Deadwood creek tributary to Spanish creek, for mining and domestic purposes. Est. cost \$200.

App. 6692 (Mono Co.) Henry Heyman, 222 W 25th St., Long Beach, for 200 gallons per day from Rock creek tributary to Owens river, for domestic purposes. Est. cost \$200.

App. 6693 (Modoc Co.) R. O. Fink, Cedarville, Calif., for 0.62 c.f.s. from Thomas creek tributary to North Fork Pit river, for irrigation and domestic purposes on 50 acres. Est. cost, \$50.

App. 6694 (Humboldt Co.) Chas. E. Snider and Walter Wilson, care Chas. E. Snider, 812 Mills Bldg., San Francisco, for 300 c.f.s. from Slate creek tributary to Klamath river, for mining purposes.

App. 6695 (San Bernardino Co.) R. S. Irwin, Lucerne Valley, Calif., for 0.5 c.f.s. from two unnamed springs tributary to unnamed waterway thence Mojave Desert, for irrigation and domestic purposes on 40 acres. Est. cost \$3000.

App. 6696 (Colusa Co.) J. W. Brownling, care Thos. Rutledge, Colusa, for 5.95 c.f.s. from Sacramento river tributary to Suisun Bay, for irrigation purposes on 476.2 acres. Est. cost \$6,690.

App. 6697 (Butte Co.) H. N. Dalley care Polk & Robinson, Chico, Calif., for 2 c.f.s. from Middle Butte creek tributary to Sacramento river for mining and domestic purposes. Est. cost \$500.

App. 6698 (Siskiyou Co.) Fred J. Blakeley, care Butler, Van Dyke Desmond & Harris, attys., P. O. Box 1114, Sacramento, for 25 c.f.s. and 4000 ac. ft. per annum from Elliott creek tributary to Applegate river, for irrigation and domestic purposes.

App. 6699 (Butte Co.) H. C. Adams, Chico, for 17.5 c.f.s. from drainage ditch from Drainage Dist. No. 2 tributary to Butte creek and Sacramento river, for irrigation purposes on 700 acres. Est. cost \$1500.

App. 6700 (Butte Co.) H. C. Adams, Chico, for 3 c.f.s. from drainage ditch from Drainage District No. 2, tributary to Butte creek and Sacramento river, for irrigation purposes on 120 acres.

App. 6701 (Nevada Co.) Nevada Irrigation District, care Fred H. Tibbets, chief engineer 1320 Alaska Commercial Bldg., San Francisco, for (1) 15 c.f.s. (2) 5 c.f.s. from (1) Fall creek (2) South Fork Fall creek tributary to South Fork Yuba river, for power purposes. Est. cost \$450,000.

App. 6702 (Nevada Co.) Nevada Irrigation District, care Fred H. Tibbets, chief engineer 1320 Alaska Commercial Bldg., San Francisco, for (1) 15 c.f.s. (2) 5 c.f.s. from (1) Fall creek (2) South Fork Fall creek tributary to South Fork Yuba river, for irrigation purposes on 167,789 acres. Est. cost \$450,000.

App. 6703 (Shasta Co.) Lambert Dost, 3335 S Vermont Ave., Los Angeles, for 0.25 c.f.s. from two unnamed springs and unnamed creek tributary to Churn creek, thence to Sacramento river, for domestic and irrigation purposes on 20 acres.

App. 6704 (Lake Co.) Martin Judge, Jr. and Co., Crocker 1st National Bank Bldg., San Francisco, for 250 c.f.s., and 175,000 ac. ft. per annum from North Fork Cache creek, tributary to Cache creek, for industrial and domestic purposes. Est. cost \$3,000,000.

App. 6705 (Lake Co.) Martin Judge Jr. and Co., Crocker 1st National Bank Bldg., San Francisco, for 175,000 ac. ft. per annum from North Fork of Cache creek tributary to Cache creek for irrigation on 50,000 acres. Est. cost \$1,000,000.

App. 6706 (San Bernardino Co.) Geo. Tillitt, Highland, Calif., for 0.003 (or approx. 1950 gallons per day) from unnamed spring tributary to Green Valley creek, thence Deep creek, thence Mojave Desert, for domestic purposes. Est. cost \$500.

App. 6707 (Alameda Co.) East Bay Municipal Utility District, care T. P. Wittschen, atty., 1406 Latham Square Bldg., Oakland, for 42 c.f.s. and 41,436 ac. ft. per annum from San Leandro, Kliser, Redwood, Moraya, Kings, Reilly's and Perez creeks tributary to San Leandro Bay, for municipal purposes. Est. cost \$137,000.

App. 6708 (Ventura Co.) W. S. Dunshee, Edw. M. and J. L. Selby, Ventura, for 100 ac. ft. per annum from Cayote creek tributary to Ventura river for recreational and domestic purposes. Est. cost \$50,710.

App. 6709 (Ventura Co.) Edw. M. and J. L. Selby, R. D. No. 1, Ventura, for 0.067 c.f.s. from Mountain spring tributary to North Fork Cayote creek thence Cayote creek, thence Ventura river, for domestic purposes. Est. cost \$2000.

App. 6710 (Glenn Co.) E. K. Reynolds, Elk Creek, Calif., for 0.06 c.f.s. from Stonely creek tributary to Sacramento river, for irrigation on six acres. Est. cost \$250.

App. 6711 (Stanislaus and Merced Cos.) Turlock Irrigation Dist., care R. V. Markle, chief engineer, 117 West main St., Turlock, for 800 c.f.s. from Tuolumne river tributary to San Joaquin river, for irrigation purposes.

App. 6712 (San Joaquin Co.) Frank Piccardi, Carlo Morzone, Angelo Calcagno and C. Farani, 109 E Weber St., Stockton, Calif., care L. B. Raab, for 0.92 c.f.s. from San Joaquin river tributary to Suisun Bay, for irrigation and domestic purposes on 73.7 acres. Est. cost \$3000.

App. 6713 (Inyo Co.) Ada Norris, P. O. Box 2, Trona, Calif., for 0.50 c.f.s. from spring in Pleasant Canyon tributary to Panamint Valley Watershed, for mining and domestic purposes.

App. 6714 (San Bernardino Co.) M. F. Bird, B Bar B Ranch, Victorville, Calif., for 0.25 c.f.s. from Ruby springs Ruby canyon tributary to Mojave Desert, for irrigation and domestic purposes on 15 acres. Est. cost, \$20.

App. 6715 (Shasta Co.) J. J. Vokal, et al. care R. J. Anderson, Sulte, P. O. Bldg., Redding, for 7 c.f.s. from Olney creek including foreign and natural flow tributary to Sacramento river, for power purposes. Est. cost \$250.

App. 6716 (Shasta Co.) J. J. Vokal, et al. care R. J. Anderson, Redding, for 0.50 c.f.s. from Olney creek including foreign and natural flow tributary to Sacramento river, for irrigation and domestic purposes. Est. cost \$250.

STREET LIGHTING SYSTEMS

PORTERVILLE, Tulare Co., Cal.—City council declares intention (134) to install ornamental electrolier system in Main St., bet. Olive and Morton Sts., involving 56 two-light standards together with underground system. Union Metal Mfg. Co's. standards, Design No. 2281. 1911 Act. Bond Act 1915. Hearing Aug. 5. W. R. Means, city clerk. Fred Pease, city engineer.

SAN JOSE, Santa Clara Co., Cal.—City Improvement Co., 2055 Center St., Berkeley, awarded contract by city council to install electroliers with underground system in Third St., between St. John and San Antonio Sts., involving (San Jose Design) Duplex electroliers.

SAN RAFAEL, Marin Co., Cal.—City council has started proceedings to install electrolier system in Fourth street from East St. to west line of Pacific Tel. & Tel. Bldg. in H Street. Pressed metal type of standard will be installed. H. K. Brainerd is city manager.

GUSTINE, Merced Co., Cal.—City Council rejects bids July 7 to install electrolier system involving 37 metal standards and new bids will be asked. Bids were: City Improvement Co., 2055 Center St., Berkeley, \$5520; Putte Electric Manufacturing Co., 956 Polson St., San Francisco, \$6476; A. E. Cowell is city engineer.

REDWOOD CITY, San Mateo Co., Cal.—City council starts proceedings to install electroliers in Broadway, Brewster & Hopkins Ave. in Broadway and Brewster Ave. from El Camino Real, 77 two-light standards will be installed and Broadway bet. Hopkins Ave. and Iris St., 37 single-light standards and in Duane St., 1 single-light standard.

MACHINERY AND EQUIPMENT

KERMAN, Fresno Co., Cal.—Until July 21, 7:30 P. M., bids will be received by R. F. W. Anderson, clerk, Empire School District, to furnish and deliver school bus. Bids will be considered at the same time for the sale of a Model AA, Ford chassis school bus of 45 to 50 passenger capacity. Specifications obtainable from clerk at Route 1 Box 355, Kerman.

KING CITY, Monterey Co., Cal.—King City Mercantile Co., King City, at \$1,575 awarded contract by city council to furnish International Freight truck with steel dump body for street department.

SONOMA, Sonoma Co., Cal.—Until July 19, 7:30 P. M., bids will be received by R. O. Hotz, secretary, Sonoma Valley Union High School District, to furnish and deliver school bus for transportation of pupils; capacity 46 passengers. Bids may be submitted on chassis and on body separately. Bids between \$3,000 and \$4,000 only will be considered. Certified check 10% required with bid. Further information obtainable from secretary.

CHOWCHILLA, Madera Co., Cal.—Until July 18, 8 P. M., bids will be received by N. E. Jensen, clerk, Sharon School District, to furnish and deliver one new Ford Model AA, 1½-ton truck chassis, equipped with extension frame overload springs, dual tires rear, single tires front, and one spare tire, and one Patchetts and Carstensen School Coach Body No. 174-B with genuine leather upholstery. Bids should be sent to N. E. Jensen, Box 221, Chowchilla, Calif. Certified check 10% required with bid. Further information obtainable from clerk.

SACRAMENTO, Cal.—Until July 16, 3 P. M., bids will be received by U. S. Engineer Office, California, Fruit Bldg., Sacramento, under Order No. 2102-1052, to furnish and deliver Rio Vista, Solano County one dragline bucket similar and equal to "Page Class C" bucket. It shall have a rated

capacity of 1 cu. yd. and a struck measurement of 34 cu. ft. It shall weigh not less than 3,450 lbs. and can be equipped with hoisting and pulling chains and at least 4 drag teeth on bottom flange of bucket. The chains shall be land made dredge chain with cast manganese and links. Snavees and cable fittings shall be furnished with the bucket, but the cables will be assembled and supplied by U. S.

Separate bids will be considered to furnish and deliver one clamshell bucket with rounded shell, heavily constructed, Western type bucket. It shall have a water measurement capacity of 1 cu. yds. It shall be of the jack knife type and as far as consistent with good practice, have a minimum distance from bottom of bucket to top of arms when the bucket is closed. It shall be equipped with at least 7 manganese steel digging teeth. Delivery is desired to Rio Vista, Calif., within 30 calendar days after receipt of order. Further information obtainable from above office.

CHOWCHILLA, Madera Co., Cal.—Until July 18, 8 P. M., bids will be received by N. E. Jensen, clerk, Sharon School District, for sale of one used 1923 Reo School Bus, capacity of 30 passengers. The bus is no longer required for district use. Bus may be inspected by application to N. E. Jensen, Box 221, Chowchilla. Terms of sale, cash.

PORTERVILLE, Tulare Co., Cal.—Until July 18, 8 P. M., bids will be received by Bert W. Dennis, clerk, Porterville Union High School Dist., to furnish and deliver a 35-passenger auto school bus complete, and for chassis and body separately. Certified check of bidder's bond 10% required with bid. Specifications and further information obtainable from clerk.

EL CERRITO, Contra Costa Co., Cal.—Fagel Motor Co., at \$3222 awarded contract by city trustees to furnish motor truck for street department.

SAN FRANCISCO—Until July 17, 2 P. M. bids will be received by U. S. Forest Service, Ferry Bldg., to furnish and deliver three gasoline shovels of 1 cubic yard capacity, crawler type. Specifications and further information obtainable from above office.

RAILROADS

OAKLAND, Cal.—Until July 14, 4:30 P. M., bids will be received by G. B. Hegardt, secretary, City Port Commission, 424 Oakland Bank Building, for grading of road beds and laying track to serve 9th Ave. Pier. Certified check 10% required with bid. Bond in full amount of contract price required of successful bidder. Specifications obtainable from secretary on deposit of \$5, returnable.

SAN FRANCISCO.—Bids will be considered by the Western Pacific R. R. Mills Bldg., San Francisco, to construct that company's portion of the 11½-mile Klamath Falls-Keddie rail link. The bids will cover the construction from Keddie to Bieber, Calif., costing approximately \$9,824,669, according to H. M. Adams, president of the company. The project will involve in the main:

1,400 acres clearing, grading, ballasting and line protection;
11 tunnels to be constructed, total length 6,500-ft.;
17,815 tons 85-lb. rails;
5,100 tons struc. steel for viaducts and bridges;
416,371 Douglas fir cross ties.
The Great Northern Railway, in con-

nection with this project, is preparing plans for its 85-mile section of the new road between Bieber and Klamath Falls, this unit to cost \$3,924,520, and will involve:

14,000 tons 90-lb. rails;
286,000 cross ties;
266,000 cu. yds. ballast;
600 acres clearing, etc.

FIRE ALARM SYSTEMS

WASHINGTON, D. C.—(By Special Wire)—Safety Electric Co., 8952 Ellis Ave., Culver City, Calif., submitted low bid to Bureau of Yards and Docks, Navy Department, Washington, D. C., to install fire alarm system, consisting of call boxes, accessory equipment and wiring, at Naval Ammunition Depot, Hawthorne, Nevada. Bid was: Gamewell, \$7,598; Autocall, \$5,343. Complete tabulation of bids will be published shortly.

FIRE EQUIPMENT

EUREKA, Humboldt Co., Cal.—Until July 15, 5 P. M., bids will be received by A. Walter Kildale, city clerk, to furnish and deliver 1000 ft. 2½ inch double jacket cotton fire hose in 50-ft. lengths with couplings. Specifications on file in office of clerk.

SEWERS AND SEWAGE DISPOSAL PLANTS

STOCKTON, San Joaquin Co., Cal.—Until July 21, 5 P. M., bids will be received by M. E. Page, city clerk, to construct sanitary sewer system, consisting of main sewer, wye branches, manholes with automatic flush tanks in E. Scott Ave. 1911 Act. Certified check 10% payable to city required with bid. Plans on file in office of clerk.

GRASS VALLEY, Nevada Co., Cal.—Oakland Const. Co., Oakland, at \$1,968 awarded contract to furnish materials and construct S. Auburn St. sewer, involving: 1550 ft. of vitrified salt glazer sewer pipe, 6-in. dia. and 150 ft. of iron pipe, 6-in. dia.; 8 manholes; flush tank.

RICHMOND, Contra Costa Co., Calif.—O. U. Miracle, San Diego, at \$99,209 submitted low bid to city council (479) to construct combined storm and sanitary sewers in Dock Ave., bet. 10th St. and east termination of Dock Ave., etc., involving salt glazed vitrified clay pipe; centrifugally cast reinforced concrete pipe; cast iron pipe; salt glazed vitrified clay sewer pipe in timber cradle on piles and in concrete pipe jackets on piles; centrifugally cast reinforced concrete pipe in reinforced concrete cradle on piles; manholes; overflow structures; storm water inlets, etc. Bids taken under advertisement for one week. Complete bid listing follows:

O. U. Miracle, San Diego.....	\$99,209
Jasper-Stacy Co., S. F.....	139,946
Hesch-Thibbitts Constr. Co., San Francisco.....	146,173
J. C. Hickey, S. F.....	156,857

PALO ALTO, Santa Clara Co., Cal.—Burns-McDonald-Smith Engineering Corp., 1031 S. Broadway, Los Angeles, in a report to the city council recommends the construction of joint outfall sewer mains and sewage treatment plant for Palo Alto and Stanford University at an estimated cost of \$205,000 to make satisfactory disposition of sewer matter from the two communities. In its recommendation for construction of a joint outfall sewer, the engineering firm estimates the pro rata share of the cost as

\$220,500 for Palo Alto, and \$74,500 for Stanford University.

STEEGE, Contra Costa Co., Cal.—M. J. Bevanda, Stockton Savings & Loan Bldg., Stockton, at \$141,080 awarded contract by Stege Sanitary District, (1) for sewers in Acq. and Imp. Dist. No. 5, in portions of Monterey St., Carl Ave., etc., involving 30-inch and 36-inch vitrified sewer pipe; 4-in. and 36-in reinforced concrete sewers with stand. vit. clay lining blocks; brick and cem. concrete manholes. WATER WORKS

SAN FRANCISCO—Until July 14, 3 P. M., under Proposal No. 613, bids will be received by Leonard S. Leavy, city purchasing agent, 270 City Hall, to furnish and deliver wrought steel pipe for park commission. Specifications obtainable from above.

SAN FRANCISCO—Until July 14, 3 P. M., under Proposal No. 614, bids will be received by Leonard S. Leavy, city purchasing agent, 270 City Hall, to furnish and deliver cast iron pipe for park commission. Specifications obtainable from above.

LIVERMORE, Alameda Co., Cal.—Following bids taken under advertisement by Superintendent of Construction, U. S. Veterans' Hospital, Palo Alto, to install one deep well pump, meter pipe and power lines in Veterans' Hospital at Livermore:

(1) pump; (2) pipe; (3) power lines.	
Sterling Pump Co. (1) \$2,748.	
P. E. Furr, (1) \$3,653; (2) \$6,983; (3) \$3,405.	
Severin Electric Co. (2) \$7,695; (3) \$4,089.	
Robert Garcia Well Co. (1) \$2,754; (2) \$8,227.71; (3) \$4,776.	
Butte Electric Co. (1) \$3,129; (2) \$8,800; (3) \$3,141.	
Byron Jackson Co., (1) \$2,875.	

PHOENIX, Ariz.—The proposed pipe line from the Verde River to the city reservoirs, for which bonds in the sum of \$2,364,000 were recently voted, will be approximately 22 miles in length. According to present plans, alternate bids will be taken on cement, steel and cast iron pipe, and

also alternative proposals on one 48-in. line and on two 36-in. companion pipe lines. Plans and specifications are to be ready by July 10. The bond issue also provides for a 10,000,000-gallon storage reservoir. W. J. Jamieson has complete charge of preparation of plans and specifications.

SAN FRANCISCO—Until July 22, bids will be received by Bureau of Supplies and Accounts, Navy Department, Washington, D. C., to furnish and deliver, San Francisco, 1 knocked-down elevated steel water tank of 100,000-gals. capacity. Purchase is provided for under Schedule No. 3727. Further information obtainable from Navy Purchasing Office, 100 Harrison St., San Francisco.

SAN FRANCISCO—Until July 21, 3 P. M., under Proposal No. 615, bids will be received by Leonard S. Leavy, city purchasing agent, 270 City Hall, to furnish and deliver 25,000 ft. 6-in. and 25,000 ft. 8-in. cast iron pipe, cement lined, made in the U. S. for use of the San Francisco Water Department. Specifications obtainable from above.

RED BLUFF, Tehama Co., Cal.—W. C. Hickman, superintendent, Municipal Water System is making surveys to replace portion of pipe line from Antelope Creek section.

SAN DIEGO, Cal.—See "Streets and Highways," this issue. Bids wanted by State Department of Public Works for services at San Diego State Teachers' College.

STREETS AND HIGHWAYS

PACIFIC GROVE, Monterey Co., Cal.—City council declares intention (3222) to improve Pacific Ave. from Lighthouse Ave. to Briggs Ave., involving cem. conc. gutters, curbs; 2-in. asph. conc. surface on present macadam pave, 34-ft. wide; storm drain and grading and intersections; san. sewers. 1911 Act. Bond Act 1915. Hearing July 17 W. G. Stubbs, city clerk.

PACIFIC GROVE, Monterey Co., Cal.—City council declares intention (3222) to improve Willow Street between Lighthouse Ave. and Junipero Ave., involving cement concrete gutters and curbs; 2-in. asph. conc. pavement on existing macadam roadway, 34 ft. wide; storm drains and grading at intersections; san. sewer laterals. 1911 Act. Bond Act 1915. Hearing July 17. W. G. Stubbs, city clerk.

SAN CARLOS, San Mateo Co., Cal.—Until July 15, 8 P. M., bids will be received by Julius M. Edling, town clerk (30-4) to improve portions of Arroyo Ave., Chestnut St., Elm St., etc., involving grading; cem. concrete curbs, walks, gutters; 4-inch water-bound rock macadam pave with 3-in. asph. conc. surface; salt glazed iron-stone pipe sanitary sewers with wyes; cem. conc. storm water sewers. 1911 Act. Bond Act 1915. Certified check 10% payable to town required with bid. Plans on file in office of clerk.

OAKLAND, Cal.—Until July 17, 12 noon, bids will be received by Frank C. Merritt, city clerk, to construct concrete culverts and four manholes in certain culvert right of ways between Penman Ave. and Sutter St. 1911 Act. One-third of cost will be paid from General Fund. Certified check 10% payable to city required with bid. Plans on file in office of clerk. Walter Prickstad, city eng.

MILL VALLEY, Marin Co., Cal.—As previously reported, bids will be received July 15, 8:30 P. M., by Will Falley (249) to improve Summit Ave., Lowell Ave. and Cornelia St. and various other streets. Involving vitrified pipe sewer, hydraulic concrete manholes; lampholes; wye branches and lateral; hydraulic concrete retaining wall; arch culverts; hydraulic conduit Inlet. Bond Act 1915. Imp. Act 1911. This project involves approximately 210,000 sq. ft. asphaltic concrete and 40,000 sq. ft. hydraulic concrete. Certified check 10% payable to town of Mill Valley required with bid. Plans obtainable from clerk. F. H. Lacey, town engineer.

SANTA ROSA, Sonoma Co., Cal.—City council declares intention (1627) to improve Cleveland Ave. from Carrillo St. to Ridgeway Ave., involving grading; 4-inch macadam base pave with 3-inch asphaltic conc. surface in 1-course; hyd. cem. conc. curbs, gutters. 1911 Act. Bond Act 1915. Hearing Aug. 5. Ney L. Donovan, city clerk.

SAN JOSE, Santa Clara Co., Cal.—County Surveyor Robt. Chandler making surveys to grade and gravel Dale Drive, property owners having petitioned for the work.

SALINAS, Monterey Co., Cal.—Granite Construction Co., Watsonville, at \$589.10 awarded contract to surface Mud Flat Road and at \$3956 to surface San Miguel Canyon Road. W. A. Dontanville, Salinas, only other bidder at \$6886.30 and \$5766.80, respectively.

SAN BERNARDINO COUNTY, Cal.—Until July 30, 2 P. M., bids will be received by State Highway Commission to grade and surface with oil treated crushed gravel or stone, 9.5 miles between 1½ miles southwest of Dunn and Cornish Valley.

See call for bids under official proposal section in this issue.

SAN FRANCISCO—Until July 16, 2:30 P. M., bids will be received by S. J. Heater, secretary, Board of Public Works, to construct Castro, 17th and Market Sts. Traffic Improvement. Est. cost \$800. Certified check 10%, payable to clerk of the Board of Supervisors required with bid. Plans obtainable from Bureau of Engineering, 3rd floor, City Hall.

MONTEREY, Monterey Co., Cal.—Until July 15, 7 P. M., bids will be received by Clyde A. Dorsey, city clerk, (2977) to improve Harrison St. bet. Clay and High Sts., involving grading; paving with asph. conc. wearing surface 2 inches in thickness. Imp. Act 1911. Bond Act 1915. Certified check 10%, payable to city required with bid. Plans on file in office of clerk.

SAN BERNARDINO COUNTY, Cal.—Following bids received July 2, by State Highway Commission to grade and surface with oil treated crushed gravel or stone, 28.7 miles between 6 miles east of Amboy and 1½ miles east of Essex:

George Herz & Co., San Bernardino.....	\$507,402
New Mexico Const. Co., Albuquerque.....	579,917
J. C. Donovan & Son, Los Angeles.....	669,790

Bids held under advisement.

NEVADA COUNTY, Cal.—Geo. E. McDaniel, Marysville, at \$434 awarded contract by State Highway Commission to construct highway guard rails between Boca and Iceland.

FRESNO COUNTY, Cal.—Peninsula Paving Co., Standard Oil Bldg., San Francisco, at \$257,557 awarded contract by State Highway Commission to grade and pave with asphalt concrete 7.6 miles between Fowler Switch Canal and Pancher Creek.

SAN DIEGO COUNTY, Cal.—Sandier Pearson, Santa Monica, at \$338,287 awarded contract by State Highway Commission to pave with cement concrete 1.2 miles, between Vegas Creek and Pine Valley.

MARIPOSA COUNTY, Cal.—Until July 24, 2 P. M., bids will be received by C. H. Sweetser, district engineer, U. S. Bureau of Public Works, to grade 7.03 miles of Mariposa Grove Section of Wawona Route in Sierra National Forest, involving:

55.28 Acres clearing;
320,000 cu. yds. unclassified excavation;
1346 cu. yds. structural excavation;
94,765 sta. yds. overhauled;
7.95 miles finishing;
121 cu. yds. cement rubble masonry;
5950 lin. ft. corrugated metal pipe in place;
195 cu. yds. hand laid riprap;
Maintenance of detours (est. cost \$250);
0.5 mile moving existing fences.

Plans obtainable from above office on deposit of \$10, checks for same to be made payable to Federal Reserve Bank of San Francisco

MARIPOSA COUNTY, Calif.—Until July 24, 2 P. M., bids will be received by C. H. Sweetser, district engineer, U. S. Bureau of Public Roads, 461 Market St., San Francisco, to grade Section B, Fish Camp-Pourmile of Route 47, Oakhurst National Forest Highway in Sierra National Forest, 2.648 miles in length, involving:

17.3 acres clearing;
85,240 cu. yds. unclassified excavation;
405 cu. yds. unclassified excavation for structures;
12,705 sta. yds. overhauled;
2,648 miles finish earth graded road;
34 cu. yds. cement rubble masonry;
1,420 lin. ft. corrug. galv. metal culvert pipe in place;
Maintenance of existing road and sections accepted for traffic, estimated cost, \$1500;

* 74 right-of-way monuments;
Plans obtainable from above office on deposit of \$10, checks for same to be made payable to Federal Reserve Bank of San Francisco.

NAPA, Napa Co., Calif.—Highway Builders, Ltd., San Francisco, at \$33,114.03 awarded contract by county supervisors for bituminous surfacing

on various roads. Complete list of bids follows:
Highway Builders, Ltd., \$33,114
George French, Jr., 33,574
Lee J. Immel, 34,835
Harold Smith, 34,989
L. C. Sedel, 35,955
A. Teichert & Son, 36,933
J. P. Holland, Inc., 42,117
J. E. Johnson, 46,870

SAN LUIS OBISPO, San Luis Obispo Co., Cal.—Irving L. Ryder, San Luis Obispo, at \$9,962.22 awarded contract by city council (322) to improve Garden, Pacific and Pismo Sts., involving grading; 6-in. hydraulic conc. pavement; hyd. cem. conc. curbs and sidewalks; part circle arch culverts; catch-basins.

STOCKTON, San Joaquin Co., Cal.—Until July 21, 11 A. M., bids will be received by Eugene D. Graham, clerk, to improve Bacon Island Road in Road Dist. No. 1. Certified check 10% payable to Chairman of Board of Supervisors required with bid. Plans obtainable from J. B. Manthey, county surveyor.

SHASTA COUNTY, Calif.—A. SIERRA COUNTY, Cal.—Until July 29, 2 P. M., bids will be received by C. H. Sweetser, district engineer, U. S. Bureau of Public Roads, 461 Market St., San Francisco, to surface 8.58 miles of Sections C and D, Yuba Pass National Forest Highway, involving:

- 500 cu. yds. unclassified excavation;
- 8.58 miles fine grading subgrade and shoulders;
- 14,700 cu. yds. crushed rock surfacing;
- 1,700 cu. yds. crushed rock (supplemental);
- Provide and maintain water plant or plants (pump sum);
- 750 gals. watering;
- 150 right-of-way monuments.

Plans obtainable from engineer on deposit of \$10, returnable, checks for same to be made payable to Federal Reserve Bank of San Francisco.

SAN MATEO, San Mateo Co., Cal.—Until July 21, 8 P. M., bids will be received by E. W. Foster, city clerk, to improve 23rd and 24th Aves., Flores St., Florin and Isabelle Aves., involving grading; hydraulic concrete curb curbs, gutters, sidewalks; asphaltic concrete pavement; hydraulic cement concrete pipe storm water sewers; catchbasins; steel reinf. box culvert; ornamental street lighting system. Bond Act 1915. Imp. Act 1911. Certified check 10% payable to city required with bid. Plans on file in office of clerk. E. P. Wilsey, city manager.

SOLANO COUNTY, Cal.—Until July 21, 2 P. M., bids will be received by R. E. Pierce, district engineer, State Highway Commission, State Office Bldg., Sacramento, to construct property fences, move and reset property fences, install new gates and move pipe line between Creston and Vacaville.

See call for bids under official proposal section in this issue.

MARTINEZ, Contra Costa Co., Cal. Bids will be asked at once by county supervisors to pave two streets in Concord; estimated cost \$6600. Specifications obtainable from County Surveyor R. R. Arnold.

OFFICIAL PROPOSALS

STATE OF CALIFORNIA

DEPARTMENT OF PUBLIC WORKS

DIVISION OF HIGHWAYS

NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received at the office of the State Highway Engineer, Public Works Building, Sacramento, California, until 2 o'clock P. M. on July 30, 1930, at which time they will be publicly opened and read, for construction in accordance with the specifications therefor, to which special reference

is made, of portions of State Highways, as follows:

Trinity County, between Westerly Boundary and Burnt Ranch (II-TRI-26-C), portions about four-tenths (0.4) mile in length, to be graded.

Placer County, through Lincoln (III-Pla-3-A), about one and seven-tenths (1.7) miles in length, to be graded and paved with Portland cement concrete.

Mendocino County, between McDonald and Wendling (IV-Men-48-A,B), about two (2.0) miles in length, to be graded and surfaced with untreated crushed gravel or stone and timber bridges to be constructed.

Santa Barbara County, a reinforced concrete girder bridge across Nojoqui Creek, 7 1/4 miles south of Zaca (V-SB-2-D), composed of four 42'-6" spans on concrete bents and an abutment.

Riverside County, between Desert Center and nine and one-half miles west of Hopkins Well (VIII-Riv-64-B & C), about sixteen and two-tenths (16.2) miles in length, to be graded and surfaced with oil treated crushed gravel or stone.

San Bernardino County, between one and one-half miles southwest of Dunn and Cornise Valley (VIII-SBD-31-J), about nine and five-tenths (9.5) miles in length, to be graded and surfaced with oil treated crushed gravel or stone.

Plans may be seen, and forms of proposal bonds, contract and specification may be obtained at the said office, and they may be seen at the offices of the District Engineers at Los Angeles and San Francisco, and at the office of the District Engineer of the district in which the work is situated. The District Engineers' offices are located at Eureka, Redding, Sacramento, San Francisco, San Luis Obispo, Fresno, Los Angeles, San Bernardino and Bishop.

A representative from the district office will be available to accompany prospective bidders for an inspection of the work herein contemplated, and Contractors are urged to investigate the location, character and quantity of work to be done, with a representative of the Division of Highways. It is requested that arrangements for joint field inspection be made as far in advance as possible. Detailed information concerning the proposed work may be obtained from the district office.

No bid will be received unless it is made on a blank form furnished by the State Highway Engineer. The special attention of prospective bidders is called to the "Proposal Requirements and Conditions" annexed to the blank form of proposal, for full directions as to bidding, etc.

The Department of Public Works reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the State.

STATE OF CALIFORNIA

DEPARTMENT OF PUBLIC WORKS

DIVISION OF HIGHWAYS

NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received by the Department of Public Works, Division of Highways, at the office of the District Engineer, 502 State Office Building, 10th and L Sts., Sacramento, California, until 2:00 o'clock P. M., on Monday, July 21, 1930,

at which time they will be publicly opened and read, for performing work as follows:

Solano County, between Creston and Vacaville, Road X, Sol-7, 8-C&A, property fences to be constructed, moved and reset, new gates installed, and pipeline to be moved.

Plans may be seen, and forms of proposal, bonds, contract and specifications may be obtained at the above address.

No bid will be received unless it is made on a proposal form furnished by the District Engineer. Each bid must be accompanied by cash, or a certified check made payable to the Director of Public Works, for an amount equal to ten (10) per cent of the amount bid, such guaranty to be forfeited should the bidder to whom the contract is awarded fail to enter into the contract.

The Department of Public Works reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the State.

District Engineer, Dist. X.

Dated: July 7, 1930.

NOTICE TO CONTRACTORS

STATE OFFICE BUILDING AT
LOS ANGELES

SEALED BIDS will be received by Geo. B. McDougall, State Architect, at the Office of the Division of Architecture, 1025 Associated Realty Building, Los Angeles, California, up to 2 o'clock P. M., Tuesday, August 5, 1930, thereafter on said day to be publicly opened and read for the erection and completion of the State Office Building at Los Angeles, California, in accordance with plans and specifications therefor. Plans and Specifications were prepared by John C. Austin, Architect, of the firm of John C. Austin and Frederick M. Ashley, Architects.

The State Office Building at Los Angeles will be a limit height Class A structure faced with granite and terra cotta. It will be located at the new Civic Center on property bounded by First, Spring, Broadway and Court Streets, all in the City and County of Los Angeles, California.

Separate bids will be entertained for the following segregated parts of the work and combinations thereof as listed:

1. General Work and Alternates.
2. Granite Work and Alternates.
3. Structural Steel Fabrication.
4. Structural Steel Erection.
5. Structural Steel (Fabrication and erection).
6. Electrical Work and Alternates.
7. Elevators and Alternates.
8. Plumbing Work and Alternates.
9. Heating Work and Alternates.
10. Ventilation Work and Alternates.
11. Heating and Ventilation Work and Alternates.
12. Plumbing, Heating and Ventilation Work and Alternates.

The "General Work" bid will embrace all branches of work other than segregated above. Contractors shall state clearly in their application the particular segregation of work that they desire plans for.

Plans and specifications are on file for examination in the office of the Division of Architecture, 1025 Associated Realty Building, Los Angeles, and at the principal California Cities Builders' Exchange Offices.

Plans, specifications and proposal forms may be secured by qualified

licensed Contractors or by Contractors who will qualify by furnishing a verified statement of experience and financial condition as required by the provisions of Chapter 644, Statutes 1929, and whose statements so furnished are satisfactory to the Department of Public Works. Questionnaire forms may be secured from the Division of Architecture, either in Los Angeles or Sacramento.

Bids will not be accepted from a Contractor to whom proposal form has not been issued and all bids must be on proposal forms supplied by the State.

Application for plans shall be made to the Sacramento Office of the Division of Architecture, Public Works Building, Sacramento, and shall be accompanied by a deposit of Fifty (\$50.00) dollars. Check shall be made payable to the Department of Public Works, Division of Architecture. Deposit will be returned upon receipt of the set in good condition, at Sacramento Office of the Division within 30 days after opening bids, otherwise it will be forfeited to the State.

All bids must be filed on or before the time heretofore stated and in accordance with the "Rules for Bidding" accompanying the proposed form.

No bid will be considered unless cash, a bidder's bond made payable to the State of California, or a certified check made payable to the "State Engineer, Department of Public Works," in the sum of at least ten per centum (10%) of the amount of the bid is enclosed with the bid.

The Division of Architecture, State Department of Public Works, reserves the right to reject any or all bids and to waive any informality in any bid received.

NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received at the office of the State Highway Engineer, Public Works Building, Sacramento, California, until 2 o'clock P. M., on August 6, 1930, at which time they will be publicly opened and read, for construction in accordance with the specifications therefor, to which special reference is made, of portions of State Highway, as follows:

Los Angeles County, between Santa Clara River and Castale School (VII-A-4-A), about four and three-tenths (4.3) miles in length, to be widened with bituminous treated rock borders.

San Diego County, between Balboa Avenue and Torrey Pines Road (VII-S-D-2-E), about five and four-tenths (5.4) miles in length, to be paved with Portland cement concrete.

San Bernardino County, three concrete bridges east of Ontario (VIII-S-B-18-B), the first, at Station 43+01.5, consisting of three 8' 0" slab spans, the second at Station 107+93, consisting of two 14' 3" slab spans; and the third, at Station 119+04.7, consisting of 15' 0" slab span; to be

partially reconstructed and widened and the approaches to be widened and paved with asphalt concrete.

Monro County, between Sonora Junction and 4 miles south of Coleville (IX-Mon-23-K), about twelve and nine-tenths (12.9) miles in length, to be graded.

Plans may be seen, and forms of proposal, bonds, contract and specifications may be obtained at the said office, and they may be seen at the offices of the District Engineers at Los Angeles and San Francisco, and at the office of the District Engineer of the district in which the work is situated. The District Engineer's offices are located at Eureka, Redding, Sacramento, San Francisco, San Luis Obispo, Fresno, Los Angeles, San Bernardino and Bishop.

A representative from the district office will be available to accompany prospective bidders for an inspection of the work herein contemplated, and Contractors are urged to investigate the location, character and quantity of work to be done, with a representative of the Division of Highways. It is requested that arrangements for joint field inspection be made as far in advance as possible. Detailed information concerning the proposed work may be obtained from the district office.

No bid will be received unless it is made on a blank form furnished by the State Highway Engineer. The special attention of prospective bidders is called to the "Proposal Requirements and Conditions" annexed to the blank form of proposal, for full directions as to bidding, etc.

The Department of Public Works reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the State.

C. H. PURCELL,

State Highway Engineer.

Dated July 9, 1930.

NEW BUILDING LAW BEING FRAMED FOR ALAMEDA

A new building ordinance for the city of Alameda will be presented to the city council by the City Planning Commissioner within 60 days.

A feature of the ordinance will be a section providing a \$20 fee in connection with filing rezoning petitions, the purpose of which, according to its sponsors, is to discourage indiscriminate rezoning movements.

In connection with the proposed measure, Councilmen W. H. Henning and Al Latham explained that the council has been harassed by real estate men and property owners with petitions to rezone their property when they were without definite plans for improvement.

In many cases, according to Henning and Latham, the rezoning petitions were filed by dealers or owners to influence prospective purchasers of property, and when the deal collapsed no building would be erected, and in a few months the owners would ask that the property be rezoned to its former classification.

At the same time City Attorney Silver was instructed to ascertain the legality of an ordinance requiring property owners to give bond to carry out improvements designated in rezoning petitions.

MANY BUILDINGS CONDEMNED AT SACRAMENTO

The effects of a quiet drive that has been in progress for several months, to do away with disreputable buildings in Sacramento, are made public by Fire Chief M. J. Dunphy.

A total of 62 houses have been condemned since January 1, and these have been ordered wrecked by owners of the buildings at the instigation of the fire department.

The results of this drive are worth approximately \$100,000 to Sacramento, according to Dunphy, who said that where buildings have been wrecked new ones are being erected and the general improvement is of great value.

A "Pittsburg" Automatic Water Heater installed in the Home indicates high quality throughout.

Recommended and specified by all the leading architects, plumbers and builders.

Consider the high merit of the Pittsburg coupled with "Pittsburg Perfect Service."

"Hot water quick as a wink."

Send For a Sample Copy
Of The NEW
Daily Pacific Builder

The only daily construction newspaper affording complete coverage of the construction activities in Central and Northern California, featuring work contemplated, bids wanted, bids opened, contracts awarded, sub-bids wanted and sub-contracts let on all types of building construction, bridges, dams and harbor works, irrigation projects; machinery and equipment; water works and supplies business opportunities, building permits, building contracts, mechanics' liens, acceptances, etc., etc.

Keep informed on construction developments in Central and Northern California and the major projects in Southern California, the states of Oregon, Washington, Nevada and Arizona.

The new DAILY PACIFIC BUILDER will afford a service that serves—both in Quality and Quantity. You, as a member of the construction fraternity, should not be without it.

Subscription price \$1.50 per month, or \$15.00 a year, payable in advance.

N. Y. STEEL BOARD DROPS NEGOTIATIONS WITH UNION WORKERS

Officers of the International Bridge and Structural Iron Workers Union to capture all greater New York steel erection have proved unavailing according to information received from that city today. After three months of discussion the Structural Steel Board of Trade unanimously adopted a resolution terminating all negotiations with the Union. Steel in New York has been erected open shop for twenty-four years. The Union, it is said, attempted to force closed shop erection in New York by tying up all of Starrett Bros. work throughout the country.

The resolution adopted by the Structural Steel Board of Trade follows:

RESOLUTION passed by the Structural Steel Board of Trade of New York, at a meeting held July 1, 1930.

When the Structural Steel Board of Trade entered into its recent negotiation with the Iron Workers' Union, it did so with the intention of effecting an agreement that would establish uniform labor conditions for its members throughout the whole metropolitan district, including New Jersey. This would have permitted them to carry out their obligations to their customers, to the public, and particularly to their employees, many of whom have already indicated their fear of discrimination.

During these negotiations the deplorable labor conditions in New Jersey, including both the exploitation of the public and the workers, have been exposed in the public press; but notwithstanding this publicity and the proof of the conditions themselves, the Union has done nothing to clear up the situation but has even taken steps toward its continuance—in fact, the negotiators for the International Union have consistently shown an apparent willingness to countenance existing conditions in the future.

The opinion of this Board cannot be other than that the signing of any agreement with the union regardless of its form would not remedy the situation as there is no apparent desire to do so on the part of the union and it believes that if an agreement were executed it would simply be a matter of a short time before the conditions in New York would be similar to those which are now known to exist in New Jersey.

It is therefore

RESOLVED: That all negotiations or efforts toward making an agreement with the Iron Workers' Union be and they hereby are discontinued and the proper officers of said union be so advised.

CONSTRUCTION ON THE INCREASE SAYS A. G. C.

An increase of approximately 8½ per cent in the volume of construction performed during June, as compared with that of the previous month, was indicated by the shipments of basic construction materials, according to the statistical charts of the Associated General Contractors of America which show the June volume at index number 191, or 15 points above that for May. The June index number, however, was 40 points below that for the same month last year.

Composite index numbers for the first six months of 1930 indicate a decrease of 12 per cent in the amount of construction work performed during the first half of the year, as compared with the same period of 1929. The average monthly index this year has been 148 against 167 for the first six months of last year and 195 for the entire twelve-month period of 1929.

Although contract awards reported for the first five months likewise show a decrease in comparison with those of last year, Edward J. Harding, assistant general manager of the Associated General Contractors, is confident that there is still a large volume of work which will come forward and that a relatively stronger showing will be made in the final half of the year.

Concrete surface pavement awards aggregated 18,914,000 square yards in May, or 314,000 square yards more than in the previous month which was a record-breaking April. The awards for the first five months totaled 64,665,036 square yards, or an increase of 32.3 per cent over the same period last year.

Long term State and municipal bond issues totaled \$135,000,000 in May and \$595,056,000 for the first five months, a gain of slightly more than 12 per cent for the latter period. The monthly average thus far has been \$119,000,000 as compared with \$17,150,000 for the first five months of 1929.

The average of construction costs in the principal construction centers in June was 3.4 points less than the cost index figure for the same month a year ago, standing at index number 189.6, according to the association's charts.

PROTESTS CODE CHANGES

The Amerlux Steel Corporation has filed a complaint with the San Francisco Board of Supervisors of a movement to revise the San Francisco building ordinance so as to allow only the use of steel made by the open hearth process and prevent the use of steel made by the Bessemer process. John B. Leonard, superintendent of the Bureau of Building Inspection, says that that revision would not prevent the use of Bessemer steel.

BARGAIN PRICES FOR THOSE WHO BUILD NOW

(From Engineering News-Record)

Now and then it is worth while to forget the business cycle, or at least to discard its terminology, and take a homely look at facts. Such a time is at hand. Regardless of trends or causes of trends, the construction industry is short of work. Money is not being spent for homes, for factories or for office and apartment buildings in anywhere near normal volume. And the reason, regardless of what we call the present state of the business cycle is plain. Everyone is waiting for a bargain.

It is now nearly a year since deflation began. The various indexes of business activity—steel mill operations, building contracts, electric power output, car loadings, commodity prices, interest rates—have steadily declined. Considering only building materials, in October, 1929, the basic steel price was \$1.90; it is now \$1.65. Brick was \$14.50, it is now \$13. Pine has declined 6.5 per cent, fir 18.5 per cent. Cement at \$1.95 is higher than it was in October, but is below the \$2.05 price which held from 1925 to September, 1929. Briefly, not since 1922 have building materials prices been so low. Other factors in construction point to advantages over recent years. Manufacturers of equipment and accessories, anxious to keep plants going and men employed, have reduced prices. Labor itself, working under the threat of possible unemployment, is more efficient than for several years past. Slack business has fostered keen competition among contractors and fabricators who are waiting hungrily for invitations to bid.

Granted a bargain day has arrived, can we expect bigger and better bargains to follow? Economists generally are answering this in the negative. They are pointing to several factors which indicate that bottom has been reached.

Credit conditions, which are fundamental to increased business, are wholesome. The rate of credit expansion, after a year of decline, has now reversed itself and is nearly normal; in step with business, both should move ahead. Resistance to further decline in commodity prices is seen in the upturn of some of them. Signs of an increase in residential building are reported by mortgage companies and building loan associations. Crops are going to be good, which means revenue for the railroads if not for the farmers.

It is worth while to keep in mind that business has now been marking time for nearly a year. Such an unusual situation in a country so completely convinced of the close relationship among prosperity, construction and industrial activity is not normal and must eventually change. The facts cited above herald the change. The tide is on the turn. It is time to build.

QUANTITY SURVEY WOULD HAVE SAVED \$23,000 ON SCHOOL JOB

I hope the day will come when quantity surveys will be provided and competing contractors will be able to make use of them to their own mutual benefit. It would be a great aid to every one in the contracting business to figure on some sort of uniform system. One man will take off brick work and wind up with half million brick and another man will take the same plan and only get four hundred and fifty thousand brick. Somebody is at a great disadvantage.

The real cost that is involved in the estimating of plans finally has to fall upon the owner. The owner sooner or later will see, possibly not in our time, but in the next generation, how it would be far more profitable for him to supply with his plans and specifications the quantities—the number of cubic feet of concrete, the number of thousand of brick, and have that quantity ascertained by not one Quantity Surveyor, but take three men, figure a set of plans and then compare their figures. They are bound to arrive at correct results, and it would be far better for architects to say, "Here are the plans and specifications the number of brick it will take, number of yards of plastering, number of feet of lumber, and the number of cubic feet of concrete." Then, it would be a simple matter for a contractor to figure. As it is today, thousands of dollars are wasted in overhead, in figuring plans.

Take a plan like the high school let here in St. Louis a little more than a week ago. There were twenty-three bidders on that high school, and I will venture to say every general contractor who figured that job spent one thousand dollars, at least, in ascertaining the quantities and making up his bid. Well now, there was twenty-three thousand dollars that was absolutely wastefully spent. If one-tenth of that amount of money was spent through quantity survey, just that much economy would be practiced.

Economical Feature

There is a difference of opinion in all things, and I still maintain the time will come when quantity survey will be a most useful and economical feature in building construction.

You know while I was a public servant, I liked my job. One night I was making a speech in the ballroom of the Statler. After I had made my speech a woman came up to me and extended her hand and said, "Mr. Mayor, I enjoyed your speech so much that I can't refrain from telling you that you remind me so much of my husband before he was taken away." I solicitously asked, "How long has he been dead?" She replied, "He isn't dead, they took him away to a lunatic asylum." (Laughter.) Then, on another occasion, I used to visit the institutions with the Grand Jury. I did that for self-protection, and too, it created a good feeling. We visited one of the feeble minded farms, a big institution, and there was an inmate there by the name of Otto. I was always friendly with Otto, shook hands with Otto. This day I wanted to show off a little and I said, "Otto, how are you today?" "I am fine." "This is a beautiful place up here, isn't it?" "Yes." "You like to live up here?" "Yes, Henry you ought to come up here and live

Address of Henry W. Kiel, Ex-Mayor of St. Louis, made at the Fifth Annual Convention of the American Institute of Quality Surveyors in St. Louis, Mo., April 15, 1920.

with us, you would like it too." (Laughter.) He had a good idea of what should have happened to me.

Speaking of relationship to the architect, I remember hearing a speaker, some thirty or thirty-five years ago, say that the contractor bears the same relation to the architect, that the undertaker does to the doctor—he covers up his mistakes. The architect makes some mistakes and the contractor makes a great many more, but if there is co-operation of giving the very best, and I do insist the method of building today is far superior than when I learned that trade. Today, through the co-operation of labor organizations, and you know they are very stringent and strict, you can't get a mechanic to slight his work, and you are getting a better quality and a better class of work. The only difficulty is that the contractor, whether he be a sub-contractor or general contractor is at a great disadvantage because of errors and mistakes made in estimating work.

Benefit to Contractors

I say, sincerely, that the time will come when the Quantity Surveyor will be of great benefit to the contractor. I never saw a contractor who died rich, but they always seem to have plenty of money when alive. A man told me, when I complained of losing money on almost every contract, "Well, you must have had a good pile when you started because you have done a whole lot of work."

The architects are not only taking interest in their personal affairs, but in civic affairs and that, after all, is the important part of any community. Today is the day of education. We learn by contact. This meeting of yours where you exchange thoughts and ideas, when you go back home you tell your colleagues what information you have gathered here, and it spreads out like an endless chain, and keeps on going.

The architects do a whole lot to help beautify the city. A nice residence district might be established and somebody wants to build a store or a garage and mar the beauty of the particular place. It was largely through the efforts of the architects that the zoning law of the City of St. Louis was adopted and became a permanent law. We had a great deal of difficulty when the Supreme Court declared the law at that time null and void. Today it would appear to work a hardship on an individual, but, nevertheless, you see the various localities in St. Louis ideally adapted to the purpose for which they are zoned.

You have your commercial zones, your apartments and industrial plants. The result is we are getting a more beautiful city, and everything is being erected in such a way that it adds to the attractiveness of the city and that credit largely belongs to the architect because they have made it a study and they have been able to convince the people that that must

be done to make a better and bigger city.

There are a great many problems that are confronting the people of this Nation today. Since we have talked a little bit about reformatories and prohibition, when I look at this Literary Digest, I find everybody isn't of the same accord.

Public

If you gentlemen who are here at this Convention will go back home and educate your own people, that is, the contractor, particularly the architect, of course, is a factor, the architect would settle your problem if he would make it a condition that his clients obtain quantity survey and submit it along with specifications, then your problem would be over. You have to get the contractor to use your information and every one of them would like to do it, but the cost is the thing that is prohibitive. That is an additional outlay of money. So through some method, if you could get your contractors' organization in cities where the contractors' organizations are strong, get them to utilize your plan, if you would be positive, which you would have to be in your quantities, then you would relieve a situation, and I think it would be only a matter of education.

Rush Bids Troublesome

The thing that troubles the general contractor, there is a dead line, bids must be in at a certain hour. Sub-contractors are going to wait until the last minute, varying thirty or forty per cent, one being materially lower and consequently the general contractor is in a quandary, whether the fellow is reliable or not.

Now then, if he had these quantity surveys that he could compare, use his own judgment as far as unit prices are concerned, then he would be in a more positive position, but the most trying period of a contractor's life is an hour before a bid goes in. If he has made a mistake and gets the job, then he is worried about how much money he is going to lose.

There was a time in my younger days when brick work was let on unit basis. The building was built upon a cost so much per thousand brick. After the building was completed, the engineer would measure that building, so many brick in it and yet would get paid just exactly for what you did.

The custom today is to get just as many bids as you can. That seems to be the policy, and even if you didn't want a large number of bids the contractors themselves would appeal to the architect and owners for permission to figure on the job. It is impossible for twenty-five men to estimate a set of plans and for one of them not to make a mistake. Many of them will make a mistake in their own favor and not get the job.

Encourage Irresponsible Competition

Mr. Ittner has said that out of twelve school jobs, four of them fail, and the bonding companies have to complete the building. Of course, bonding companies today are looking for business and they don't care, any one with a reasonable sort of statement, the good contractor pays for the defaulting contractor. It is business that they are looking for. The bonding company will write mostly any kind of a contractor, go surety

for him; they will take a chance. When he feels, the bond rate is naturally increased.

There are a lot of defects in the building business and a lot of defects in the architectural business, but, nevertheless, we are making progress. I think conditions are far superior today than ten years ago, but only by that constant perseverance that you gentlemen are exhibiting here, by coming here, you are making a great sacrifice yourselves but you are, nevertheless, helping those coming after you, because you are going to teach a lesson today and next week and next year it will be learned and carried out and followed.

I think you are on the right plan. I think you have the right idea of how to do this. Now then, your problem is to convey that idea to others who don't understand. If you keep on trying and educating, I think your way has not been wasted, but very well spent.

NO INCREASE FOR ROOFERS AT FRESNO

Members of the Fresno Roofers' Union have agreed to return to work at their old wage schedule of \$8 per day, abandoning, because of economic conditions, their recent demand for a \$1 per day increase. The union is composed of approximately fifteen members.

Committees from the Fresno Builders' Exchange and the Fresno Building Trades Council met at the request of the roofers' union and issued a joint statement that "the refusal of the wage increase was necessitated by a thorough review of conditions both locally and over the entire state."

"The Builders' Exchange," said Harry Cayford, secretary, "made clear its attitude requesting the building trades council to use its offices in maintaining the wages of the roofing craft as well as other crafts on a level and stable basis until such time as conditions warrant a change."

\$23,000,000 STEEL MILL FOR VANCOUVER

The Financial Post, Toronto publication, says that financing of a \$23,000,000 steel plant for the vicinity of Vancouver, B. C., by the Coast Range Steel Company, Ltd., is being arranged in New York.

The steel company controls iron ore property on Texada island, off the coast of British Columbia, near Vancouver.

Under plans of a company reorganization, the Post said, William B. Mayor, chief engineer of the Ford Motor Company, will be president, with Geo. M. Holly, president of the Holly Carburizer Company, and other Detroit capitalists associated.

A recent survey of ore deposits on the island revealed 6,924,000 tons, with an average iron content of 60 per cent, the paper declared. Mining engineers estimated sufficient ore was blocked off to keep the proposed plant operating 30 years.

The Post said the proposed plant would handle 300,000 tons annually and market 50 per cent of its pig iron and steel products in western Canada. Negotiations have been started, the paper declared, to sell under a five-year contract 200,000 tons of ore annually to Japan.

JASPER - STACY OF S. F. LOW ON ARIZONA ROAD WORK

Jasper-Stacy Co., of San Francisco, at \$24,310 submitted the low bid to the U. S. Bureau of Public Roads for 4,921 miles of Housecroft Canyon Highway in the Kaibab National Forest, Arizona. The engineer's estimate is \$243,537.

NEW INDUSTRY NEEDED TO USE OUR SURPLUS FUNDS AND ENERGIES

What will be the new, big industry which will use our surplus funds and energies? How are we going to get full employment throughout the nation when practically every industry is overproducing?

The question is asked in the Business Bulletin of the LaSalle Extension University of Chicago. —Editor.

Here is a problem that has many thinking business men stumped. It was well put in a letter recently received from a man who would like to be an unqualified optimist, who is a real thinker, but who can't find his way out of a dilemma which he expressed as follows:

"How in the world we are ever going to get full employment throughout the nation when practically every industry is overproducing is something not very pleasant to think about."

What Is There Left to Do?

It is easy to evade this question by platitudinizing about the many unfulfilled wants of the world and by pretending that were only a few "injustices" corrected so as to make it possible for every worker to acquire what he wanted, then the problem would solve itself. We all hope that this millennial situation will some day be realized, but all thinking men know that progress toward that goal has been long in the making and that it cannot be reached in a year. This year and the years just ahead are facing this problem. How can it be answered now?

This problem, looked at from a slightly different angle, ties right up with the use we make of our national income. For 1929, this is estimated as having been about \$30,000,000,000. That is the sum which we Americans had at our disposal to spend or save or invest. Exactly what we did with this money is impossible to determine, but roughly 50 per cent of it was spent in buying things in stores, etc.; 30 per cent was spent on services such as transportation, government and beauty specialists; and 20 per cent was saved and invested in buildings and factories and machinery. It is this last fraction which has been providing us as a people with our enormous facilities for efficient production of the things we buy, for rapid and luxurious transportation, and for splendid mass amusements.

And Where Invest Our Money?

You see now how our problem hinges largely on the way in which this last fraction is invested. So much has been saved and invested in more and bigger plants and more efficient equipment that overproduction, or, at least, overcapacity, presents serious difficulties. When these modern plants work at capacity and employ their men full time, they turn out more goods than folks will buy.

Is the answer, perhaps, to get folks to buy more? Yes, in part, but not entirely. The trouble is that folks who can afford to buy more things and services already are buying about as much as they care for. They prefer to save and invest their surplus income—yet, laudable as this impulse is, it contains the threat of still further over-expanding our productive capacity.

Did Autos Create Our Wealth?

The way out of our difficulty is shown us in the history of the automobile industry. Here was a device that seemed at first a rich man's toy. Yet so attractive a toy was it that, more and more generally, it became

"the thing" for which to work harder so as to earn more, and to save a little less for investing, in order to get one, too.

And thus was started an industry which has absorbed untold surplus billions and provided well-paid work for untold numbers of men who might otherwise have clogged our labor market. Notice that direct investment and direct employment in the industry are but a small part of this total. The automobile is responsible for the billions that are being spent on roads, for the vast expansion of the oil industry, and for a transformation of rural as well as city life, with all the developments and building that have resulted.

The automobile industry is probably correct in claiming for itself the chief part in the marvelous prosperity of our people.

The Auto Industry Needs No New Money

But now the automobile industry has largely done its bit. Its influence is still responsible for big road-building programs and the like. But the industry itself is unfortunately overbuilt to the point where it seems unlikely that it will ever produce cars at its capacity rate of 7,000,000 a year. It has little need, therefore, of attracting additional money out of this huge fund that seeks investment each year.

Clearly, then, we need now some new industry which will fire the imagination of our spenders and our savers. We need some industry into which our savings can be poured to produce something which many men will long for and buy. If in the making or servicing of that something multitudes of men will find good pay, so much the better.

Where Will Our Savings Go Next?

What will this new industry be? Who would hazard a guess? Perhaps it will be some industry now in its infancy. Some fancy that the radio has just such marvelous possibilities before it as the automobile had 20 years ago, with television and other unannounced marvels about to be developed.

The conquest of the air will be put forward, by others as the basis of an industry which will, for years, claim all our spare resources. Perhaps they will prove correct.

The chemical industry is visioning marvels also. New uses for old materials may turn upside-down many of our present processes for doing things, and vast investments and a vast amount of work may be needed to rebuild our industries.

Is Rebuilding Our Cities the Answer?

Or perhaps the new industry will arise through new emphasis on something folks want now, but are not yet insisting on. We might well get "all het up" over the dirt and smoke of our cities, for example, thus giving encouragement to the widespread use of gas, the banishment of horses, and work for thousands of men in keeping things clean. Or it may be noise which we resolve to overcome, involving extensive rebuilding of our abundant noise-making devices.

Or perhaps a far-reaching, wholesome civic consciousness will demand that our cities and our roadsides be made beautiful. Perhaps the cluttered rabbit-warrens in which a large share of our people still live will be rebuilt into sections where folks will be proud to live. Perhaps the rivalry between cities and states will bring this about unexpectedly soon.

And the men who sponsor the successful new industry will prosper!

THE OBSERVER

What He Hears and Sees on His Rounds

In my judgment, says H. C. Turner, president of the Turner Construction Co., we have reached a low point in the cost of buildings and the man with confidence in the future of this country will build now and at better prices than are likely to prevail again for some time to come. The cost of building construction remained fairly constant from 1923 to 1929. Increases in wages were offset by better management. Today building materials can be purchased at depression prices. You can judge how long this will continue. Wages have not been reduced, but efficiency has decidedly increased. With the surplus of skilled workmen, the most capable and skilled are employed with the obvious increase in performance and the constant reduction in labor cost.

Several years ago while attending a meeting of the construction interests in the Southern section of the state I was told by a general contractor that if the secretary of every Builders' Exchange in California was as active as "that fellow from Pasadena, we would have a state-wide organization second to none in the world."

The general contractor referred to George Israel, secretary-managed of the Pasadena Builders' Exchange.

"When Israel speaks, the building industry in Southern California listens," I was told.

Apparently my contractor friend was right.

In his latest exchange bulletin, Israel speaks. He asks "Why a Builders' Exchange?" and then proceeds to answer the question in the following style:

Why a Builders' Exchange?

That slogan was coined by a man who was, within his true self, one of the best friends the building industry as a unit and the building public of California ever had.

When you seriously think of the building industry in California, its great importance, its comparable investments in our state with any other industry in the state, its first ranking, necessity, you will have the answer to the above slogan.

I am thinking of the men who are this building industry, the inventive, constructive minds who have accomplished the seeming impossible. The architect, the engineer, the contractors in the many divisions, their visible efforts confront you everywhere you go.

The mind in the building industry stops at nothing. It defies the earthquake fault by filling the fissure with cement, spans the chasm that man may pass over, it seeks out the lonely canyons in mountains—and crags and rocks, lends to nature the handy work of the builder. In leaving the main highways which too unfortunately the traveler of the world seldom does, the panorama unfolds to you the many, many enterprises, commercial, educational, philanthropic, religious and recreational, which even old residents know little of, and with no possible exception these things have been done by you and your colleagues as builders. True, isn't it?

Now if this is all true, I want you to think seriously with me for the moment. Why should not the builders as a unit be just one big family?

Why should they not make themselves so clean, so outstanding, so honorable (which is the alpha and omega of self protection) among themselves that they will absolutely command the entire respect of the "ruling power" of every condition, viz.—The General Public.

I want you to put this down in the bottom of your "meerscham" and draw on it—when every member of the builders organization will tune in, be willing to do their part, promptly take care of their obligations to the parent body, demonstrated their willingness to work on committees, religiously come to meetings without being urged, think out and work on constructive suggestions, or—in simple language, support your officers and directors, and many members who have given their time and spent their change in traveling over the state during the past few years in working out the ground plan which is now recognized from the high financier, all down the line, and which is only now beginning.

Never for an instant overlook the fact that the leaders in any worthwhile movement come from men who conscientiously do their part, and that you should be one of them. When—

This comes to pass—your work will be your pleasure.

You have a family; yes—and as time passes the family separate, each going their own way—so long as the word often comes, "they are all well" and doing well," all is well, but—when sickness or distress comes to one of them, the wires flash, even the modern transportation is too slow—you are together again, and so California for the past score of years has been a happy go lucky, mad rush—you all have gone your own way, and all have been intoxicated, but there never was a sprayer where the awakening did not call for real judgment. I feel we are at this station right now, and if there ever was a time when men should come together in a common understanding—IT IS RIGHT NOW. Will the building industry do it? I know it will.

The outstanding facts in the Third Annual Report of the American Arbitration Association just issued are the linking up of trade associations in a unified national arbitration system, more than 300 such trade bodies being listed as participating in the work, and the increased use of its Tribunals by attorneys, 290 law firms having used its services.

Listed among the organizations participating in the educational work of the Association and identified with the arbitration system are the American Association of Engineers, American Face Brick Association, American Institute of Architects, Building Trades Employers Association, Long Island Real Estate Board, New York State Association of Real Estate Boards. Also associated with the Arbitration Association are the Builders Exchange of Los Angeles, Indianapolis Building Congress, New York Building Congress, Real Estate owners Protective Association. Lucius R. Eastman is President of the

American Arbitration Association and its Board of Directors includes Wm. D. Baldwin, W. J. L. Banham, Irving T. Bush, Irwin S. Chanin, Henry Ives Cobb, L. K. Comstock, Morton R. Cross, Frederick Brown, H. Hobart Porter and David A. Schulte.

Mr. Eastman's report lays particular stress upon the necessity for a careful preparation of arbitration agreements and calls attention to the number of appeals being made to the Courts to vacate awards because technical requirements are not observed. The Association has issued a Warning on Arbitration Clauses calling the attention of business men to the losses and inconvenience which result from vacated awards, and more than 60,000 of these warnings have been distributed throughout the country, together with instructions as to correct procedure for the guidance of the parties and the arbitrators.

The records of the Association indicate that in 1929, in its New York City Tribunals alone, 344 cases were submitted to arbitration, and in only four of these cases were appeals made to the Courts to have the awards of the arbitrators set aside. In three of the cases appealed the Courts upheld the arbitrators' awards and one case is still pending.

Overruling a recent "cease and desist" order of the Federal Trade Commission issued against the Berkey & Gray Furniture Co. and 23 other furniture manufacturing companies of Grand Rapids, the U. S. Circuit Court of Appeals for the Sixth Circuit in decrees entered June 28 held that the furniture factories of the United States and its possessions do not have to include the word "venerer" in all advertising of furniture not made from solid woods, according to the American Lumberman. The court sustained the position of the furniture manufacturers that virtually no fine furniture is made from solid woods. The court further held, sustaining the furniture men, that in calling their products walnut or mahogany, or by the name of any other wood, the manufacturers are not making a misrepresentation to the trade nor misbranding furniture, as was contended by the Federal Trade Commission. The Federal Trade Commission held that the furniture factories had, in their catalogs and invoices, referred to furniture being made of "mahogany" or "walnut" when large plain surfaces like table tops or panels are built up of cross laminations of other woods and faced with a thin layer or veneer of walnut or mahogany. The commission held that this trade practice involved unfair misrepresentation to the public and that in such catalogs or invoices the factories must specify that the article is "veneered."

The Portland cement industry in June produced 17,227,000 barrels, shipped 18,700,000 barrels from the mills and had in stock at the end of the month 29,348,000 barrels, according to the Department of Commerce. The production of Portland cement in June, 1930, showed an increase of 2.6 per cent and shipments a decrease of 9 per cent as compared with June, 1929. Portland cement stocks at the mills were 6.7 per cent higher than a year ago. The total production for the first half of 1930 amounted to 75,892,000 barrels, compared with 75,076,000 barrels in the like period of 1929. The total shipments for the first half of 1930 amounted to 70,137,000 barrels, compared with 70,248,000 barrels in the like period of 1929.

ALONG THE LINE

Hollis R. Thompson, for the past two years managing director of the Berkeley Chamber of Commerce, was installed as city manager of Berkeley last Monday, succeeding John N. Eddy, who resigned to accept a similar position in the East. Thompson, 31 years old, said to be the youngest city manager in the country, is a graduate of the University of California. He will receive a salary of \$7000 a year.

The city trustees of Carmel, Monterey County, will shortly appoint a new city engineer. The office of city engineer, held by D. H. Severance, was recently declared vacant.

TRADE LITERATURE

"How to Paint Concrete and Masonry Surfaces," a 20-page booklet published by the Medusa Portland Cement Co., Cleveland, Ohio, tells of the characteristics of Medusa portland cement paint and gives directions for painting concrete and masonry surfaces. Various sections of the book take up the use of cement paint in industrial and railroad work and in other types of engineering construction.

Osthoff & Co. of San Francisco has opened a branch factory at 349 Eleventh St., Oakland. The company manufactures electric signs. A specialty is made of process work. C. F. Goss is Oakland manager.

Bulletin 111 of the Chicago Pump Co., Chicago, Ill., gives a large amount of data on pneumatic water-supply systems, including a history of the development of such systems, an explanation of the special equipment used, assembly and layout suggestions, and engineering tables and specifications.

NATIONAL ELECTRIC LIGHT ASSOCIATION PRAISES S. F.

San Francisco was highly commended as a convention city by the thousands of delegates attending the National Electric Light Association Convention during June. In fact, the feeling of appreciation for their reception was so strongly apparent that the following official declaration on the subject was made by Mathew S. Sloan, retiring president of the association:

"The cordiality of San Francisco to visiting delegates has never been equalled in the history of the association and I am sure that the city will eventually profit by its reception to us. That treatment presages an early return here for a future convention. We have never been treated more courteously or welcomed more enthusiastically and we want San Franciscans to know how we feel about it."

HERE — THERE — EVERYWHERE

Wm. H. McGlinchey of City Hardware Co., 11 Main St., plaster contractor, James Quaglino of the County Hooding Service, J. H. Kirk of the S. P. Lumber Yard, and H. M. Holzinger of the San Luis Mill & Lumber Co., have been admitted to membership in the newly formed Builders' Exchange of San Luis Obispo County.

Governor John H. Trumbull, president of the Trumbull Electrical Manufacturing Company, a recent visitor to Oakland, announced his firm plans to establish a Pacific Coast manufacturing plant. It is possible, Trumbull said, that the plant will be located in Oakland.

The American Institute of Architects' safety code for construction work, which is being considered by the Sectional Committee of the American Standards Association in connection with the development of a national construction code, has been adopted by the New Jersey Legislature. It was approved by the Governor on April 18.

Three hundred structural iron workers, who walked out at Kansas City July 1 asking a daily wage of \$12, returned to work last Tuesday under an agreement which permits the building of several skyscrapers to continue, and will be effective for two years. A 50 cent increase in wages, making then \$10.50 a day, is effective at once. On January 1 the pay will be \$11.

A total of \$287,270,000 for public improvements, construction, industrial expansion and motion picture production will be spent in the Los Angeles area during the next six months, according to figures announced by the Los Angeles chamber of commerce.

The figures are divided as follows: Construction, public improvements and expansions will require expenditure of \$187,120,000 and require an estimated 10,200 men.

Movie production will require an expenditure of \$100,000,000 and require an average of 3000 more men.

The above figures do not include work already under way or the commencement of work on Boulder Dam but only work in the immediate Los Angeles area.

The city of Los Angeles will spend approximately \$34,500,000 during the next six months on public improvements. Of this amount the board of public works calls for an expenditure of approximately \$8,000,000.

WESTERN HIGHWAY ENGINEERS ELECT OFFICERS

All officers of the Western Association of State Highway Officials were re-elected at the conclusion of the fourth annual convention at Salt Lake City, July 3.

The officers are: Henry H. Blood, chairman of the Utah State Road Commission, president; Z. E. Severson, Wyoming state highway engineer, vice president; J. D. Wood, Idaho, state commissioner of public works, secretary; Blood, Wood, L. I. Hewes of the bureau of public roads, O. S. Warden of Montana and W. C. Davidson of New Mexico, members of the executive committee.

TRADE NOTES

Inertel Co., Inc., New York City, has opened a branch office at 447 Sutter St., San Francisco. B. W. Mueller has been appointed Western manager, in charge of the office.

Milcor Steel Co., Milwaukee, Wis., is the new name adopted by the organization formerly known as the Milwaukee Corrugating Co. and its subsidiaries. There will be no change in management.

General Electric Co., Schenectady, N. Y., has divided the industrial heating and welding section of the industrial department into two sections to be headed by C. L. Ipsen as manager of sales for the industrial heating section and L. D. Meeker for the electric welding section.

Belyea Truck Company, 3128 East Twenty-sixth St., Los Angeles, has just purchased the business of the Western Crane Service Company of that city and will operate it in conjunction with its own crane service department. A number of the operators of Western Crane Service Company were retained.

MILLIONS ADVANCED FOR HOME BUILDING

That building-loan associations are strongly supporting the intensive campaign of homebuilding now underway throughout California is indicated by the fact that during the last three months 39481 new loans aggregating \$33,042,563.21 have been made by these institutions. The total number of loans in force to date is 132,882, amounting to \$418,101,599.48.

Call reports recently made to Charles Whitmore, State Building-Loan Commission, show that there were 6466 flat loans totaling \$50,-\$56,996.51 in force on April 1, a decrease of 4482 loans aggregating \$17,980,670.82 as compared with those held on September 30, 1929, indicating that a conservative, safe loan policy is being followed by the associations with regard to this class of financing, Commission Whitmore stated.

STANDARDS OF DESIGN FOR CONCRETE

A new engineering treatise entitled "Standards of Design for Concrete" has been published by the Bureau of Yards and Docks, of the Navy Department. This work is the result of an intensive study of past and current practice in concrete design, and includes several new developments in this field, which constitute distinct improvements over former practice.

"Standards of Design for Concrete" has been complemented by some of the high engineering authorities of the country, and owing to the interest of many activities of the Government in this type of construction, this publication should prove of great value to engineers, and others interested in concrete design. The booklet is obtainable from the Superintendent of Documents, Government Printing Office, at 50 cents per copy.

**SACRAMENTO PAINTERS UNION
WOULD DEPORT ALIENS**

Deportation of all Mexicans, Japanese and Filipinos and other aliens who have not declared their intention of becoming citizens of the United States is recommended in a resolution adopted by the Painters' Union, No. 487, of Sacramento.

The painters declare the three peoples affected in the resolution "seriously and grievously lower the high standards of living that we try to uphold." The resolution, as adopted, is as follows:

Whereas, there are many Mexican, Japanese and Filipino peoples in California that have no right to be here, and,

Whereas, these peoples do seriously and grievously lower the high standards of living that we try to uphold, and,

Whereas, these peoples who have not their first papers announcing intentions of citizenship, and,

Whereas, these people who cannot read, write and speak the English language, and,

Whereas, these peoples who have become stranded and desire transportation back to their own countries, therefore, be it

Resolved: We, Local Painters' Union No. 487, of Sacramento, California, in regular session, do petition the county, state and national governments to adopt such methods and means as will deport these peoples.

**HEAT TRANSFER IN AMMONIA
CONDENSERS**

Bulletin No. 209 of the Engineering Experiment Station of the University of Illinois contains a report of the progress made in the investigation of the heat transfer in various types of ammonia condensers since the publication of Bulletins 171 and 186. The former dealt with the performance of three types of ammonia condensers, namely, the atmospheric bleeder, the double pipe, and the vertical shell-and-tube; the latter with results obtained when certain changes were made in the design and operation of the vertical shell-and-tube condenser and with results from a study of the heat transfer in a double-tube superheat remover. The present bulletin contains results from a study of the performance of a horizontal shell-and-tube condenser.

The objects of the investigation were: to determine the coefficient of heat transfer and performance characteristics of the condenser with the water passing in parallel through the two shells and with various rates of flow and initial temperatures for the water; to determine the effect of the pressure of the ammonia in the condenser on the coefficient of heat transfer and the performance characteristics of the condenser; to determine the performance characteristics when the condenser was operated with one shell alone, and also with the water passing in series through the two shells instead of in parallel; to determine the rate of scale formation, or fouling of the tubes, and the effect of such fouling action on the coefficient of heat transfer for the condenser.

Copies of Bulletin No. 209 may be obtained without charge by addressing the Engineering Experiment Station, Urbana, Illinois.

**SUPER-HIGHWAY SURVEY
IS STARTED BY STATE**

Actual work on the East Bay-shore Richmond to San Jose super-highway has been started. Arrival of survey engineers on the ground to make studies of routing is announced by C. H. Purcell, State Highway Engineer, to the California State Chamber of Commerce.

The starting of the actual work culminates a two year fight of the civic leaders of the East Bay shore and members of the Central Coast Highway Committee of the State Chamber of Commerce. The work necessitated the bringing together in agreement the supervisors of the three counties involved with the state highway officials.

C. H. PURCELL
State Highway Engineer

Following the completion of the survey a joint highway district will be formed for the actual construction of the road.

A statement from the committee states in part: "The need for a high speed super-highway skirting the bay-shore from San Jose to Richmond serving east-bay cities has long been felt and urged by eminent engineers and city planners. The Committee is pleased to acknowledge the cooperation and support of the supervisors of the counties of Alameda, Contra Costa and Santa Clara, and is highly pleased with the progress being made toward the realization of this project."

The committee members of the State Chamber who have been working for the construction of this super-highway are: J. H. Fuller, Harry Goodridge, E. M. Hunt, Geo. N. Randall, Chester Hunt, Mel Auerbach, R. E. Chandler, I. S. Shattuck, E. A. Hoffman, Ralph S. Hawley, H. Y. Stuart, R. R. Arnold, W. W. Scott, Geo. A. Posey and E. D. Landels.

Unfilled orders of the United States Steel Corporation declined 91,163 tons in June to a total of 3,968,064 tons on June 30. The May decrease was 294,993 tons. The backlog on May 31 was 4,059,227 tons. On April 30 unfilled orders aggregated 4,354,220 tons, on March 31 the total was 4,570,653 tons and on June 30, 1929, the total was 4,256,910.

**POPP, SAN JOSE ENGINEER, RE-
TURNS FROM MEXICO**

W. L. Popp, city engineer of San Jose, at a meeting of the San Jose Engineers' Club last Tuesday told of his recent trip into Mexico and Lower California.

The trip into Mexico is well worth taking, Popp advised, for it offers complete change of scenery and an easy opportunity to observe fairly primitive people. Prohibition in the United States has resulted in noticeable changes in Mexico in 10 years, he said, the building up of a few fine hostleries and the tremendous increase in liquor prices.

At Agua Caliente, for instance, he stated, he found prices of meals very reasonable, but on every side he noticed people drinking liquor with their meals that was very costly.

After a short visit at Agua Caliente, Popp went to Ensenada, the new capital of Baja California, a very primitive Mexican village. The town has an old fort garrisoned with Yaqui soldiers who begin the maneuvers each morning at 4 o'clock with a bugle drill lasting as long as an hour.

One reason for the expense of staying in good hotels, Popp explained, is the fact that officials and their friends stay in hotels without cost, the management realizing that they have to "put up" officials without charging them. Another reason, he added, is the tendency of the Mexican government to raise taxes whenever a business seems to be making a profit, causing a race between the prices the public pays and the taxes charged by the government.

**RUSSIAN LUMBER, HELD AS CON-
VICT MADE, ADMITTED**

Assistant Secretary Lowman rules that six shiploads of Russian lumber imported by the A. C. Dutton Lumber Company at Poughkeepsie, New York, should be admitted to this country, as it had not been proved that it was produced by convict labor.

Two shiploads of the lumber arrived at Poughkeepsie and Providence, R. I., last week and were denied entrance by customs officials under the tariff act which provides that articles produced wholly or in part in any foreign country by convict labor shall not be entitled to entry.

Four other shiploads of lumber are on the high seas and Lowman instructed customs collectors that they should be admitted.

Lowman's decision was the result of a hearing at which importers of pulp wood and the Amtorg Trading Corporation, the Russian commercial organization, testified the lumber had not been produced by convict labor.

**STATE MAY AID IN GOLDEN GATE
BRIDGE CONSTRUCTION**

Directors of the Golden Gate Bridge and Highway District have the opinion of Attorney General U. S. Webb that state moneys may be spent for the construction of approaches at both ends of the proposed Golden Gate bridge provided they are not taken from the state gasoline tax.

Webb also ruled that in view of the quasi-municipal character of the district the bridge, after it is paid for, may be taken over by the state thru condemnation and operated on a toll-free basis. The district established by the legislature, can be dissolved by the same body, he said. The opinions were requested by B. E. Meek, director of the state department of public works.

PROGRESS IN STATE HIGHWAY CONSTRUCTION CITED BY ENGINEER

Outstanding accomplishments in state highway construction for the year 1929 were the reduction in roughness and the increase in average daily production of both Portland cement concrete and asphaltic concrete mixtures, according to a review of the season's work by Earl Withycombe, assistant construction engineer of California Division of Highways, State Department of Public Works.

"The best machine-finished asphalt concrete project averaged but 3 1/2 inches of roughness per mile greater than the best Portland cement concrete projects," declares Mr. Withycombe in his report.

"The record average daily production of Portland cement concrete pavement has been increased to 361.5 cubic yards. This figure is obtained by considering each start of the mixer as a day's run and represents approximately 90.4 per cent of the maximum output that could have been secured had there been no delays.

"The high daily average of asphaltic concrete tonnage has been increased to 790.7 which represents 72 per cent of the maximum obtainable without delays.

Cement Concrete Pavements

"Mix—The maximum density method of proportioning coarse aggregate with the amount of fine aggregate governed by the resulting voids in the coarse aggregate and with a definite amount of excess for workability, constitutes the method of design of mixtures. The amount of cement is held uniformly to six sacks per cubic yard of concrete actually placed. As an experimental section, a day's run of concrete on one of the larger jobs of last season's construction was proportioned with but 4.82 sacks of cement to the cubic yard in an attempt to produce a compressive strength of 3500 pounds per square inch at 28 days.

"The average for a series of casts from this mix was 3690 pounds or 84.4 per cent of that produced from the same job with six sacks of cement to the cubic yard.

"Design—Panels are uniformly 10 by 20 feet with thickened longitudinal edges. Provision for expansion is made at 60-foot intervals and under special conditions at 40 feet. The intermediate joints are of the weakened plane type. A double line of one-half inch square deformed marginal bars is placed around all sides of the panel and held in place, four inches from the edge, by steel chairs driven into the concrete. One end of all longitudinal steel is extended through the joint and fitted with a sleeve to serve as a dowel. Three additional three-quarter-inch round dowels are provided at expansion joints with provision for expansion at the ends of the dowels and the steel.

"Construction—Central proportioning by weighing each of the coarse aggregates, above and below the one and one-half inch screen size, and the sand in separate boxes was uniformly practiced during the past season.

"All construction was in 10-ft. widths with the exception of one project where, for the convenience of traffic, 20-ft. construction was permitted with a weakened plane longitudinal joint. The slab was poured from the side with an extension boom on the mixer.

"It was definitely proven in last season's construction that delayed finish resulted in smoother riding surfaces, and this is being practiced on all subsequent work. Nearly all jobs have increased production to the point where two finishing machines or two heavy longitudinal floats are necessary in order to secure compaction, and

delayed finish is secured by maintaining the maximum interval between the two machines or the floats, as the case may be.

"Pavements are opened to traffic, following an 8-day watering period, on the basis of strengths developed by beams cast and broken in the field.

"Result of Tests—The average compressive strength of pavement concrete during 1929 for the entire state was 3320 pounds per square inch. This represents 24 projects. Of these 24 projects, 17 were selected by headquarters representatives to cast a special series of 10 to 15 cylinders for 28-day comparisons. The average strength from the job cylinders for these projects was 3940 pounds per square inch, as compared to 4365 pounds average on the basis of the casts made by headquarters.

"Of the jobs selected for casting by headquarters, seven were selected by the laboratory for coring. The laboratory cores, after being corrected for height and age, show an average compressive strength of 4894 pounds per square inch, the corresponding headquarters casts show 4401 pounds, and the field casts show 3348 pounds per square inch. Assuming that the cores represent the true strength of the concrete in the pavement it would appear from this analysis that the headquarters casts represent 67 per cent of the actual strength of the concrete and the field casts but 79 per cent.

"In the past it has been the practice to include in the 6-inch by 12-inch cylindrical cast a true representation of all the aggregate contained in the pavement mixture. It was questionable whether the maximum size aggregate, two and one-half inch material, did not unduly influence the resulting strength in a cylinder of such dimensions, and it was later proven by our own investigations that such was the case. It then became a question as to the advisability of increasing the dimensions of the specimen to take care of the maximum size of rock or uniformly eliminating from the material selected for casting all of the aggregate above a certain screen size. To increase the size of cylinders would have resulted in discarding a considerable portion of the field and laboratory equipment. It has been decided to screen the mixture on a one and one-half inch square mesh prior to casting in order to secure uniformity.

Asphalt Concrete Pavements

"Mix—Since the latter part of the 1929 construction season mixtures are being designed and controlled by means of the stability test of the mortar content. The fine aggregate of a project is selected prior to the letting of the contract by means of relative stability values and often a convenient source of sand that would otherwise be rejected on the basis of specification requirements for sieve analysis is accepted if these stability values are satisfactory. This method has resulted in a wider use of local materials with a consequent greater economy in the price per ton of the mixtures in place.

"Samples are taken at two-hour intervals during the operation of the plant, screened through the 10-mesh sieve while yet warm and submitted daily to the laboratory for a stability test. A rational use of this stability value is attempted at all times. Realizing the danger of sacrificing the quality in the resulting pavement that prolong its useful life, no attempt is made to secure unreasonably high stability values.

"Imported filler is not used in either base or leveling course mixture, but is maintained at approximately 3 per

cent of the total dry mixture for the surface course.

"Design—Black base construction, on new subgrade, has come into more general use during the past season. Base course varies from four to five inches in center thickness, according to local conditions, and surface course is uniformly two inches in thickness over the full width. The outer edges of the pavement are uniformly thickened to nine inches corresponding to the Portland cement concrete section. A sub-base of natural cementing material is used under the pavement where local soil conditions are unfavorable for subgrade.

"Construction—Some hand finish was permitted on work during the past season, but this type is rapidly being abandoned for the superior machine-finished work.

"Mixing plants are now being manufactured and in use on state work with a capacity of nearly three times that of the plants in general use a few years ago. The use of such plants has been made possible largely by the increase in capacity for handling tonnage on the street with machine methods. These plants have not as yet been brought up to their normal capacity for the duration of the job, but the delays can be attributed largely to the plant rather than to street operations. The maximum tonnage secured in eight hours on state work to date is slightly more than 1100 tons."

U. S. GOOD ROADS ASSOCIATION ELECTS OFFICERS

T. L. Kirkpatrick of Charlotte, N. C., was unanimously elected president of the United States Good Roads Association and Charlotte was selected as the 1931 meeting place of the organization, at its session in Oklahoma City.

Low Wentz, president of the Oklahoma State Highway Commission, was elected first vice-president of the association. Next year's convention will be held the first week in May.

Following election of officers, the report of the resolutions committee was read in which the association commenced President Hoover and congress for their "generosity and vision" in increasing the annual appropriation for federal aid to good roads from \$75,000,000 to \$125,000,000 and recommended the annual appropriation be increased to \$200,000,000 and placed on a continuing basis, as an investment proposition.

The association went on record as requesting that congress create a secretary of highways as a cabinet officer, in the belief that "the importance of good roads is such and transcontinental highways are so vital to the welfare of the republic" as to make such an office a necessity.

WOODSON NAMED MANAGER OF NICOLAI DOOR SALES CO.

Larue J. Woodson has been appointed general manager of the Nicolai Door Sales Company with headquarters at Nineteenth and Harrison Sts., San Francisco. Woodson succeeds J. C. Haring, retiring manager.

Woodson for the past ten years was Northern California representative for the Wheeler Osgood Company and his long experience in the industry eminently qualifies him for his new position.

Wm. H. Klinsenberg, well-known to the sash and door trade of California, has been named assistant manager in charge of sales.

WESIX, INC., WINS SUIT OVER PATENT

In a decision rendered last Monday by United States District Judge Kerrigan, H. E. Sandoval and Sandoval Sales Company, agents for Apex Manufacturing Company of Oakland, manufacturers of Apex heaters, were adjudged infringers of letters patent as Wesix electric heaters and an injunction was ordered restraining them from further infringement, together with an order for an accounting of the profits and damages.

W. Wesley Hicks, president of Wesix, Inc., in commenting upon the decision, says:

"The effect of this decision goes far to sustain the position of Wesix as the pioneer in the development of major electric heating and reinforce the company's leadership in that art, giving it a virtual monopoly in the field of major electric space heating."

U. C. MEN COMPLETE FORESTRY TEST WITH HONORS

Word has just been received by Walter Mulford, professor of forestry at the University of California, that seven out of eight candidates from the University successfully passed the Civil Service Examination for entrance to the United States Forest Service. Three of the men took first, third and fourth places among 140 candidates examined, only one-third of whom passed.

Those recent graduates in forestry who took first, third and fourth places, were, respectively, F. W. Grover of Nevada City, Peter J. Van Huizen of Ukiah, and C. C. Buck of Oakland.

Grover made a record in the written part of his examination of 89.9 per cent, which is apparently the highest that has ever been made in the 25 years that civil service examinations in forestry have been offered, with the exception of one other record. That one other record was made by another graduate student of forestry at the University of California, Howard W. Siggins of Oroville, several years ago.

This means that two of the three highest marks ever awarded in forestry civil service were garnered by University of California students. The fact that three of California's entries this year received better than 85 per cent in the examination is considered phenomenal.

TENSION TESTS OF RIVETS TOLD IN BULLETIN

The objects of the investigation reported in Bulletin No. 210 of the Engineering Experiment Station of the University of Illinois were to determine the strength of rivets in tension and to determine the initial tension in rivets.

All rivets used in the investigation had a nominal diameter of three-fourths inch. Some rivets were driven with an air hammer, others with a press riveter. The influence of a number of variables was determined, as follows: type of head, length of grip, temperature of rivet when driven, and time required to drive the rivet. The head that was formed when the rivet was manufactured was designed as the "manufactured" head, and the head that was formed when the rivet was driven as the "driven" head. The manufactured head was a button head for all rivets used; the driven head was either a button head, a button head flattened to three-eighths inch, a head that was count-

ersunk and not chipped, or a head that was countersunk and chipped. The grip of the rivets varied from 2 to 6 inches. The temperature of the rivets was designated by their appearance. Some were driven when cold, others when at a dull red heat, at a cherry red heat, at a white heat, when burned, and when badly burned. The time elapsing during the driving varied with the grip and with the method of driving.

The test to determine the strength for rivets in tension were made in triplicate and those to determine the initial tension in quadruplicate. There were 27 groups of three rivets each in the first series, and 34 groups of four rivets each in the second.

Copies of Bulletin No. 210 may be obtained without charge by addressing the Engineering Experiment Station, Urbana, Illinois.

FEDERAL ENGINEERS START SURVEY FOR DAM

Anticipating the construction of the \$80,000,000 Kennet Dam on the upper Sacramento River as part of a co-ordinate state-wide water program, A. E. McKennett and fifteen army engineers are at the dam site making surveys.

The party will be at work until October, making the location surveys for the Southern Pacific Railroad as it will have to be after the dam, estimated at 520 feet high, is completed.

The dam, it is explained, would back the river upstream forty miles flooding the rails of the Southern Pacific.

The first work is to route the railway between Kennett and Coram, to put "warp and loom" on the road.

ELECTRICAL RECORD WANTS STANDARD PRODUCTS

The purchase and sale only of standard products is urged upon the electrical industry by Stanley A. Dennis, editor-in-chief of the Electrical Record in an outline of that publication's ten objectives for the year of 1930. Under the heading "Buy and Sell Standard Products Only," Dennis says: "The fight against substandard products of all kinds grows hotter and hotter each year, and more hopeless for the makers of the substandard goods. Manufacturers of flexible cord have recently made excellent progress in enabling the industry and the public to identify substandard cord. The same sort of thing must be done sooner or later with reference to all wiring devices and appliances as well. Lasting profits will be built only on standard products. Buy, sell, and install no other kind."

Another of the objectives of the publication in its editorial program is to "push the sale of lower price standard appliances." "Notice, please," says Dennis, "that the emphasis is on 'standard' as well as on 'lower-priced.'"

ERNEST KUMP SELECTED ON VISALIA SCHOOL UNITS

Ernest J. Kump of Fresno has been commissioned by the Visalia High School District to prepare plans in connection with improvements to the high school plant involving an expenditure of \$210,000. Bonds to finance the work were recently voted and will be offered for sale on August 19. The work will involve classroom additions and a new auditorium building.

CITY WILL ACCEPT ELECTRIC METALLIC TUBING

S. C. Curtis, chief inspector of the San Francisco Department of Electricity announces that electric metallic tubing, or thin walled conduit, will be approved for use by this department when the same is run exposed inside of buildings and is installed according to all rules pertaining to the same in the 1930 Underwriters' National Electric Code, Sections 508 and 510, Pages 55, 56, 57, 58 and 59.

CITY WILL ACCEPT ELECTRIC METALLIC TUBING

S. C. Curtis, chief inspector of the San Francisco Department of Electricity announces that electric metallic tubing, or thin walled conduit, will be approved for use by this department when the same is run exposed inside of buildings and is installed according to all rules pertaining to the same in the 1930 Underwriters' National Electric Code, Sections 508 and 510, Pages 55, 56, 57, 58 and 59.

PAINT PLANT IS PROPOSED AT RICHMOND

E. F. Duffy is president of a company planning immediate construction of a plant at Thirteenth St. and the Santa Fe R. R. tracks in Richmond, for the manufacture of fire-resistant paint. The plant will be located on a site 265 by 125 feet. Construction of the first unit will be started within the next three months, Duffy announces. W. C. Dohrmann will manage the plant.

SIGN WAGE SCALE

The present scale of wages for employees of the Shell Oil Company will continue through another year, it was announced at the conclusion of a conference between Shell executives, representatives of the employees and conciliator of the federal department of the labor bureau. Those affected by the agreement are employed in the oil fields, production, pipe lines, refineries and automotive departments. The agreement is effective from August 31, 1930, to August 31, 1931.

DECLINES CONVENTION POST

Declaring that his civic duties come first, City Manager Clifton E. Hickok of Alameda declined a request to serve as chairman of the local committee in charge of arrangements for the International City Managers' Association Convention to be held in the bay region September 24 to 27. About 200 city managers from all parts of the United States and Canada are expected to participate in the convention, the business sessions of which will be held in San Francisco.

SAN DIEGO CONTRACTOR TO WITHDRAW SEWER BID

O. U. Miracle of San Diego, low bidder for the construction of a sewer system in the industrial district of Richmond, has petitioned the city council to release him from his bid of \$99,209, claiming an error.

The estimate of E. A. Hoffman, city engineer, is \$110,000. Jasper-Stacy Co. of San Francisco was second low bidder at \$139,946. Two other bids ranged as high as \$186,857.

Consideration of the release has been postponed by the city council for one week.

C. C. Schott, 55 Kennitt Ave., Buffalo, N. Y., is interested in securing agency from firm wishing to establish an outlet for their product in that territory.

GRANITE URGED FOR S. F. WAR MEMORIAL

The San Francisco Labor Council declares it would be a "grievous architectural fault to adopt terra cotta finish" for the proposed San Francisco War Memorial Buildings to be erected in the Civic Center.

In a communication to the Board of Trustees of the War Memorial, signed by Roe H. Baker, president and John A. O'Connell, secretary, the council says:

The San Francisco Labor Council takes great interest in the undertaking to erect a suitable War Memorial, worthy of the loyalty and patriotism of our citizenship, and designed to serve with entire satisfaction to all the people the high purposes for which it is to be used by this and future generations.

We have noted with some regret that the former Board and its architectural advisers did not, in our judgment, keep in mind several of the considerations that must be observed to fully realize the aforesaid high aims and purposes to be served in this undertaking.

Permit us to point out that the opposition to the plans of the previous Board arose from the fact that it failed to take into account the wishes of the citizenship of San Francisco, which favors a War Memorial suitable to stand in company with present buildings, and not presenting, to laymen and lovers of art alike, the incongruity of aspect that would result from failure to give the war Memorial buildings the same exterior finish as other buildings.

One of the foremost matters to be considered in the planning of such a structure is the exterior finish that gives the monumental character and aspect to such buildings. We think every sound planner would, without hesitation, adopt the view that our Civic Center demands uniform treatment in regard to exterior finish, and that as granite or equally monumental material of local manufacture has been provided for all previous buildings erected in the Civic Center, it would be a grievous architectural fault to adopt terra cotta finish as proposed by the former Board.

Probably the most popular form the opposition has assumed is the now practically universal economic sentiment in this community expressed in the slogan: "Keep payrolls in San Francisco." The circumstance that terra cotta manufacturers have their plants away from the city, pay the lowest wages, and do not contribute to the prosperity of the community, should be sufficient argument to impress any public board expending the funds of the city with the necessity of heeding public policy in regard to the expenditure of public moneys.

To set all doubts at rest, as to the intention of the present Board, we would respectfully and earnestly request that you at once announce your decision in this matter.

California State Highway Commission has cancelled a call for bids, scheduled to be opened July 30, to grade 0.4 miles in Trinity County, between the westerly boundary and Burnt Ranch.

Engineering News Section

BRIDGES

SAN BERNARDINO COUNTY, Cal.
—Until August 6, 2 P. M., bids will be received by State Highway Commission to construct three concrete bridges east of Ontario, one consisting of three 8-ft. 0-inch slab spans; another consisting of two 14-ft. 3-inch slab spans and a third consisting of one 15-ft. 0-inch slab span to be partially reconstructed and widened and the approaches to be widened and paved with asphalt concrete.

See call for bids under official proposal section in this issue.

SAN FRANCISCO.—City Engineer M. M. O'Shaughnessy completing plans for Third Street bridge over Channel. Plans provide for a single leaf draw-bridge, with 140-ft. span, 103-ft. clearance, six lanes for vehicular traffic, two six-ft. walks, two street car tracks, a Belt Line Railroad track and deepening of channel to allow 30-ft. of water at low tide. Estimated cost \$400,000, of which State Harbor Commission has agreed to pay \$150,000.

SISKIYOU COUNTY, Cal.—Rocca & Coletti, San Rafael, at \$37,779 awarded contract by State Highway Commission to construct reinforced concrete girder bridge over Klamath River about ten miles north of Yreka, consisting of four 80-ft. spans and two 72-ft. spans on concrete piers.

SANTA BARBARA COUNTY, Cal.
—As previously reported, bids will be received by State Highway Commission July 30 to construct reinforced concrete girder bridge over Nojoqui Creek, 7½ miles south of Zaca, composed of four 42-ft. spans on concrete bents and abutment. Project involves: 520 cu. yds. struc. excav.; 575 cu. yds. class A, 35 cu. yds. class B and 14 cu. yds. class E cem. conc.; 120,000 lbs. reinf. steel; 1360 lbs. bronze expansion plates; 1 lot misc. items of work.

COLUSA, Colusa Co., Calif.—R. B. McKenzie, Gerber, at \$19,966 awarded contract by State Highway Commission to construct reinforced concrete girder bridge over Bear Creek about 28 miles west of Williams, consisting of seven 31-ft. spans on conc. bents.

RIVERSIDE, Riverside Co., Cal.—County Surveyor A. C. Pulmore has presented to the board of supervisors plans for a 300-ft. bridge to be built across the San Jacinto river near the Soboba Indian Reservation. The board will ask the alternative bids on a wooden and concrete-steel span. Est. cost of the wooden bridge is \$22,000, of which the county would pay \$11,000, the balance from federal funds. The estimated cost of a concrete bridge is \$23,000. Bids would be asked on the basis of contractor furnishing cement and on basis of county furnishing the cement.

SISKIYOU COUNTY, Cal.—Rocca & Coletti, San Rafael, at \$97,884 awarded contract by State Highway Commission to construct reinforced concrete bridge over Shasta river about 7½ miles north of Yreka, consisting of two 200-ft. open spandrel arch spans, two 40-ft. girder spans, and two 32-ft. girder spans.

PLACERVILLE, El Dorado Co., Cal.—Until August 5, 2 P. M., bids will be received by Arthur J. Koletzke, county clerk, to

(a) construct reinforced concrete girder bridge over Perry Creek;

(b) construct reinforced concrete girder bridge over Youngs Creek.

Both structures are located near Fairplay. Separate bids are wanted on each structure. Certified check 10% payable to clerk of the Board of Supervisors required with bid. Plans obtainable from county clerk on deposit of \$10, returnable.

SAN JOSE, Santa Clara Co., Cal.

—Frank Neves, 891 Harrison St., San Jose, at \$15,483 awarded contract by city council to construct reinforced concrete bridge over Guadalupe river at Auzerais Ave.

TULARE COUNTY, Calif.—W. A. Bechtel Co., 206 Sansome St., San Francisco, at \$86,396 submitted low bid to U. S. Bureau of Public Roads, San Francisco, to construct Lodgepole, Glover Creek and Silliman Bridges and approaches between Sta. 223 plus 50 and E 270 plus 67 on Sections C2 and D1 of Generals Highway, Route 1, in Sequoia National Park, involving:

1,030 excavating, structural;
3,900 sta. yds. overhaul;
770 cu. yds. class A concrete;
58,850 lbs. reinf. steel;
1,532 cu. yds. cement rubble masonry
30 lin. ft. 18-in. corr. metal pipe;
85 lin. ft. curb stone;
615 sq. yds. membrane waterproofing;
4,000 cu. yds. backfill;
6,000 cu. yds. hauling selected material.

Complete list of bids follows:

W. A. Bechtel Co., S. F. \$86,396
Dan G. Munro, Los Angeles 103,956
Schuler & McDonald, Oakland 126,925
Engineer's estimate 88,880

SAN CARLOS, San Mateo Co., Cal.

—Wiggins and Kaiser, 6230 Hilton St., Oakland, at \$9835 awarded contract by city trustees to construct reinf. concrete culverts, as follows: one 3 ft. by 10 ft. reinf. conc. box culvert on Arroyo Ave at inter. of Walnut St. over Pulgaras Creek; one 5 ft. by 6 ft. reinf. conc. box culvert on Elm St. over Pulgaras Creek; one 5 ft. by 6 ft. reinf. conc. box culvert on Chestnut St. over Pulgaras Creek; one 5 ft. by 6 ft. reinf. conc. box culvert on Cedar St. over Pulgaras Creek, and one 13 ft. by 13 ft. reinf. conc. box culvert on Stanford Lane over Cordilleras Creek at east end of Stanford Lane. Complete list of bids follows:

Wiggins & Kaiser 9,835
C. H. Gildersleeve 10,337
Walter Todd 10,399

Chas. Hardy 19,750

SAN BERNARDINO COUNTY, Cal.

—As previously reported, bids will be received August 6 by State Highway Commission to construct three concrete bridges east of Ontario, the first consisting of three 8-ft. slab spans; the second consisting of two 14 ft. 3 in. slab spans; and the third consisting of one 15 ft. slab span; to be partially reconstructed and widened and the approaches to be widened and paved with asphalt concrete. Project involves: 2300 cu. yds. rdwy. excavation without class; 620 cu. yds. struc. excav.; 60 cu. yds. concrete to be removed; 385 cu. yds. class A and 11 cu. yds. class E cem. conc.; 34,000 lbs. reinf. steel; 1700 sq. yds. subgrade for pave.; 700 tons asphalt concrete; 20 cu. yds. rock aprons; 1 lot misc. items of work.

SAN JOSE, Santa Clara Co., Cal.—

Until August 4, 11 A. M., bids will be received by Henry A. Pfister, county clerk, to construct reinforced concrete culvert on Canada Road at Dexter's Place, one mile east of the Pacheco Pass road, in Supervisor's District No. 1.

Certified check 10%, payable to county clerk required with bid. Plans obtainable from Robt. Chandler, county surveyor.

SAN JOSE, Santa Clara Co., Cal.—

Until August 4, 11 A. M., bids will be received by Henry A. Pfister, county clerk, to construct reinforced concrete culvert on McAbbe Rd. near McAbbe's House, in Supervisor's District No. 4.

Certified check 10%, payable to county clerk required with bid. Plans obtainable from Robt. Chandler, county surveyor.

SAN JOSE, Santa Clara Co., Cal.—

Until August 4, 11 A. M., bids will be received by Henry A. Pfister, county clerk, to construct reinforced concrete on Blossom Hill at Clikker's Place and two corrugated culverts in Supervisor's District No. 5.

Certified check 10%, payable to county clerk required with bid. Plans obtainable from Robt. Chandler, county surveyor.

LOS ANGELES, Cal.—General Engineering Corp., Ltd., 740 S. Broad-

way, Los Angeles, at \$204,320 awarded contract by Board of Public Works to construct Washington St. Bridge over Los Angeles river, between Soto and Harriett Sts. Will be 310 ft. in length consisting of five reinf. conc. girder spans, each 62 feet center to center; roadway 56 ft. wide with two 5 ft. walks. Involves approx. 830 234 lbs. reinf. steel; 6975 cu. yds. Class F concrete; 11,136 lin. ft. concrete piling, 15 ft. long.

EL DORADO CO., Cal.—Following

2 low bids received July 16 by State Highway Commission to construct reinf. concrete girder bridge across South Fork of American River at Riverton, composed of one 60 ft. span and two 54 ft. spans on concrete piers and bents, and grading and surfacing approaches with untreated crushed gravel or stone:
Ralph Hunter, Sacramento \$25,106
Geo. J. Ulrich, Modesto 30,194
Pennell Co., Sacramento 34,840

UKIAH, Mendocino Co., Cal.—Pacific Coast Engineering Co., Foot of 14th St., Oakland, at \$2995 awarded contract by county supervisors to construct 100-foot steel bridge over Calpella Creek near Calpella. Complete list of bids follows:
 Pacific Coast Eng. Co., \$2955
 Judson-Pacific Co., S. F., 3045
 Dyer Bros., San Francisco, 3500
 Smith Bros., Eureka, 3944
 Minneapolis Steel & Machine Co., Los Angeles 4429
 E. H. Smith is county surveyor

DREDGING, HARBOR WORKS & EXCAVATIONS

LIVE OAK, Sutter Co., Cal.—Until July 26, 7:30 P. M., bids will be received by Norman H. King, Secretary, Reclamation District No. 777, to construct approximately four and one-half miles of drainage canal. Certified check 10% required with bid. Plans obtainable from M. C. Polk, engineer for district, Chico.

LONG BEACH, Cal.—The Neptune Pier Co., Long Beach, reports that the financing of the new pleasure pier to be built on the site of the present Sliver Spray Pier at Chestnut Ave. and W. Seaside Blvd. is practically completed and work will start about Oct. 15. Plans are being prepared by Engineer R. D. Van Alstine, Heartwell Bldg., Long Beach. The new pier will be 1464 ft. in length of solid fill type and 378 ft. wide. The proposed work will cost \$1,500,000 and will involve the following:

60,000 tons rock rip-rap (rock in sizes from 500 lbs. to 20 tons);
 650,000 cu. yds. hydraulic fill;
 2,000 tons steel;
 9,000 cu. yds. concrete;
 70,000 lin. ft. wood piling for boat landings and anchors; sewers, gas mains and lighting system; sheet steel pile bulkhead.

The buildings on the pier will represent an additional million dollars.

SAN FRANCISCO—M. B. McGowan, Call Bldg., San Francisco, at \$120,568 awarded contract by Trustees of Islais Creek Reclamation District, 375 City Hall, to build wooden box drains on piles at Islais Creek Channel, involving:

45,000 lin. ft. wood piling (below cut-off);

3,500 lin. ft. 14x8 ft. wooden box drain
 50 lin. ft. 10x8 ft. wooden box drain

Appurtenances for drains.
 Project is located in the vicinity of Selby street from Oakdale to Evans Ave. and along and under the Southern Pacific Company's trestle to Islais Creek Channel and along Tulare St. adjacent to Islais Creek Channel.

BAKERSFIELD, Kern Co., Calif.—Until July 31, 2 P. M., bids will be received by H. I. Tupman, secretary, Kern River Levee District, Bank of Italy Bldg., Bakersfield, for reinforcement of levee on south side of Kern river from Oak street bridge to A. T. & S. F. railroad bridge. Certified check or bidder's bond of 10% payable to district required with bid. Plans obtainable from secretary.

STREET LIGHTING SYSTEMS

SANTA BARBARA, Calif.—Walker & Martin, 4215 S. Western Ave., Los Angeles, submitted low bid to city council at \$5233 for lighting system in W. Cabrillo Blvd., bet. State and Castillo Sts., involving cast iron standards, conduits, cables, etc. Other bids were: Pacific Eng. & Const. Co., \$5,-

297; H. C. Reid & Co., \$5486; Butte Elec. Co., \$6543; Humphrey Smith El. Co., \$7572; Nielson Smith Elec. Co., \$7940.

SACRAMENTO, Cal.—E. E. Burgess at \$11,660 awarded contract by city council (2903) to install electroliners with underground system in H St., bet. 6th and 12th Sts., involving 43 single light standards.

REDWOOD CITY, San Mateo Co., Cal.—City council declares intention (M-10) to install electroliner system in portions of Broadway, Brewster Ave., ad Arch St., together with underground system. Union Metal Mfg. Company's standards 1911 Act. Bond Act 1915. Hearing July 28. E. E. Myers, city clerk. C. L. Dimmitt, city engineer.

RICHMOND, Contra Costa Co., Cal.—City Engineer E. A. Hoffman completes plans for electroliner system in Tenth St. bet. Ripley St. and Cutting Blvd. A resolution of intention will be adopted at once.

SAN FRANCISCO—Bids will be asked shortly by the Constructing Quartermaster, Fort Mason, to replace electric lighting system at the Letterman General Hospital, involving approximately 35 standards of either Marbellite or Toncan metal type. Bids will be also be asked for underground cables and conduits in connection with above.

STREET LIGHTING SYSTEMS

NAPA, Napa Co., Cal.—City council has authorized the purchase of a Caterpillar "30" for use in connection with street department. H. A. Harrold, city engineer.

SAN RAFAEL, Marin Co., Cal.—County Supervisors authorize purchase of a portable compressor and accessories for \$1280 and a portable rock crusher for \$2000 for District No. 3 and a Caterpillar Tractor and loader for \$3552 for District No. 4. Rodney Messner is county surveyor.

Plans Being Figured—Bids Close July 21, 12 Noon.

PLANT Cost, \$—
 LIVERMORE, Alameda Co., Cal.
 Reinforced concrete washing, screening and loading plant.

Owner—Kaiser Paving Co., 1522 Latham Square Bldg., Oakland.
 Engineer—L. H. Nishkan, 525 Market St., San Francisco.

OROVILLE, Butte Co., Cal.—County Purchasing Agent Frank W. Boyle authorized by county supervisors to purchase \$17,500 worth of equipment for use in connection with highway construction. Equipment to be purchased and approximate costs include: Two box back Fords, \$10,000; two small trucks, \$1,800; one 30-hp. caterpillar, \$2,300; one 60-hp. caterpillar, \$4,000; one 8-ft. grader, \$1,400; one 12-ft. grader, \$2,100; 1 hydraulic scraper, \$600; one hydraulic scraper, \$800; tools for repair shop, \$1,700; jack hammer, \$170 rock spreader, \$40; water pump and trailer, \$150; blasting battery, \$100; Fordson tractor, \$600; one small truck, \$625. Old road equipment of the county will be sold to the highest bidder. J. A. Baumgarner is county road engineer.

MODESTO, Stanislaus Co., Calif.—Frank Paradis Co., Modesto, at \$1,023 awarded contract by city council to furnish motor truck for use of street department.

TULARE, Tulare Co., Cal.—California Motor Coach Co., at \$3,375 awarded contract by Tulare High School District to furnish school bus of 35-passenger capacity.

VALLEJO, Solano Co., Cal.—Until July 24, 11 A. M., bids will be received by Alf. E. Edgecombe, city clerk, to furnish and deliver one motor pick-up street sweeper, delivery to be made 14 days after award of contract. Certified check 10% payable to City required with bid. T. D. Kilkenny, city engineer.

MADERA, Madera Co., Cal.—Until August 11, 6 P. M., bids will be received by C. M. Petty, Secretary, Madera Union High School District, to furnish and deliver:

A.—One 1½ or 2 ton bus chassis, wheel base length to suit body builders, dual tires.

B.—One 1½ ton bus chassis, wheel base length to suit body builders, (Ford or equal dual tires rear).

C.—One bus body, mounted on chassis, forty passenger type with jump seats extra. Leather upholstering cross seats.

D.—One bus body, mounted on chassis, twenty-five passenger type, leather upholstering.

Surety or personal bond required with bid. Further information obtainable from secretary.

GILROY, Santa Clara Co., Cal.—Gilroy School District votes direct tax of 30 cents per \$100, a portion of which will finance the purchase of a motor school bus.

RAILROADS

NORTHERN CALIFORNIA—Following is a list of prospective bidders figuring plans for the proposed extensions of the Western Pacific Railroad from Bieber to Keddie and the Great Northern from Klamath Falls, Ore., to Bieber:

W. A. Bechtel Co., San Francisco.
 Utah Const. Co., San Francisco and Ogden.

A. Guthrie & Co., Portland.
 Hauser Const. Co., Portland.

Northern Const. Co., Seattle.

Stewart & Welch, Vancouver.

List Const. Co., Kansas City.

Morrison Knudsen Co., Boise.

Twohy Bros., Portland.

George Pollock Co., Sacramento.

R. B. Porter, Spokane.

Siems & Helmen, St. Paul.

COLMOR, N. M.—W. B. Story, president of the Santa Fe Railroad, has announced that the company will expend about \$15,000,000 for the construction of 350 miles of new railway line. Construction will connect Oklahoma with Colmor, 110 miles, and Spearman and Dumas, Texas, 50 miles. Other lines in Colorado and Oklahoma will complete the total.

BOULDER DAM—The Secretary of the Interior has authorized the Bureau of Reclamation to start work on the Boulder Dam, the first work to be the construction of a railway from Las Vegas to the dam site, about 41 miles. The estimated cost is \$2,350,000. The work will also include construction roads.

Raymond F. Walter, Wilda Bldg., Denver, is the chief engineer. The department has announced that all work will be done by contract and that no labor will be employed direct.

OKLAND, Cal.—Worden & Forsyth, 264 Sybil Ave., San Leandro, at (a) \$2750 and (b) \$1.45 submitted low bid to City Port Commission to furnish track laying at Ninth Ave. Pier. Eaton & Smith, San Francisco, only other bidder at (a) \$13,900; (b) \$1.25. Taken under advisement.

RESERVOIRS AND DAMS

KENNETT, Shasta Co., Cal.—Government engineers have started surveys for proposed Kennett Dam. Proposed dam will be about 520-ft. high, backing up waters in Sacramento River for a distance of thirty miles.

BOULDER DAM.—The U. S. Bureau of Reclamation is planning to expend approx. \$520,000 for the construction of water works, streets, and sewers in the new town to be located near the Boulder Dam site. The first construction work will be the water works, etc., and a railway costing \$2,350,000. Funds have been appropriated under a \$10,660,000 deficiency bill Raymond F. Walter, Wilda Bldg., Denver, is chief engineer. The department has announced that all work will be done by contract and that no labor will be employed direct.

LOS ANGELES, Calif.—Preliminary plans of the Los Angeles water and power department for a dam to be built in Bouquet Canyon provide for a 160-ft. dam, 900 ft. long and 300 ft. wide at the base, of dirt fill construction with a concrete or stone surface. The storage capacity is estimated at 30,000 acre feet. Plans are now before the Santa Clara River Conservation District of Santa Paula. The final plans will be offered to the state, the county of Ventura, and the city of Los Angeles, for approval before any construction is started.

SANTA ANA, Orange Co., Calif.—A. Kempke, Hobart Bldg., San Francisco, has been retained as consulting engineer to investigate the site of a proposed dam in Santiago Canyon to be built jointly by the John T. Carpenter Water Co. of El Modena, The Irvine Co. and the Serrano Water Co. of Villa Park. The proposed dam will cost bet. \$700,000 and \$800,000. Construction should start early in 1931.

SEWERS AND SEWAGE DISPOSAL PLANTS

MODESTO, Stanislaus Co., Calif.—Industrial Manufacturing and Supply Co., at \$486 awarded contract by city council to furnish and install sludge pump at sewer farm.

MODESTO, Stanislaus Co., Calif.—Dorr Co., Los Angeles, at \$6014 awarded contract by city council to install clarifier at sewer farm.

OAKLAND, Cal.—City council declares intention to construct sewer in south half of 6th St., between Castro and Grove Sts., with lampholes and wye branches. 1911 Act. Hearing August 7. Frank C. Merritt, city clerk. Walter A. Frickstad, city engineer.

RICHMOND, Contra Costa Co., Cal.—O. U. Miracle, San Diego, low bidder to construct sewers in the industrial district, has requested the city council to permit him to withdraw bid due to error. Miracle bid \$99,209, other bidders being: Jasper-Stacy Co., \$133,946; J. C. Hickey, \$186,557. Healy-Tibbitts Co., \$146,173. Engineer's estimate, \$110,000. Request taken under advisement for one week. A. E. Hoffman, city engineer.

WATER WORKS

PASO ROBLES, San Luis Obispo Co., Cal.—New bids will probably be asked by city council to furnish and install pump in connection with water system. Only one bid was submitted July 7 and was received after the hour set for the bid opening. It was not considered.

FRESNO, Fresno Co., Cal.—Bids will be called shortly to construct water distributing system in Fresno County Water Works District No. 1, involving:

7,000 ft. 4-in., 25,000 ft. 6-in. and 7,000 ft. 8-in. pipe line. Bonds in the sum of \$55,000 have been voted. A. Segel, 512 Griffin-McKenzie Building, Fresno, and Perry F. Brown, 702 Peralta St., Fresno, are consulting engineers.

STRATFORD, Kings Co., Cal.—Stratford Public Utility District will call an election shortly to vote bonds of \$30,000 to finance construction of a water works system.

PLAYGROUNDS & PARKS

BERKELEY, Alameda Co., Calif.—Until August 4, 8 P. M., bids will be received by Clara F. Andrews, secretary, Board of Education, 225 Milvia St., to resurface lower playground of Cragmont School, between Regal Rd., Spruce St. and Marin Ave. Certified check 10% payable to Berkeley School District required with bid. Specifications obtainable from Secretary on deposit of \$5, returnable.

SAN JOSE, Santa Clara Co., Cal.—Bids will be asked at once by John J. Lynch, city clerk, to construct tennis courts at new city playground at Delmas Ave. and Home St.

STREETS AND HIGHWAYS

VALLEJO, Solano Co., Cal.—John W. Huggard, 17 Brooklyn St., Vallejo, at \$3651.59 awarded contract by city council (171) to improve Indiana St. from Colusa to Amador St., involving grading; 5-in. cement concrete pavement; 6 ft. wide and 4 in. thick cement concrete sidewalks; 4-in. vitrified clay sewer; sewer lateral; cement concrete curbs and gutters.

SAN RAFAEL, Marin Co., Cal.—Until July 29, 8 P. M., bids will be received by Eugene W. Smith, City Clerk, (513) to improve portions of Jewell St., Acadia Ave., Palm Ave., etc., involving grading; Ironstone pipe main sewers and side sewers; hyd. concrete manholes; corr. iron pipe culverts; hyd. conc. and corr. iron arch culverts; hyd. conc. and corr. iron arch culverts; hyd. conc. catch-basins; pave with stone sub-base with hyd. concrete surface; hyd. conc. curbs and gutters. 1911 Act. Bond Act 1915. Certified check 10% payable to city required with bid. Plans on file in office of clerk. H. K. Brainerd, city manager.

SAN FRANCISCO—C. L. Harney, Call Bldg., San Francisco, at \$1,501 submitted low bid to Board of Public Works to grade portions of 44th Ave. bet. Ortega and Rivera Sts., and bet. Vicente and Sloat Blvd.-Sunset Well System, involving 7500 cu yds. excavation (3700 cu yds. bet. Ortega and Rivera Sts. and 4200 cu yds. bet. Vicente St. and Sloat Blvd.) Complete list of bids follows:

C. L. Harney	\$1,501
E. J. Treacy	1,896
F. J. McHugh	2,133
Meyer Rosenberg	2,607
Granfield, Farrar & Carlin	2,765

UKIAH, Mendocino Co., Cal.—Ellison Bros., Fort Bragg, at \$4040 awarded contract by county supervisors to construct portion of Ukiah-Bloomville road in District No. 1, known as Soda Creek Bluffs, involving: 10,000 cu yds. unclassified excavation with free haul of 500 ft., including all clearing; install 80 lln.

ft. 15-in. galvanized culvert pipe (to be furnished by the county). Complete list of bids follows:

Ellison Bros., Fort Bragg	\$4040
W. C. Colley, Berkeley	4466
J. W. Pickle and M. A. Christy	
Ukiah	6432
Christie & Allen, Fort Bragg	6880
E. H. Smith is county surveyor.		

BERKELEY, Alameda Co., Calif.—Proceedings have been started by the city council to pave Spruce St. at a cost of \$210,000. Tentative plans provide for county paying 20% of total cost, the city 20% and the property owners affected 60%.

YUBA CITY, Sutter Co., Cal.—J. E. Johnston, Savings and Loan Bldg., Stockton, at \$212,262.10, on the basis of asphaltic concrete pavement on 5-in. crusher run base, awarded contract by Joint Highway District No. 12, to improve sections of Woodland-Yuba City Cut-off between Knights Landing City Cut-off in Yolo county and the Garden Highway one-half mile west of Tudor in Sutter county, being sections 9.9 miles in length between Robbins in Sutter county and Garden Highway. Approximate quantity of materials involved are: 36,000 cu. yds. excav. and subgrade; 17,000 tons crusher run base; 21,500 cu. yds. pavement.

SAN BERNARDINO CO., Cal.—As previously reported, bids will be received by State Highway Commission July 30 to grade and surface with oil treated crushed gravel or stone, 9.5 miles between 14½-miles SW of Dunn and Cronise Valley. Project involves: 89,000 cu. yds. rdwy. embankment; 132,000 cu. yds. overhaul; 81,000 cu. yds. excav. ditches and channels; 2,860 cu. yds. struc. excav.; 51,000 cu. yds. pit run gravel sub-base; 2700 M gals. water applied to subgrade; 25,500 tons oil treated crushed gravel or stone surf.; 700 cu. yds. screenings (seal coat); 700 bbls. fuel oil (seal coat); 90 lln. ft. 18-in. and 598 lln. ft. 24-in. corr. metal pipe; 13,915 lln. ft. furnish treated piles; 533 each. driving piles; 94 M. ft. b.m. untreated Douglas fir timber, select struc. grade; 115 M. ft. b.m. redwood timber, dense select all-heart struc. grade; 130 M. ft. b.m. redwood timber, select all-heart struc. grade; 502 sta. finish rdwy.; 148 monuments. State will furnish corr. metal pipe.

TRINITY COUNTY, Cal.—Are previously reported, bids will be received July 30 by State Highway Commission to grade 0.4 miles between west boundary and Burnt Ranch. Project involves: 30,800 cu. yds. rdwy. excav. without class.; 3100 sta. yds. overhaul; 1500 cu. yds. struc. excav.; 55 cu. yds. rubble masonry (head-walls); 106 lln. ft. 18-in., 276 lln. ft. 54-in., 290 lln. ft. 60-in. and 144 lln. ft. 84-in. corr. metal pipe; 21 sta. finish rdwy.; 54 monuments. State will furnish corr. metal pipe and cast steel frame and covers for drop inlets.

RICHMOND, Contra Costa Co., Cal.—City council declares intention (476) to improve Pullman Ave., bet. Cutting Blvd. and Panhandle Blvd., and Panhandle Blvd., bet. Pullman Ave. and Del Norte Place, and portions of Cutting Blvd., 45th, 47th and Monument Sts., involving grading; pave with 4-inch broken stone cushion with 3-course asphalt concrete pavement, consisting of 2-course base of 6-inch asph. conc. and 2-in. asph. conc. surface; cem. conc. curbs with galv. steel curb bars; cem. conc. gutters, walks; corr. iron pipe inlets; corr. iron and cem. conc. culverts. 1911 Act. Hearing July 23. A. C. Faris, city clerk. Edward A. Hoffman, city engineer.

PLACER COUNTY, Calif.—As previously reported, bids will be received July 30 by State Highway Commission to grade and pave with cement concrete, 1.7 miles through Lincoln. Project involves: 9500 cu. yds. rdwy. excav. without class; 10,500 sta. yds. overhaul; 15,200 cu. yds. imported borrow; 800 cu. yds. imported selected material; 750 cu. yds. struc. excav.; 20,000 sq. yds. subgrade for pave. 4150 cu. yds. class A cem. conc. (pavement); 195 cu. yds. class A cem. conc. (struct.); 8 cu. yds. class E cem. conc. (struct.); 122,500 lbs. bar reinf. steel (pave. and struc.); 2000 cu. yds. salvaged macadam and oil mixed surfacing; 390 lin. ft. 12-in. and 710 lin. ft. 18-in. corr. metal pipe; 10 lin. ft. 8-in. and 14 lin. ft. 12-in. vit. clay pipe; 235 lin. ft. special timber headers; 1.0 mi. move and reset property fence; 1500 lin. ft. remove and salvage existing property fences; 670 lin. ft. remove and salvage existing guard rail; 89 sta. finish rdwy. State will furnish corr. metal pipe.

MENDOCINO COUNTY, Calif.—As previously reported, bids will be received by State Highway Commission to grade and surface with crushed gravel or stone and construct timber bridges, on two miles between McDonald and Wandering. Project involves: 13 sta. clear and grub right of way; 75,500 cu. yds. rdwy. excavation without class; 200,000 sta. yds. overhaul; 3340 cu. yds. struc. excav.; 5000 cu. yds. untreated crushed gravel or stone surf.; 900 cu. yds. class A cem. conc. (struct.); 50 cu. yds. class A cem. conc. (placed by tremie); 75 cu. yds. class B cem. conc.; 104,600 lb. steel reinf. steel (struct.); 26,000 lbs. struc. metal; 110 lin. ft. 15-in., 996 lin. ft. 18-in. and 162 lin. ft. 30-in. corr. metal pipe; 800 lin. ft. 8-in. perforated metal pipe underdrain; 58 M. ft. b.m. redwood timber, dense select all-heart struc.; 15 M. ft. b.m. redwood timber, select all-heart struc.; 0.6 mi. new property fence; 60 each timber guide posts; 106 sta. finish rdwy.; 22 monuments. State will fur. corr. metal pipe.

SAN FRANCISCO—Until July 16, 2:30 P. M., bids will be received by Sid J. Hester, Secretary Board of Public Works, to grade portions of 44th Ave., between Ortega and Rivera Sts., and between Vicente and Sloat Boulevard-Sunset Well System, involving 7900 cu. yds. excavation, (3700 cu. yds. between Ortega and Rivera streets and 4200 cu. yds. between Vicente St. and Sloat Blvd. Estimated cost \$2400. Bond of \$1200 required of successful bidder. Plans obtainable from Bureau of Engineering, 3rd Floor, City Hall

GILROY, Santa Clara Co., Cal.—Until July 2, 8 P. M., bids will be received by E. F. Rogers, city clerk, to improve portions of Hanna St., First

St., Sixth St., Alexander St., etc., involving grading; asphalt concrete pavement; cement concrete curbs, gutters and walks; storm water sewer. 1911 Act. Bond Act 1915. Certified check 10% payable to city required with bid. Plans on file in office of clerk and obtainable from Raymond W. Fisher, city engineer.

MONO COUNTY, Cal.—Until August 6, 2 P. M., bids will be received by State Highway Commission to grade 12.9 miles between Sonora Junction and Coleville.

See call for bids under official proposal section in this issue.

SAN DIEGO COUNTY, Cal.—Until August 6, 2 P. M., bids will be received by State Highway Commission to pave with Portland cement concrete, 5.4 miles between Balboa Ave. and Torrey Pines Road.

See call for bids under official proposal section in this issue.

LOS ANGELES COUNTY, Cal.—Until August 6, 2 P. M., bids will be received by State Highway Commission to widen with bituminous treated rock borders, 4.3 miles between Santa Clara river and Castaic School.

See call for bids under official proposal section in this issue.

GILROY, Santa Clara Co., Cal.—City Council declares intention (12-1930) to improve Rosanna St., bet. 3rd and 2nd Sts., and 2nd St., bet. Hanna and Church Sts., including intersection, involving grade; asphalt concrete pavement; cement concrete curbs, gutters, walks. 1911 Act. Bond Act 1915. Hearing July 25. E. F. Rogers, city clerk. Raymond W. Fisher, city engineer.

MARYSVILLE, Yuba Co., Cal.—Until July 21, 10 A. M., bids will be received by W. W. Strief, county clerk, to furnish and spread crushed rock on north 6 1/10 miles of Willow Glen Road. Certified check 10% payable to clerk required with bid. Specifications obtainable from clerk on payment of \$1.

EL DORADO COUNTY, Cal.—G. E. Finnell, 5th and E Broad Sts., Sacramento, at approximately \$112,000 submitted low bid to U. S. Bureau of Public Roads, San Francisco, to grade 2.82 miles and surface 5.14 miles of Section C, Route 32, Placerville-Lake Tahoe National Forest Highway, Eldorado National Forest in Eldorado county, involving: 21 acres clearing; 61,194 cu. yds. unclass. excav.; 700 yds. struc. excav.; 26,000 sta. yds. overhaul; 2.32 mi. fine grading, subgrade and shoulder; 14,000 cu. yds. crushed rock surface; 700 cu. yds. supplemental crushed rock; 107 cu. yds. cem. rubble massory; 1950 lin. ft. C. M. pipe in place;

200 lin. ft. 6-in. porous tile underdrain in place; 1.04 miles move and reset fence; 58 right of way monuments; 2550 cu. yds. coarse screenings; 1050 cu. yds. fine screenings; maintenance of detours; estimated cost \$2000.

SAN MATEO CO., Calif.—Basch Bros., Title Insurance Bldg., Los Angeles, at \$402,982 awarded contract by State Highway Commission to grade and pave with cement concrete 5.2 miles between South San Francisco and Burlingame.

OFFICIAL PROPOSALS

NOTICE TO CONTRACTORS

MECHANICAL WORK

SEALED BIDS will be received by Geo. B. McDougall, State Architect, Public Works Building, 11th and P Streets, Sacramento, California, up to 2 o'clock P. M., Tuesday, August 12, 1930, said bids thereafter on said day to be publicly opened and read, for the installation and completion of the Mechanical Work for the Kitchen and Commissary Building, Whittier State School, Whittier, California, in accordance with plans and specifications therefor.

Mechanical Work includes Plumbing, Heating, Ventilation and Electrical Work. Separate bids will be received for "Electrical Work" and for "Plumbing, Heating and Ventilation Work." Combined bids will also be received covering all four branches of the work.

Plans and specifications are on file for examination in the office of the Division of Architecture, Public Works Building, Sacramento, California, and also at Room 1025 Associated Realty Building, Los Angeles, and at the principal California Cities Builders' Exchange Offices.

Plans, specifications, and proposal forms may be secured by licensed licensed Contractors who have qualified or who will qualify by furnishing a verified statement of experience and financial condition as required by the provisions of Chapter 644, Statutes 1929, and whose statements so furnished are satisfactory to the Department of Public Works. Questionnaire forms may be secured from the Division of Architecture.

Bids will not be accepted from a Contractor to whom a proposal form has not been issued and all bids must be on proposal forms supplied by the State.

Requests for plans shall be accompanied by a deposit of twenty-five (\$25.00) dollars. Check shall be made payable to the Department of Public Works, Division of Architecture. Deposit will be returned upon receipt of the set in good condition at Sacramento Office of the Division within 30 days after opening bids, otherwise it will be forfeited to the State.

All bids must be filed at the office of the State Architect on or before the time heretofore stated and in

accordance with the "Rules for Bidding" accompanying the proposal form.

No bid will be considered unless cash, a bidder's bond made payable to the State of California, or a certified check made payable to the "State Engineer, Department of Public Works," in the sum of at least ten per centum (10%) of the amount of the bid is enclosed with the bid.

The Division of Architecture, State Department of Public Works, reserves the right to reject any or all bids and to waive any informality in any bid received.

STATE DEPARTMENT OF PUBLIC WORKS,

DIVISION OF ARCHITECTURE,

Geo. B. McDougall,
State Architect.

B. B. MEEK,
Director of Public Works.

NOTICE TO CONTRACTORS

GENERAL WORK

SEALED BIDS will be received by Geo. B. McDougall, State Architect, Public Works Building, 11th and P Streets, Sacramento, California, up to 2 o'clock P. M., Tuesday, August 12, 1930, thereafter on said day to be publicly opened and read for the erection and completion of the General Work for the Kitchen and Commissary Building, Whittier State School, Whittier, California, in accordance with plans and specifications therefor.

The Kitchen and Commissary Building is a one-story and partial basement structure of concrete, brick and frame construction, with interior partitions of hollow tile, wood roof construction and tile roof. The total floor area is approximately 12,500 square feet.

Plans and specifications are on file for examination in the office of the Division of Architecture, Public Works Building, Sacramento, California, and also at Room 1025 Associated Realty Building, Los Angeles, and at the principal California Cities Builders' Exchange Offices.

Plans, specifications, and proposal forms may be secured by licensed General Contractors who have qualified or who will qualify by furnishing a verified statement of experience and financial condition as required by the provisions of Chapter 644, Statutes 1929, and whose statements so furnished are satisfactory to the Department of Public Works. Questionnaire forms may be secured from the Division of Architecture.

Bids will not be accepted from a Contractor to whom a proposal form has not been issued and all bids must be on proposal forms supplied by the State.

Requests for plans shall be accompanied by a deposit of twenty-five (\$25.00) dollars. Check shall be made payable to the Department of Public Works, Division of Architecture. Deposit will be returned upon receipt of the set in good condition at Sacramento Office of the Division within 30 days after opening bids, otherwise it will be forfeited to the State.

All bids must be filed at the office of the State Architect on or before the time heretofore stated and in accordance with the "Rules for Bidding" accompanying the proposal form.

No bid will be considered unless cash, a bidder's bond made payable to the State of California, or a certified check made payable to the

"State Engineer, Department of Public Works," in the sum of at least ten per centum (10%) of the amount of the bid is enclosed with the bid.

The Division of Architecture, State Department of Public Works, reserves the right to reject any or all bids and to waive any informality in any bid received.

STATE OF CALIFORNIA

DEPARTMENT OF PUBLIC WORKS

DIVISION OF HIGHWAYS

NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received at the office of the State Highway Engineer, Public Works Building, Sacramento, California, until 2 o'clock P. M., on August 6, 1930, at which time they will be publicly opened and read, for construction in accordance with the specifications therefor, to which special reference is made, of portions of State Highway, as follows:

Los Angeles County, between Santa Clara River and Castaic School (VII-L-A-4-A), about four and three-tenths (4.3) miles in length, to be widened with bituminous treated rock borders.

San Diego County, between Balboa Avenue and Torrey Pines Road (VII-S-D-2-E), about five and four-tenths (5.4) miles in length, to be paved with Portland cement concrete.

San Bernardino County, three concrete bridges east of Ontario (VIII-SB-19-B), the first, at Station 43+01.85, consisting of three 8' 0" slab spans, the second at Station 107+93, consisting of two 14' 3" slab spans; and the third, at Station 119+04.7, consisting of 15' 0" slab span; to be partially reconstructed and widened and the approaches to be widened and paved with asphalt concrete.

Mono County, between Sonora Junction and 4 miles south of Coleville (IX-M-23-K), about twelve and nine-tenths (12.9) miles in length, to be graded.

Plans may be seen, and forms of proposal, bonds, contract and specifications may be obtained at the said office, and they may be secured at the offices of the District Engineers at Los Angeles and San Francisco, and at the office of the District Engineer of the district in which the work is situated. The District Engineer's offices are located at Eureka, Redding, Sacramento, San Francisco, San Luis Obispo, Fresno, Los Angeles, San Bernardino and Bishop.

A representative from the district office will be available to accompany prospective bidders for an inspection of the work herein contemplated, and Contractors are urged to investigate the location, character and quantity of work to be done, with a representative of the Division of Highways. It is requested that arrangements for joint field inspection be made as far in advance as possible. Detailed information concerning the proposed work may be obtained from the district office.

No bid will be received unless it is made on a blank form furnished by

 DIVISION OF HIGHWAYS.

C. H. PURCELL,

State Highway Engineer.

Dated July 9, 1930.

NOTICE TO CONTRACTORS

(Air Corps Hospital and Non-Com-
 missioned Officers Quarters—
 March Field)

Office Constructing Quartermaster,
 March Field, Riverside, California.

Sealed proposals in triplicate will be
 received here until 11:00 o'clock A. M.,
 August 20, 1930, and then opened, for
 the construction of One Air Corps
 Hospital and Twelve sets of Non-
 Commissioned Officers' Quarters. Copies
 of plans and specifications may be
 had on application from the Con-
 structing Quartermaster at March
 Field, Riverside, Calif.; \$25.00 dol-
 lars deposit on each set of plans will
 be required for return of same. Copy
 of plans and specifications may be
 seen also in the office of the Con-
 structing Quartermaster, Fort Mason,
 California.

Expenditure of seven and a half
 per cent of the \$17,360,797 being in-
 vested in building construction, in
 66 of the larger cities of California
 for which permits were issued in

June, will be in Greater Oakland
 structures, the Oakland Real Estate
 Board announces.

During the first half of 1930 the
 seven municipalities of Greater Oak-
 land issued permits for eight and a
 half per cent of all new construction
 authorized by these 66 California
 cities.

During the comparable period of
 1929, the Greater Oakland quota was
 8.8 per cent.

Fred T. Wood, president of the
 board, said:

Throughout California as a
 whole, the new construction pro-
 gram of this year is running ap-
 proximately 29 per cent behind
 that of the previous year, while
 that of the Pacific Coast as a
 whole reflects a reduction of more
 than 30 per cent.

Oakland figures, however, show
 a reduction of 28 per cent.

The June building permit totals for
 the Greater Oakland cities and for
 the other larger Pacific Coast cities
 are: Oakland, 306 permits, \$883,199;
 Alameda, 53 permits, \$71,576; Albany,
 22, \$27,875; Berkeley, 132, \$197,302;
 Emeryville, 6, \$17,780; Hayward 8,
 \$46,883; Piedmont, 12, \$37,043; Rich-
 mond, 34, \$30,710; San Leandro, 12,
 \$34,742; Los Angeles, 2524, \$5,485,132;
 Long Beach, 407, \$1,004,575; Pasa-
 dena, 217, \$1,261,834; San Francisco,
 565, \$2,232,809; Seattle, 598, \$1,581-
 855, and Portland, 533 permits, with
 a valuation of \$937,610.

FILLING BIG ORDER

The South San Francisco plant of
 the Western Pipe & Steel Company
 is working on an order for 500 steel
 car underframes with accessories for
 the Pacific Fruit Express Company.
 This is a new field for the Western
 organization as it is stated that this
 is the first time such a product has
 been manufactured in California.

A "Pittsburg" Auto-
 matic Water Heater
 installed in the Home
 indicates high quality
 throughout.

Recommended and speci-
 fied by all the leading ar-
 chitects, plumbers and
 builders.

Consider the high merit
 of the Pittsburg coupled
 with "Pittsburg Perfect
 Service."

"Hot water quick as a
 wink."

Pittsburg Water Heater Co.

Makers of "Pittsburg Automatic"—"Bungalow Automatic"
 Storage Systems and "Lyon" Tank Water Heaters.

FRESNO IRRIGATION DISTRICT SEEKS WATER RIGHTS

The Fresno Irrigation District of Fresno County seeks authorization of the State Department of Public Works, Division of Water Resources, to appropriate 200,000 acre feet of surplus waters from the San Joaquin river.

The district, according to the application filed, proposes to dam the river under the following specifications: Diverting dam, 120 feet in height; 1410 feet long along the top, concrete construction. Storage dam, 247 feet in height, 3400 feet on top, 250,000 acre feet capacity, 2950 acres surface area.

The site of the project is described to be in sections 3, 4 and 5 of township 11, range 21, and sections 23, 24, 25, 26, 27, 32, 33, 34, 35 and 36 of township 10, range 21. The estimated cost is not disclosed.

At no time will the total storage in the reservoir proposed exceed 200,000 acre feet of water, and the diverted and stored waters will be conveyed through a canal of an approximate capacity of 750 cubic feet flowing per second, according to the complaint. The canal will lead out of the reservoir at Friant, running in a general southerly and southeasterly direction for a distance of approximately 13 miles to a point immediately within the northern boundary of the district in section 28, township 12, range 21. Waters from the canal will be poured into existing distributing canals and ditches belonging to the district and carried to lands embraced within the district boundaries. The supply will be for the public use of the land owners and inhabitants of the district for domestic and irrigation purposes as well as the watering of stock. Geo. L. Swendsen is chief engineer and manager of the district.

PALO ALTO IN PROTEST ON IMPORTING LABOR

According to word from Palo Alto, a committee representing the city government, labor groups, the merchants' association and the Chamber of Commerce, will interview K. E. Parker, general contractor on the new \$500,000 Palo Alto Hospital, "to learn from him why he employs imported labor, despite many appeals made to him to give work to local artisans."

The committee is composed of Mayor C. H. Christensen, Bert P. Ward, carpenters' union; Floyd C. Baker, painters' union; E. C. Tholts, merchants' association; D. A. Mendenhall, chamber of commerce; L. H. Anderson, building inspector; and O. F. Campbell, member of the board of public works.

It is stated that prior to the signing of the contract Parker gave oral assurance that local labor would be given preference to outside workmen in the matter of jobs.

Unlicensed Architect Gets 20-Day Jail Term

Refusal to repay \$200 which he had collected for plans drawn for the First Baptist Church of Redwood City, to which he had represented himself as an architect without a state license, resulted in a 20-day jail sentence for J. G. Lehman.

Sentence was passed by Judge Edward I. McAuliffe at Redwood City, who gave Lehman the alternative of paying a \$200 fine. The case was prosecuted by Richard O. Bell, deputy county attorney, with A. L. Bolton, acting as representative of the State Board of Architectural Examiners.

After hearing the case, Judge McAuliffe found Lehman guilty of practicing without a license and the sentence was passed.

Bids for the new Baptist Church to be erected in Redwood City were thrown out recently when it was found that the plans had been drawn by an unlicensed architect.

Architects and Engineers Must Pay Municipal Tax

Ordinance 8788, recently adopted by the San Francisco Board of Supervisors, imposes a license tax on architects as well as on engineers—civil, electrical or mechanical. Landscape gardeners are also included.

For any firm or individual engaged in such lines of business where the annual gross receipts of which amount to less than \$3,000, the tax will be \$2 per quarter; \$3,000 and less than \$5,000, \$4.50 per quarter; \$5,000 and less than \$7,500, \$6 per quarter; \$7,500 and less than \$10,000, \$7.50 per quarter; \$10,000 and less than \$15,000, \$11.25 per quarter; \$15,000 and less than \$20,000, \$15 per quarter; \$20,000 and less than \$25,000, \$18.75 per quarter; \$25,000 and less than \$30,000, \$22.50 per quarter; \$30,000 and less than \$40,000, \$30 per quarter; \$40,000 and less than \$50,000, \$37.50 per quarter; \$50,000 and less than \$60,000, \$45 per quarter; \$60,000 and less than \$70,000, \$52.50 per quarter; \$70,000 and less than \$80,000, \$60 per quarter; \$80,000 and less than \$90,000, \$67.50 per quarter; \$90,000 and less than \$100,000, \$75 per quarter; \$100,000 and less than \$150,000, \$112.50 per quarter; \$150,000 and over, \$125 per quarter.

Ordinance 8788 was finally passed by the Board of Supervisors on June 20 and received the signature of Acting Mayor Angelo Rossi on July 11.

State Reclamation Board is considering recommendations to appropriate \$300,000 to finance levee construction and flood control work in the Sacramento Valley. Four levees in the Yolo By-Pass at a cost of \$142,000, and one on the Feather River, costing \$88,000 are contemplated.

RED RIVER LUMBER COMPANY ANNOUNCES WAGE CUT

The wage scale of the Red River Lumber Company plant at Westwood, Lassen County, will be cut, July 28th, about 15 per cent below last year.

The company announcement, signed by T. S. Walker, resident manager at Westwood, cites the low lumber prices and the small sales as the reason. The new employees, hired after July 28th, will take a slightly lower wage than the wages paid the older crew members.

But Westwood is a company town, and the Red River Company will relieve the pressure by cutting house and room rents by the same percentage the wages are reduced. July 28th will also mark the start of the company cafeteria, a 15 per cent reduction in the theatre admission prices and the laundry and the dry cleaning rates.

Expressing regret at the need for the wage reductions, applicable to salaried and hourly-pay basis positions alike, the company cited the lumber prices and the sales of various grades of lumber last month as compared with June, 1929.

Typical are:

Six-by-fours, No. 1 and 2 clear, R. W., June, 1929, 115,000 board feet sold at \$67.35 per M.; June, 1930, \$8,000 board feet at \$60.20 per M.

Five-by-fours, No. 2 shop, June, 1929, \$23,000 board feet sold at \$31 per M.; June, 1930, 519,000 board feet at \$20.35 per M.

CALIFORNIA SECOND IN U. S. BUILDING OPERATIONS

California with 66 cities reporting, runs second in the United States in building operations for the first half of the year, 1930. Building operations undertaken in these 66 cities during the past six months involved an expenditure of \$105,679,933 as compared with New York State which topped the list with 46 cities reporting. The New York State total is \$253,005,327. Following are the twelve leading states:

	No. of Places	Volume of Permits for First Half, 1930
1. New York	46	\$253,005,327
2. California	66	105,679,933
3. Ohio	27	69,334,283
4. Pennsylvania	30	64,834,820
5. Illinois	52	62,878,555
6. Michigan	22	46,487,730
7. Massachusetts	30	40,111,514
8. New Jersey	36	40,061,846
9. Texas	21	35,615,198
10. Wisconsin	20	30,610,975
11. Washington	14	25,091,423
12. Connecticut	19	22,825,219

ART AND ECONOMICS OF THE SKYSCRAPER—UNJUST CRITICISM

As a representative of the steel construction industry in the United States it is a privilege and a pleasure to convey you greetings. We in America—and our membership includes Canada and Mexico as well as the United States, take pride in the fact that the steel construction industry of Europe is inclined to find favor in some of the things we have done on the other side of the Atlantic.

Our country covers a vast area and not all of the steel constructors there are engaged in similar work. Some of our members are concerned mostly with the erection of great bridges. Some build only factories and industrial buildings. Others specialize in the many branches of heavy construction which our country so happily offers. It is my good fortune to have been engaged in the erection of multiple-story buildings, or the skyscraper, and it is to that which I intend to address myself specifically.

The American skyscraper today is the product of the best economic, engineering as well as artistic knowledge. As an engineer and a steel constructor I may be inclined to accentuate some things about building which would be overlooked by another, but experience with modern-day practice compels me to confess that an engineer alone would not produce that kind of structure which might prove highly successful. As an engineer I know that tall buildings can be safely built to a height of 2000 feet (610 meters). Skyscrapers with penthouses to rival mountain lodges can be built today, because we have at our command the most perfect building material known to man—steel—but whether such buildings would pay on the investment, or whether they could be made to appear aesthetically satisfactory is a matter that must first be passed upon by others.

As a steel constructor I would like to tell you something of the problems we have encountered in the building of skyscrapers. To me it is a fascinating story and to nearly everyone extremely dramatic.

The story of steel began in the town of St. Pancras, in England. It was there, in 1854, that one Henry Bessemer (later to be knighted and famous throughout the world) made his great discovery, the discovery which he came on in his small ironworks, that if he blew a blast of air through molten iron he oxidized and drove out a number of impurities which made iron an uncertain substance chemically, and to all intents and purposes produced a new substance—steel. The process of Bessemer and of Kelly, who made an almost simultaneous discovery, is old-fashioned and inadequate now; modern metallurgy has far surpassed it in wonders. But it was the start. From that time on, the Woolworth Building was a possibility. And trains that traveled sixty miles per hour. And one automobile for every five people in our country. And man's conquest of the skies. None were, before that blast of air went through that caldron of iron and dross. Once it had, each one, you may like to think, had its actual beginning.

Who designed the first skyscraper is still a matter of dispute. L. S. Buffington, a Chicago architect, attempted to file letters patent on his skyscraper design in 1887, but was never able to establish his claim. That did not prevent him, however, from threatening suit for patent infringement.

George E. J. Pistor, treasurer and director of the American Institute of Steel Construction, who is visiting Europe this summer and consulting with the steel interests of England, France, Germany, Holland and Belgium, made the following speech at London before the British Constructional Engineers.—Editor.

ment against several owners of later skyscrapers. Another claimant is W. L. B. Jenny, who built the first steel-framed building, the Home Insurance Company Building in 1883.

The earliest beginnings of metal frame construction are probably to be found in the building erected in 1854 in New York for Harper & Brothers, whose cast iron columns were used as supports. Wrought-iron beams and columns were used in buildings for the Centennial Exposition in Philadelphia, in 1876. By that time, iron was beginning to be a fairly common building material. But there was another problem that had to be solved before engineers were ready to construct tall buildings. That was the problem of getting people from floor to floor without stairways. One of the earliest elevators known was the one installed in the ornate old Fifth Avenue Hotel in New York, in 1859. It was built by Otis Tufts and cost \$25,000. A steam engine ran it by turning an immense vertical screw—whence its name, vertical screw railway—much as a nut is moved up and down on a bolt by turning the bolt. The first suspended elevator, the forerunner of the kind we know today, was installed seven years later in the old St. James Hotel, New York.

Then came foundations. Simply digging a hole in the ground and building up masonry to support the building was not sufficient for more than a few stories. The foundation problem was not solved until 1880, when the Federal Building in Chicago sank considerably and caused great apprehension among builders and engineers. That started an investigation from which developed a wholly new and modern method of foundation building. Nowadays foundations are in practically all instances, placed under the foot of each column in the building, each one independent of the other. These footings are carried down into the ground until they reach a safe foundation. In some places, like New Orleans, it is necessary to sink piles until they strike a bottom solid enough to carry the weight, or to a depth which will afford a skin friction sufficient to support the building. By some means or other a perfectly safe and solid bottom must always be provided.

With elevators, foundations, and the new structural steel, the time was ripe for the first true skyscraper. The Home Insurance Company, in 1883, put up a building in Chicago in which were used, for the first time, some of the skyscraper principles—primarily of supporting the entire weight of the walls on a steel framework, instead of making the walls themselves carry the weight of the building. The 14-story Tacoma Building in Chicago, erected in 1887, carried skyscraper principles still further, and is generally known as the first real skyscraper. The Tacoma Building was supported entirely by a metal frame, and the walls did no more than curtain off the interior and protect it from the elements. So sound was its design that when the

owners, the University of Chicago, demolished it recently to make way for a 24-story building with a 23-story tower, the framework was found to be in perfect condition.

To build higher and to build larger was only a matter of further experimentation, for engineers realized that in steel they had a material upon which they could depend absolutely. Accessories, of course, had to be improved, particularly the elevator. After Tuff's vertical screw railway type came the hydraulic plunger and later the electric elevator. Electric elevators have been developed to move at the astonishing speed of 1,000 feet (305 meters) a minute, with an acceleration so accurately controlled that passengers are hardly conscious of the rate at which they are traveling. No building is yet equipped with elevators as rapid, but those in the towering new 68-story Chrysler Building in New York move at the rate of 700 feet a minute (356 centimeters a second). When the legal limit is raised they can travel at the rate of 1,000 feet a minute. Elevators now being designed for the Empire State Building will be able to travel at the rate of 1,200 feet a minute (610 centimeters a second).

As a matter of engineering I could leave the story with you at this point, and you would undoubtedly agree with me that it has been a fascinating and dramatic story. It is fascinating because of the infinite possibilities of this modern material—steel—and the exact knowledge that man has acquired of it, an exactitude which has been impossible with any other building material. It is dramatic because of the sureness with which this new art of skyscraper building has come upon us—a type of building that was unknown fifty years ago. But today the skyscraper is indigenous to every city in the United States and is being built in many of the important cities of the world. There are today more than 4,778 buildings in the United States of 10 stories and over in height and of this number 247 are in New York. There are 377 buildings over 20 stories in height of which 138 are in New York City. Thus over 50% of our skyscrapers are in New York City. Chicago, Los Angeles, Detroit, Philadelphia and Boston are the other cities in the United States which have over 100 buildings 10 stories and over. Forty years ago a 10-story building was thought to be a skyscraper. Today we are building office structures 50 and more stories high.

In the future we will build even higher. I say that not upon my knowledge as an engineer—as an engineer I know we can build 2,000 feet (610 meters) high with steel—or some 200 stories or more. But economists, who are today calling for advice tell us that we must build higher if we are to earn a proper return upon the ever increasing land values in our urban centers. The concentration of business activities in our cities, making it highly desirable for great numbers of persons to do business at a single locality calls for ever increasing floor accommodations, and the only way that is to be obtained is by placing one floor above another, thus giving a floor area from fifty to a hundred times the ground area.

As the world becomes more populated and the desire for centralization becomes more and more pronounced, the cities find a greater necessity for larger structures to house the greater

army of people conducting the businesses to provide the needs of the public. It is a human tendency to desire to conduct business from centers and, as the demand for these central locations becomes more acute the values of such locations increase proportionally. It is plain to see that as land values increase, it becomes necessary to build so that the return will be commensurate with the investment. The reason for a building to supply floor area and the more floors there are the greater the rentable floor area from which the income is obtained.

We had our critics who objected to the tall building from the beginning and condemned it as the source of most evils of our city life, and it is only recently that an endeavor has been made to lay the real facts before the public which will make it possible to arrive at an intelligent conclusion.

It may be interesting to know that the first attack of his group was chiefly directed against—so the critics stated "the way they disfigured the streets and against the possibility of a catastrophe involved in the collapsing of one of these monsters on a crowded street." These criticisms amounted to nothing more than a prejudice against the new. Then came the criticism that these tall buildings shut out the light and air and were thus harmful to the health of the public. Lately the traffic conditions have become almost intolerable in our cities and again the skyscraper was blamed. The congestion argument has become the chief objection of those with conscientious scruples against the tall building.

In the matter of light and air it will be admitted by all that this applies only to the few lower floors—and that applies equally to buildings of limited height—but as we reach the upper floors of a modern skyscraper, we attain the maximum of sunlight and air and also a cheerful outlook. The higher the floor the more permanent are such benefits.

The more modern buildings have such arrangements of windows as to further assure an abundance of sunlight.

Also the modern skyscraper makes possible the provision for artificial illumination and ventilation and atmospheric control so as to even excel the natural light and air and thus afford the possibility of having the atmosphere of mountain resorts right in the heart of New York City.

The possibility of the collapse of one of these buildings upon a crowded street was at one time held up as a serious objection to building them. After the experience of two generations this fear has been all but forgotten. Engineers have been able to convince the public of their ability to design and erect these structures with absolute safety.

We still hear of the fire hazard and the danger to life of the occupants due to their inability to reach the ground in safety. All of our modern skyscrapers are built of fire resisting material and the trend in the furnishing of the offices is towards the non-burning kind. Of course we still have much of the contents that will burn and should a fire start it is necessary to confine it and either let it burn out or have it extinguished. The advances made in fire resisting construction and fire fighting equipment have reduced this menace to a minimum so that today the fire hazard is much less in the modern skyscraper than in most other types of buildings.

There are three distinct agencies which work towards guarding against fire loss. First, the City Building Department is charged with enforcing the strict regulations of the Building Code. Second, the City Fire Department is charged with inspection of the various features which concern them, not only during the construction but also periodically after occupancy and it is tru-

ly to the interest of the members of this department to see that all equipment is in working order and that no violation of the rules is allowed. Third, the Fire Underwriters are interested in reducing the fire loss, and in penalizing the owners by charging extra premiums they exert powerful influence to keep the requirements of the highest class lived up to.

The various legal regulations and fire underwriting recommendations are too numerous for me to discuss here. Some of the more important are the requirements for stairs and exits, the standpipes and tanks and fire pumps, and the outside windows of metal and wire glass.

Now just a few words regarding the congestion problem. This problem is not new and was present in our various cities long before we had any buildings over three or four stories high. As far back as the time of Julius Caesar, ancient Rome had this problem to contend with and many of the traffic regulations which we think modern were resorted to at that time. Thus history tells us that Rome had traffic policemen—taxi stands—one way streets—also regulations that specified due to the narrowness of the streets, merchants had to make their deliveries at night. In our own country this problem existed with bus and horse-car lines and ferriesboats, fifty years ago.

In London where buildings are limited to 100 feet in height above the sidewalk, every means of transportation and traffic is crowded. Where in our cities can you find more aggravated traffic congestion than is found at Aldergate or Ludgate Hill in London. Similarly in Paris and Buenos Aires, where there are no tall buildings you find the traffic congestion a problem very serious and growing steadily worse. In our own United States the experience of those cities where there are a few if any tall buildings, seems to indicate that low buildings do not save the community from congestion. Take for instance, Boston—Boston has a very wide spread business area, it has subways and a greater percentage of street area than most other cities, and yet where can you find a more serious traffic condition even in our tall building cities.

In New York City we find more serious congestion on Fifth Avenue and in the Times Square Section, than we do in the foot of Manhattan where most of the skyscrapers are. For the greater part of the day the department store sections are by far the more congested and in the evening you find the congestion in the theatre district where there are few if any tall buildings.

Not alone has the skyscraper taxed engineering genius and enlisted economic talent, but it has with us called into being new professions and greatly altered sociological conditions. These tremendous buildings must not only afford a shelter, but competition has forced improvements in equipment which would have been impossible under any other system of housing. Heating, ventilating and lighting have been so advanced that within the walls of a skyscraper the air is purer, the temperature more uniform and the light more perfect than on the streets in front. Transportation via elevators is equalled by no other means of travel by air, land or water.

These modern structures present a tremendous problem in their management. As a matter of fact the art of managing a skyscraper today is highly developed despite its newness, and our leading colleges and universities are offering courses of

training to persons who expect to enter this profession. To manage the routine affairs of a skyscraper is not merely a question of running a dynamo, a donkey engine, manipulating the levers in an elevator, repairing the electric lights or the ventilator fans, but it consists in managing numerous trained workmen who do care for these things and of supervising the receipts and expenditures on the tremendous investment represented by the building. Building management is a highly complex and exacting profession.

In the new Empire State Building which is being erected on the site of the old Waldorf-Astoria Hotel in New York City, the present plans call for 64 elevators. This building will be 86 stories high, the top reaching some 1100 feet (335 meters) above the sidewalk. This building will have a ground-floor area of 200'x425' (61 meters by 130 meters) and the tower which will start at the 30th floor will have a floor area of 133'x185' (40 meters by 56 meters). The tendency is for buildings of larger ground area and the ideal space is naturally a full block with frontages on 4 streets. This sort of area is very difficult to assemble, but it would be a surprise if the up-to-date promoter would not strive to attain such plots.

Mergers are the trend of the times with us. We witness the chain stores, the many combinations of large and small companies, businesses and corporations. And so it can be expected that real estate owners and builders will see the benefits to be derived from putting their interest together to make possible a more profitable operation. It will be found more advantageous for individual owners to merge their smaller plots and form combinations, and build on co-operative lines on plots of economic size, and thereby each individual in turn will derive a more profitable return from his property.

There is no wonder that architects, at first, were somewhat at sea how to treat this, then new type of housing and many odd looking structures, yes even monstrosities, were built. From the plain looking box with windows to the more ornate tower, there were innumerable styles.

In more recent years, the zoning laws effected in New York City have put certain restrictions on the shape and height of buildings. One of the most striking of these restrictions is the limitation in size of a tower to not more than 25% of the total lot area, but which may rise to an indefinite height as long as structural safety and economic conditions are satisfied.

Paris has achieved a wonderful harmony of structures, but we in the United States are limited by the law-making powers conferred. Zoning restrictions have been adopted by us in a number of instances, but legal means have not infrequently been found to break them when a builder discovered an economic necessity therefor. We are, however, approaching the day when buildings will be projected in a group plan. In New York City recently what is known as the "Rockefeller City" was designed to cover several city blocks, all the structures being planned to be architecturally harmonious. Similar schemes have been put forward with more or less success but upon a smaller scale. I have no doubt but the idea will be carried much further with us in the immediate future.

The American skyscraper is the result of the efforts to wed an economic necessity to a material design. But to criticize this design as something fundamentally ugly, as some of our critics would make it appear, is

merely begging the question. There is no interview more certain to be printed in America than one with an alien architect saying he thinks our skyscrapers are hideous. But I am happy to say that not many of them are so zealous of obtaining publicity as to subvert their honest convictions and their politer instincts.

Most foreign architects will concede that in the modern skyscraper America has contributed the most impressive and the most worth while style since the Renaissance. There are many eminent authorities to bear me out, and practically all the worth while architects in other countries have expressed their appreciation of the design of the American skyscraper. And I may safely say that this new style of Architecture, truly American, bids fair to become the pattern not only through the United States, but also to influence the modern European forms.

Of course there were some atrocious examples when we first began building tall structures. We acknowledge they were bad in design and ugly in appearance. So was the first mud hut of man.

Architectural designs is motivated by the qualities of the material from which it is the flower. Egypt had granite and as a result developed a distinctive architectural style. Heavy lintels and columns, massive and impressive, it expressed the properties of the stone from which it was constructed.

Greece had her marble and the chaste classical design came into being.

The Orient had her cedar and carved wood which made possible the pagoda.

The aspiring pinnacles of the Renaissance grew out of the soft limestone.

Steel was made commercially about a half a century ago. It is today ushering in a new era in architecture.

The strength, the plasticity, the durability, the perfect elasticity and the uniformity of steel enabled man to do with it what had never been done with a building material before. So accurately can the properties of a piece of steel be measured that we know exactly to what extent we can depend upon it before we place it into a structure. This cannot be done with any other material.

There is no material in commercial use so strong, nor one which will occupy so little space for the weight it will carry.

Thus—when we began carrying the walls on steel frames, architects were able to introduce a vertical line in the structure that had never before been possible. Also we were able to introduce a horizontal member of a strength that has made possible the elimination of supporting columns in theatres and large auditoriums.

Only within recent years have architects been ready to take full advantage of the physical qualities in steel and to utilize these properties in a new architectural design.

The best examples of skyscraper architecture have discarded the ornamental and make use of the vertical and horizontal line and the mass to give the structure a beauty that is just beginning to blossom forth in the leading American cities.

Architecture is truly artistic only when it does not deceive, and certainly a steel framed building is deceptive if it hangs a veneer of classical marble columns for a curtain wall. We have deserved that criticism where we failed to give true expression to the properties of that in which

we worked. When literary workers copy, they are accused of plagiarism. I wish it were possible to use as strong language to describe the appearance of some of the first skyscrapers, those of the style which are now being wrecked, demolished and removed to make way for a better and truer style of skyscraper architecture.

In 1931 we shall celebrate the fiftieth anniversary of the invention of rolled steel shapes and the erection of the first American skyscraper. Though possibly ugly at first, architects have attained such skill in using the material at their disposal that today this tall building architecture is universally held up as one of the great contributions to creative art.

Those of you who have visited the state and viewed the sky-line of New York as your ship moved up the Bay have undoubtedly been impressed by the courage of those who have dared to build so high. You who are yet to visit our shores I hope will look forward to that experience. Above all, however, I hope you steel constructors will not long permit us to enjoy the exclusive honor, but will take advantage of our experience and improve upon that which has already been tried and found expedient, economical and of unique architectural merit.

IS IT MASKED OPPOSITION TO G. G. BRIDGE PROJECT

"With each new project for a large bridge the old contest of ship against bridge is renewed and demands of the ship for greater clearance heights become more extreme," says Engineering News-Record.

"The project for a Hudson River bridge at Fifty-seventh Street, New York, and the Golden Gate bridge project at San Francisco, are the latest instances, following the Longview bridge case, in which the government authorities imposed a minimum clearance height of 195 ft. At New York a height of 200 ft. has been demanded by the War Department; at the Golden Gate the ship men ask for 250 ft. In part these demands merely mask opposition to any bridge whatever, but in part they represent beliefs that ships if given free scope will grow—like skyscrapers—beyond all present limits. Whether it is proper to encourage such unbounded growth, or whether bridges should be forced up to dizzy heights on idle future speculation, has never had conscientious consideration. If ship lock dimensions and railroad clearance diagrams were treated in such loose manner, much of the world's commerce would stop. There is evidence that the needs of the largest ships are far below the limit now mentioned, and that the extreme funnel or mast heights of a few vessels represent architectural fancy rather than service need. Some of the newest and greatest passenger vessels have lower funnels than smaller vessels of earlier date. Francis Lee Stuart showed recently, at the Fifty-seventh Street bridge hearing, that 150 ft. or even less represents the highest service necessity that can fairly be reasoned out of ship-construction conditions. Figures of this kind carry the clear implication that some of the recent shipping demands are fantastic and lack merit. They suggest also that a genuine inquiry into the height requirements of ships by a balanced tribunal of authorities would be timely. Unreasonable obstruction to bridge building benefits no one."

Illinois Supreme Court Rules Zoning Provisions Must Apply Impartially

An amendment to the zoning ordinance of Chicago changing the maximum street line height of buildings on lots having frontage on three streets from 264 to 440 ft., made six years after adoption of ordinance, after construction of from 60 to 70 buildings under the original ordinance, was in violation of the zoning statute of Illinois, requiring the city council, before enacting a zoning ordinance, to consider existing conditions, conservation of property values, direction of building development to best advantage to city, and the use to which the property is devoted at the time of the enactment of the ordinance, since the change in the maximum height would not only unreasonably impair value of buildings constructed under original ordinance, but would constitute the ex post facto confiscation of property rights without compensation.

This was the ruling of the supreme court of Illinois in the case of the Michigan Lake Holding Corporation vs. Eva H. Hamilton, et al (Nos. 20657-48-59), on appeal from the circuit court of Cook county.

In its concluding comment on the case the supreme court says:

"Any regulation or restriction placed upon property by virtue of the police power granted under a zoning statute, must be impartially applied as to all properties similarly situated. The few properties here affected under the amendatory ordinance are not so differently situated as regards surrounding open spaces, light, air, safety, congestion and other matters pertaining to the public welfare as to warrant establishing these properties as a class and give them freedom from restriction, whereby the street line height of buildings erected thereon might be 66 2/3 per cent higher than that which all other properties in the same volume district might have.

"In our opinion there is no merit in appellant's contention that denying him the right to erect a 60-story building upon his property will deprive him of property without due process of law. He and his property are under provisions and regulations of the original 1923 zoning ordinance of the city of Chicago and its lawful amendments, which have been the guiding hand in the construction of all other business buildings in the fifth volume district.

"We are of opinion the judgment of the trial court in revoking the building permit issued to Cuneo was correct, and the judgment will therefore be affirmed."

LICENSING LAW ADVOCATED BY LOUISIANA CONTRACTORS

Action has been taken by the Louisiana members of the Associated General Contractors to have a state law passed providing for licensing contractors. A special committee of the Shreveport Chapter has been appointed, according to the chapter secretary, B. D. Battle, which is to cooperate with the Central Louisiana Chapter in bringing the matter before the next state legislature. The committee consists of K. C. Wilson, Ashton Glassell and W. A. McMichael.

The measure advocated by the contractors provides for a board of examiners consisting of five members who will pass upon the eligibility of all contractors.

THE OBSERVER

What He Hears and Sees on His Rounds

New Yorkers who are just getting used to the Chrysler Building's domination of the mid-town skyline, where its silver spire pierces the sky 1045 feet above the street level, soon will be able to look down on the city from a platform almost 200 feet above that point. Former Gov. Alfred E. Smith, president of the company erecting the new Empire State Building, announces that plans have been changed to include a public observation gallery at the 1225-foot level. The building will rise to a total height of 1243 feet, almost a quarter of a mile above the street, an equivalent of 102 stories. It is scheduled to be completed by May 1, 1931.

The index number of wholesale prices computed by the Bureau of Labor Statistics of the U. S. Department of Labor shows a further decline in June. This index, which includes 550 price quotations weighted according to the importance of each commodity, stands at 86.8 for June, compared with 89.1 for May, 96.4 for June, 1929, and 100.0 for the year 1926. Based on these figures the purchasing power of the 1926 dollar was \$1.037 in June, 1929, and \$1.152 in June, 1930. Building materials also were noticeably lower than in May, prices of lumber, brick, cement, structural steel, and paint materials averaging well below those of the preceding month. Metals and metal products averaged lower, with declines in iron and steel and nonferrous metals, including copper, lead, silver, tin, and zinc.

Declining retail prices point to an early culmination of readjustment in general business, according to Gage P. Wright, New York business and investment counselor, writing in the current issue of the Business Economic Digest, who goes on to say that the upturn in the construction industry is another bright spot commanding more than ordinary interest.

"As might be expected," Wright says, "market analysis and economists are quick to recognize the favorable effect of the upward trend in the construction industry. The importance of this industry as a major influence upon general business activity can hardly be over emphasized. The great periodic increases or declines in the volume of construction influence to a marked degree the level of general business activity."

Salvation Army officials of Wenatchee, Wash., are planning to establish a soup kitchen for scores of men from Pacific Coast towns who have found there are no more jobs to be had on the Rock Island dam project of the Washington Electric Company.

This followed an announcement by the Wenatchee Welfare Association that "this city does not intend to maintain a soup kitchen to feed people who came here despite repeated warnings to keep away."

Washington Electric Company officials declared they have hired virtually all the men that will be needed to work on the Columbia river dam this year.

Highway construction, which is being expedited by the state in an effort to relieve unemployment conditions, is now three months ahead of schedule, Bert B. Meek, state director of public works, announces.

Approximately \$50,000,000 will be expended by the state on road and bridge building during the biennial period ending June 30, 1931, Meek said.

Of this amount contracts aggregating \$40,000,000, or 80 per cent of the total amount involved in the program, have already been let, although the biennium is only half over, Meek reported.

"We are expediting this work as quickly as possible and as fast as the funds are available," he declared. "This is being done for the sole purpose of relieving, to the limit of our ability, the unemployment problem."

There were only 21,276 unemployed persons in San Francisco at the time of the last census, according to unofficial, preliminary figures, released by the Federal Government.

This total, only slightly more than 2 per cent of the population as determined by the enumeration, is considered surprisingly low. In some other big industrial centers of the country, such as Toledo and Detroit, the unemployed have totaled nearly half the population, it was pointed out. In Toledo 47 per cent is the unemployment figure.

Preferential rates to applicants for loans for building or modernization of homes to reduce unemployment by speeding up construction are announced by a savings and loan association at Seattle. The concern offers to eliminate customary financing charges, including fees for appraising and preparing papers and also to reduce interest rates for the next few months.

"If all lenders of mortgage money will likewise offer special reduced rates on this class of loans hundreds of families could be persuaded to build more modern homes for their own use and thousands of men will be given employment during the coming fall and winter season," R. R. Hart, president of the loan association, said.

Despite the temporary let-down in building operations throughout the nation, Chicago will have completed or under construction 500 skyscrapers of 10 stories or more by the end of 1930, according to the Chicago Association of Commerce.

In the past 10 years, a survey by the association shows building costing \$500,000 or more each have been erected in the downtown area at a total cost of more than \$500,000,000. Of the structures in this group, eight have cost more than \$10,000,000 each. With several other big buildings being planned for construction between now and the World's Fair of 1933, it is expected that construction in Chicago's downtown area in the next three years will equal that of the past decade.

A tabulation of Chicago's present tall buildings show 391 of 10 to 20 stories each, and 67 of more than 20 stories.

Absent window reveals and rich black and white materials on the exterior, rather than ornamentation, will give New York its first "shadowless" office building with completion next May of the 41-story structure to stand on the southeast corner of Madison Avenue and Fortlieh Street.

Kenneth Franzheim is said to have struck more than one ultra-modern architectural note of extreme simplicity in his novel design for the structure. In contour, its 505-foot height will not vary greatly from other new business buildings in the midtown section although in aspect it will be conspicuously different.

"Entablatures, cornices, architraves, pediments and other ornamental features have no appropriate place in a tall, modern structure designed purely for business purposes," says Franzheim. "Originally, such classic features were intended primarily for casting shadows by which desirable light contrast could be produced in low, solid-masonry structures.

"For 22 East 40th Street, as the Houston Properties Corporation's new building will be known, we have a partee which depends entirely upon masses and portion in simple black and white building materials and not upon stylistic ornament.

"An effort has been made to effect striking results in the simplest possible manner through use of contrasting white enamel brick and black brick, albarene stone and black granite appropriately relieved with silver metal. These, to our conception, more fittingly represent the spirit of the modern office structure."

There will be no window sills in the building, the glass being flush with the exterior surface of the walls. Black spandrels, harmonizing with the dark exterior appearance of window glass and alternating with light piers, will accentuate the structure's height and slender grace.

Twenty-two East 40th Street is being built for the Houston Properties Corporation, through the 277 Madison Avenue Corporation, by Dwight P. Robinson & Company.

JADWIN DECLINES FEDERAL POWER COMMISSION POST

Coincident with a decision of President Hoover to send no nominations to the senate for confirmation until the treaty situation has cleared, the White House received informal reports that Lieutenant General Jadwin would not accept the chairmanship of the federal power commission.

Mr. Hoover announced recently the selection of General Jadwin and his nomination was one of those being withheld from the senate.

Although the general declined to discuss the reports, it was said he had received an attractive offer from civil life that he did not feel he could refuse. He was to have accepted the post for only six months to give the president the benefit of his experience as chief of army engineers.

After his selection was made public, several senators indicated they would oppose confirmation. Once the senate sets the time for voting upon the treaty it will be confronted with a number of nominations to be disposed of before adjourning.

Five members of the power commission and six members of the tariff commission are to be named by the president.

ALONG THE LINE

Walter Hibbard Seaver, 59, for twenty years Pacific Coast sales manager for the United States Steel Company at San Francisco, died July 13, following a heart attack.

Seaver, a native of Boston, came here many years ago from New York, after graduating from the Massachusetts Institute of Technology. His connections with the steel company extended over the past thirty years.

George J. Schwall, assistant city electrician of Stockton in charge of police and firm alarm systems, has been appointed acting city electrical inspector by W. B. Hogan, city manager. Schwall will occupy the position held by the late Frank G. Morrell, who died recently. Schwall has been employed by the city since November, 1924. J. S. Clay will continue as assistant electrical inspector.

R. F. Brown, construction engineer for the California Water Service Company, has been appointed manager of the Stockton branch of the company.

Brown succeeds H. K. Griffin, former president of the Stockton Chamber of Commerce, who has been promoted to the managership of the entire Northern California territory served by the company.

Brown, a civil engineer, is a graduate of Stanford University. He has been employed by the company since November, 1928, and just recently completed supervising construction of a 1,000,000,000-gallon reservoir near Clyde, known as the Chenery project.

Appointment of Leonard F. Starks, a member of the architectural firm of Starks and Plenders and Frank H. Reynolds, to the city board of examiners and appeal, provided by the municipal building code, is announced by James S. Dean, city manager of Sacramento.

Mr. Starks will become the architect-member of the board, taking the place Dean occupied before becoming city manager. Reynolds will become the structural engineer-member of the board, taking the place of M. W. Sahlberg, who has left the city.

The appointments are effective at once. The members serve without pay at the pleasure of the city manager. The function of the board is to settle controversies or disputes arising over the building code.

Carmel, Monterey County, does not contemplate hiring a new city engineer at present, but will hire an engineer when necessary for certain projects. This is the aftermath of action recently taken by the Carmel city council, when it declared the office of city engineer, held by Howard Severance, vacant.

PLANING MILL LEASED

E. R. Maule, Southern California mill man, and J. Earle Heber, former Pacific Coast manager of Truscon Steel Co., have leased the planing mill of the Los Angeles Investment Company in Los Angeles, and will engage in the general millwork business. The firm will be known as the Maule-Heber Company. Mr. Maule will be general manager in charge of plant operations and Mr. Heber will have charge of the sales. J. T. Williams will be superintendent of the mill.

TRADE NOTES

Paul J. Carriere will operate from 704 Larkin St., San Francisco, under the firm name of Rainbow Electric Co., according to articles filed recently with the county clerk.

Montgomery Lumber Co. and Yost-Linn Lumber & Finance Co. of Culver City have been merged and will operate as the Culver City Lumber Co. J. G. McKinney is president of the new company and Fred H. Yost and J. H. Montgomery are directors. W. F. Betts is yard manager. General offices will be located at 8817 Washington Blvd., Culver City.

Newspaper advertising can play a great part in assisting business through its present troubled waters in the belief of Theodore Watson, University of California Extension Division lecturer in economics.

"Advertising isn't meant to be seasonal from the standpoint of paying only this or that season," declares Watson. "Sustained advertising the year around builds a confidence that is not easily shaken. Steady trade built through advertising cannot be established through any other method."

TEST TO DETERMINE MOISTURE IN FLOORING

If new concrete or unsuspended floors are not thoroughly dried out, there are two simple yet dependable tests by which the presence of moisture can be determined. These tests have been developed by the Armstrong Cork Company in connection with the laying of corkbrick, cork tile and linoleum coverings over new floors, but they are equally practical wherever it is essential the floor be dried out before a final covering is put on or a waterproofing process applied.

The more sensitive and effective test to detect moisture in sub-floors is as follows: Place on a two-inch watch crystal a quarter-teaspoonful of anhydrous calcium chloride, which can be readily obtained at any drug store. Set the crystal on the floor and cover it with a five-inch clock crystal, imbedding the edges of this cover in soft putty spread in a five-inch circle around the watch crystal. It is important that the edges of the glass well imbedded in the putty to prevent any air reaching the calcium chloride. Within twenty-four hours any dampness in the floor will make the calcium chloride wet. If there is a considerable amount of moisture present, the chemical will dissolve.

A simpler but probably less accurate method consists of placing pieces of linoleum face down on the floor, weighting the edges, and allowing them to remain for twenty-four hours. Under ordinary circumstances the presence of any moisture in the flooring will be shown by dampness between the floor and the linoleum.

In making these tests, it is advisable, for conclusive results, to test several different portions of the floor, as one part of a large floor area may be dry while another is still damp. A new suspended floor usually becomes thoroughly dry in from two to four months, depending on climatic conditions.

HERE — THERE —
EVERYWHERE

A proposal to vote bonds of from \$200,000,000 to \$250,000,000 for the Metropolitan Water District's aqueduct from the Boulder Canyon Dam to Los Angeles and allied districts, may be placed on the November ballot if estimates of cost can be prepared in the meantime. Selection of a route will be made in August, according to reports from the southern city.

The Senate has adopted a resolution by Senator McNary, Republican, Oregon, directing the tariff commission under the new flexible provision to investigate costs of production of timber and lumber, including western fire, spruce, pine, hemlock and larch. Under the flexible clause if foreign costs are found to be lower than American by a margin greater than present duties, the rates may be increased by not more than 50 per cent, or lowered in case there is found to be too heavy protection.

The Santa Ana city council has issued orders to municipal building inspectors to deny building permits to contractors who cannot exhibit a state license. It is proposed to secure the co-operation of other municipalities in Orange County to enforce the state license law.

The Federation of Merchant Plumbers of Southern California, meeting at Santa Barbara, selected Santa Monica as the place for their meeting next year. Lou Remy is president of the federation. E. L. Cochran is secretary.

The first visible signs of turmoil in the Washington State Federation of Labor Convention at Spokane, Wash., arose over the fight of the proposed adoption of a resolution favoring the six-hour day and the five-day week. Three resolutions were introduced by different unions of the state. One asked for the six-hour day and five-day week, one for a five-day week with the eight-hour day, and the other for the five-day week with the nine-hour day.

The ultimate aim of these proposed resolutions was the relief of the unemployment situation.

MODERN HOMES

A survey of a number of representative small houses in thirty-one cities scattered throughout the United States which was recently completed by the division of building and housing, United States Department of Commerce, shows that English and pseudo English houses, featuring steeper roofs, are more popular in a great many parts of the country, but that Spanish and Italian types are preferred in the Southern and Western states.

PROTESTS FREIGHT RATES

A complaint has been filed with the Railroad Commission by the United Concrete Pipe Corporation against the Pacific Electric Railway and the Southern Pacific Company claiming unjust and unreasonable rates were charged by defendants on numerous carloads of sand shipped from Hewitt to Delano, Calif. Complainants ask reduction.

BULLETIN ON AIR SEASONING
OF WOOD

The sawmill owner with a stock of millions of feet of lumber in his yard and the farmer with a few hundred green fence posts will each find useful the facts in the new Government bulletin, "The Air Seasoning of Wood," just off the press. J. S. Mathewson of the Forest Products Laboratory, Forest Service, U. S. Department of Agriculture, is the author.

The new bulletin is based on the results of years of research conducted by the Forest Service at the Forest Products Laboratory, Madison, Wisconsin, and elsewhere. The bulletin outlines the basic principles of wood drying, and reports studies of the air seasoning of boards and planks, dimension stock, lath, crosssties, poles, posts, timbers, cordwood, cooperage, and veneer. The effects on coopership of climate, time of year, kind of wood, thickness of stock, locality of growth, yard location and arrangement, piling method, and other factors are discussed in detail.

While the supply lasts, this publication, Technical Bulletin No. 174-T, can be obtained free from the Department of Agriculture, Washington, D. C.

CLAY PRODUCTS MEET SET FOR
AUGUST 1-2

Representative of clay products industries throughout the Pacific Northwest are planning to attend the summer conference of the American Ceramic Society, Northwest Section, in Victoria, B. C., August 1 and 2.

A business and technical meeting Friday afternoon will be one of the outstanding events of the conference and will embody research reports, planning of future work of the society, and the reading of papers by professors of the University of Washington and University of British Columbia. A discussion of the general advancement made in the use of clay products in all types of building construction is anticipated also.

The modern trend toward creation of beautiful business structures and industrial buildings will be discussed by a building arts specialist of Victoria, according to announcements made by Prof. Hewitt Wilson of the University of Washington, and W. J. Howard, engineer-manager of the Pacific Northwest Brick & Tile Association, who are in charge of the program.

COLUSA COUNTY HOSPITAL
PLANS UNDER WAY

Otto Deichmann, San Francisco architect, is preparing plans for a new hospital to be erected for Colusa County. The structure will be one and two stories in height of reinforced concrete construction and will cost \$250,000.

The one-story unit will comprise a wing and the two-story section the administration building.

Only the first unit of the project will be undertaken at this time. This to have a capacity of 24 beds. The completed project will have a capacity of 100 beds.

The Standards Association of Australia is revising the Australian Electrical Wiring Rules and has requested a copy of the Electrical Safety Orders of the California Industrial Accident Commission.

POWER LINE AWARD

Miracle Construction Company of San Diego, has been awarded a contract by Electrical District No. 4 at Casa Grande, Ariz., to construct about 60 miles of new power lines to serve the district east of Casa Grande, including Eloy and Toltec sections. Bonds of \$250,000 voted to finance the work have been purchased by the contractors.

ARCHITECT CRIM LEAVES \$200,000
ESTATE

Leaving an estate of about \$200,000 to be placed in trust for the benefit of his widow, Mrs. Janita M. Crim, and a son, William C. Crim, 2295 Broadway, the will of William H. Crim Jr., San Francisco architect, was filed for probate last Wednesday.

Crim died July 12, this year, leaving a will dated June 25, 1926, in which a sister, Grace M. Crim, is named executrix. Income from the estate is to be divided between the widow and son, eventually to be distributed to the son.

Edmond Rising, business associate, is left Crim's office equipment and plans.

EXTENSIVE LUMBERING BY
McCLOUD COMPANY

Notwithstanding what the lumber men call a bad market, the McCloud River Lumber Company has been cutting an average of about 250,000 board feet of lumber daily for several weeks on the government land in the Modoc National Forest, near White Horse Camp. Two trains of logs leave the cutting area daily for the company's mills at McCloud. A considerable amount of cutting is also being done on the company's land, near the town of White Horse, in the extreme southwest corner of the county. The Long-Bell Lumber Company is carrying on extensive cutting in the northern end of the same western yellow pine belt.

ANCIENT LEASE

The following is a building lease translated from a stone tablet written about 1800 B. C.:

"The whole house, which is owned jointly by Awel-Sin, the judge, and Ilushu-Ibni, Sin-Iksham, the scribe, has rented from Awel-Sin and Ilushu-Ibni for one year. As the rent for one year he will pay five shekels of silver. He shall plaster the roof and strengthen the walls, the lessor will pay the expenses. As installment he has paid two shekels of silver."

From this it can be seen that the custom of requiring the lessor to keep the property in repair is at least 3729 years old.

PASADENA TO BEGIN CONSTRUCTION OF PINE CANYON DAM

The city of Pasadena has announced that it expects to start at once on construction of the proposed Pine Canyon dam for its water-supply project. This decision followed the filing of the final reports on the dam site by Dr. F. L. Ransome, of the California Institute of Technology, consulting geologist for the city, and L. C. Hill, consulting engineer, both of whom reported favorably on the adequacy of the site for the proposed structure, which will be 295 ft. above streambed. The city last year voted \$10,000,000 in bonds to finance the project.

WAGE INCREASE UNWARRANTED

General contractors of Tacoma, Wash., have deferred action on the petition of the Carpenters' Union for a wage raise. The builders feel that conditions at present do not justify any increase in building cost. The request of the Building Laborers' Union for explicit recognition is withheld insofar as it effects wage scales, although its members are given preference when help is needed.

BUILDING SURVEY VOTED

In order to have a complete survey of county building needs for the next ten years, the Fresno Board of Supervisors has voted \$550 to be paid experts of the California Taxpayers' Association for work on the survey. All county activities will be included in the survey.

A TREE OVER TREE

Those motoring north on the summer vacations may see the famous "tree over tree" on the property of Hans Jorgensen, about 7 miles north of Crescent City on the California Redwood Highway. One tree, estimated to be 2500 years old, grew up around and over a fallen redwood 2000 years old which is still sound. The fallen tree is 8 ft. in diameter and the standing tree is 11 ft. in diameter.

OPENS NEW PLANT

Idaho Pine Pole Co. has established a plant at Idaho Falls, Idaho, and is treating pine poles with creosote for power and telegraph companies in the Western states. The capacity of the plant is about 100 poles per day.

\$5,000,000 STEEL PLANT PROPOSED

Otis Steel Company of Cleveland, Ohio, announces plans for a \$5,000,000 expansion including the building of a new continuous rolling mill and a survey looking to the manufacture of alloy steel. Contracts for the mill are to be awarded shortly and work started within the next ninety days.

The program calls for extension of the present mill buildings and installation of three additional furnaces and of six stands of mills. The new mill will be equipped to produce 35,000 tons of material monthly.

SITE BIDS ASKED

Bids will be considered by the U. S. Treasury Department at Washington, August 19 to furnish the Federal Government with a site for the proposed \$450,000 post office to be erected in Stockton. A site in the center of the business district is desired by the post office officials. The price must not exceed \$245,000.

Mr. Ambrose B. McKenna, of the Commercial Engineering staff, Westinghouse Lamp Company, is making a special study of the business applications of ultra violet light in European countries, particularly Germany and France. His investigations are covering, primarily, the field of general lighting and the results obtained from the use of mild ultra violet sources in buildings and basements, tunnels, mines and all such properties from which sunlight is normally excluded. Ultra violet applications have progressed somewhat further abroad than in this country and the important possibilities in the development of a larger domestic market are encouraging this and similar studies. Mr. McKenna hopes to obtain considerable first-hand knowledge of the use of tungsten filament ultra violet sources in special glass bulbs.

Building News Section

APARTMENTS

Owner Takes Sub-Bids in One Week.
APARTMENTS Cost, \$175,000
OAKLAND, Alameda Co., Cal. Perkins and Van Buren Sts.
Six-story and basement steel frame
& brick apartments (60 apts.; 2-3-
and 4-rooms).
Owner and Builder—Harry Schuster,
2424 Curtis St., Berkeley.
Architect—Willis Lowe, 354 Hobart
St., Oakland.

Note—It was previously proposed to erect this structure at Lee and Grand Avenue, Oakland. The owner decided to erect a larger building and selected the new site.

Plans Being Completed.
APARTMENTS Cost, \$175,000
SAN FRANCISCO. NE Buena Vista Ave. and Waller St.
Six-story Class C basement and sub-basement apartments (36 2 and 3-room apts. and one 10-room apt.)
Owner—Suncal Investment Co.
Architect—Albert H. Larsen, 447 Sutter St., San Francisco.
Plans will be ready for figures in a few or ten days.

Contracts Awarded.
ALTERATIONS Cost, \$50,000
SAN JOSE, Santa Clara Co., Cal. W-Santa Clara Street.
Alter present building for three-story apartment house (46 rooms).
Owner—Paul Masson Building.
Architect—W. H. Weeks, Hunter-Du-lin Bldg., San Francisco; 1736 Franklin St., Oakland, and Bank of Italy Bldg., San Jose.
General Contract and Heating Contract—C. N. Swenson, Washington St., San Jose, general, \$50,574; heating, \$—.
Elevators—Spencer Elevator Co., 166 7th St., San Francisco.
Electric Work—Gilbert Bros., 286 W-Santa Clara St., San Jose, at \$1938.

Contract Awarded.
APARTMENTS Cost, \$90,000
REDWOOD CITY, San Mateo Co., Cal. Duane and Whipple Road.
Three-story and basement frame and stucco apartments (24 2 & 3-room apts.; concrete floor).
Owner—Mark E. Ryan, 231 Main St., Redwood City.
Plans by C. Schuetz, Old Mill Flower Shop Bldg., Redwood City.
Contractor—Russell & Duncan, 1202 Arugello St., Redwood City.

Owner Taking Segregated Figures.
APARTMENTS Cost, \$45,000
SAN FRANCISCO. SE 14th Ave. and Taraval St.
Three-story frame and stucco apts. (six 2-room and six 3-room apts.; brick basement).
Owner—Harry J. Rock.
Architect—Irvine & Ebbets, Call Bldg.

Sub-Bids Being Taken.
APARTMENTS Cost each, \$40,000
SAN FRANCISCO. W 25th Avenue S Cabrillo St.
Two three-story and basement frame and stucco apartments (six 2-room and six 3-room apts.)
Owner and Builder—Fred Anderson, 156 Granada St.
Architect—Irvine & Ebbets, Call Bldg.

Contract Awarded.
APARTMENTS Cost, \$37,500
SA FRANCISCO. Greenwich St. and Franklin St.
Three-story frame and stucco apartments.
Owner—Mrs. Sara Schwalbe, 1597 Greenwich St.
Plans by Builders.
Contractor—Laughlin Const. Co., 1770 Pine St.

Sub-Bids Being Taken.
APARTMENTS Cost, \$125,000
OAKLAND, Alameda Co., Cal. No. 764 Walker Avenue.
Eight-story steel frame and brick apartments and garage (six-story apartments and two-story garage) (36 two and three-room apts.; garage to accommodate 30 automobiles).
Owner and Builder—Thos. D. Fisher, 2851 23rd Ave., Oakland.
Engineer—Cooks & Hill, 1448 Webster St., Oakland.

Structure will have brick and terra cotta exterior; mechanical ventilation in baths; steam heating system; hardwood floors throughout.

Plans Complete.
APARTMENTS Cost, \$125,000
SAN FRANCISCO. 25th St. and Park Oaks.
Six-story steel frame and concrete apartments (36 2- & 3-room apts.)
Owner and Builder—V. Guilles, 1203 Guerrero St.
Plans by Owner.
Project will go ahead as soon as financing arrangements have been completed.

To Be Done By Day's Work.
APARTMENTS Cost, \$25,000
SAN FRANCISCO. Page and Cole Sts.
Three-story and basement frame and stucco apartments (12 apts.)
Owner and Builder—Stein & Krieg, 754 30th Ave.
Plans by P. Krieg, 134 19th Ave.

BONDS

MARTINEZ, Contra Costa Co., Cal.—Oak Grove School District defeats proposal to issue bonds of \$20,000 to finance auditorium and classroom addition to the present school. It is probable that the trustees will levy a direct tax to finance the construction.

A Demonstration of the SKILSAW PORTABLE ELECTRIC HAND SAW

Will solve your cutting problems.
(Four Models, 1/2 to 1 h. p.)

PETER H. NELSON

Labor Saving Portable Electric Tools.

1222 Mission St.
San Francisco

Underhill
1267

VINELAND, Kern Co., Cal.—Election will be held August 4 in Vineland School District to vote bonds of \$12,000 to finance school improvements. Trustees of the district are: J. E. Michaels, John Francis and A. J. Fowler.

CHURCHES

Plans To Be Prepared.
CHURCH Cost, \$14,000
GILROY, Santa Clara Co., Cal. Church building.
Owner—Presbyterian Church Congregation, Rev. M. M. Ki'patrick, pastor, Gilroy.
Architect—Not Yet Selected.
Of the \$14,000 required for construction, \$12,000 has already been raised to finance the building.

Plans Being Prepared.
CHURCH Cost, \$15,000
SANTA CRUZ, Santa Cruz Co., Cal. One-story frame and stucco church (1st unit).
Owner—Church of the Nazarene (Rev. E. F. Dunn, pastor), 51 Cayuga St., Santa Cruz.
Plans by Mr. Crewdson, Oakland.

FACTORIES AND WAREHOUSES

Contract Awarded
DRYER, ETC. Cost, \$—
VISALIA, Tulare Co., Cal.
One-story reinforced concrete dryer and storage building (100x28 ft.)
Owner—Knudsen Creamery Co., 1965 Santee St., Los Angeles.
Architect—Train & Cressey, Western Mutual Life Bldg., Los Angeles
Contractor—L. C. Clark, Visalia.

Steel Tank Contract Let.
PLANT Cost (1st unit), \$500,000
PITTSBURG, Contra Costa Co., Cal. Twenty-acre site available.
Refractories plant.
Owner—Stockton Fire Brick Co., Russ Bldg., San Francisco.
Engineer—K. Theill, 580 Market St., San Francisco.
Steel Tank—Chicago Bridge and Iron Works, Rialto Bldg., San Francisco. Tank will be on 105-foot tower and of 30,000-gal. capacity. Modern equipment will be installed including a continuous car tunnel kiln. There will be considerable steel work involved.

Sub-Contracts Awarded.
LABORATORY Cont. price, \$65,000
SAN FRANCISCO. N Fall Street bet. Van Ness Ave. and Polk St.
Three-story and basement reinforced concrete and brick offices and laboratory.
Owner—The Viavi Co., Van Ness Ave. and Market St.
Architect—Willis Polk Co., 277 Pine Street.
Contractor—Barrett & Hilp, 918 Harrison St.
Lumber—J. H. McCallum Lumber Co., 748 Bryant St.
Structural Steel—Judson - Pacific Co., 609 Mission St.
Reinforcing Steel and Steel Pans—Soule Steel Co., Rialto Bldg.
As previously reported, excavation awarded to Granfield, Farrar & Carlin, 67 Hoff St.

Contract Awarded.
INDUSTRIAL BLDG. Cost, \$15,000
SAN JOSE, Santa Clara Co., Cal.
 Virginia and Fourth Sts.
 Industrial building.
 Owner—Barron Gray Packing Co.,
 Fifth and Martha Sts., San Jose
 Architect—Chas. S. McKenzie, Twohy
 Bldg., San Jose.
 Contractor—Magna & Newell, Bank
 of Italy Bldg., San Jose.

Sub-Contracts Awarded
ADDITION Cost, \$25,000
WATSONVILLE, Santa Clara Co., Cal.
 Wall and Walker Streets.
 Reinforced concrete and galvanized
 iron packing house addition.
 Owner—T. J. Morgan Co., Premises.
 Plans by Mr. Renfrow.
 Contractor—Jack Renfrow, Watson-
 ville.

Furnishing Machinery—Link-Belt Co.,
 400 Paul Ave., San Francisco.
Electric Equipment—Just-Rite Elec.
Co., Watsonville.
Plumbing and Fire Equipment—P. J.
Fredermuth Co., Watsonville.

Planned.
REFINERY Cost, \$12,000,000
TORRANCE, Los Angeles Co., Cal.
 Refinery (1000 acre site).
 Owner—General Petroleum Corp.,
 Higgins Bldg., Los Angeles.
 Engineer—Engineering Dept. of Owner

Completing Plans.
SERVICE BLDGS. Cost, \$38,000
AUBURN, Placer Co., Cal.
 One-story brick and concrete service
 group (auto shed, warehouse
 building and yard improvements).
 Owner—Pacific Gas & Electric Co.,
 245 Market St., San Francisco.
 Plans by Eng. Dept. of Owner.
 Bids will be taken in about two
 weeks.

Contract To Be Awarded.
LOADING PLANT Cost, \$37,669
LIVERMORE, Alameda Co., Cal.
 Reinforced concrete washing, screen-
 ing and loading plant.
 Owner—Kaiser Paving Co., 1522 Lath-
 am Square Bldg., Oakland.
 Engineer—L. H. Nishikien, 525 Market
 St., San Francisco.
 Contractor—Schuler & McDonald, 1723
 Webster St., Oakland.

Contract Awarded.
LABORATORY Cost, \$112,940
PHOENIX, Arizona. McDowell Rd.
 and Tenth St.
 First unit of medical research labora-
 tory (U-shaped masonry struc-
 ture; 200x70 ft.)
 Owner—Wm. C. Cranow.
 Landscape Architect—Ralph D. Corn-
 nell, 3723 Wilshire Blvd., Los
 Angeles.
 Contractor—T. L. Weatherford, 119
 N. First Ave., Phoenix.

Plans Being Figured—Bids Close July
25, 2 P. M.
HANGAR Cost, \$6500
WATSONVILLE, Santa Cruz Co., Cal.
 Corrugated iron and frame hangar (80
 by 100 ft.)
 Owner—Watsonville Airport Company.
 Architect—A. W. Story, Pajaro Val-
 ley Bank Bldg., Watsonville.

Contract Awarded.
ALTERATIONS Cost, \$7432
EMERYVILLE, Alameda Co., Calif.
 45th, Hollis and Holden Sts.
 Alterations and additions to ware-
 house.
 Owner—Pacific Gas & Electric Co., 215
 Market St., San Francisco.
 Plans by Eng. Dept. of Owner.
 Contractor—Emil Person, 829 San
 Louis Road, Berkeley.

STOCKTON, San Joaquin Co., Cal.
 —Warehouse of John Witney, Inc.,
 destroyed by fire July 17 with loss of
 \$10,000 including machinery and min-
 ing material stored. Loss is partially
 covered by insurance.

Contract Awarded.
WAREHOUSE Cont. Price, \$23,660
 including equipment.
LIVE OAK, Sutter Co., Cal.
 One-story and basement concrete
 warehouse and processing plant
 (120x90 ft.)
 Owner—Walnut Growers Assn. (N. F.
 Todd, President), Live Oak.
 Architect—Albert C. Martin, Higgins
 Bldg., Los Angeles.
 Contractor—John J. Cavanagh,
 Stockton.

Following is a complete list of bids
 received:
 Fred F. Anglade, Yuba City, \$22,799
 John J. Cavanagh, Stockton, 23,660
 Campbell Constr. Co., Sacto, 24,225
 Matthews Constr. Co., Sacto, 26,320
 E. H. Riley, Stockton, 27,737

Owner Taking Bids.
PLANT Cost, 1st unit, \$50,000
SAN JOSE, Santa Clara Co., Calif.
 Berryessa Road (15-acre site).
 One- and two-story reinforced concrete
 meat packing plant and one- and
 two-story reduction plant of gal-
 vanized and brick construction.
 Owner—Continental Packing Co., Ltd.,
 (represented by W. H. Lehrback
 and Geo. F. Cokely, 1217 Park Ave.
 San Jose).

Architects—Lescher & Mahoney, Phoe-
 nix, Arizona.
 Note—Plans for the plant proper
 were prepared by Lescher and Ma-
 honey. Plans for the reduction plant
 were prepared by W. W. Lehrback of
 the owner's engineering department.
 The reduction unit will cost between
 \$2,000 and \$5,000.

Plans Being Completed.
EXTENSIONS Cost, \$—
SAN FRANCISCO. Mills Field Muni-
cipal Airport.
 Owner—City & County of San Fran-
 cisco S. J. Hester, Secretary,
 Board of Public Works.
 Engineer—Eng. Dept. of Board of
 Public Works, 3rd Floor, City
 Hall, San Francisco.

Bids Held Under Advice.
WAREHOUSE Cost, \$5500
SAN JOSE, Santa Clara Co., Cal.
 One-story frame and stucco offices
 and warehouse.
 Owner—Williams and Russo, Fourth
 and Virginia Sts., San Jose.
 Architect—Herman Krause, Bank of
 San Jose Bldg., San Jose.

PITTSBURG, Contra Costa Co., Cal.
 —Anchor Post Fence Co. of Calif.,
 460 Fifth St., San Francisco, awarded
 contract at \$11,000 by Shell Chemical
 Co., San Francisco, to furnish and
 install a 6-foot chain link fence to
 enclose Nitrogen Fixation Plant.

Contract Awarded.
LABORATORY Cost, \$1,000,000
 including equipment
LOS ANGELES, Cal. No. 6920 Santa
Monica Blvd
 Two-story Class A steel frame and
 brick film laboratory (150x135 ft.)
 Owner—Craff Films, Inc.
 Plans by H. A. McMurphy, 6347
 Eleanor Ave., Los Angeles.
 Contractor—H. A. Murphy.

Permit Applied For.
REPAIRS Cost, \$6500
STOCKTON, San Joaquin Co., Calif.
 18 N. Wilson Way.
 Repair fire damage.
 Owner—Fisher Brothers Milling Co.,
 premises.
 Architect—None.

TRACY, San Joaquin Co., Cal.—
 Hay warehouse of Fablan & Fields
 destroyed by fire July 17. Loss esti-
 mated at \$16,000 including contents,
 partially covered by insurance.

GARAGES AND SERVICE STATIONS

Bids Opened—Held Under Advice.
SALES BLDG. Cost, \$20,000
NEWMAN, Stanislaus Co., Cal.
 One-story rickb auto sales and service
 building.
 Owner—Thomas Rose.
 Architect—H. G. Bissell, 421 E Miner
 St., Stockton.

OAKLAND, Cal.— See "Apart-
 ments," this issue. Apartment and
 garage building for Thos. D. Fisher.

GOVERNMENT WORK AND SUPPLIES

Bids To Be Asked Shortly.
GATES, ETC. \$17,000 Available.
SAN FRANCISCO. Presidio (Nation-
al Cemetery).
 Granite and bronze gates, urns, etc.,
 at entrance to National Cemetery.
 Owner—United States Government
 Architect—Constructing Quartermas-
 ter, Fort Mason, San Francisco.

Plans Approved.
ADDITION Cost, \$14,000
SAN FRANCISCO. Presidio.
 Addition to Nurses' Dormitory.
 Owner—U. S. Government.
 Architect—Constructing Quartermas-
 ter, Fort Mason.

BLAINE, Wash.— Until August 26,
 3 P. M., bids will be received by Su-
 pervising Architect, Treasury Depart-
 ment, Washington, D. C., to erect U.
 S. Customs and Immigration Inspection
 Station Buildings at Pacific Highway
 Site and Peace Arch Site at Blaine,
 Wash. Deposit of \$15, required for
 plans obtainable from above.

Bids Opened.
POST OFFICE Cost, \$—
PRESCOTT, Arizona.
 Three-story and basement fireproof
 (brick, stone and terra cotta
 facing) Post Office and Court-
 house

Owner—United States Courthouse.
Architect— Supervising Architect,
 Treasury Department, Washing-
 ton, D. C.
Low Bidder— Robt. E. McKee, Central
 Bldg., Los Angeles, and El Paso,
 Texas, bid of \$207,200 exclusive of
 elevator.

McKee submitted an alternate bid
 of \$206,700, substituting architectural
 terra cotta for all stone work above
 the first floor level.

SAN DIEGO, Cal.— Until 11 A. M.,
 August 15, bids will be received by
 the Public Works Office, 11th Naval
 District, San Diego, for repairs to
 auxiliary boiler at the Naval Operat-
 ing Base (Fuel Depot), San Diego.
 Spec. N. 6255. The work will consist
 of removal of existing top sheet, sub-
 merged crown sheet, tubes, breeching
 and approx. 16 ft. of upper part of
 steel stack and replacing with new
 parts. Plans obtainable from the Pub-
 lic Works Officer, San Diego, upon de-
 posit of \$10.

Commissioned To Prepare Plans.
OFFICE BLDG. Cost, \$2,800,000
SAN FRANCISCO. Civic Center.
 Four-story and basement Class A
 Federal Office Building.
 Owner—U. S. Government.
 Architect—Arthur Brown, Jr., 251
 Kearny St.

SAN DIEGO, Cal.—Until 11 A. M., August 7, bids will be received by the Public Works Office, 11th Naval District, San Diego, for weatherproofing doors and windows of Quarters A at the radio station, Point Loma. Spec. No. 6224. The work includes caulking all window and exterior door frames, metal weather stripping, metal threshold, etc. Plans obtainable from the Public Works Office, San Diego, upon deposit of \$10.

MERCED, Merced Co., Cal.—Until August 18, bids will be received by U. S. Treasury Department to furnish site for proposed postoffice building. An appropriation of \$150,000 is available for the site and building.

SACRAMENTO, Cal.—Until August 1, 3 P. M., under Order No. 2233-1670, bids will be received by U. S. Engineer Office, California Fruit Bldg., to furnish and deliver following lumber, S&S:
24 ft. (2 pcs.) Spruce, 1x12-in. by 12-ft. No. 1, clear;
60 ft. (5 pcs.) Pine, 3/4x12-in. by 12-ft. No. 2, clear or better;
120 ft. (10 pcs.) Pine 1x12-in. by 12 ft. No. 2, clear or better;
67 ft. (10 pcs.) Pine, 1x4-in. by 20 ft. No. 2, clear or better;
8000 ft. (500 pcs.) 1x12-in. by 18 ft. No. 3 Common Pine, rough.
Further information obtainable from above office.

Additional Sub-Contracts Awarded.
SHELL HOUSES Cost, \$160,000
MARE ISLAND, Calif. Mare Island Navy Yard.
Six one-story reinforced concrete shell houses and extension to railroad. Owner—U. S. Government.
Architect—Bureau of Yards & Docks, Navy Dept., Washington, D. C.

Contractor—MacDonald & Kahn, Financial Center Bldg.
Roofing—Malott & Peterson, 3221 20th St., San Francisco.
Reinforcing Steel—Truscon Steel Co., Call Bldg., San Francisco.
Masts—Pacific Pipe Co., 201 Folsom St., San Francisco.
Lightning Protectors—W. B. Baker & Co., 270 6th St., San Francisco.

The project will involve the installation of one hundred and thirty-eight 1500-Watt globes. Considerable wiring is involved in the improvement. Projectors will be furnished by the Giant Manufacturing Company

Plans Being Figured. Cost, \$50,000
GRASS VALLEY, Nevada Co., Cal.
Greenwood Park.
Reinforced concrete mausoleum.
Owner — North American Mausoleum Co., Sacramento.
Architect—Jens C. Petersen, 812 26th St., Sacramento.

Marble interior, tile floors, bronze sash and doors and copper set glass.

SACRAMENTO, Cal.—C. J. Hopkinson, 1810 28th St., Sacramento, at \$2262 and \$2958, respectively, awarded contract by city council to erect comfort stations in McKinley and William Curtis Parks.

PITTSBURG, Contra Costa Co., Cal.—City Engineer E. L. O'Hara preparing specifications for approximately 9,400 feet of fencing and three gates at the municipal reservoir site.

Plans Being Prepared. Cost, \$—
AREN'A, Sacramento Co., Cal.
L. St. and Alhambra Blvd.
Ice skating and sports arena.
Owner—Sacramento Ice Hockey Club.
Architect—Starks & Flanders, Forum Bldg., Sacramento.

The structure will contain facilities for ice hockey, boxing, wrestling, swimming and other athletic events. The ice hockey court is planned to have a seating capacity of 6,000, which may be enlarged to accommodate 2,500 more people in bleachers in the upper promenades. When the ice area is covered over for boxing and wrestling matches, a crowd of 10,500 may be seated.

A large natatorium also is to be part of the project. There will be a swimming pool, 60x150 ft. in size, for adults and another pool, 60x40 ft. in area, for children. The children also will be provided outdoor gardens with sandy beaches.

OAKLAND, Cal.—San Leandro Rock Co., San Leandro, at 90c cu. yd. awarded contract by City Port Commission to furnish and deliver Municipal Airport 5000 cu. yds. quarry waste from second grade rock. 1st report July 16

PITTSBURG, Contra Costa Co., Cal.—Bids will be asked at once by city council to construct three tennis courts with asphalt type of pavement. Total estimated cost \$5200. Plans prepared by City Manager George Oliver.

Contract Awarded. Cost, \$50,000
GRASS VALLEY, Nevada Co., Cal.
Greenwood Park.
Reinforced concrete mausoleum.
Owner — North American Mausoleum Co., Sacramento.
Architect—Jens C. Petersen, 812 26th St., Sacramento.
Contractor—McGillivray Constr. Co., Folsom Blvd. and 66th St., Sacramento.
Marble interior, tile floors, bronze sash and doors and copper set glass.

SAN FRANCISCO — H. R. Love, 4354 26th St., at \$1,819 awarded contract by Board of Public Works to construct safety beacon at Castro, 17th and Market Streets.

MARICOPA, Kern Co., Calif.—Until August 9, 12 noon, bids will be received by C. B. Warner, clerk, Maricopa High School Dist., to construct 3,000 ft., more or less, picket fence to eight or nine gauge wire fencing. Specifications obtainable from principal at high school.

MARICOPA, Kern Co., Calif.—Until August 9, 12 noon, bids will be received by C. B. Warner, clerk, Paeto School District, to construct 3,000 ft., more or less, picket fence to eight or nine gauge wire fencing. Specifications obtainable from office of principal at school.

MISCELLANEOUS SUPPLIES AND MATERIALS

SAN FRANCISCO—Until August 11, 3 P. M., under Proposal No. 612, bids will be received by Leonard S. Leavy, city purchasing agent, 270 City Hall, to furnish and deliver linseed oil, shellac, turpentine, lead, litharge, mineral brown and putty, as may be ordered from time to time during the tri-annual term commencing Sept. 1 and ending Dec. 31, 1930. Specifications obtainable from above office.

UKIAH, Mendocino Co., Cal.—Until July 30, 7:30 P. M., bids will be received by F. C. Handy, city clerk, to furnish and deliver:

400 lbs. No. 4-0 WP D B soft drawn, stranded copper wire;
1500 lbs. No. 3-0 WP DB medium, hard drawn bare, stranded copper wire;

2000 lbs. No. 2, 500 lbs. No. 6 and 1500 lbs. No. 4 WP DB soft drawn solid copper wire.

Certified check 10% payable to City Council required with bid. Further information obtainable from city clerk.

ROSEBURG, Ore.—State Highway Commission is making surveys for 1300 ft. tunnel under Hancock Mountain, east of Elkton on the Umpqua Highway; estimated cost \$130,000. Roy A. Klein is state highway engineer.

BUSINESS OPPORTUNITIES

SAN FRANCISCO—Names and addresses of the individuals or firms concerned in these opportunities will be furnished on request to the Business Opportunity Department of Daily Pacific Builder, 545-547 Mission Street. Phone GARfield 8744.

20298—Representation. San Francisco, Calif. Party located in Poland is desirous of representing local firms there.

20300—Springs, Chains, Wires. San Francisco, Calif. Czechoslovakian manufacturer of wires, springs, bed-springs, furniture springs, and chains desires a local representative.

20314—Machinery, Bread Making and Bottling. Papeete, Tahiti. Partners who are planning to establish a bakery are desirous of communicating with manufacturers or exporters of bread making machinery, also bottling machinery (for soda pop).

20315—Slate. Genoa, Italy. Manufacturers of slate for roofing, billiard tables, blackboards, etc., are desirous of forming connections with importers of these commodities in San Francisco. Further information available locally.

20316—Marble. San Francisco, Calif. Shippers of white and colored granulated marble produced in northern Italy, desire to communicate with interested firms in San Francisco. Price list and samples are available.

20318 — Statues. San Francisco, Calif. French manufacturers of statues desire to enter into relations with firms in San Francisco interested in the importation of these articles.

20319—Representation. San Francisco, California. Party with several years' experience in South American countries, who speaks several languages, is seeking the representation of a local firm for South America, especially interested in Argentina and Chile. His specialty is agricultural machinery, also automobiles. Local references.

Panyard Piston Ring Co., (J. J. Biggs, sales manager), Muskegon, Mich., is anxious to secure an agency in this city. Communicate with Mr. Biggs direct.

Louis Denhof, Biltmore Hotel, 735 Taylor St., San Francisco, is interested in acting as exclusive sales representative in the Pacific Coast territory for manufacturers located in the East, selling to the wholesale trade only.

SPRINKLER ORDINANCE BEFORE SACRAMENTO CITY COUNCIL

An ordinance proposing installation of meters for roof sprinkler systems of more than ten sprinkler heads are used, has been submitted to the Sacramento city council by Jas. S. Dean, city manager.

In addition to requiring the installation of meters, the sprinkler ordinance would require a permit before such sprinkling systems could be installed. Dean stated this would enable the city inspectors to keep a closer check on roof sprinklers. At present there are 102 such systems in the city and the only means the water inspectors have of learning of new installations is by observation. The proposed ordinance provides for a flat rate of so much per sprinkler head where less than ten heads are installed.

Engineering News Section

BRIDGES

* **HUMBOLDT COUNTY, Cal.**—Until August 13, 2 P. M., bids will be received by State Highway Commission to construct overhead crossing over tracks of the Northwestern Pacific Railroad about 2½ miles north of Beatrice, consisting of two 61 ft. 7 inch through plate girder spans, one 49 ft. steel beam span and approximately 450 feet of timber trestle approach.

See call for bids under official proposal section in this issue.

SAN JOSE, Santa Clara Co., Cal.—San Jose Iron Works, 535 West San Carlos St., awarded contract to furnish miscellaneous iron work in connection with the Hellyer Avenue bridge, the general contract for which was awarded by the county supervisors to Collins & Martin, San Jose, at \$9794. Will be wooden Pratt truss bridge.

OAKLAND, Cal.—Herrick Iron Works, 18th and Campbell Sts., Oakland, at \$2464 awarded contract by East Bay Municipal Utility District, to construct bridge over upper San Leandro Creek.

SACRAMENTO, Cal.—Until July 29, 10 A. M., bids will be received by H. W. Hall, county clerk, to construct timber structure over Laguna Creek, known as Hagle Bridge. Certified check 10% payable to Chairman of Board of Supervisors required. Plans obtainable from County Engineer Chas. Deterding.

TRINITY COUNTY, Calif.—Whipple Engineering Co., Monrovia, at \$3,000 awarded contract by State Highway Commission to construct bridge across Trinity River near Douglas City, consisting of two 125-ft. steel deck truss spans with concrete deck, four 56-ft. reinforced concrete girder spans and two 30-ft. reinforced concrete girder spans.

RIVERSIDE, Riverside Co., Calif.—Until 10 A. M., July 28, bids will be received by the county to construct a bridge over San Jacinto River, known as the Soboba—San Jacinto bridge, involving the following approximate quantities:

Steel Bridge—Structural steel, 197,730 lbs.; reinf. steel, 35,870 lbs.; class A concrete, 272 cu. yds.; embankment approaches, 13,400 cu. yds.; surfacing, 1690 cu. yds.

Alternate Plan, Creosoted Pile Bridge—Douglas fir creosoted piles, 2220 lin. feet, Douglas fir selected common stringers, 35,640 ft. B. M.; Douglas fir selected common struc., 33,593 ft. B. M.; select all-heart situ. redwood, 6108 ft. B. M.; embankment approaches, 13,400 cu. yds.; surfacing, 1690 cu. yds.

A. C. Fulmer, county surveyor. Deposit of \$5 for plans. Certified check 5%. J. F. Reimer, deputy clerk of the board.

OAKLAND, Cal.—Robt B. McNair, 834 Mead St., Oakland, awarded contract by city council to improve certain culvert right-of-way, involving 27-in. reinf. conc. pipe culvert, \$3.60 ft.; 33-in. reinf. conc. pipe culvert,

\$4.95 ft.; conc. taper section, 5 ft. long, \$49.50 ea; manholes, \$39.50 ea.

LYON COUNTY, Nev.—Until Aug. 6, 2:30 P. M., bids will be received by State Highway Commission, Carson City, to construct reinforced concrete bridge, including approaches, over East Walker River at a point 7½ miles south of Yerington. Plans obtainable from S. C. Durkee, state highway engineer, Carson City, on deposit of \$15, of which \$10 is returnable. Plans on file in office of U. S. Bureau of Public Roads, 461 Market St., San Francisco. Certified check 5% required with bid.

EL DORADO COUNTY, Cal.—Ralph Hunter, 3408 Brockway St., Sacramento, at \$25,106 awarded contract by State Highway Commission to construct reinf. concrete girder bridge across South Fork of American River at Riverton, composed of one 60-foot span and two 54-foot spans on concrete piers and bents, and grading and surfacing approaches with untreated crushed gravel or stone.

NAPA, Napa Co., Cal.—Until August 12, 10 A. M., bids will be received by James A. Daly, county clerk, to construct arch extension to highway bridge near Myrtledale Hot Springs. Certified check 10% payable to Chairman of Bd of Suprs. required with bid. Specifications on file in office of clerk.

REDWOOD CITY, San Mateo Co., Cal.—Bids will be asked at once by city council, to be opened about August 11, to construct six bridges in various section of the city; estimated cost \$15,000. Bonds were recently voted to finance this work. C. L. Dimmitt is city engineer. Quantities of materials will be published shortly.

LOS ANGELES, Cal.—Robert E. McKee, Central Bldg., Los Angeles, at \$181,885 awarded contract by Board of Public Works to construct Sixth street reinforced concrete viaduct at track of the A. T. and S. F. Railway.

SAN LUIS OBISPO, San Luis Obispo Co., Cal.—Until August 11, bids will be received by city council for the following bridge improvements:

French street bridge over San Luis Obispo Creek, involving removal of old bridge and replacing with two 30-ft. spans with roadway, 27-ft. wide; regrading approaches; estimated cost, \$6500.

Santa Rosa street bridge, 22-ft. roadway; estimated cost, \$9000.

Rebuild and widen Chorro street bridge; estimated cost, \$4000.

Plans on file in office of clerk, Warren Burch, engineer, San Luis Obispo.

DREDGING, HARBOR WORKS & EXCAVATIONS

SACRAMENTO, Cal.—State Reclamation Board is considering recommendations to appropriate 390,000 to finance levee construction and flood control work in the Sacramento Valley. Four levees in the Yolo By-Pass at a cost of \$142,000 and one on the Feather River, costing \$88,000 are considered.

SAN FRANCISCO—Until August 11, 11 A. M., bids will be received by F. T. Letchfield, secretary, Islais Creek Reclamation District, 375 City Hall, to construct rock bulkhead wall in trench at Islais Creek Channel, involving:

(1) 325,000 cubic yards of material to be dredged and disposed of;

(2) 475,000 tons of rock fill to be furnished, transported and placed.

The work is located along the north side of Islais Creek Channel west of Third St. and along the east side of the Southern Pacific Company's trestle.

Certified check 10% required with bid. Plans obtainable from M. H. Levy, engineer for district, 375 City Hall.

See call for bids under official proposal section in this issue.

BAY POINT, Contra Costa Co., Cal.—Peter Bellomo, Bay Point, is taking bids to dredge canal on his property near Suisun Bay on which he proposed to establish a yacht harbor. The canal is to be dredged to a width of 100 ft. and a minimum depth of 7 ft. It will be about 1650 ft. in length.

SANTA BARBARA, Cal.—County Supervisor C. L. Preisker has announced that Major G. E. Verrill, resident engineer for the breakwater project, has prepared plans and estimates for a seawall to be built along the ocean front for the protection of the east boulevard. The proposed wall would be built of rocks and sheet piling. The estimate is \$80,000.

IRRIGATION PROJECTS

TURLOCK, Stanislaus Co., Calif.—Until Sept. 2, 2 P. M., bids will be received by Anna M. Sorensen, secretary, Turlock Irrigation District, for approximately 958,000 sq. ft. 2-in. concrete lining in various canals throughout the district. Specifications on file in office of secretary and obtainable from R. V. Meikle, chief engineer for the district.

STREET LIGHTING SYSTEMS

SANTA BARBARA, Cal.—City Engineer E. B. Brown estimates cost of ornamental electrolier system in connection with Milpas St. widening at \$36,000.

RICHMOND, Contra Costa Co., Cal.—City council declares intention (483) to install ornamental street lighting system in Tenth St. bet. Ripley Ave. and Cutting Blvd., involving 48 Richmond standards, 2-light, Design No. 1800, together with underground system. 1911 Act. Hearing Aug. 4. A. C. Faris, city clerk. E. A. Hoffman, city engineer.

OAKLAND, Cal.—City council declares intention to install ornamental street lighting system in 38th Ave. bet. Allendale Ave. and Liese Ave., involving 21 single-light standards together with underground system. 1911 Act. Hearing Aug. 7. Frank C. Merritt, city clerk. Walter Frickstad, city engineer.

REIWOOD CITY, San Mateo Co., Cal.—City Engineer C. L. Dimmitt is preparing specifications for ornamental street lighting system in Main St. from railroad tracks to El Camino Real, property owners having petitioned for the work.

MACHINERY AND EQUIPMENT

ALAMEDA, Alameda Co., Cal.—Until August 5, 8 P. M., bids will be received by Wm. G. Paden, Secretary, Board of Education, Room 9, City Hall, to furnish and deliver one radial drill. Certified check 10% payable to Alameda Board of Education required with bid. Further information obtainable from secretary.

EL CENTRO, Cal.—Until 2 P. M., August 4, bids will be received by the Imperial County Supervisors for one gasoline shovel, capacity $\frac{3}{4}$ to $1\frac{1}{2}$ yds., caterpillar type tractor for use of Road District No. 2. C. C. Mousseau, clerk of the board.

MADERA, Madera Co., Cal.—Until August 2, 8 P. M., bids will be received by Geo. H. Clark, Clerk, Howard School District, to furnish and deliver one new Chevrolet one and one-half-ton truck chassis equipped with extension frame and overload springs. Number 940, type 90, Wayne Bus, signals front and rear, driver controlled, rear bumper, dome lights, running lights (left side only), 32x6 H. D. tires on rear and 32x6 truck type on the front, all tires to be furnished with 32x6 puncture proof tubes. Certified check 10% required with bid. Further information obtainable from clerk, Route 3, Box 30, Madera.

PORTERVILLE, Tuare Co., Calif.—Lauren Motor Body Co., Fresno, awarded contract by Porterville Union High School District, to furnish motor school bus; 36-passenger capacity.

LAKEPORT, Lake Co., Cal.—Until August 7, 2 P. M., bids will be received by Mrs. Winifred Payne, Clerk, Clear Lake Union High School District, to furnish and deliver truck chassis of the following or equal specifications: Not less than 2-ton chassis; bus type motor, full pressure type lubrication system; double drop bus type frame; underslung bus type springs; four-wheel brakes; dual rear wheels and tires; wheelbase of sufficient length to accommodate present school bus body, known as Bus No. 1. Bids shall also specify amount which will be allowed as trade in value of old Motor Chassis. Estimate No. 19042, now in use by said School District and known as Bus No. 1. Further information obtainable from clerk.

BOONVILLE, Mendocino Co., Cal.—Until August 2, 8 P. M., bids will be received by Martha W. Rawles, Clerk, Anderson Valley Union High School District, to furnish and deliver two school busses, each having capacity of 30 pupils. Specifications obtainable from clerk.

COVINA, Los Angeles Co., Calif.—Until 7:30 P. M., August 4, bids will be received by the Covina Union High School District for furnishing one new special chassis, model 122, as manufactured by the Studebaker Corp. with a body built according to specifications of the school. Thos. B. Reed, clerk.

FULLETON, Orange Co., Calif.—Until 7:30 P. M., August 5, bids will be received by the city council for one motor truck chassis, including closed cab and dual wheels, of $1\frac{1}{2}$ -ton capacity. Spec. to be furnished by the bidder; one Ford pick-up, 1930 model, specification to be furnished by bidder. Certified check, 5%. F. C. Hiez-malhach, city clerk.

FULLETON, Orange Co., Calif.—Until 7:30 P. M., August 5, bids will be received by the city council for furnishing one 6 to 7 ton, 3-wheel roller, equipped with pressure spray on all wheels. Allowance must be made on one 12-ton Austin-Western road roller. Certified check 5%. F. C. Hiez-malhach, city clerk.

NAPA, Napa Co., Cal.—County Supervisors authorize purchase of a one-ton International motor truck for county road department.

RAILROADS

OAKLAND, Cal.—Worden & Forsythe, 264 Sybil Ave., San Leandro, at (a) \$2750 and (b) \$145 awarded contract by City Port Commission to track laying on Ninth Avenue Pier.

REDDING, Shasta Co., Cal.—Major A. E. McDennett and fifteen army engineers are at the site of the proposed \$80,000,000 Kennett dam on the upper Sacramento River, to start a survey for the Southern Pacific Railway line as it will be re-located to allow for the new dam reservoir. The proposed dam is to be 520 ft. in height. The first work will be to re-route the railway from the crest of the dam midway bet. Kennett and Coram toward Redding on the grade to the road as now located.

FIRE EQUIPMENT

EUREKA, Humboldt Co., Cal.—City council takes under advisement bids to furnish 1000 ft. of fire hose. Bidders were: H. L. Anderson for Eureka Fire Hose Co.; E. J. Biord for American Rubber Mfg. Co., and H. H. Buhne Co.

RESERVOIRS AND DAMS

LAKEPORT, Lake Co., Cal.—M. J. Russell, Lakeport, at 42 cents per yard awarded contract by city trustees to excavate for new reservoir. Excavation is to be seventy-one ft. and eight in. in dia. and twelve ft. eight in. deep, measuring from top of wall of old reservoir. Walls of excavation are to be perpendicular and hand faced; bottom to be sloped three in. to the north and hand faced for the concrete floor of reservoir. All earth removed is to be carried at least ten ft. from edge of excavation. Oakland Construction Co., 755 60th St., Oakland, only other bidder at \$119 yd.

VENTURA, Ventura Co., Calif.—V. Freeman, chief engineer of the Santa Clara River Const. District, has announced that the district has decided to build a storage dam to be built at French Flats in Piru Creek gorge. The proposed dam will be 150 ft. in height and 800 ft. in length.

AMADOR COUNTY, Cal.—Pacific Gas & Electric Co., 245 Market St., San Francisco, has filed application with the State Department of Public Works, Division of Water Resources, seeking authorization to use of the waters of the Tiger Creek and the East and West Forks of the Panther

Creek Amador County, for power purposes.

In the Tiger Creek application the company proposes to build a concrete diversion dam 105 feet high and 470 feet across the top.

The application for appropriating the Panther Creek waters calls for the use of 140 cubic feet per second, the use of 140 cubic per second, half from a dam on each fork. The water, from all the projects, would be used at the Tiger Creek, West Point and Electra Power Plants, and would be returned to the Mokelumne River, of which the above named creeks are the tributaries.

The construction would start six months after the approval and the project will be ready for use in four years.

IONE, Amador Co., Cal.—Following bids received July 22 by State Department of Public Works, Division of Architecture, to construct reinforced concrete dam for Preston School of Industry near Ione; dam will measure 192 ft. at the crest and approximately 600 cu. yds. of reinforced concrete: Geo. French Jr., Cherokee Lane, Stockton, \$14,300; S. P. Adams, 950 Evelyn St., Oakland, \$16,155; A. Fredrick Anderson, 1093 Longridge Road, Oakland, \$16,438; Dyer Constr. Co., Ray Bldg., Oakland, \$18,000; M. R. Peterson, 4530 Parker Ave., Sacramento, \$21,320; Utah Construction Co., Phelan Bldg., San Francisco, \$21,475; J. H. Bodenhamer, 4533 T St., Sacramento, \$23,807; Ward Engineering Co., 315 Montgomery St., San Francisco, \$26,200; Clinton-Stephenson Construction Co., Monadnock Bldg., San Francisco, \$28,151. Bids held under advisement.

OROVILLE, Butte Co., Cal.—County supervisors declare intention for improvements in Road Imp. District No. 1, involving the construction of a causeway, consisting of:

(a) Construction of causeway on a rolled earth fill approximately 30 ft. high and 230 ft. long, containing 8400 cu. yds. of embankment of assorted materials from three different sources: 1, 5000 cu. yds. of selected earth borrow to be placed in the rolled fill portion of the causeway.

2, 1100 cu. yds. of solid rock from the Swayne Logging Railway and the highway cut at the east end of the proposed fill, material to be placed on slopes of fill.

3, 2300 cu. yds. of rock and granular material from the widening of Lake-side Way, materials to be placed on the slopes of fill in a di highway approaches to fill.

(b) Clearing and grubbing timber and brush on site and approaches and moving present highway bridge.

(c) Stripping site of fill to bedrock to required width.

(d) Construction of cut-off trench to width required.

(e) Construction of 18 inches inside diameter reinforced concrete drainage conduit with timber control gate stand and placing control gate from outlet from old dam.

(f) Constructing three tube reinforced concrete syphon drainage culverts.

(g) Constructing highway approach at each end of fill.

(h) Reconstructing Swayne Logging Railroad (narrow gauge). Taking up and relaying 1400 ft. of main line track and 90 ft. of siding track. Moving and resetting water tank and camp buildings, tent floors and grading new camp sites.

(i) Regrading road connecting with Lakeside Way.

(j) Furnishing all material and labor, hauling, mixing, placing, laying out, assembling of materials, and all

construction work either temporary or permanent in connection with the work and delivering the entire work complete and ready for use.

(k) Constructing and maintaining a suitable detour of the present county road during construction of causeway. Work under County Improvement Act of 1921. Hearing August 5, C. F. Belding, county clerk. J. A. Baumgartner, county road engineer.

PIPE LINES, WELLS, ETC.

SAN FRANCISCO.—Until August 13 2:30 P. M., bids will be received by Board of Public Works to install Pleasanton Wells System, involving the drilling of a gravel envelope well; single well, 200-ft. in depth, involving: (1) 250 lin. ft. sinking test bore; (2) 60 lin. ft. 30-in. conductor pipe; (3) 250 lin. ft. reaming bore and furnishing and installing 14-inch casing with gravel envelope;

(4) 1 test pump and appurtenances; (5) 24 hours operating test pump. Estimated cost \$4050. Bond of \$2025 required of successful bidder. Specifications obtainable from Bureau of Engineering, 3rd floor, City Hall.

SEWERS AND SEWAGE DISPOSAL PLANTS

MONTREY. Monterey Co., Cal.—City Council has started proceedings for sewers in Grace St., bet. Prescott and Irving St.

RICHMOND. Contra Costa Co., Cal.—Jasper-Stacy Co., 216 Pine St., San Francisco, at \$139,946 awarded contract by city council (479) to construct combined storm and sanitary sewers in Dock Ave., bet. 10th St. and east termination of Dock Ave., etc., involving salt glazed vitrified clay pipe; centrifugally cast reinforced concrete pipe; cast iron pipe; salt glazed vitrified clay sewer pipe in timber cradle on piles; in concrete pipe jackets on piles; centrifugally cast reinforced concrete pipe in reinforced concrete cradle on piles; manholes; overflow structures; storm water inlets, etc. O. U. Miracle, San Diego, at \$99,209 submitted low bid for this project, but was permitted to withdraw his bid claiming error.

OAKLAND. Cal.—Gladding, McLean Co., 660 Market St., San Francisco, at approximately \$4000 awarded contract by city council to furnish and deliver sewer pipe for remainder of current fiscal year.

SAN MATEO. San Mateo Co., Cal.—City Clerk E. W. Foster will ask bids at once to construct extension to 35-in. sewer from Delaware to Humboldt St., as part of the Poplar Ave. outfall system.

LOS ANGELES. Cal.—Chas. H. Johnston, 947 North Orange Dr., Los Angeles, at \$334,136 awarded contract by Board of Public Works to construct sewers and storm drains in the Jefferson Storm Drain System, Section No. 3, including pave, curbs, gutters, etc.

WATER WORKS

LOS ANGELES. Cal.—Until 10 A. M. July 30, bids will be received by Los Angeles harbor department, City Hall, to furnish pumping equipment, motors, etc., for Fish Harbor salt water supply line under Spec. No. 865. The work includes furnishing, delivering and installing three 5000 G. P. M. salt water pumps, one 250-gallon centrifugal pump, motors and incidental equip-

ment and work. Information obtainable from harbor engineer, San Pedro Bart Edwards, general manager.

CLOVERDALE. Sonoma Co., Cal.—Until August 5, 8 P. M., bids will be received by N. S. Cobb, city clerk, to furnish pipe, hydrants, valves, services and appliances for extension to municipal water supply system and for labor necessary for installation. Plans on file in office of city clerk.

CHINO. San Bernardino Co., Cal.—Until 7:30 P. M., August 19, bids will be received by city clerk, M. L. Birnie, for furnishing a new turbine pump for well No. 1, City of Chino Municipal Water System. The pump is to be sunk to a depth of 230 ft. in a 16-inch hole. Spec. call for the delivery of 700 gallons per minute.

LOS ANGELES. Cal.—Proposal to vote a bond issue of from \$200,000,000 to \$250,000,000 for the Metropolitan Water District's aqueduct from Los Angeles Boulder Canyon Dam to Los Angeles and allied districts, may be placed on the November ballot if estimates can be prepared in the meantime. Selection of a route will be made in August.

SAN FRANCISCO.—Following bids received by Leonard S. Leavy, city purchasing agent, to furnish and deliver cast iron pipe, tar coated:

(a) 25,000 ft. 6-inch;
(b) 25,000 ft. 8-inch.

(1) Pacific States Cast Iron Pipe Co.
(2) U. S. Pipe and Foundry Co.
(3) Central Foundry Co.
(4) American Cast Iron Pipe Co.

(a) .5676 (1) .526 (2) .525 (3)
(b) no bid .744 .743 .74
American C. I. Pipe Co. submitted alternate bid of (a) \$.5783 and (b) \$.816 for cement lined pipe.

LOS ANGELES. Cal.—Until 3 P. M. July 22, bids will be received by the water and power commission for seamless steel tubing and couplings. Adv. 1377, involving:

(1) 1900 ft. 12-in. inside dia.;
(2) 1100 ft. 12-in.;
(3) 60 couplings.

SAN FRANCISCO.—Following bids received by City Purchasing Agent Leonard S. Leavy, under Proposal No. 614 to furnish and deliver f.o.b. Sharp Park, Salada Beach, San Mateo Co., centrifugally cast-iron bell and spigot pipe in 12-16- or 18-ft. lengths, together with fittings. Bidders and bids were:

(1) U. S. Cast Iron Pipe and Foundry Co. Monadnock Bldg., San Francisco (delivery 55 days).
(2) National Cast Iron Pipe Co., 671 Mission St., San Francisco (60 days).
(3) American Cast Iron Pipe Co., Balboa Bldg., San Francisco (50 days).

SAN FRANCISCO.—Twenty-one bids were received by City Purchasing Agent Leonard S. Leavy, under Proposal No. 613, to furnish standard wrought steel pipe, galvanized, with threads and couplings, random lengths; delivery f.o.b. Salada Beach, San Mateo County. All bids were identical, as follows:

13,530-ft. 2 -in.	19.08
13,280-ft. 1½-in.	14.18
525-ft. 4 -in.	59.32
1,805-ft. 3 -in.	39.45
7,810-ft. 2½-in.	30.17

Bidders were: P. E. O'Hair & Co.; Petroleum Equip. Co.; Steam and Plumbing Service Co.; Grinnell Co. of the Pacific; M. Stulsaft; Daziel-Moller Co.; General Machinery & Supply Co.; Claussen & Co.; Dunham, Carrigan & Hayden Co.; Pacific Plumbing and Heating Co.; Marshall-Newell Co. Baker-Hamilton & Pacific; R. W. Gladings Supply Co.; Crane Co.; Richmond Sanitary Co.; Pacific Pipe Co.; Walworth Co.; Tay-Holbrook, Inc.; The Turner Co.; Federal Pipe and Supply Co.; Olsen and Hefferman.

EUREKA. Humboldt Co., Cal.—American Cast Iron Pipe Co., Balboa Bldg., San Francisco, awarded contract by City Council to furnish and deliver cast iron pipe:

5,000 ft. 8-in. \$4185
2,000 ft. 6-in. 1152
3,000 ft. 4-in. 1164

Bids are f. o. b. dock, Eureka. Other bidders were: United States Pipe & Foundry Co., Pacific States Cast Iron Pipe Co., and Grinnell Co.

ANTIOCH. Contra Costa Co., Cal.—City Council orders installation of 10-inch water mains in B St., between 6th and 10th Sts. Estimated cost \$2100. E. L. O'Hara, city engineer.

EL CAJON. San Diego Co., Calif.—Southern California Water Supply Co. (F. M. Faude, vice-president), room 1010 Bank of Italy Bldg., San Francisco, has filed application with the state for the appropriation of 18.6 cu. ft. per second water from Sweetwater river in San Diego county and 400,000 acre feet per annum storage for irrigation and domestic use near El Cajon, San Diego county. Work involves the installation of the following works:

Storage Dam—To be concrete construction, 204 ft. high, 800 ft. long on top with capacity of 35,000 ac. ft.

Pipe Lines—Involving the construction of the following to be welded steel or concrete:

35,000 lin. ft. 18-in. pipe line;
59,400 lin. ft. 25-in. pipe line.

The above work is to start 12 months after permit is granted and the work will take approx. 2 years to complete.

Approximately 500 acres of land are to be irrigated and the water is also to be used for domestic purposes for National City, Chula Vista, Coronado and unincorporated areas in the vicinity.

Plans and specifications are being prepared by Loveland Engineers, Inc., 485 California St., San Francisco.

PLAYGROUNDS & PARKS

PITTSBURG. Contra Costa Co., Cal.—Bids will be asked at once by city council to construct three tennis courts with asphalt type of pavement. Total estimated cost \$5200. Plans prepared by City Manager George Oliver.

STREETS AND HIGHWAYS

MARYSVILLE, Yuba Co., Cal.—Jemstreet & Bell, Marysville, at \$2.25 cu yd. awarded contract by county supervisors to furnish and spread crushed rock on north 6/10 miles of Willow Glen road, involving \$800 cubic yards. Mountfort & Armstrong, Sacramento, only other bidder at \$3.20 cu. yd.

LYON COUNTY, Nev.—Until Aug. 6, 2 P. M., bids will be received by State Highway Commission, Carson City, to grade, construct structures and place surfacing material on 23.22 miles between 3-miles north of Wells and Thousand Springs Creek. Plans obtainable from S. C. Durkee, state highway engineer at Carson City on deposit of \$15, of which \$10 is returnable. Plans on file in office of U. S. Bureau of Public Roads, 461 Market St., San Francisco. Certified check 5% required with bid.

KERN COUNTY, Cal.—A. Telchert & Son, 1846 37th St., Sacramento, at \$141,335 awarded contract by State Highway Commission to surface with oil treated crushed gravel or stone about 13.9 miles in length, between 1½ miles east of Cottonwood Creek and Democrat Springs.

OAKLAND, Cal.—City Council declares intention to improve portions of Hermosa Ave. and Broadway Terrace, involving grading; cement sidewalks, curbs, gutters; conduits; storm water inlets; sewers with manholes, etc.; wooden culvert. St. Imp. Act 1913. Hearing August 28. Frank C. Merritt, city clerk. Walter N. Frickstead, city engineer.

SAN FRANCISCO—C. L. Harney, Call Bldg., at \$1,501 awarded contract by Board of Public Works to grade portions of 44th Ave. bet. Ortega and Rivera Sts., and bet. Vicente and Sloat Blvd., Sunset Well System, involving 7500 cu. yds. excavation (3700 cu. yds. bet. Ortega and Rivera Sts and 4200 cu. yds. bet. Vicente St. and Sloat Blvd.)

SANTA BARBARA, Cal.—Until 10 A. M., August 14, bids will be received by the county for grading and construction of drainage of Section 1 Goleta Foothill Blvd., between Sta. 0+400 and Sta. 45+00. The engineer's estimate is \$17,000. Plans obtainable from the county surveyor, Owen H. O'Neill. D. F. Hunt, county clerk.

SAN LUIS OBISPO COUNTY, Cal.—Following bids received July 23 by State Highway Commission to grade and pave with cement concrete 3.0 miles between San Luis Obispo and foot of the Cuesta Grade:
Cornwall Constr. Co., 219 E. Mason St., Santa Barbara, \$30,829
Watson & Sutton, San Diego, 134,973
McCray Co., Los Angeles, 135,710
J. F. Knapp, Oakland, 140,660
W. A. Dontanville, Salinas, 142,556
T. M. Morgan Paving Co., L. A., 145,004
M. J. Bevanda, Stockton, 149,829
Ariss-Knapp Co., Oakland, 154,675
I. L. Ryder, San Jose, 174,292

REDWOOD CITY, San Mateo Co., Cal.—W. A. Dontanville, Salinas, submitted only bid at \$4336 to city council (M-8) to improve Chestnut St., between Heller and Stambaugh Sts., involving grading; 6-inch hydraulic cement concrete surface pavement; 3-inch broken stone base and 1-inch sand cushion; cement concrete curbs, gutters, sidewalks. Bond Act 1915. Imp. Act 1911. Taken under advisement.

MARIN COUNTY, Cal.—Following bids received July 23 by State Highway Commission to grade and surface with bituminous macadam, 1.3 miles between Belvedere Crossing and Tiburon:
Granfield, Farrar & Carlin, San Francisco, \$54,415
Sibley Grading & Teaming Co., San Francisco, 57,914
E. C. Coates, Sacramento, 58,735
Fredrickson & Watson & Fredrickson Bros., Oakland, 59,075
H. W. Rohl Co., Los Angeles, 65,487
Ariss-Knapp Co., Oakland, 70,799
J. P. Holland, San Francisco, 80,486
C. Emil Force, Piedmont, 88,245

TRACY, San Joaquin Co., Cal.—Steps are being taken to create a joint highway district for the proposed West Side Highway to extend from Tracy to Ventura County through the west section of the San Joaquin Valley. Lawrence Grady, secretary-manager of the Tracy Chamber of Commerce, is a member of the organization committee.

SAN MATEO, San Mateo Co., Cal.—Mike J. Sisevich, 1616 B St., San Mateo, at \$2257.50 awarded contract by city council to widen San Mateo Drive, between Second Ave. and Baldwin Ave. A. G. Raisch, San Francisco, only other bidder at \$2655.

GILROY, Santa Clara Co., Cal.—Hanrahan Co., Standard Oil Bldg., San Francisco, at \$54,958 submitted low bid to city council to improve portions of Hanna St., First St., Sixth St., Alexander St., etc., involving grading; asphalt concrete pavement; cement concrete curbs, gutters and walks; storm water sewer. 1911 Act. Bond Act 1915. Complete list of bids, taken under advisement until July 25, follows:
Hanrahan Co., San Francisco, \$54,958
Union Paving Co., S. F., 56,465
P. S. Harless, San Rafael, 58,131
California Rd. and St. Imp. Co., Fresno, 59,238
Central-California Roads Co., Oakland, 64,384
Ray Fisher is city engineer.

SOUTH SAN FRANCISCO, San Mateo Co., Cal.—Until August 18, bids will be received by D. McSweeney, city clerk, (71) to improve Linden Ave., between Railroad Ave. and Southern Pacific Company's Bay Shore Line involving grading; hydraulic cement concrete sidewalks, gutters, curbs; pavement consisting of 3-inch asphaltic concrete base; 6-in. waterbound rock macadam sub-base on cushion and 2-inch asphaltic concrete wearing surface; two steel reinforced hydraulic concrete bridges; inforced hydraulic concrete bridge; concrete box culvert; vitrified salt-glazed ironstone pipe sanitary sewer; brick manholes, catchbasins, electrolators, cement concrete wall. Estimated cost \$100,000. Improvement Act 1911. Bond Act 1915. Certified check 10% payable to city required with bid. Plans on file in office of clerk Geo. A. Kneese, engineer, Courthouse, Redwood City.

SAN MATEO, San Mateo Co., Cal.—Hanrahan Co., Standard Oil Bldg., San Francisco, at \$37,625.40 awarded contract by city council to improve 23rd and 24th Aves., Flores St., Florin and Isabelle Aves., involving grading; hydraulic concrete cement curbs, gutters, sidewalks; asphaltic concrete pavement; hydraulic cement concrete pipe storm water sewers; catchbasins; street relinf. box culvert; ornamental street lighting system. Bond Act

1915 Imp. Act 1911. Complete list of bids follows:
Hanrahan Co., San Francisco, \$37,625
Union Paving Co., S. F., 37,715
A. G. Raisch, S. F., 47,634

NAPA, Napa Co., Cal.—Until August 12, 10 A. M., bids will be received by James A. Daly, county clerk, for grading and surfacing road through Berryessa Valley. Certified check 10% payable to Chairman of the Board of Supervisors required with bid. Specifications on file in office of county clerk.

SAN JOAQUIN CO., Cal.—Clark & Henery Const. Co., Chancery Bldg., San Francisco, at \$57,147 awarded contract by State Highway Commission to grade and pave with asphalt concrete, 1.4 miles bet. Forest Lake and north boundary.

RIVERSIDE COUNTY, Cal.—Pearson and Dickerson, Riverside, at \$33,032.50 submitted low bid to U. S. Bureau of Public Roads, San Francisco, for oil processing 15.5 miles of Idyllwild National Forest Highway, Route 72 in San Bernardino National Forest, involving:

- (a) 15.5 miles prepare roadway;
 - (b) 365,000 gals. asphalt. oil (furnish and apply);
 - (c) 15.5 miles road mixing and compacting oil treated surface;
 - (d) 198 right of way monuments.
- Unit price bid follows:
(1) Pearson & Dickerson, Riverside, \$33,032.50.
(2) Street Imp. Co., Los Angeles, \$35,404.
(3) Engineer's Estimate, \$39,643.

	(a)	(b)	(c)	(d)
(1)	\$225	.057	\$500	\$5.00
(2)	225	.0513	800	4.00
(3)	300	.06	800	3.50

PLACER COUNTY, Calif.—As per SAN DIEGO COUNTY, Cal.—As previously reported, bids will be received August 13 by State Highway Commission to furnish and apply heavy fuel oil to roadbed on 8.4 miles between La Posta and Tecate Divide. Project involves 5,640 bbls. heavy fuel oil.

HAYWARD, Alameda Co., Cal.—City council declares intention (\$805) to improve portions of Smalley and Laurel Aves. and Belmar and Princeton Sts., involving:
(1) 165,450 sq. ft. 6-in. full penetration emulsified asphalt macadam paving (including grading);
(2) 10,723 lin. ft. concrete curbing;
(3) 21,202 sq. ft. concrete gutter;
(4) 42,850 sq. ft. concrete sidewalks;
(5) 1,257 lin. ft. 6-in. vitrified sanitary sewer;
(6) 1,350 lin. ft. 4-in. vitrified side sewer;
(7) 36 4x6-in. wye branches;
(8) 4 vit. pipe lampholes with concrete and c. i. frames;
(9) 340 lin. ft. concrete and part circle corr. iron drain culverts
(10) 137 lin. ft. rawwood header boards
1911 Act. Hearing Aug. 6. M. E. Templeton, city clerk. Jesse B. Holly, city engineer.

REDWOOD CITY, San Mateo Co., Cal.—W. A. Dontanville, Salinas, at \$1943 submitted only bid to city council (M-9) to improve Maple Street, bet. Main Street and Dilliers Addition, involving grading; 6-inch hydraulic cement concrete surface pavement; 3-inch broken stone base and 1-inch sand cushion; hydraulic concrete cement curbs; 4-in. hydraulic cement concrete sidewalks; 2 hydraulic cement concrete storm water inlets; cement concrete gutters. Bond Act 1915. Imp. Act 1911. Taken under advisement.

REDDING, Shasta Co., Cal.—County Surveyor Carl F. Mau making surveys for proposed new road from Shingle-ton to Viola.

SACRAMENTO CO., Cal.—Fredrickson & Watson and Fredrickson Bros., 354 Hobart St., Oakland, at \$89,029 awarded contract by State Highway Commission to grade and pave with Portland cement concrete 2.6 miles between one mile south of Arno and Co-sumnes river.

ELY, Nevada—City council has sold the \$40,000 bond issue to finance oiling of various streets. Bids for the oiling will be asked at once.

STOCKTON, San Joaquin Co., Cal.—George J. French Jr., Stockton, at \$33,658 awarded contract by county supervisors to construct Bacon Island road over Upper Jones Tract. Other bids: Louis Moering, Stockton, \$34,755; Pereira & Reed, Stockton, \$34,481. Will be 4 miles long, 16 ft. wide, gravel surfacing.

MILL VALLEY, Marin Co., Cal.—Town trustees reject bids received July 15 to improve Summit Ave., Lovell Ave. and Cornelia St. and various other streets, involving vitrified pipe sewer; hydraulic concrete manholes; lampholes; wye branches and lateral; hydraulic concrete retaining wall; arch culverts; hydraulic conduit inlet. Project involved 210,-

000 sq. ft. asphalt concrete and 40,000 sq. ft. hydraulic concrete pavement. New proceedings will be started at once and plans prepared for hydraulic concrete pavement in the entire district. Work under 1911 Act and Bond Act 1915. A. G. Ralsch, 46 Kearny St., San Francisco, was low bidder at \$88,232. E. H. Lacey is town engineer.

SANTA ROSA, Sonoma Co., Cal.—Clark & Henery Construction Co., Chancery Bldg., San Francisco, bidding 20½ cu. yds. for grading and macadam paving; 85c lin. ft. for combined curb and gutter; 35c ft. for curb, alone; 60c lin. ft. for gutters and 20c sq. ft. for sidewalks, awarded contract by city council to improve:

Nason Street, bet King and Wright Sts., involving grading; 4-in. macadam base; 3-in. asphaltic concrete surface pavement; hyd. cem. concrete curbs, walks and gutters. Construct and furnish material in extending Fourteenth St. to Wright Street.

Construct extension to Fourteenth St. to Wright St.

MARYSVILLE, Yuba Co., Cal.—City council rejects bids to grade 115 acres of Cheim Airport site, lowest bidder being M. J. Treaster of Sacramento at \$57.50 per acre. The work will be done by Hemstreet & Bell of Marysville on the day labor basis.

LOS ANGELES AND ORANGE COUNTIES, Cal.—Until August 13, 2 P. M., bids will be received by State Highway Commission to grade and pave with Portland cement concrete and bituminous macadam, 3.1 miles between Anaheim St. and Seal Beach. See call for bids under official proposal section in this issue.

ORANGE COUNTY, Cal.—Until August 13, 2 P. M., bids will be received by State Highway Commission to grade and pave with Portland cement concrete, 3.3 miles from Seal Beach to Sunset Beach.

See call for bids under official proposal section in this issue.

LOS ANGELES COUNTY, Cal.—Until August 13, 2 P. M., bids will be received by State Highway Commission to construct a reinforced concrete girder bridge over the San Gabriel river near Seal Beach, consisting of seven 57 ft. spans on concrete piers with pile foundations.

See call for bids under official proposal section in this issue.

SAN DIEGO COUNTY, Cal.—Until August 13, 2 P. M., bids will be received by State Highway Commission to furnish and apply heavy fuel oil to roadbed on 8.4 miles between La Posta and Tecate Divide.

See call for bids under official proposal section in this issue.

SANTA BARBARA & SAN LUIS OBISPO COUNTIES, Cal.—Until August 13, 2 P. M., bids will be received by State Highway Commission to grade and surface with oil treated crushed gravel or stone, 37.9 miles between the second crossing of the Cuyama River and the east boundary of San Luis Obispo County.

See call for bids under official proposal section in this issue.

PLACER COUNTY, Cal.—Until August 13, 2 P. M., bids will be received by State Highway Commission to construct 53½ linear feet of tunnel and about 1.0 mile of roadway to be graded and surfaced with crusher run base and oil treated crushed gravel or stone surfacing.

See call for bids under official proposal section in this issue.

PITTSBURG, Contra Costa Co., Cal.—City Council petitioned to improve streets in the Green Addition and the Di Piazza Addition, involving sewers, concrete paving, curbs, gutters and walks. Streets included are all of Grossitto, Monterella and Brennan Aves., 1 block of C St. and 2 blocks in D St. Petitions are in circulation seeking paving of 6th St., bet. J and K; 9th St., bet. A and C and J St., bet. 2nd and 3rd Sts. E. L. O'Hara is city engineer.

MONTEREY, Monterey Co., Cal.—Clark & Henery Construction Co., Chancery Bldg., San Francisco, at 13c sq. ft. awarded contract by city council to improve Harrison St., bet. Clay and High Sts., involving grading; paving with asphalt concrete wearing surface 2 inches in thickness.

MARYSVILLE, Yuba Co., Cal.—Until July 28, 8 P. M., bids will be received by Chester O. Gates, city clerk (37) to improve portions of 12th St., E. St., B St., involving removal of concrete curbs and sprinkler system, remove trees, grading; pave with 2½-in. asphalt concrete base with 1½-in. Warrenite-Bit. surface; concrete curbs, gutters. 1911 Act. Bond Act 1915. Certified check 10% payable to city required with bid. Specifications on file in office of clerk.

TEHAMA CO., Cal.—Nate Lovelace, Sacramento, at \$99,763.50 submitted low bid to U. S. Bureau of Public Roads, San Francisco, to grade Section A, Route 21, Deed Creek National Forest Highway in Lassen National Forest, 3.4 miles in length, involving:

(1) Nate Lovelace, Sacto.....\$ 89,763.50
(2) B. E. Boyd, San Diego.....101,544.50
(3) Chas. Harlowe, Jr., Oakland.....104,994.35

EUREKA, Humboldt Co., Cal.—Chamber of Commerce petitions city council to start proceedings to widen Broadway from Buckspart to Wabash, a width of 100 ft. Taken under advisement.

RIVERSIDE COUNTY, Cal.—Steele Minley, Santa Ana, at \$34,402 awarded contract by State Highway Commission to widen about 6.2 miles of existing roadbed between northerly boundary and one mile west of Beaumont.

ANTIOCH, Contra Costa Co., Cal.—City council petitioned to grade and pave streets in Wills Addition. Concrete paving is specified. Streets included are: Empire Ave. from Wills Ave. to its west end; Brennan Ave. east end and Wills Ave. from Empire from Wills Ave. to its west end; Morterola Ave. from Wills to its east end; Grossotto Ave. from Wills Ave. to its Ave. to Grossotto Ave.

SANTA BARBARA, Cal.—City Engineer E. B. Brown estimates cost of proposed widening of Milpas St. from Canyon Perdido St. to E Cabrillo Blvd. The paving, curbs, gutters, walks and lighting conduits will cost approx. \$62,500, and ornamental lighting standards, \$36,000.

MONO COUNTY, Cal.—L. C. Pulley, 1960 Alamitos St., Long Beach, at \$4,951.50 submitted low bid to F. G. Somner, district engineer, Sta. Highway Commission, to furnish and apply 1,230 barrels of heavy fuel oil as a dust layer on 8.8 miles between Mono Lake and the foot of Conway Grade.

HAYWARD, Alameda Co., Cal.—City council declares intention (\$805) to improve portions of Smalley Ave., Laurel Ave., Belmar and Princeton Sts., involving grading; 6-inch emulsified asphaltic macadam pave.; cement concrete curbs, gutters and walks; cement manholes; and pure iron part circle drain culverts; vit. clay pipe san. sewers; cem. conc. lampholes. 1911 Act. Hearing August 6. M. B. Templeton, city clerk. Jesse B. Holly, city engineer.

OROVILLE, Butte Co., Cal.—Until August 5, 2 P. M., bids will be received by C. F. Belding, county clerk, to grade Lumpkin road, involving 13,800 cubic yards of earthwork, unclassified, being ½-mile in length. Certified check 10% required with bid. Specifications obtainable from J. A. Baumgarner, county road engineer.

KING CITY, Monterey Co., Cal.—Until August 11, 8 P. M., bids will be received by J. A. Wasson, city clerk (6) to improve portions of First St., involving grading; hyd. concrete curbs; 5-in. hyd. cem. conc. pavement. 1911 Act. Bond Act 1915. Certified check 10% payable to city required with bid. Plans on file in office of clerk. Howard Cozens, Court House, Salinas, engineer.

OAKLAND, Cal.—City council declares intention to improve portions of Dowling St. and Hillside St., adjacent to 88th Ave., involving grad; curbs; gutters; walks; culverts; storm water drainage system; sewers with appurtenances. 1911 Act. Hearing Aug. 7. Frank C. Merritt, city clerk. Walter N. Frickstad, city engineer.

MARTINEZ, Contra Costa Co., Cal.—Until August 4, 11 A. M., bids will be received by J. H. Wells, County Clerk, (3) to widen Lowell Ave. from 36th St. to San Pablo Ave., and 36th St., bet. Lowell and Andrade Ave., involving grading; Durite asph. conc. pavement on broken rock cushion; cem. conc. curbs, gutters; vit. ironstone sewers; br. and conc. manholes. Acq. and nap. Act. 1925.

Certified check 10% payable to County required with bid. Plans obtainable from Edw. A. Hoffman, engineer, City Hall, Richmond, and on file in office of clerk.

YOLO COUNTY, Cal.—Jones & King Hayward, at \$129,575 awarded contract by State Highway Commission, to grade and pave with asphalt concrete about 5.8 miles between Bretona and Dunnigan.

LOS ANGELES CO., Calif.—Southwest Paving Co., Washington Bldg., Los Angeles, at \$134,330 awarded contract by State Highway Commission to surface about 12.6 miles with bituminous macadam between 1.2 miles and 13.9 miles north of Castale School.

DEL NORTE COUNTY, Cal.—Hemstreet and Bell, Marysville, at \$88,405 awarded contract by State Highway Commission to surface with oil treated gravel or stone (road mixed) about 12.7 miles between southerly boundary and Wilson Creek.

REDWOOD CITY, San Mateo Co., Cal.—County supervisors declare intention (23) to improve Oak Knoll Dr. from Lake Blvd. and Vista Dr. northerly, involving grading; 4-in. water-bound rock macadam base with 3-in. asph. conc. surface; guard rails; 6-in. vit. san. sewers; 30-in. hyd. cem. conc. pipe spillway or storm drain; brick manholes. 1911 Act. Hearing Aug. 4. Elizabeth M. Kneese, county clerk. G. A. Kneese, county surveyor.

REDDING, Shasta Co., Cal.—Until August 1, bids will be received by directors of Joint Highway District No. 11 to construct Weed-Klamath road project (1st unit), comprising Section from Station 0 plus 60 to 142 plus 15, involving:

- (1) 9.8 acres clearing;
- (2) 51.44 cu. yds. unclass. excavation;
- (3) 113 cu. yds. unclass. excavation for structures;
- (4) 21,803 sta. yds. overhaul;
- (5) 2.8 miles finishing earth graded road;
- (6) 8.52 cu. yds. class C concrete;
- (7) 91 lbs. reinforcing steel;
- (8) 582 lin. ft. 18-in. G. C. M. P.

Estimated cost \$65,000. Plans obtainable from Carl F. Mau, district engineer at Redding.

SAN CARLOS, San Mateo Co., Cal.—Until August 4, 8 P. M., bids will be received by A. Simpson, clerk, San Carlos Elementary School District, for grading and paving school yard in Elm St. bet. Cypress Ave. and Cherry St. Certified check 10% payable to clerk required with bid. Plans obtainable from E. L. Norberg, architect, at 407 Occidental Ave., Burlingame, or 580 Market St., San Francisco, on deposit of \$5, returnable.

OFFICIAL PROPOSALS

STATE OF CALIFORNIA

DEPARTMENT OF PUBLIC WORKS

DIVISION OF HIGHWAYS

NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received at the office of the State Highway Engineer, Public Works Building, Sacramento, California, until 2 o'clock P. M., on August 13, 1930, at which time they will be publicly opened and read, for construction in accordance with the specifications therefor, to which special reference is made, of portions of State Highway, as follows: Humboldt County, an overhead crossing over the tracks of the Northwestern Pacific Railroad about 2½ miles north of Beatrice (1-Hum-1-G), consisting of two 61 ft. 7-in. through plate girder spans, one 40 ft. 0 in. steel beam span and approximately 450 feet of timber trestle approach.

Pierce County, through Newcastle, (11-Pla-17-B), consisting of five hundred thirty-one (531) lineal feet of tunnel and about one (1.0) mile of roadway to be graded and surfaced with crusher run base and oil treated crushed gravel or stone surfacing.

Santa Barbara and San Luis Obispo Counties, between the second crossing of the Cuyama River and the Easterly Boundary of San Luis Obispo County (V-S.B-SLO-57-B,C & D), about thirty-seven and nine-tenths (37.9) miles in length, to be graded and surfaced with oil treated crushed gravel or stone.

San Diego County, between La Posta and Tecate Divide (VII-S.D-12-F), about eight and four-tenths (8.4) miles in length, heavy fuel oil to be furnished and applied to the roadbed.

Los Angeles County, a reinforced concrete girder bridge across San Gabriel River near Seal Beach (VII-L.A-60-F), consisting of seven 57-ft. spans on concrete piers with pile foundations.

Orange County, from Seal Beach to Sunset Beach (VII-Or-60-A), about three and three-tenths (3.3) miles in length, to be graded and paved with Portland cement concrete.

Los Angeles and Orange Counties, between Anaheim Street and Seal Beach (VII-L.A-Or-60-F & A), about three and one-tenth (3.1) miles in length, to be graded and paved with Portland cement concrete and bituminous macadam.

Proposal forms will be issued to only those Contractors who have furnished verified statement of experience and financial condition in accordance with the provisions of Chapter 644, Statutes 1929, and whose statements so furnished are satisfactory to the Department of Public Works. Bids will not be accepted from

a Contractor to whom a proposal form has not been issued by the Department of Public Works.

Plans may be seen, and forms of proposal bonds, contract and specification may be obtained at the said office, and they may be seen at the offices of the District Engineers at Los Angeles and San Francisco, and at the office of the District Engineer of the district in which the work is situated. The District Engineers' offices are located at Eureka, Redding, Sacramento, San Francisco, San Luis Obispo, Fresno, Los Angeles, San Bernardino and Bishop.

A representative from the district office will be available to accompany prospective bidders for an inspection of the work herein contemplated, and Contractors are urged to investigate the location, character and quantity of work to be done, with a representative of the Division of Highways. It is requested that arrangements for joint field inspection be made as far in advance as possible. Detailed information concerning the proposed work may not be obtained from the district office.

No bid will be received unless it is made on a blank form furnished by the State Highway Engineer. The special attention of prospective bidders is called to the "Proposal Requirements and Conditions" annexed to the blank form of proposal, for full directions as to bidding, etc.

The Department of Public Works reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the State.

DEPARTMENT OF PUBLIC WORKS,
DIVISION OF HIGHWAYS,
C. H. PURCELL,
State Highway Engineer.
Dated July 16, 1930.

NOTICE TO CONTRACTORS

Mechanical Work

SEALED BIDS will be received by Geo. B. McDougall, State Architect, Public Works Building, 11th and P Streets, Sacramento, California, up to 2 o'clock P. M., Tuesday, Aug. 19, 1930, thereafter on said day to be publicly opened and read for the installation and completion of the Mechanical Work for the Men's Gymnasium Building, San Jose State Teachers' College, San Jose, California, in accordance with plans and specifications therefor.

Mechanical Work includes Plumbing, Heating, Ventilation and Electrical Work. Separate bids will be received for "Electrical Work" and for "Plumbing, Heating and Ventilation Work." Combined bids will also be received covering all four branches of the work.

Plans and specifications are on file for examination in the office of the Division of Architecture, Public Works Building, Sacramento, California, and also at Room 1025 Associated Realty Building, Los Angeles, and at the principal California Cities Builders' Exchange Offices.

Plans, specifications, and proposal forms may be secured by licensed Contractors who have qualified or who will qualify by furnishing a verified statement of experience and financial condition as required by the provisions of Chapter 644, Statutes 1929, and whose statements so furnished are satisfactory to the Department of Public Works. Questionnaire forms may be secured from the Division of Architecture.

Bids will not be accepted from a Contractor to whom a proposal form has not been issued and all bids must be on proposal forms supplied by the State.

Requests for plans shall be accompanied by a deposit of twenty-five

(\$25.00) dollars. Check shall be made payable to the Department of Public Works, Division of Architecture. Deposit will be returned upon receipt of the set in good condition at Sacramento Office of the Division within 30 days after opening bids, otherwise it will be forfeited to the State.

All bids must be filed at the office of the State Architect on or before the time heretofore stated and in accordance with the "Rules for Bidding" accompanying the proposal form.

No bid will be considered unless cash, a bidder's bond made payable to the State of California, or a certified check made payable to the "State Engineer, Department of Public Works," in the sum of at least ten per centum (10%) of the amount of the bid is enclosed with the bid.

The Division of Architecture, State Department of Public Works, reserves the right to reject any or all bids and to waive any informality in any bid received.

STATE DEPARTMENT OF PUBLIC WORKS
DIVISION OF ARCHITECTURE
GEO. B. McDOUGALL,
State Architect.
R. B. MEEK,
Director of Public Works.

NOTICE TO CONTRACTORS

General Work

SEALED BIDS will be received by Geo. B. McDougall, State Architect, Public Works Building, 11th and P Streets, Sacramento, California, up to 2 o'clock P. M., Tuesday, Aug. 19, 1930, thereafter on said day to be publicly opened and read for the erection and completion of the General Work for the Men's Gymnasium Building, San Jose State Teachers' College, San Jose, California, in accordance with plans and specifications therefor.

The building is a reinforced concrete structure with brick veneer base, frame interior partitions, steel roof construction and tile roof. The total floor area is approximately 35,500 sq. ft.

Plans and specifications are on file for examination in the office of the Division of Architecture, Public Works Building, Sacramento, California, and also at Room 1025 Associated Realty Building, Los Angeles, and at the principal California Cities Builders' Exchange Offices.

Plans, specifications, and proposal forms may be secured by licensed General Contractors who have qualified or who will qualify by furnishing a verified statement of experience and financial condition as required by the provisions of Chapter 644, Statutes 1929, and whose statements so furnished are satisfactory to the Department of Public Works. Questionnaire forms may be secured from the Division of Architecture.

Bids will not be accepted from a Contractor to whom a proposal form has not been issued and all bids must be on proposal forms supplied by the State.

Requests for plans shall be accompanied by a deposit of twenty-five (\$25.00) dollars. Check shall be made payable to the Department of Public Works, Division of Architecture. Deposit will be returned upon receipt of the set in good condition at Sacramento Office of the Division within 30 days after opening bids, otherwise it will be forfeited to the State.

All bids must be filed at the office of the State Architect on or before the time heretofore stated and in accordance with the "Rules for Bidding" accompanying the proposal form.

No bid will be considered unless cash, a bidder's bond made payable to the State of California, or a certified check made payable to the "State Engineer, Department of Public Works,"

in the sum of at least ten per centum (10%) of the amount of the bid is enclosed with the bid.

The Division of Architecture, State Department of Public Works, reserves the right to reject any or all bids and to waive any informality in any bid received.

STATE DEPARTMENT OF PUBLIC WORKS
DIVISION OF ARCHITECTURE
GEO. B. McDOUGALL,
State Architect.
R. B. MEEK,
Director of Public Works.

COORDINATION OF CODES OF BUILDING GROUPS

Coordination of the professional codes of the architects, engineers and contractors of Southern California has been decided on by these groups following a number of joint conferences. These conferences were begun at the suggestion of James P. Collins, director of the California State Department of Professional and Vocational Standards, who expressed the belief that business standards would be advanced by the cooperation of the groups on their mutual problems.

The plan for coordination is to have the contractors', engineers' and architects' associations appoint delegates who will attend meetings at which disputes involving the different professions may be arbitrated. The organizations cooperating in this work are the Southern California Chapter of the Associated General Contractors, Los Angeles section; American Society of Civil Engineers, Los Angeles Chapter; American Association of Engineers, Southern California Chapter; American Institute of Architects, State Association of California Architects and the Los Angeles Builders' Exchange.

PLAN TO ELIMINATE BID PEDDLING EVIL

A plan for eliminating the evil of bid peddling has been adopted by a firm of architects in Ohio which is designed to protect the owner against the danger of having the materials put in his building cheapened. The method followed is to specify that the general contractor submit the names of his subcontractors and the amount of their bids when he submits the general contract.

The general contractor is permitted to substitute any subcontractor with the consent of the architect, but if the substitute's bid is lower than that of the original bidder the difference between the two is deducted from the general contract. It is claimed that this system eliminates the danger of the work being slighted and benefits the responsible contractor who is often forced to turn to bid peddling in order to meet the prices offered by the irresponsible contractor.

NEW INCINERATOR ANNOUNCED

The Welded Products Corp. of Kansas City, Mo., has developed an incinerator plant said to be both odorless and noiseless. This incinerator will burn all types of rubbish and garbage—wet or dry—up to a fine ash. A frequent arrangement is a small receiving door to the kitchen which carries the rubbish directly to the incinerator, saving many steps to the former unsanitary garbage can and unsightly trash heap.

The incinerator is designed to operate either through the furnace or with a separate stack. This makes its application simple for either old or new installations. There is a full range of sizes available, suitable for the smallest cottage or the largest apartment.

ARCHITECT'S PART IN CITY BUILDING

"During the past decade the architect has been playing an increasingly vital and important part in the development and growth of this country," says John Hudson, president of the Washington State Society of Architects.

"The beauty of a city is not so much in the amount of money that has been expended, as in the careful and artistic planning and designing of the buildings constructed therein.

"The public in general has come to realize the necessary and distinctive part that the architect plays in his ability to place before the prospective builder a complete visualization of what his structure is going to be long before the first brick is laid.

"Literally, no other class of citizen has so vital a part in the building of a great city as has the architect, and it is to members of associations like ours that the people must look to give dignity, permanence and beauty to building construction, so that each structure built will be a monument to

the owner, the architect and society generally.

"From many years of experience in the building profession, I realize more clearly today than ever before that money spent for architectural service is the most economical part of a building venture, and we as members of our associations should ever work to educate the public to the importance of securing expert professional advice when contemplating any line of construction.

"The members of these associations should become more closely allied with one another and work together in harmony to maintain a high standard of architectural efficiency and beauty. Furthermore, it is only through co-operation that proper legislation can be secured to protect the rights of our organization. Just as laws have been passed to protect the interests of other professions, so should we work in harmony to secure legislation which will raise the standards of our profession and protect the people of this great commonwealth."

COUNTY PLANNING ENGINEER IS NAMED

Reeve Conover, Monterey engineer, has been named engineer for the Monterey County Planning Commission, it is announced by Carmel Martin, chairman of the planning board. Beside investigating and drawing up zoning ordinances for the board, Conover will also be executive secretary of the commission and will maintain an office in Monterey where planning matters may be presented for the board's consideration. His duties will include gathering data for the purpose of indicating when and where new roads will be needed so that the commission may purchase rights of way.

For the past five years Conover has been a partner in the civil engineering firm of Conover and Files, dissolution of which was recently announced.

A "Pittsburg" Automatic Water Heater installed in the Home indicates high quality throughout.

Recommended and specified by all the leading architects, plumbers and builders.

Consider the high merit of the Pittsburg coupled with "Pittsburg Perfect Service."

"Hot water quick as a wink."

**Pittsburg Water Heater Co.**

Makers of "Pittsburg Automatic"—"Bungalow Automatic" Storage Systems and "Lyon" Tank Water Heaters.

Send For a Sample Copy
Of The NEW
Daily Pacific Builder

The only daily construction newspaper affording complete coverage of the construction activities in Central and Northern California, featuring work contemplated, bids wanted, bids opened, contracts awarded, sub-bids wanted and sub-contracts let on all types of building construction, bridges, dams and harbor works, irrigation projects; machinery and equipment; water works and supplies business opportunities, building permits, building contracts, mechanics' liens, acceptances, etc., etc.

Keep informed on construction developments in Central and Northern California and the major projects in Southern California, the states of Oregon, Washington, Nevada and Arizona.

The new DAILY PACIFIC BUILDER will afford a service that serves—both in Quality and Quantity. You, as a member of the construction fraternity, should not be without it.

Subscription price \$1.50 per month, or \$15.00 a year, payable in advance.

BUILDING OFFICIALS PREPARE FOR MEETING

Early preparations for the ninth annual meeting of the Pacific Coast Building Officials' Conference, to be held at the Hotel Virginia, Long Beach Sept. 29 to Oct. 4, present bright prospects for a convention of exceptional interest. It is reported in the July Bulletin of the Conference.

"It is planned to have a number of well-qualified men present papers on such important subjects as city planning and housing, condemnation of buildings, fire prevention in buildings used for public assemblage, size of fire districts, methods of making standard fire tests, licensing of contractors and reinforced brick masonry.

"In addition, approximately two days' time will be devoted to discussions of the Uniform Building Code by six code changes committees. A place on one of the six committees has been assigned to each active member of the Conference. Delegates other than active member city building officials may sit in with any committee they wish and participate in the discussions. The code changes committees will also take up such subjects as refrigeration, film storage and handling of films, theater regulations, incinerators and the installation of gas burning appliances.

"Three informal breakfasts will be held at this year's annual meeting for the purpose of answering questions of code enforcement. Instituted at the Fresno meeting in 1928, the plan of holding breakfasts to discuss interpretation and enforcement has ever since been one of the most popular features of the annual meeting.

"As a needed digression from the strenuous business sessions for which the Conference is noted, several entertainment features are scheduled for the men by the local committee on arrangements, headed by C. D. Waites, Jr., chief building inspector of Long Beach. These include trips through the harbor and to other points of interest. It is planned to entertain the ladies by drives about the city, with luncheons, afternoon bridge parties, swimming parties, a theater party and a trip to Hollywood through the motion-picture studios, together with other miscellaneous diversion. Entertainment for everyone will consist of an evening trip through a nearby steel mill and an all-day trip to the famous 'Catalina Island.'

PACIFIC CLAY EARNINGS

For the six months ended June 30, Pacific Clay Products Company, Los Angeles, reports net earnings after all charges including depreciation and Federal tax of \$143,778 equal to \$1.45 a share on 99,157½ shares of no par common outstanding, against \$205,138 or \$2.07 a share on the same share basis for the 1929 period. After the payment of \$18,989 in common dividends at the annual rate of \$2.40 a share there remained a balance of \$24,820 to be added to surplus.

Engineers' Employment Service Places 1,688 Men

BY THE OBSERVER

The San Francisco office of the Engineering Societies Employment Service, during its four years of operation has placed 1688 men in positions, according to Newton D. Cook, manager of the San Francisco branch.

Supporting societies to the service are the American Society of Civil Engineers; American Institute of Mining and Metallurgical Engineers; American Society of Mechanical Engineers; American Institute of Electrical Engineers; California Section, American Chemical Society; Engineers' Club of San Francisco and the Western Society of Engineers.

The Engineering Societies Employment Service is a co-operative enterprise, started in New York City in 1918. With the support of the four leading engineering societies and their 50,000 members its success was such that offices were opened in Chicago and San Francisco in 1925.

Briefly, the unit is a professional service bureau for engineers, operated by engineers. The service to employers covers the entire field of engineering and chemistry with men available for any position from beginner to chief executive. Every effort is made to fill positions whether they be for construction, operation, distribution or any of the various divisions of activity for which men with technical training are qualified. Members register from all over the world and may be secured for work in out-of-the-way places as readily as for the cities.

Members of the supporting societies are given preference in filling positions, but in order to take care of many requests for which members are not available, an active register of non-members also is maintained. Non-members are required to apply in person before registering for employment unless they are recommended by members.

As an added service the San Francisco branch maintains a file containing the names and addresses of consulting engineers practicing in the Western States. This information is exceedingly valuable to any person or firm desiring to secure professional engineering service of the highest grade.

Employers and employees are alike benefited by the operation of this employment service, acting as a central clearing house, where careful discrimination is exercised in co-ordinating the requirements of the position with the qualifications of the individual.

A. G. C. CITES ILLS IN HOME BUILDING FIELD

Acceleratory measures in the construction fields amenable to the control of governmental and public bodies produced an increase of more than a quarter of a billion dollars in the volume of such construction awards during the first six months of the current year, as compared with the same period of 1929, according to a statistical analysis just completed by the Associated General Contractors of America.

This increase however, was not sufficient to offset the drastic decline reported in fields of the industry dominated by private business, and failed to maintain the total volume of contract awards which showed a decline of 12½ per cent from that for the first half of last year.

The fields contributing to the increase were those of educational, hospital and institutions, religious and memorial, public buildings and public works and utilities, while those showing declines were social and recreational, commercial industrial and residential buildings, which in the aggregate decreased 33 per cent.

Edward J. Harding, assistant general manager of the Associated General Contractors, states that his organization is preparing to launch movements to similarly accelerate construction on a sound basis in the lagging fields, especially that of residential building which in the first six months showed a decline of \$523,657,400, or 47½ per cent as compared with the corresponding period of last year.

At a recent meeting of the executive cabinet of the association, headed by A. E. Horst, of Philadelphia, president, the numerous ills and problems afflicting the residential section of the industry were gone into and the promulgation of a program looking toward the working out of their solution was authorized.

Among the ills that have contributed to the present position of residential construction, Mr. Harding states, have been the unregulated activities of shoestring speculative builders; lack of proper provision for second mortgage financing on a conservative basis at low cost; lack of organization of legitimate home builders and other residential contractors; the existence of unsound appraisal practices and what appears to be a growing lack of confidence in this section of the industry on the part of the public.

The declines of 16 per cent in commercial buildings, 17½ per cent in industrial buildings and 7 per cent in social and recreational buildings reported for the first six months may yet be made up in the year's total in the event of an appreciable business revival within the near future, Mr. Harding believes. Drastic corrective measures, however, must be brought to bear in the residential section of the industry before it is enabled to proceed on a sound basis, he said.

TRADE ASSOCIATIONS AND THEIR VALUE TO INDUSTRY

(By W. J. Parker, Trade Association Organizer and Director, New York)

At this particular time of business depression and when plans are being formulated and considered for the rehabilitation of business on a profitable basis, trade association activities seem all the more important and should take an even more prominent place in our economic structure. Had there been more serious adherence to the idea of mass minds, associated effort and research during that period leading up to the recent dramatic business climax, many of those concerns now trying to ward off the death rattle would have thrown up far better defenses against the conditions now obtaining. While foresight is less common than hindsight, still even to the lay mind it was obvious that the centrififugal force of business was reaching the danger point, and the balance wheel had to be slowed down to keep the business machine within safe limits. Now that the business cycle curve has reached what we hope is to be the low level, it becomes vastly important that its ascension be plotted upon a sane basis.

Trade Associations can play a vital part in this reconstruction. They permit the organization of producers and distributors of commodities and services for the promotion of business in their branch industry by the compilation and distribution of data, the establishment of trade standards and the cooperative handling of trade problems and practices both within the civil and moral law. But even better than that, they permit competitive contact and acquaintanceships which remove personal antipathies that so commonly and unconsciously exist without reason.

Practices Prohibited

Under our anti-trust legislation, embodied principally in the Sherman and Clayton Acts, there are three outstanding practices in business that are prohibited. These apply to restriction of production, territorial division by agreement and price fixing by agreement. The latter provision is being given consideration for revision in the Capper-Kelly Bill now before Congress. There are other trade practices interpreted by the Federal Trade Commission as trade abuses which are also under a ban.

The things that cannot be done individually or collectively are fixed by statute and rule. The things that can be accomplished by collective thinking and effort are almost limitless and the Trade Association becomes the beacon to which the course may be set in sailing into the harbor of ethical business relations.

Trade Associations are not a style that changes with fancy. They are here to stay as an important factor in our commercial existence. The legislative, economic and financial minds of the country have more than given them their stamp of approval—they have come to lean upon them as pillars of progress. President Hoover, while Secretary of Commerce, gave continued recognition to their value and gave sponsorship and encouragement to industrial organization. Congress, through the creation of the Federal Trade Commission, which has worked hand in hand with Trade Associations in smoothing out industrial and commercial ills and abuses, has indicated its confidence in collective thinking. Economic foresaw the possibility of manufacturing and distribution interchange of ideas through the trade association in accomplish-

ing standardization and the elimination of waste in effort and materials. The banker realized that no one man or individual company, irrespective of his ability or its size, had cornered all of the brain power in any industry. The statistician has worked out a formula indicating that no business man or company irrespective of how efficient, controls but 40% maximum of the factors governing his or its business. The other 60%, pressing from the outside, including relationship with federal, state and local government, taxation, tariff, industry and inter-industry competition, labor, etc., are influences that can only be reckoned with in general. For this reason the large companies today in almost every field are active members of Trade Associations.

Cost Accounting

One of the highly important phases of association work is the development of cost accounting systems. Either in manufacturing or selling it is fundamental that we know our costs and how to arrive at them with accuracy. It is surprising to learn the number of larger and erstwhile successful concerns as well as smaller companies, who have computed their cost and selling price either by mere guess or by haphazard methods, little better than guess. How business today, in the face of keen competition, can go on without a uniform cost accounting procedure which will allow the men of an industry to legally get together and compare costs, is difficult to understand. "If one does not know what his costs are how can one figure his profits."

It is not uncommon for the little fellow, who assumes a low over-head and who depends upon territorial distribution, to establish prices ridiculously low to meet outside competition. His competitors decide to meet his price and so the battle goes on, resulting in profitless sales for all concerned. By the adoption of uniform cost accounting system and trade association cost conferences, the interchange of methods and experiences prove invaluable and need betray no secrets of manufacture and sale. On the other hand, the discussions of operations lead to suggestive methods from which not only individual concerns but the public at large benefit.

Another very constructive activity of vital importance is the development and compilation of complete and accurate facts and figures indicating trends in industry. This may start with raw material and carry through to the buying habits of the ultimate consumer. They may include inventory and movement of commodities in the base industry as well as inter-related industries which affect either the manufacture or sale of the class of commodity an association is primarily interested in. Such statistical information is secured through various ways—by questionnaire, surveys, reports from members, etc., and correlated so as to bring out its greatest value. It is needless to say that an association is by far a better clearing house for such data than by attempting to maintain a statistical department in individual concerns. In fact there are few concerns which can afford such a department.

Associated Effort

Trade promotion is another important activity made possible through associated effort. It permits of research in developing every possible use and outlet for commodities; group adver-

tising to promote good will towards industry through catchy slogans and timely or seasonal buying; it effects great saving in buying of printing matter, data books and promotional pieces; it permits the conduction of sales and inspirational meetings among jobber, dealer and consumer groups, it promotes the holding of shows and expositions when the buyer is brought to the seller. There are but a few of the myriad of promotional activities possible through group effort.

The Bureau of Standards in Washington has made great strides in standardization and simplification of materials and parts. It is, however, a function of the Trade Associations to accomplish standardization and simplification of the assembled product. Reference could be made running into volumes of instances, where various association committees on standardization have saved countless thousands of dollars for their members and the public at large through the standardization of materials, tool and machine equipment. Such simplification not only reflects a saving to the branch industry covered by the association but those related industries upon which it depends for materials.

Patent litigation has been one of the expensive luxuries of the manufacturing business. It is a subject that involves such a volume of details and such a diversification of interpretations that a manufacturer is hardly ever sure of his ground irrespective of the caution practiced to avoid infringement. Trade association activities have been invaluable in keeping suits of this character from court calendars. They have permitted the adjustment of patent differences and the cross licensing of patents through committee work which feature alone has paid in dividends many times the cost for association membership expense. We need only to refer to the automotive industry as a concrete example of the effectiveness of control of patent exchange.

Codes of Practice

Keen competition has been the parent of many unethical, wasteful and vicious abuses in business practice. That they are within the law made them even more difficult to adjust or eliminate unless by gentlemen's agreement. Codes of Business practices in trade associations have placed an effective obligation upon their members which has gone far in obviating the suspicious and unethical methods among competitors. They have set up standards of business morals, which while not always lived up to, furnishes a basis upon which constructive criticism can be effectively used. An association that is representative of an industry has a court of appeal in the Trade Practice Committee of the Federal Trade Commission which Committee when the facts are brought before it can call a trade practice conference of the entire industry affected. As a result of such conferences, the abuses or practices are grouped and classified according to their legal or moral status and the machinery of government is set in motion to counsel the adjustment of the abuses, either by collective agreement or by resort to the courts so that the small and large alike have equal opportunities to weather the maelstrom of competition.

There are many more functions of the trade association dealing in gen-

eral and with the ramifications of specific industries. It is not contended that association activities form a panacea for business ills. Suffice to say, however, they do offer the most constructive step toward the stabilization of industry's problems. They offer dividends in direct proportion to the individual interest invested in them.

Price cutting is a problem of great complexity, very hard to understand, and most difficult to cure. The sustaining cause of the problem is not in the realm of economic or social law; it is in the realm of mental qualities of the price-cutting manufacturers of the industry in the form of ignorance, misunderstanding, confusion, greed, distrust and antagonism. The solution of the problem involves the curbing or elimination of these qualities. The penalty for failing to curb or eliminate these qualities is unprofitable operation.

The only answer to the problem of the individual business man who is either faced by the necessity of liquidation, insolvency or merger, is the Trade Association. It is the only protection against these one or two or three in an industry who are forever upsetting all its plans and keep it running at a loss. Every business man knows that it takes only one manufacturer alone in the industry to lower the price level of an entire industry, irrespective of the wishes of the remainder of those in the industry.

Industry Education

For carrying on the battle against depressed price levels and unprofitable operation industry is already provided with two very formidable and effective weapons. The first of these is industry education, conducted by the industry for the enlightenment of its members. Campaigns of industry education have already done much to help the situation. The adoption of uniform methods of cost accounting, the publication of industry statistics on stocks, prices and volume, and the determination of definite standards and specifications for product have all served to replace doubt, uncertainty and confusion with definite, understandable facts and conclusions. Industry education of the immediate future, however, should hit more directly at the cause of depressed price levels—at the illusion that competitive price-cutting, either direct or disguised, is profitable. On the foundation laid down in uniform costs, industry statistics, and standard product specifications, this can be done by analyzing, one aspect at a time; the various factors involved in price-cutting reasoning, by pointing out the utter futility of this reasoning as a means to greater profits, and by demonstrating the great possibilities which constricting the great possibilities which lie in a reversed reasoning and the elevation of price levels. By hammering these indisputable facts home again and again to every member of our industry, the present influences on price level, human nature notwithstanding, should be discouraged, not on the grounds that it is wrong, but on the grounds that it is futile and foolish.

Trade Practice Conference

A second weapon, one still more formidable and effective, is provided by the Federal Trade Commission in the trade practice conference. This procedure, a development of the last ten years, provides for the self-government of industry on a basis which either coincides with or closely approaches a legal status. It introduces a compulsory factor into industrial affairs which both supplements and increases the good that may be accomplished by industry education alone. Industry education may be reasonable in its admonitions, but unfortunately some manufacturers are unreasonable.

Success in combating the problem of depressed price levels demands reasonableness and unanimity, and unanimity cannot be secured by passive means in the face of a unreasonable minority.

Trade practice procedure is in a state of development. The progress indicated in the last six months is noteworthy. Trade practice procedure has, from the outset, been notably effective in eliminating such obviously undesirable practices as bribery, misrepresentation, secret rebates and slander. It has done enough in the direction of the adoption of uniform, standard terms and specifications in the description of product to show the important possibilities that lie in this direction. Several rules dealing more or less directly with this problem have recently been given Group 1 approval by the Federal Trade Commission, this approval indicating that the full influence of the commission can be brought to bear on their enforcement. Prominent among these rules are those dealing with selling below cost, the prohibition of price discrimination, the provision for price schedules, and miscellaneous rulings aimed at rebates, allowances and free concessions of all kinds.

The rule on price discrimination, which only very recently has been accorded Group 1 approval, appears to have most important possibilities in connection with the depressed price level problem. This rule, based on the Clayton Act itself, prohibits price discrimination between purchasers of the same class. The enforcement of this rule appears to mean, therefore, that each manufacturer must adhere to an established price for each type, condition, and location of account.

There seems to be no other way that he can avoid discriminations to purchasers in the same class. In this way it is possible that one of the great curses of the depressed price level problem, namely price cutting in individual or sporadic instances, can be practically eliminated. On a careful analysis it is evident that strict and uniform adherence to a pre-determined price schedule would accomplish this most important point—it would make evident to each manufacturer, to a degree never before possible, the indisputable fact that profitable price-cutting, or profitable general price reduction, is an illusion. With a uniformly maintained price schedule throughout all his selling activities the resulting loss from price reductions would be readily apparent to every manufacturer. Without this uniformity the illusion is hidden in confusion. The importance of this point in its bearing on the depressed price level problem merits repetition again and again; once the illusion is destroyed, that greater profits can accrue from an increase in volume built on price-cutting, the root of the depressed price level problem is also destroyed. The lead which is being taken by the woodworking, machinery, paper-board, gypsum and cut stone industries in this connection is one of great significance to industry.

Every industry presents a situation practically its own. The question of getting some measure of control over price of production, distribution and so on, can be handled not only within the limits of the law but within the limits of good business. For instance, there is the Javits plan which may be applied to certain industries successfully. There are those things which have been freely discussed herein which can be made to eventually deal with the problem of practically every industry.

Is there any other answer than those of a Trade Association for every industry in these times?

MILLWORK INSTITUTE WILL MEET AT PASADENA

The annual meeting of the Millwork Institute of California will be held at Hotel Huntington, Pasadena, August 6, 7 and 9.

Lester G. Sterrett of Fresno, field secretary of the Institute, has been in Pasadena assisting W. L. Leshman, president of the Crown City Manufacturing Co. and a director of the Institute, in making arrangements for the event.

Architects Myron Hunt and John C. Austin of Los Angeles, will appear on the program. Mr. Hunt will tell of the value of good workmanship in millwork and will discuss the relation of the architect to the mill industry. Keith Bowleson of the Security-First National Bank of Los Angeles, research department, will discuss credits.

Thursday, August 6, the annual meeting of the directors will be held and general business of the Institute will be transacted. Friday the general session of the institute will be held and Friday evening the annual banquet will be held.

Leshman and a group of Pasadena mill men have arranged to meet northern and central California delegates at Glendale with automobiles and they will be shown some of the beautiful residence streets of Pasadena on their way to the Huntington Hotel. A visit to the Huntington library and art gallery may be arranged for delegates who have time.

PICKERING LUMBER COMPANY FORMS SALES ORGANIZATION

Organization of the Pickering Lumber Sales Company as a subsidiary of the Pickering Lumber Company of Kansas City, owning large timber holdings in Sonora and Tuolumne Counties, Calif., and the appointment of L. V. Graham of Oakland, Calif., as general sales manager is announced.

Graham, formerly manager of the Chicago Lumber Company, will maintain headquarters at Kansas City, Oroville N. Pier, sales manager at Kansas City will continue in that capacity until Graham's arrival. H. A. Lowe will be in charge of sales in the New York office.

Other appointments announced are: C. C. Stibbich to have charge of San Francisco office, and D. H. Steinmetz, Jr., in charge of the Los Angeles office.

STERLING PUMP COMPANY PLANS EXPANSION

Application for dissolution of the Sterling Pump Works, which is reorganizing as the Sterling Pump Corporation, has been filed with the county clerk at Stockton. Hearing on the application is set for August 30.

Dissolution of the old company, organized April 4, 1907, and originally known as the Sterling Iron Works, is necessary to the formation of the new corporation. W. F. Barnickol, president of the concern, stated in explaining the move. The reorganization has been necessitated by the enlargement of the company's activities, which embraced opening of a branch plant in South Bend, Indiana. The new corporation will have the same capitalization of \$500,000, as the present company. It will also have the same directors and officers, who are Barnickol, president; Ralph M. Bacheller, vice-president, and William W. Wilson, secretary. They comprise the board of directors.

THE OBSERVER

What He Hears and Sees on His Rounds

The contract for the building of the Western Pacific extension northerly from Keddie in the Feather River Canyon to Bieber, in Lassen County, to link that railroad with the Great Northern has been awarded to the W. A. Bechtel Company of San Francisco and the Utah Construction Company of Ogden on a joint bid. Work will be started at once.

The project, which equates in magnitude the appropriation for the first unit of the Boulder Dam construction, represents an outlay of approximately \$10,000,000. According to engineers it is the most important project involving the construction of railroad lines to be undertaken in the last ten years within the borders of California.

The award of this contract sets in motion the railroad building that will make the Western Pacific an important part of a competitive route between California, Arizona and New Mexico on the south; Nevada, Utah and Colorado on the east, and the northern and northwestern states. When the last spike is driven, the additional thorough route will stimulate a greater exchange of commodities between the different states served.

Together with the extension of the Great Northern, about to build southward 88 miles from Klamath Falls, Oregon to Bieber, this new construction will connect two great trunk systems. The Western Pacific's part of this link will swing northward 112 miles through Plumas and Lassen counties on a line roughly midway between the Sacramento Valley and the Nevada boundary. It will serve a rich timber and agricultural section of northern California.

It is estimated that about \$4,500,000 will be spent for labor, while the material costs will approximate \$4,500,000; the balance represents the cost of right of way, engineering, etc. The contract calls for clearing about 1500 acres of right of way. Approximately 3,000,000 cubic yards of rock and earth are to be handled in the grading of the roadbed. To ballast the main track with its 22 miles of siding, 354,000 cubic yards of crushed rock or gravel will be required.

The W. A. Bechtel Company and the Utah Construction Company, the successful bidders, are well known in the railroad construction world. Both these firms have been identified for a long time with many large projects in the western states, including railroad work and general construction. The strength of these two companies insures the satisfactory and expeditious completion of the work.

Great interest centered in the bidding which was participated in by many of the largest general railroad contractors in the western part of the country.

In the 14 cities in the United States having a population of 500,000 or over, \$16,930,300,968 was spent for building operations in the 9-year period ended Dec. 31, 1929, as indicated by building permits issued, according to information made available by the Bureau of Labor Statistics, Department of Labor.

Nearly 60 per cent of the amount, the report states, was spent for new residential buildings, while commercial buildings, including factories, shops, office buildings, stores, etc., accounted for approximately 20 per cent of the remainder. The remaining

20 per cent included buildings for amusement, churches, schools and libraries, public buildings and works, and public institutions.

Of the total spent in these 14 cities, New York City alone accounted for nearly 50 per cent.

Chicago, Detroit, Los Angeles, and Philadelphia were the only other cities where the building permits issued in these nine years totaled more than \$1,000,000,000. Chicago's expenditure totaled more than \$2,500,000,000 while in the other three the expenditures were less than \$1,500,000,000.

In all of the 14 cities the expenditure for new residential buildings exceeded that for new nonresidential buildings, the report shows.

Los Angeles led in the erection of amusement buildings, while Baltimore ranked last.

In church construction, Buffalo led with 2.5 per cent of its total, while San Francisco spent only six-tenths of 1 per cent of its total for that purpose.

A final elimination of the 12-hour working day, involving shorter hours for men on that schedule and giving employment to others, has been worked out in the plants of the Universal Atlas Cement Company, according to B. F. Affleck, president of the company.

Mills which were owned by the former Atlas Company came under United States Steel Corporation rules through the purchase of the Atlas Portland Cement Company's properties and business in January and their consolidation with the Universal Portland Cement Company's, a Steel corporation subsidiary. One of these rules is that no man may work more than 10 hours per day or more than six consecutive days.

Formerly some of the men employed in the Waco, Tex., and Leeds, Ala., mills worked more than 10 hours, many of them 12 hours per day. As cement making is a continuous process which keeps the kilns burning 24 hours a day, this meant two shifts per day, except in the shops. Substitution of three instead of two shifts per day was completed on July 15, Affleck announced.

Institution of the eight-hour basis placed all of the company's mills on the same working hour basis. In addition to the plants at Waco and Leeds, other plants are operated by the company at Hudson, N. Y., Northampton, Pa., Universal, Pa., Bufington, Ind., Duluth, Minn., Hannibal Mo., and Independence, Kan.

There was a decrease of 8.8 per cent in the value of building permits issued in June, 1936, as compared with May according to reports received by the Bureau of Labor Statistics of the United States Department of Labor from 289 identical cities having a population of 25,000 or over. The total migration Quota list, Sir Alexander of June was \$157,894,291. Decreases were registered in 5 of the 7 geographic districts. Increases in total building operations were shown in the New England States and the West North Central States. Residential buildings decreased 7.0 per cent com-

paring May with June, while non-residential buildings decreased 9.0 per cent.

There were 11,393 families provided with dwelling places in new buildings during June, which is a decrease of 8.8 per cent from the 12,456 provided for during May.

Employment on the Boulder dam project will develop only as contracts are let, and ample notice will be given when opportunities for work present themselves, it is announced by Secretary of the Interior Wilbur. Despite notice that there are no positions to be filled at present, applications have been flooding the office of the Bureau of Reclamation at the rate of nearly 200 a day.

When Secretary Wilbur announced the beginning of construction, he made the following statement: "Of one thing the public should be warned, and that is the unwisdom of going to the vicinity of the dam site in the expectation of getting work without ample provision to meet the emergency should this expectation fail. The dam site is located in the midst of a great desert with few inhabitants and slight opportunity for other employment than that which it may afford."

The entire third floor of the Temple Court Building in Denver has been leased to provide office space for the Boulder dam engineering corps during its expected eight years' headquarters in that city. About 40 additional engineers will shortly join the existing staff, according to Elwood Mead, U. S. Commissioner of Reclamation, who was recently in Denver for a conference with Raymond F. Walter, chief engineer for the Denver district.

The Hoover-Young Bay Bridge Commission is unalterably opposed to the use of the proposed San Francisco Bay bridge by steam trains. Use of the bridge by steam trains would add tremendously to the cost of construction, the commission says. C. E. Andrews, engineer for the State Department of Public Works, testified at a recent meeting that a maximum saving of 26 minutes would be possible by the bridge, and an average saving of 10 minutes. The statistics were based on a traffic survey made recently by the state. Final plans for the bridge, which will link San Francisco and Alameda, and decision when construction will start, are expected shortly. Mark L. Requa is chairman of the commission.

American plants engaged in the manufacture of electrical equipment, apparatus and supplies are showing large gains, according to survey of operations. This is reflected in consumption of electrical energy, which is approximately 1.2 per cent greater than the normal seasonal increase, the Electrical World reports.

Berkeley, Calif., will vote on a \$2,690,000 bond issue August 26. The proceeds of the sale of the bonds should the proposal carry, will finance erection of new schools and additions to standing school buildings.

It has just been announced by the Division of Simplified Practice of the Bureau of Standards, Department of Commerce, that simplified practice recommendation No. 49—Sidewalk, Floor, and Roof Lights has been reaffirmed by the standing committee of the industry, without change, for another year. A survey conducted prior to the revision meeting indicated that approximately 98 per cent of the 1929 production of this commodity conformed to the simplified schedule.

ALONG THE LINE

William D. Barkhuff, city engineer of Seattle, died in that city July 26 as the result of injuries received in an automobile accident.

M. E. Danford, 52, assistant vice-president of the American Rolling Mill Company, died at Shotton, Chester, England, according to a cable received at Ashland, Ky., July 26.

Earl Bowe, representative of the National Lumber Manufacturers Association, with headquarters in Los Angeles, has been made executive secretary of the Termite Investigating Committee of the Pacific Coast.

Ward P. Christie, for the last ten years staff engineer of the Associated General Contractors, recently resigned his position to become connected with Ulen & Co., and will be located at the principal offices of the company at Lebanon, Ind. Mr. Christie is a graduate of Purdue University, class of 1915.

Cowell Equipment Company, manufacturer of automobile hoists, auto grease units, gasoline pumps, gasoline storage tanks, pressure tanks, with head office in Los Angeles, and factory at Lynwood, Calif., has recently established Northern California headquarters in San Francisco at 227 7th St. A. W. Courtney is branch manager.

Albert B. Stevens, a graduate of the University of California, has been added to the faculty of the University of Southern California as instructor in general engineering. He will give courses in engineering drawing, mechanics and materials, and will also assist Prof. John F. Dodge in the division of petroleum engineering. Mr. Stevens has been engaged in drafting, scouting and field work in cementing of wells.

Gerald C. FitzGerald has been appointed a member of the Los Angeles Board of Harbor Commissioners to succeed Emerson Spear, whose term has expired. The appointment was confirmed by the city council July 16. Mr. FitzGerald, a consulting hydraulic and civil engineer of wide experience, has been identified with the development of Los Angeles harbor for many years. He is a member of the firm of FitzGerald Engineering and Construction Company of Los Angeles, and holds a commission as captain, Corps United States Engineer Reserve.

BRUNNIER ELECTED TO STATE ENGINEERS' BOARD

Donald M. Baker of Los Angeles and H. J. Brunnier of San Francisco, were chosen president and vice-president, respectively, of the State Board of Registrations for Civil Engineers.

Albert Givan, chief engineer of the Sacramento Municipal Utilities District, was re-elected secretary.

The state board has issued licenses to 3,388 engineers operating in the state of California.

VETERAN RETIRES

John T. Broderick, secretary of the manufacturing committee, General Electric Co., Schenectady, N. Y., retired on July 1 after 41 years of continuous service with the company, 36 of which were spent in the position from which he retires.

HERE — THERE — EVERYWHERE

Semi-annual meeting of the American Iron and Steel Institute will be held in New York City, October 24.

San Jose city council will appoint a committee of fifteen citizens to make a survey with the object of developing a system of supervised playgrounds.

B. C. Forbes, financial expert and editor, speaking before the San Francisco Commercial Club, declared that the present adverse conditions in the lumber industry can be cured only by reduced production. He intimated that, in his opinion, united action by lumbermen to this effect would not meet with any opposition from Washington.

Frances Perkins, New York State Industrial Commissioner, in a speech before the Greater New York Safety Conference, said: "I am convinced that one of the factors in the very large increase in industrial accidents in the state of New York in the past two years has been the practice of laying off, or failing to reemploy, the older and more experienced men and using young unskilled or semi-skilled workers at jobs beyond their capacity for good judgment and safe practice."

Permission has been granted by the Railroad Commission to The Northwestern Railroad Company and The Pacific Lumber Company to execute an agreement covering joint use of a railroad line owned by Northwestern Pacific Company, between Scotia and South Bay in Humboldt County.

OREGON ARCHITECTURAL BOARD OF EXAMINERS RE-ELECTS

All officers of the Oregon State Board of Architectural Examiners were re-elected at the annual meeting of that body held July 25.

John Benne, of the firm of Benne & Herzog, was re-elected president; J. E. Wicks, Astoria, vice-president; and Morris H. Whitehouse, treasurer.

Ellis F. Lawrence, of the firm of Lawrence, Holford, Allyn & Bean, was elected to fill the director's place vacated by the death of Joseph Jacobberger. Frank Clark, Medford architect, was the other director elected.

P. G. & E. CO. SEEKS TO SELL \$25,000,000 IN BONDS

The Pacific Gas and Electric Company has made application to the state railroad commission for permission to issue and sell \$25,000,000 worth of first and refunding mortgage gold bonds, for the purpose of financing the company's construction requirements during 1930.

According to the application, arrangements have been made to sell the bonds at 93½ per cent of their face value through the National City Company. The bonds will bear interest at the rate of 4½ per cent per annum and are redeemable at \$105 on June 1, 1960.

ACQUIRES PROPERTIES

Columbia Steel Co., subsidiary of United States Steel Corp., has acquired by purchase the properties of the United Steel Products Co., Columbia department, with mines, quarries, furnaces, foundries, mills and warehouses located in Colorado, Utah, California, Oregon and Washington.

TRADE LITERATURE

Radio talks broadcast by the Arney Iron Master, telling the story of the iron and steel industry, have been reproduced in printed form in a 52-page illustrated booklet issued by the American Rolling Mills Co., Middletown, Ohio.

In a 12 page illustrated booklet the Fay Metal Patch Co., Cleveland, O., treats of the prevention of rust with Fisholine, a specially processed transparent oil which, when spread upon a metal surface, congeals to form a protection against moisture and atmospheric action.

A handbook has been issued by the Electrical Association of New York, Inc., 100 East 45th St., New York City, containing twelve sections covering each of the following classifications: Illumination, industrial control, industrial heating, material handling, motors, refrigeration, signals, signs, switchboards and panelboards, tools, ventilation and wiring.

Results of a questionnaire sent out to motor truck owners in all parts of the country by the General Motors Truck Co., Pontiac, Mich., are given in a 44-page bulletin recently issued. Facts and figures on truck operating, maintenance and depreciation costs, the use of special hauling equipment, methods of compensating drivers, and other matters in connection with the operation of more than 46,000 trucks of various makes are analyzed and compared in respect to various services. Among the businesses considered are those of general and road contracting and general haulage.

SHORTER DAY IS URGED TO PROVIDE EMPLOYMENT

"The work day should be reduced so that employment can be spread out sufficiently to provide work for everybody," said Governor Trumbull of Connecticut, at the closing session of the Governor's Conference in Salt Lake City.

"Mass production is responsible to a great extent for unemployment," said Governor Trumbull. "Statistics tell us that one workman produces as much as 32 workmen produced 75 years ago. In other words, one man today, working one hour, produces as much as one man working 32 hours did 75 years ago. Our ability to consume necessities, at least, has not been on the same basis."

"This situation is going to become more and more acute. The only immediate answer that is seen is a shortening of the productive hours per day."

"It has been estimated that employees working four hours per day universally can produce all the necessities, all the luxuries, make additions to surplus capital and still enjoy all the things that we have in the past, and that the work hours per day required will become less and less as mass production and mechanization of industry increases and grows."

"We are going through a transitory period from the old hand method of production in New England into the machine age and we are going still further into it. There is not an industry in the East that I know of that is not overcrowded."

Colorama Lighting For Oakland Ballroom

Installation of the new Colorama system of lighting, the first system of its kind on the Pacific Coast and the second of its kind in the United States, is being made by the B. R. Fritz Electrical Company of Oakland, in Sweet's Persian Gardens, a new ballroom at Grand Avenue and Webster Street, Oakland.

All interior decorations are to be performed by the modern servant—Electricity. Light will be actually poured from flutes, mixed in different combinations with colors, producing effects never before thought possible. Five hundred combinations can be produced to blend with the music, yet no lamps will be seen, no glare to tire the eyes, the combination will be brought in and out in such a way that the people in the ball room will feel the light with the music.

The installation will surpass the number of changes that can be produced in the only other installation of its kind, the St. George Ballroom at Brooklyn, New York.

Engineers of the General Electric Company made special trips to Brooklyn to study and if possible perfect and improve upon this installation which they have done in a marked degree. Apparatus new to lighting had to be developed and it is now being rushed from the laboratories.

All materials and equipment in connection with the installation, under the personal supervision of Mr. Fritz, are being purchased locally wherever possible. Drawings for the installation were developed in the Institute of Light at Nela Park.

The installation will be completed in October. Engineers linked with the electrical industry in various sections of the United States are planning to attend the initial test of the installation.

Special feeders of the Great Western Power Company installed in connection with the lighting, are said by officials of the power company, to be larger than those installed for a town of 12,000 population.

PRIVATE GARAGES LEAD IN BUILDING OPERATIONS

More private garages than any other kind of structure were built in American cities of over 25,000 population in 1929. The total of such garages was 135,637, representing 44.2 per cent of all buildings built, according to the United States Bureau of Labor statistics. The cost was \$48,637,185, averaging \$359 for each garage. Second to garages were one-family dwellings, of which 104,798 were built, or 34.1 per cent of the total.

ENGINEER RESIGNS

J. B. Brokaw, since 1924 chief engineer of the Eastern Oregon Light & Power Co. of Baker, Oregon, has resigned to accept the position of assistant manager with the Peoples West Coast Hydro-Electric Corp., California Public Service Co. and Western States Utilities Co., with headquarters in Portland. These companies are subsidiaries of the Peoples Light & Power Co. of New York.

FIVE HUNDRED DAMS INSPECTED

Approximately 500 dams in California have been inspected during the past year under authorization of a law passed by the last Legislature, Edward Hyatt, state engineer, announces.

BANKRUPT LAWS MADE SUBJECT OF INQUIRY

President Hoover has asked Attorney-General Mitchell to make an extensive and vigorous investigation of bankruptcy laws and practices.

The inquiry will be under the direction of the solicitor-general, with the department of commerce co-operating.

Its purpose was outlined by the president as the formulation of legislation to correct present evils in the bankruptcy laws.

Hoover said he had been informed losses to business through bankruptcies had amounted to \$3,000,000,000 over a period of five years.

Present losses, he added, are approximately \$750,000,000 a year.

The text of the president's announcement follows:

"I have authorized the attorney-general to undertake an exhaustive investigation into the whole question of bankruptcy law and practice. It will be a most extensive and vigorous investigation. The work will be under the direction of the solicitor-general and he will be assisted by the department of commerce."

HIGHLY ORNAMENTAL STREET LIGHTING LUMINAIRE

As the first unit of a DeLuxe line of street lighting equipment, the Westinghouse Electric & Manufacturing Company has developed the Renaissance Luminaire, which is particularly applicable for installations in sections desiring a highly ornamental luminaire or for installations in the grounds or parks surrounding public buildings.

The metal parts of the Renaissance Luminaire are all cast aluminum. The canopy, which is equipped with an internal porcelain enameled reflector to redirect the upward light, is hinged to facilitate cleaning and relamping. An adjustable socket support and a porcelain enameled reflector are mounted in the lower casting.

The glassware used in the Renaissance Luminaire is a cylinder of either Monax or Cremax glass which is cushioned on the sides and bottom by heavy felt gaskets cemented to the metal frame work.

Thick luminaire, having all metal parts of aluminum, is light in weight; the complete fixture, including globe and socket, weighs only 160 pounds.

ENGINEERS TO REPORT ON POWER DEVELOPMENT OF LOS ANGELES

Approval has been given by the Los Angeles board of water and power commissioners of the three engineers selected by the Chamber of Commerce to make a survey and report on the city's proposed power development program from an engineering standpoint.

The bureau of power and light wishes to place on the ballot at the primary election, August 26, a measure authorizing a bond issue of \$19,000,000 as a part of a tentative three-year financial program totaling \$31,000,000, of which \$12,000,000 is to be derived from power revenue.

The engineers chosen are W. F. Durand, emeritus professor of mechanical engineering, Stanford University; R. W. Sorensen, professor of electrical engineering, California Institute of Technology; and A. V. Gullion, assistant chief engineer of the California railroad commission.

GENERAL ESTRADA COMPLETES ENGINEERING COURSE

General Enrique Estrada who served Mexico as minister of war under President Obregon, is planning to enlist again in his country's service, this time as an engineer, he told the United Press.

To this end he has completed a course in civil engineering at the University of Southern California, which has fitted him to take part in the future development of Mexico.

"I want to be of use to my country," Estrada said. "If I am not allowed to return to Mexico, then I shall go to some other Latin country where I can at least be of service to my race."

First, he said, he desires to get some practical experience as an engineer in the United States. The ex-warrior is chiefly interested in highway construction for he believes that development of transportation is the chief problem of his country today.

"Highways must come before any great amount of railroad construction can be hoped for," Estrada declared. "Mexico will have a finer railroad system in a few years, but meantime highways must be built."

So his studies at the University were concentrated upon power, highway construction and the use of concrete.

He wants to get experience in the United States because of the wide experimentation that has been conducted here, he said.

SMOKE ABATEMENT CAMPAIGN SUCCESSFUL AT SALT LAKE

For several years Salt Lake City, Utah, has been waging a smoke-abatement campaign in which the municipal authorities have had the co-operation of the U. S. Bureau of Mines and the University of Utah. The result has been to reduce the smoke from large industrial and heating plants 90 per cent. The campaign began in 1921 by the organization of a department of smoke inspection and abatement. An ordinance was drawn according to a plan recommended by the Bureau of Mines and a vigorous educational campaign was undertaken with all classes of fuel consumers. As a result of nine years' activity, although the smoke problem has not yet been definitely solved, it has been established that a large reduction can be made in the smoke from big industrial and heating plants and that even small heating plants can be successfully converted into smokeless types at small cost.

EMBARGO IS ORDERED ON RUSSIAN LUMBER

A general order by Assistant Secretary of Treasury Lowman was issued July 25 placing an embargo on pulp wood imports from Russia. A Treasury Department investigation of the labor used in producing lumber in Russia has progressed to a point where it has been determined almost conclusively that convict labor is largely used in the timber industry.

SCHOOL BUILDING ACTIVE

During a period of comparative slump for building trades in California, school-house building is going ahead at an unprecedented steep, and is providing work for many unemployed. Plans have been approved for 69 new school buildings in 23 California counties, the State Department of Education announces, the aggregate cost being more than \$1,500,000.

TWENTY-FIVE CITIES REPORTING LARGEST VOLUME OF PERMITS FOR FIRST HALF OF 1930 AND JUNE, WITH COMPARISONS*

	First Half, 1930	First Half, 1929	June, 1930	June, 1929
1. New York	\$203,622,725	\$679,965,306	\$34,810,752	\$37,179,718
2. Los Angeles	39,712,901	54,071,599	5,485,138	8,002,185

	\$575,099,011	\$1,285,177,013	\$95,339,455	\$133,268,423

* Compiled by S. W. Straus & Co.

STATES REPORT 32,522 MILES OF HIGHWAYS IMPROVED IN 1929

In 1929, the highway departments of the 48 States improved a total of 32,522 miles of State highways, according to reports received from the departments by the Bureau of Public Roads, U. S. Department of Agriculture. In the year they expended a total of \$910,485,291 for highways. They also reported a total of 314,136 miles of highways in the State systems at the end of 1929.

The total mileage improved is an increase of 3270 miles over the 1928 figure, and includes 7451 miles of graded and drained earth roads and 25,071 miles of new surfacing. New surfaces were placed on three types of roads — on unsurfaced roads, on roads already improved with a lower type of pavement, and on roads of the same type of surfacing, which is classed as reconstruction work. Of the 25,701 miles of new surfacing, 14,014 miles were laid on unsurfaced earth roads, 4337 miles on a lower type of surfacing, and 6720 miles on the same type of surfacing.

The types and mileages of new surfacings are as follows: Sand-clay and topsoil, 2399 miles; gravel, 12,183 miles; waterbound macadam (treated and untreated), 1642 miles; bituminous macadam, 1200 miles; sheet asphalt, 116 miles; bituminous concrete, 440 miles; Portland cement concrete, 6991 miles; and brick and other block pavements, 100 miles.

The total of 314,136 miles in the State systems represents an increase of 7694 miles over the 1928 figure, and includes 208,324 miles of surfaced highways, 28,553 miles of graded and drained roads, and 77,259 miles of unimproved and partly graded highways.

The surfaced mileage consists of 133,211 miles of low-type and 75,113 miles of high-type surfacing. The low-type surfaces include 15,442 miles of sand-clay and topsoil; 97,838 miles of gravel; and 19,331 miles of water-

bound macadam. High-type surfaces include 14,043 miles of bituminous macadam; 1498 miles of sheet asphalt; 5722 miles of bituminous concrete; 50,584 miles of Portland cement concrete; and 3266 miles of vitrified brick and other block pavements.

For construction and right-of-ways the State spent \$557,400,625; for maintenance, \$173,060,321; for equipment and machinery, \$18,056,509; for interest on outstanding bonds and notes, \$45,834,531, and for miscellaneous items, \$5,524,358. The States also paid out \$42,384,378 in retirement of the principal of outstanding bonds and notes and transferred \$45,791,374 to county and town funds for local roads. Other obligations assumed by the State highway departments amounted to \$22,433,195.

The total sum available to the 48 States for 1929 for State highway and bridge work under supervision of State highway departments (including bond payments and transfers to counties) amounted to \$1,914,775,026. This was made up of an unexpended balance of the previous year's funds of \$232,967,988, and an income of \$961,807,038. Of this sum, motor vehicle fees of \$278,092,734 and gasoline tax receipts of \$287,253,416 allotted to State highways represented more than 58 per cent. Sales of State bonds and notes issued for State highways amounted to \$161,229,297, or more than 16½ per cent of the income. Federal-aid fund allotments of \$7,752,691 represented 8 per cent. Highway taxes levied in several States amounted to \$11,431,349, and appropriations for highway funds by several States totaled \$60,305,631. Miscellaneous income was reported as \$11,726,508, and funds transferred from local authorities at \$74,190,412. The States reported an unexpended balance of \$284,289,735, at the end of 1929.

U. S. ROADS BUREAU TO TEST PAVEMENT DESIGN

To determine the relative efficiency of several designs of concrete pavements and to develop more exact knowledge of the amount and distribution of stress in pavement slabs resulting from loads applied to them in various positions, the Bureau of Public Roads of the U. S. Department of Agriculture is constructing numerous full-size concrete pavement slabs at the Experiment Farm of the department at Arlington, Va. The slabs will later be subjected to an elaborate series of tests.

Some slabs will be of uniform thickness throughout. Tests on these are expected to furnish information regarding the relation between loads applied at various points and the stress and strain of the concrete at all points in the loaded cross section, and the relation between load resistance and slab thickness.

Other slabs will be thickened at the edges and for a certain distance from the edges in accordance with the different designs now used in several States. In some slabs the thickening will be provided for by excavating the subgrade under their edges. In others the surface of the concrete slab will be raised at the edges so as to form a low, rounded lip curb. In still others the lip curb will be combined with a thickening of the edge of the slab at the bottom. Observations of these sections will furnish information regarding the relative load-resisting properties of designs now in use in various States.

The test slabs, which will be 20 ft. wide by 40 ft. long, will have central longitudinal and transverse joints. The object of one test is to determine the efficiency of various methods in use for transferring load across these joints.

Other experiments will include bond tests of dowel bars to determine the length of embedment necessary; the measurement of subgrade friction with particular attention to the effect of edge thickening of transverse joints on resistance to the sliding of the slabs on the supporting surface; and the measurement of the movement of the slab in the subgrade as a result of temperature and moisture changes.

The work of construction of the slabs has just begun, and the concrete will be laid in late summer. The tests will be under way in October when they may be observed by engineers from all parts of the world who will be in Washington from October 6 to 11 to attend the Sixth International Road Congress, to be held in this country at the invitation of the U. S. Government.

U. S. STEEL EARNINGS

United States Steel Corporation on July 29 reported total second quarter earnings of \$47,061,304 compared with \$49,615,397 in the March 31st quarter and \$71,955,461, the pace-time record, in the second three months of 1929. The figures are after the usual deductions for operating expenses.

Net income for the last quarter was \$32,126,717 against \$35,777,807 in the first three months of 1930.

Unfilled orders on hand June 30th totaled 3,968,064 tons in contrast with 4,570,653 on March 31st and 4,256,910 a year ago.

The directors declared the usual quarterly dividend of \$1.75 a share on common and preferred stock.

CITY MANAGER TO MARRY

Edwin Dames, Pacific Grove city manager, has filed application for a marriage license at Salinas. Dames is to wed Beatrice M. Donald, 27, of San Francisco.

Building News Section

APARTMENTS

Plans Being Completed.

APARTMENT HOTEL Cost, \$150,000
OAKLAND, Alameda Co., Cal. Lake-side District.

Six-story and basement steel frame and brick Class C apartment hotel 100x115 ft.; 162 rooms; 2, 3 and 4-room apts.)

Owner—Withheld.

Architect—Leonard H. Ford, 1435 Harrison St., Oakland.

Segregated figures will be taken in about 30 days.

Commissioned To Prepare Plans.

APARTMENTS Cost, \$200,000
LOS ANGELES, Cal. Rossmore Ave. bet Clinton and Melrose Sts.

Six-story and basement reinforced concrete apartments (72x130 ft.)
Owner—Andrew Browne, 525 S. Gramercy Place, Los Angeles.

Architect—A. I. Rouda, 502 Lissner Bldg., and C. Hugh Kirk, 522 S. Western Ave., Los Angeles, Associated.

Sub-Contracts Awarded.

APARTMENTS Cost, \$40,000
SAN FRANCISCO, S Greenwich St. near Franklin St.

Three-story frame and stucco apts. (36 rooms).

Owner—Mrs. Sarah Schwalbe.

Private Plans.

Contractor—Laughlin Const. Co., 421 Mills Bldg.

Plumbing and Steam Heating—T. H. Phillips, 176 Judson Ave.

Brick Work—Emil Hogberg, 666 Mission St.

Concrete Work—Acme Conc. Co., 2254 51st Ave.

Carpenter Labor (rough and finish)—E. Klemm, 1668 Market St.

Ornamental Iron, Structural Steel and Steel Sash—F. Kern and Sons, 517 6th St.

Rough Hardware—Central Hardware & Glass Co., 638 4th St.

Lumber—J. H. McCallum, 748 Bryant.

Contract Awarded.

APARTMENTS Cost, \$58,000
OAKLAND, Alameda Co., Cal. Erie St. near Mandanna Path.

Three-story and basement brick veneer apartments (15 2 and 3-room apts.)

Owner—Mrs. Louise Brain, 3600 Lakeshore Drive, Oakland.

Plans by Clay N. Burrell, American Bank Bldg., Oakland.

Contractor—Felix Sonmarstrom, 738 E-17th St., Oakland.

Owner Taking Bids.

APARTMENTS Cost, \$15,000
ALBANY, Alameda Co., Cal. Solano Avenue.

Two-story frame and stucco stores & apartments (4 3-room apts.; 2 stores).

Owner—Harry Brown, % T. J. Clancy Real Estate Co., 1723 Telegraph Ave., Oakland.

Plans by Clay N. Burrell, American Bank Bldg., Oakland.

Commissioned To Prepare Plans.

APARTMENTS Cost, \$500,000
LOS ANGELES, Cal. Sweetzer and Fountain Aves.

Limit-height steel frame and reinforced concrete apartments (193

rooms; 61x92 feet).

Owner—Chateau Dijon Holding Co.
Architect and Engineer—Sheet & Hillier, 328 Story Bldg., L. A.

Plans Completed.

APARTMENTS Cost, \$60,000
OAKLAND, Alameda Co., Cal. Orange and Pearl Sts.

Three-story and basement brick veneer apartments.

Owner—L. J. Newton, 1130 First Ave., Oakland.

Plans by Clay N. Burrell, American Bank Bldg., Oakland.

Plans Being Prepared.

APARTMENTS Cost, \$150,000
OAKLAND, Alameda Co., Cal. Location Withheld.

Six-story frame and brick apartments and stores (140 rooms; 3 stores).
Owner—Withheld.

Plans by Clay N. Burrell, American Bank Bldg., Oakland.

More definite information will be given in two weeks.

Sub-Bids Wanted.

APARTMENTS Cost, \$25,000
SAN MATEO, San Mateo Co., Cal. No. 219 Ninth Avenue.

Two-story frame and stucco apartments.

SAN FRANCISCO—Until August 4 P. M., under Proposal No. 616, bids will be received by Leonard S. Leavy, city purchasing agent, 273 City Hall,

to furnish and deliver 10,000 lbs. No. 12 solid triple braid I.L.D.W.P. wire for Department of Electricity. Specifications obtainable from above.

OAKLAND, Cal.—Until August 13, 8 P. M., bids will be received by John H. Kimball, secretary, East Bay Municipal Utility District, 512 16th St., to furnish spare parts for equipment of Pardee Power Plant. Estimated cost, \$5,500. Specifications obtainable from above.

July 29, 1930

ANAHEIM, Orange Co., Cal.—Until August 12, 8 P. M., bids will be received by Edw. B. Merritt, city clerk, to furnish copper wire and cable under Spec. 50, following:

Item 1.—Weatherproof Wire, Section 1 of Specifications No. 50:
12,000 lbs. No. 2-0, 7 strand;
800 lbs. No. 4-0, 7 strand;
2,000 lbs. No. 2, solid;
4,000 lbs. No. 4, solid;
3,000 lbs. No. 6, solid;
2,000 lbs. No. 8, solid;
2,000 lbs. No. 10, solid.

Item 2.—Rubber Covered Wire, Section 2 of Specifications No. 50:
1,000 ft. No. 10, solid, black;
1,000 ft. No. 10, solid, white.

Item 3.—Lead Covered Cable, Section 4 of Specifications No. 50:
2,500 ft. No. 8, solid, single conductor, for 2500 volts.

Separate proposals will be received and separate awards may be made for the three items.

ALAMEDA, Alameda Co., Cal.—See "Government Work and Supplies," this issue. Contemplated construction for proposed Alameda Air Base for Federal Government.

Plans Being Completed.

POWER HOUSE Cost, \$30,000
MODESTO, Stanislaus Co., Cal.
Stanislaus County Hospital.

Two-story reinforced concrete and hollow tile power house (unit 3).
Owner—County of Stanislaus.

Architect—Russell Guerne De Lappe,
1710 Franklin St., Oakland.

Bids will be taken in two or three weeks.

PUBLIC BUILDINGS, FIRE HOUSES AND JAILS

Completing Revised Plans.

AUDITORIUM Cost, \$1,050,000
PASADENA, Los Angeles Co., Cal.
Green St. and Garfield Ave
Three-story steel frame Class A municipal auditorium (200x306 ft.; capacity 3000).

Owner—City of Pasadena.

Architect—Edwin Bergstrom, 1135 Citizens National Bank Bldg., Los Angeles, and Bennett & Haskell, 311 First Trust Bldg., Pasadena, Associated.

BERKELEY, Alameda Co., Calif.—August Vollmer, chief of police, in his annual report submitted to City Manager Hollis R. Thompson, recommends erection of a new police headquarters and jail to meet the present expansion of the department. Vollmer states that the present office and jail is ill-adapted to the character of work now being performed by the department; that the office has poor ventilation and insufficient light; that the jail and headquarters are taxed to capacity and that the jail does not allow the segregation of prisoners. The police chief recommends that the new jail and headquarters include an assembly room, dressing room and locker room for officers, gymnasium, shooting gallery and red room.

BERKELEY, Alameda Co., Calif.—Fire Chief George Haggerty in his annual report just submitted to City Manager Hollis R. Thompson, recommends the erection of a new fire station in the Northbrae or Arlington District.

OAKLAND, Alameda Co., Calif.—All bids received by City Park Commission, to furnish and install two public address speakers, one in Alameda Park and one in Diamond Park were rejected. Lowest bid was submitted by W. R. Buckridge, at \$1295.

New bids will not be called for at this time.

NAPA, Napa Co., Cal.—City council approves specifications for painting and redecorating council chambers for which \$500 is available. Bids will be asked from local contractors.

EUREKA, Humboldt Co., Cal.—Until August 12, 2 P. M., bids will be received by Fred M. Kay, county clerk to construct wooden bridge across Mosley Slough in Road Dist. No. 3. Certified check 10% required with bid. Plans obtainable from county surveyor and on file in office of clerk.

SAN FRANCISCO.—The Hoover-Young San Francisco Bay Bridge Commission has selected the route from Rincon Hill in San Francisco to Goat Island, then by span and trestle to the Key Route fill and along the fill to Yerba Buena Ave. in Emeryville, terminating at San Pablo Ave. in Oakland. The cost of construction is estimated at \$72,000,000. It will require from four to five years to complete the project. Commencing next Monday in the offices of the State Railroad Commission public hearings will be held in connection with the project.

NAPA, Napa Co., Cal.—As previously reported, bids will be received by James A. Daly, county clerk, August 12, 10 A. M., to construct arch extension to Highway bridge near the Myrtle Dale Hot Springs. Project involves:

- (1) 80 cu. yds. struc. excav. unclass.;
- (2) 300 cu. yds. fill approach;
- (3) 142 cu. yds. class A concrete;
- (4) 10,200 lbs. reinforcing steel.

Plans obtainable from County Engineer E. P. Ball at Napa.

REDWOOD CITY, San Mateo Co., Cal.—As previously reported, bids will be received by E. E. Myers, city clerk, August 11, 8 P. M., to construct six bridges in various sections of the city, involving:

- (1) 550 cu. yds. concrete;
- (2) 59,100 lbs. reinf. steel;
- (3) 1,890 cu. yds. excavation;
- (4) 822 cu. yds. filling and backfill;
- (5) 1,405 sq. ft. asphalt. conc. pave.;
- (6) 315 lin. ft. 2-in. galv. iron railing;
- (7) 10 catchbasins;
- (8) 50 lin. ft. 6-in. black dipped steel pipe;
- (9) 50 lin. ft. 8-in. do.;
- (10) 32 lin. ft. 12-in. galv. corr. steel pipe.

Estimated cost \$15,000. Certified check 10%, payable to city required with bid. Plans obtainable from C. L. Dimmitt, city engineer.

LYON COUNTY, Nevada.—As previously reported, bids will be received August 6, 2:30 P. M., by State Highway Commission, Carson City, to construct reinforced concrete bridge, including approaches, over East Walker River at a point 7 1/2 miles south of Yerington. Project involves: 53 cu. yds. excav. unclass.; 300 cu. yds. excav. unclass.; 300 cu. yds. struc. excav.; 40 cu. yds. load, haul and spread gravel; 225 cu. yds. class A concrete; 27,600 lbs. reinf. steel; 750 lbs. bearing plates and rollers; 4 monuments; 2 posts for federal aid markers. Crushed rock or gravel for surfacing roadway furnished by the state in stockpile to the right of station 394 plus 50. Plans obtainable from S. C. Durkee, state highway engineer, Carson City, on deposit of \$15, of which \$10 is returnable. Plans on file in office of U. S. Bureau of Public Roads, 461 Market St., San Francisco. Certified check 5% required with bid.

REDWOOD CITY, San Mateo Co., Cal.—Bids to construct reinforced concrete culverts or bridges in various sections of the city will be opened by the city council August 11, 9 A. M. It was previously reported these bids would be opened August 11, 8 P. M. Quantities involved in the project were published in our issue of July 26.

DREDGING, HARBOR WORKS & EXCAVATIONS

SACRAMENTO, Cal.—City Manager James S. Dean announces that the necessity for holding next year's budget to absolutely essential expenditures will prevent the inclusion of an appropriation for the development of a yacht harbor in the Sacramento River. He suggested that persons interested in having a harbor developed might form an organization and raise the money privately to carry out the project, which, it is estimated, would cost approximately \$50,000.

SACRAMENTO, Cal.—Until August 23, 3 P. M., under Circular Proposal No. 31-30, Specifications No. 2070, bids will be received by U. S. Engineer Office, California Fruit Bldg., Sacramento, for dredging approximately 775,000 cubic yards of material in New York Slough. Specifications and further information obtainable from above office.

OAKLAND, Cal.—American Dredging Co., 255 California St., San Francisco, at \$23.21 cu. yd. submitted low bid to U. S. Engineer Office, San Francisco, for dredging in Oakland Harbor. Complete list of bids, all taken under advisement, follows:

American Dredging Co.	23.21
United Dredging Co.	27.88
San Francisco Bridge Co.	30.00
Hydraulic Dredging Co.	33.00

Estimate cost of government engineer with government plant and hired labor, 19.29 cu. yd.

LOS ANGELES, Cal.—Until August 26, 3 P. M., bids will be received by U. S. Engineer Office, 751 S. Figueroa St., for repairing revetment at Reservation Point in Los Angeles Harbor. Specifications obtainable from above.

ALAMEDA, Alameda Co., Cal.—See "Government Work and Supplies," this issue. Contemplated construction for proposed Alameda Air Base for Federal Government.

OAKLAND, Cal.—Until Aug. 4, 4:30 P. M., bids will be received by G. B. Hegardt, secretary, City Port Commission, 424 Oakland Bank Building, for levees for hydraulic fill, located at the west end of 14th St., involving 7,000 lin. ft. earthen dykes, in outer harbor area, approx. 5-ft. in height with a 3-ft. beam on natural slope.

Certified check 10% required with bid. Bond in full amount of the contract price required of successful bidder. Specifications obtainable from secretary on deposit of \$5, returnable.

IRRIGATION PROJECTS

PHOENIX, Ariz.—Verde River Irrigation & Power District, Security Bldg., Phoenix, has received from the Secretary of the Interior, approval of rights-of-way for the Verde project on 80,000 acres of the district lands. The project proposes to develop 85,000 H. P., with necessary canals, laterals, drains, etc. The principal structures planned are a reservoir of 950,000 acre feet at Camp Verde, a dam, at Horseshoe on the Verde River, to impose 240,000 acre feet, and various concrete lined canals and laterals.

STREET LIGHTING SYSTEMS

SANTA BARBARA, Cal.—Until August 7, 1:30 P. M., bids will be received by S. B. Taggart, city clerk, to improve West Cabrillo Blvd., bet. southwest line of State Street extended southeast and the southwest line of Castillo St. extended southeast involving installation of cast iron standards, with certain concrete foundations, lantern units, series transformers, splicing potheads, lamps, conduits, cables, wires, etc., under 1911 Act. Certified check or bond for 10% required with bid. Plans on file in office of clerk.

SANTA BARBARA, Cal.—Until 1:30 P. M., August 7, new bids will be received by the city council to construct lighting system in West Cabrillo Blvd., between State St. and Castillo St., involving cast iron standards, with all appurtenances; 1911 Act. E. B. Brown, city engineer. S. B. Taggart, city clerk. Previous bids rejected.

GLENDALE, Los Angeles Co., Cal.—Until August 19, 3 P. M., bids will be received by City Advisory Committee (Frank C. Ayers), 901 S. Brand Blvd., for equipment in connection with proposed lighting system in

Brand Blvd., involving 254 ornamental combination lighting standards; 608 lighting units. Of the lighting standards, 242 will be required to withstand a side stress of 2000 lbs. at a point 36 ft. above the sidewalk level, and 12 will be required to withstand a similar stress at a point 42 ft. above the sidewalk level. The standards are to be approx. 44 ft. in height above the sidewalk elevation. Bids are desired for the complete standard delivered on the job, and also separately for the pole alone to carry the weight and stress of trolley and other railroad wires, for the jacket alone covering such pole for ornamental lighting purposes; for the lighting unit alone; for the glassware; for the refractor or reflector; for auto or insulating transformer. The estimated cost of the complete system is between \$200,000 and \$250,000. The project was appointed by the city council to report a recommendation upon which the city council is to base its plans and specifications. Further information obtainable from above.

ALAMEDA, Alameda Co., Cal.—See "Government Work and Supplies," this issue. Contemplated construction for proposed Alameda Air Base for Federal Government.

REDWOOD CITY, San Mateo Co., Cal.—City council has started proceedings to install street lighting system in Main St. from Maple St. to El Camino Real, plans having been completed by C. L. Dimmitt, city engineer.

MACHINERY AND EQUIPMENT

GILROY, Santa Clara Co., Calif.—Until August 7, 2:30 P. M., bids will be received by E. E. Eustice, clerk, Gilroy High School District, to furnish and deliver one Reo Modified 2-Ton School Bus Chassis, and for one Barshaw & Falerio School Bus Body for said Reo Modified 2-Ton School Bus Chassis. Further information obtainable from clerk.

VALLEJO, Solano Co., Calif.—Elgin Co., at \$7500, less \$1610 allowance for old sweeper, awarded contract by city council to furnish and deliver a motor pick-up street sweeper. Western Road Machinery Co. only other bidder, offering an allowance of \$1500 on the old machine.

EUREKA, Humboldt Co., Cal.—Until August 12, 2 P. M., bids will be received by Fred M. Kay, county clerk to furnish and install certain laundry equipment for County Hospital. Newton Ackerman, architect, 102 W 4th St., Eureka. Certified check 10% required with bid. Specifications on file in the office of the county clerk.

CHINO, San Bernardino Co., Cal.—Until 6:30 P. M., August 8, bids will be received by Chino High School for furnishing a school bus body.

RAILROADS

LAS VEGAS, Nev.—Union Pacific Railway, according to reports, will be the only railway to construct and operate the proposed line to Boulder Dam site, due to its strategic position in Las Vegas. Bids, however, will probably be asked on a competitive basis. The line will be operated under government contract.

ALAMEDA, Alameda Co., Cal.—See "Government Work and Supplies," this issue. Contemplated construction for proposed Alameda Air Base for Federal Government.

LOS ANGELES, Cal.—Robt E. McKee, 125 Central Bldg., awarded contract by Santa Fe Railway for grade separation work on the railway company's right of way at Avenue 12 and 26 in Los Angeles, involving construction of overhead structures at these points with reinforced concrete abutments and retaining walls and steel bridge work. The piers of the company's bridge across the Los Angeles river will be raised.

NORTHERN CALIFORNIA—W. A. Lechtel Co., 206 Sansome St., San Francisco, and Utah Construction Co., Ogden, Utah, (with branch office in Helian Bldg., San Francisco), bidding jointly awarded contract of Western Pacific Railroad, Mills Bldg., San Francisco, to construct 111 miles of railroad from Keddie, Plumas County, to Bieber, Lassen County, this unit being the Western Pacific's portion of the joint line from Keddie to Klamath Falls, Ore., in connection with the Great Northern R. R. The cost of construction is approximately \$10,000,000. The project involves:

- 392 acres heavy, 394 acres medium clearing;
- 476 acres light, and 217 acres sagebrush;
- 1,264,354 cu. yds. solid rock excavation;
- 788,148 cu. yds. loose rock excavation;
- 779,903 cu. yds. common excavation;
- 256,626 cu. yds. loose rock borrow;
- 560,291 cu. yds. common borrow;
- 3,655,771 sta. yd. overhaul;
- 6500 ft. tunnels, 17x22 ft.;
- 5100 tons struct. steel (vland. and bridges);
- 215,000 ft. B. M. Douglas Fir;
- 3300 ft. piling, 1733 cu. yds. concr. (foot);
- 416,971 Douglas fir cross ties;
- 17,845 tons 85-lb. rail;
- 354,000 cu. yds. gravel or volcanic cinders, also steel and wooden tanks, sidings, line protection.

LOS ANGELES, Cal.—Bids will be asked shortly by county supervisors to furnish 1,200 r.r. ties for Flood Control Department; to be 6x8-in. by 8-ft. No. 1 incised and creosoted O. P. f.o.b. truck's plant of bidder at price per M. B. M.

LOS ANGELES, Cal.—Bids will be asked shortly by county supervisors to lay railway track and furnish and place rip-rap along west levee of Los Angeles river from Louise St. to 52nd St. near North Long Beach, involving: (a) 2,000 ft. r.r. track; (b) 12,500 tons rip-rap.

ROWENA, Oregon.—J. F. Shea Co., Henry Building, Portland, at \$130,000, awarded contract by Oregon-Navigation Railroad and Navigation Co. to construct tunnel in connection with changing route of main line about two

FIRE ALARM SYSTEMS

PHOENIX, Ariz.—Until 10 A. M. August 13, bids will be received by the city manager, Geo. H. Todd, for traffic signal apparatus. All apparatus to operate at 220 volts 60 cycle. Bidders to quote unit prices on articles mentioned under each item, f.o.b. city hall, Phoenix, Ariz.

Item No. 1.—Seventeen bracket type one-way traffic signals, complete with brackets, pile cables, conduits and other fittings, "no left turn" signs, etc., equal to Crouse Hinds Type T. S. V. 11-signal. With lenses lettered as directed. Dimensions of brackets and pole clamps, as later directed.

Item No. 2.—Five traffic signal timers equal in every respect to General Electric Co. T. S. M. 2 A-1-2. Certified check, 10%.

FIRE EQUIPMENT

BERKELEY, Alameda Co., Cal.—Fire Chief George Haggerty, in his annual report, just submitted to City Manager Hollis R. Thompson, recommends the purchase of an \$5 ft. aerial truck, new chief's auto, a 750 gal. pumper and reconditioning of apparatus which has been in service for the past 16 years.

RESERVOIRS AND DAMS

IONE, Amador Co., Calif.—George French, Jr., Cherokee Lane, Stockton, at \$14,300 awarded contract by State Department of Public Works, Division of Architecture, Sacramento, to construct reinforced concrete dam for Preston School of Industry near Ione; dam will measure 192 ft. at the crest and will involve approx. 600 cu. yds. of reinforced concrete.

LAKE CO., Cal.—Martin Judge, Jr., & Co., Crocker First National Bank Bldg., San Francisco, seeks authority of State Department of Public Works, Division of Water Rights, to appropriate 250 cu. ft. per second from the north fork of Cache Creek in Lake County, work involving: concrete dam, 160 ft. high, 600 ft. long on top with capacity of 150,000 ac. ft. Pipe line—235,000 lin. ft. 48-in. concrete pipe. Total estimated cost, \$3,000,000. Authorization is also sought for an appropriation of 175,000 ac. ft. per annum storage for irrigation of 50,000 acres of land in Yolo and Solano counties. Work involves the following: Storage Reservoir—To be located in Indian Valley. Construction of 90,000 lin. ft. of ditch to be 20-ft. wide on top, 8 ft. wide on bottom and with 4-ft. depth of water. Total estimated cost \$1,000,000.

PIPE LINES, WELLS, ETC.

SAN MATEO, San Mateo Co., Cal.—Until August 4, 8 P. M., bids will be received by E. W. Foster, city clerk, to construct sewer in Poplar Ave. bet. Delaware and Humboldt Sts. Certified check 10% required with bid. Plans on file in office of clerk.

STOCKTON, San Joaquin Co., Cal.—Pacific Gas and Electric Co. has authorized \$5429 expenditure to install gas mains in the Boggs Tract, involving 3372-ft. 4½-in. pipe.

OAKLAND, Cal.—Until Aug. 4, 4:30 P. M., bids will be received by G. B. Hagar, secretary, City Port Commission, 424 Oakland Bank Building, to furnish pontoon pipe, delivered Oakland Harbor Terminal:

23 pieces 20-in., 40-ft. long;
2 pieces 20-in., 48-ft. long.

Certified check 10% required with bid. Bond in full amount of the contract price required of successful bidder. Specifications obtainable from secretary on deposit of \$5, returnable.

SEWERS AND SEWAGE DISPOSAL PLANTS

OAKLAND, Calif.—City council has appropriated \$12,000 to finance a 600-ft. extension to the sanitary sewer at the foot of 5th Ave. Walter N. Frickstad is city engineer.

SAN FRANCISCO—Bureau of Engineering, Department of Public Works, completes plans to sewer Brussels St. bet. Mansell and Ward Sts., involving: 510 lin. ft. 8-in. V. C. P. sewer; 485 lin. ft. 12-in. do.; 28 x 6-in. Y or T branches; 23 12x6-in. do.; 7 brick manholes. Estimated cost, \$4,225.

LONG BEACH, Calif.—City council has deferred action on a storm drain system in District No. 8 for about 3 months. New plans, prepared by City Engineer Herbert Paterson, have reduced the estimated cost from \$800,000 to \$575,000, due to the participation of Signal Hill to the extent of \$150,000 and \$75,000 from the oil funds.

NEWPORT BEACH, Orange Co., Cal.—Currie Engineering Co., Anderson Bldg., San Bernardino, commissioned to prepare plans for proposed \$165,000 sewage disposal plant for city. Plant will serve a population of 10,000.

July 29, 1930

ALAMEDA, Alameda Co., Cal.—See "Government Work and Supplies," this issue Contemplated construction for proposed Alameda Air Base for Federal Government.

LOS ANGELES, Cal.—P. J. Ajmadi, 3028 Gilroy St., at \$72,200 submitted low bid to county supervisors to construct san. sewers in Blanchard St. (City Terrace Unit No. 2), involving 37,410 ft. 8-in. vit. main sewer, \$1; 1070 ft. do with concrete cradle, \$150; manholes, etc. . .

STOCKTON, San Joaquin Co., Cal.—E. A. Burns, 1215 North Baker St., Stockton, at \$1368.77 awarded contract by city council to construct sanitary sewer system consisting of main sewer, wye branches, manholes with automatic flush tanks in E Scott Avenue.

MADERA, Madera Co., Cal.—Andrew M. Jensen, consulting engineer, 65 Post St., San Francisco, commissioned by city trustees to prepare plans for sewer system extension for which bonds of \$20,000 have been voted to finance. The bonds are yet to be marketed.

SANTA CRUZ, Santa Cruz Co., Cal.—City council declares intention (460-C) to construct vitrified clay pipe main sanitary sewer with wye branches and brick manholes in Plateau Ave., bet. Woodrow Ave. and Columbia Street, 1911 Act. Hearing Aug. 18. S. A. Evans, city clerk. Roy Fowler, city engineer.

WATER WORKS

LAFAYETTE, Contra Costa Co., Cal.—Steps will be taken at once to organize the Lafayette Water District which proposes to tie-in with the East Bay Municipal Utility District for a water supply. Estimates of cost for a pipe line are now being prepared.

Geo. Koster, 2355 Leavenworth St., San Francisco, is in the market for a water cooling system to be installed at Calistoga, Napa County. System would have a capacity of 25,000 gallons per day. Natural temperature 150 deg. It is proposed to reduce to natural water temperature. All communications must be made by mail to Mr. Koster at above address.

SAN FRANCISCO—Dunham, Carrigan and Hayden Co., Kansas and Division Sts., awarded contract by Board of Supervisors, under Proposal No. 613, to furnish standard wrought steel pipe, galvanized with threads and couplings, random lengths; delivery L. O. B. Salada Beach, San Mateo County, as follows:

13,530 ft. 2 -in.	19.08
13,250 ft. 1½-in.	14.18
525 ft. 4 -in.	59.32
1,805 ft. 3 -in.	39.45
7,810 ft. 2½-in.	30.17

MERCED, Merced Co., Calif.—Until August 7, 8 P. M., bids will be received by Dr. N. S. Peck, clerk, Merced Union High School District, to extend present Livingston municipal water supply to serve the Livingston High School property. Certified check 10% payable to clerk required with bid. Plans obtainable from W. E. Bedesen, engineer, Shaffer Bldg., Merced.

WHITTIER, Los Angeles Co., Cal.—Until 7:30 P. M., Aug. 4, bids will be received by the city council for furnishing equipment and labor for trenching and backfilling 3000 ft. ditch suitable for installation of 30-in. water pipe line. Also alternate proposal for laying and caulking approximately 1,100 ft. class C cast iron pipe. Plans obtainable from M. R. Bowen, water superintendent. Certified check or bond, 10%. Mrs. Debbie E. Allen, city clerk.

BRAWLEY, Imperial Co., Calif.—Burns-McDonnell-Smith Eng. Corp., 422 Western Pacific Bldg., Los Angeles, has estimated the approximate cost of the proposed filtration plant for the municipal water system at \$65,000.

WHITTIER, Los Angeles Co., Cal.—Until 7:30 P. M., Aug. 4, bids will be received by the city council for furnishing at trench side approximately 1100 ft. 30-in. class C cast iron pipe. Also alternate bid for furnishing at trench side 30-in. high tensile cast iron pipe. For further particulars see M. R. Bowen, water superintendent. Certified check or bond 10%. Mrs. Debbie E. Allen, city clerk.

FULLERTON, Orange Co., Calif.—City Engineer C. M. Thorpe preparing estimates of cost for a booster pump and elevated tank for the N Cypress Ave. district.

PALMDALE, Los Angeles Co., Cal.—Until August 22, 5 P. M., bids will be received by Palmdale Irrigation District to furnish 8,000-ft. 14-gauge, 12-in. welded Toncan iron pipe with valves, etc. Specifications obtainable from H. P. Schoeller, engineer for district.

PALMDALE, Los Angeles Co., Cal.—Until August 22, 5 P. M., bids will be received by Palmdale Irrigation District, to furnish and install one 1,350-G. P. M. turbine pump, complete with motor; one 900-G. P. M. horizontal booster pump complete with motor. Specifications obtainable from H. P. Schoeller, engineer for district.

FRESNO, Fresno Co., Calif.—Until August 15, 2 P. M., bids will be received by D. M. Barnwell, county clerk to construct Water distributing system in Fresno County Water Works District No. 1. Project involves: 7000 ft. 4-in., 25,000 ft. 6-in. and 7000 ft. 8-in. pipe line. Bonds of \$55,000 voted to finance. Perry F. Brown, engineer, 512 Griffith - McKenzie Bldg., Fresno. Certified check 10% payable to Fresno County for use and benefit of Fresno County Waterworks District No. 1 or bidder's bond required with bid. Plans obtainable from engineer on deposit of \$5, returnable.

ONTARIO, San Bernardino Co., Cal.—Until August 4, 8 P. M., bids will be received by D. B. Wynne, city clerk, to furnish 10-in. welded steel pipe, 12-gauge and necessary fittings. Specifications obtainable from above.

PLAYGROUNDS & PARKS

SAN FRANCISCO—Tennis Club of San Francisco is seeking a site for a new clubhouse and tennis courts. The proposal to establish the club at the southwest corner of Laurel Hill Cemetery has been abandoned due to the

protests of property owners and the failure of the City Planning Commission to rezone the district to permit such construction.

MILL VALLEY, Marin Co., Calif.—Until August 18, 8 P. M., bids will be received by Francis P. Seitz, clerk, Mill Valley School District, to pave portion of the playground at the Old Mission School, specifically that part known as Utility Court. Specifications obtainable from the clerk.

SAN JOSE, Santa Clara Co., Calif.—W. L. Biebrach, president of the city council, has been authorized to select a committee of 15 citizens to make a recreational survey with the object of establishing a recreation department in the city government to develop a system of supervised playgrounds.

SAN JOSE, Santa Clara Co., Calif.—Until August 4, 8 P. M., bids will be received by C. B. Goodwin, city manager, to construct asphalt concrete tennis courts in south side of Home street, between Delmas and Willis Aves. Certified check 10% payable to city required with bid. Specifications on file in office of J. J. Lynch, city clerk, and Wm. Popp, city engineer.

STREETS AND HIGHWAYS

REDWOOD CITY, San Mateo Co., Calif.—City council rejects bid of W. A. Dontanville, Salinas, at \$4,493 (M-9) to improve Maple Street bet. Main Street and Dillers Addition, involving grading; 6-in. hydraulic cement concrete surface pavement; 3-in. broken stone base and 1-in. sand cushion; hydraulic cement concrete curbs; 4-inch hydraulic cement concrete sidewalks; two hydraulic cement concrete storm water inlets; cement concrete gutters. Bond Act 1915. Improvement Act 1911. New bids will be opened August 11, 8 P. M. Specifications obtainable from C. L. Dimmitt, city engineer.

PLUMAS COUNTY, Calif.—Until August 14, 2 P. M., bids will be received by C. H. Sweetser, district engineer, U. S. Bureau of Public Roads, 461 Market St., San Francisco, to furnish and apply oil to 12,046 miles of Quincy-Beck with National Forest Highway, Plumas National Forest, involving:

- (a) 12,046 miles mixing oil treated crushed rock surfacing;
- (b) 181,500 gals. asphaltic oil, furnished and applied.

Specifications obtainable from engineer on deposit of \$15, returnable, checks for same to be made payable to Federal Reserve Bank of San Francisco.

MANHATTAN BEACH, Los Angeles Co., Calif.—Until Aug. 7, 8 P. M., bids will be received by M. J. Crandall, city clerk, to improve El Camino Real, between the north and south city limits, involving in the main 159,600 sq. ft. 4-in. asphalt conc. base with 2-in. National asphalt conc. surface; 137,000 cu. yds. excavation including shaping and removal of trees and stumps; curbs, walks, gutters. Work under A and I No. 1. Plans obtainable from engineer, L. C. Lull, 1127 W. Washington St., Los Angeles.

EUREKA, Humboldt Co., Calif.—County Supervisors petitioned to construct new road from McCann to Alderpoint, following the west bank of the Eel river. Preliminary estimates place the cost at \$22,500. Frank Kelly, county surveyor.

BERKELEY, Alameda Co., Calif.—City Engineer Harry L. Goodridge, preparing specifications for pathway

between Hilldale and Euclid Aves., at the Regal Road.

SALINAS, Monterey Co., Calif.—W. A. Dontanville, Salinas, at \$53,616.61 awarded contract by city council to widen California Ave. bet. El Camino Real and Alma St., involving curbs, gutters, walks; paving.

PLACER COUNTY, Calif.—Following bids received July 30 by State Highway Commission to grade and pave with Portland cement concrete 1.7 miles through Lincoln:

N. M. Ball, Porterville.....	\$62,253
Hannahan Co., San Francisco.....	64,807
C. W. Woods, Stockton.....	66,073
Mathews Const. Co., Sacto.....	66,205
Fredrickson and Watson Const. Co., Oakland.....	66,692
Clark & Henery, San Francisco.....	76,832

Bids held under advisement.

RICHMOND, Contra Costa Co., Calif.—Until August 11, 8 P. M., bids will be received by A. C. Faris, city clerk, (476) to improve Pullman Ave. bet. Cutting Blvd. and Panhandle Blvd., and Panhandle Blvd. bet. Pullman Ave. and Del Norte Place, and portions of Cutting Blvd., 45 th, 47th and Monterey Sts., involving grading; pave with 4-inch broken stone cushion with 3-course asphalt concrete pavement, consisting of 2-course base of 6-inch asphalt conc. and 2-in. asphalt conc. surface; cement concrete curbs with gully steel curb bars; cement concrete gutters, walks; corr. iron pipe inlets; corr. iron and cement concrete culverts. 1911 Act. Certified check 10% payable to city required with bid. Plans obtainable from E. A. Hoffman, city engineer.

SAN BERNARDINO CO., Calif.—Following bids received July 30 by State Highway Commission to grade and surface with oil treated crushed gravel or stone, 9.5 miles between 1½ miles southwest of Dunn and Cornish Valley:

H. W. Rohl Co., Los Angeles.....	\$187,325
Southwest Paving Co., L. A.....	188,937
C. U. Heuser Co., Glendale.....	210,307
New Mexico Const. Co., Albuquerque, New Mexico.....	210,877

Bids held under advisement.

MARYSVILLE, Yuba Co., Calif.—Central-California Roads Co., 28th and Poplar Sts., Oakland, awarded contract by city (37) to improve portions of 12th St. E. St., R. St., involving removal of concrete curbs and sprinkler system, remove trees, grading; pave with 2½-in. Warrentite-Bit surface; conc. curbs, gutters.

ALTURA, Modoc Co., Calif.—City council declared intention (3) to improve Main St. bet. Carlo and Twelfth Sts. Project involves:

- (1) 29,000 cu. yds. asphalt conc. pave.
- (2) 4,600 cu. yds. crushed rock sub-base;
- (3) 8,000 linear feet curbs and gutters (hyd. cement conc.);
- (4) 4,600 sq. yds. hyd. cement concrete sidewalks;
- (5) 1,300 lin. ft. 4- and 6-in. water mains with fittings.

1911 Act. Bond Act 1915 City will pay \$25,000 of total cost from General Fund in city treasury. Bidding Aug. 4. E. E. Elliott, city clerk. S. A. Musher, city engineer.

ALAMEDA, Alameda Co., Calif.—See "Government Work and Supplies," this issue. Contemplated construction for proposed Alameda Air Base for Federal Government.

SHASTA CO., Cal.—State Highway Commission rejects lone bid of A. Teichert and Son, Sacramento, at \$27,789 to apply seal coat and bituminous surface treatment on 35.8 miles of highway, of which 18.8 miles lies between Lamoine and north boundary and 17 miles between Montgomery Creek and the Haynes Ranch. New bids will be asked shortly.

SAN FRANCISCO.—Until August 11, 10 A. M., under Schedule No. 928-31, bids will be received by Quartermaster Supply Officer, Fort Mason, to furnish and deliver 500 bbls. road asphalt, grade C, 2-30 penetration. Further information obtainable from above.

NAPA, Napa Co., Cal.—As previously reported, bids will be received by James A. Daly, county clerk, August 12, 10 A. M., to grade and surface road through Peryessa Valley. Project involves grading, nine miles in length. Approximate quantities involved follow:

- (1) 23,000 cu. yds. grading, unclass.;
- (2) 9,000 cu. yds. crushed rock surfacing, in place.

Specifications obtainable from County Engineer E. P. Ball at Napa.

EUREKA, Humboldt Co., Cal.—Until August 12, 2 P. M., bids will be received by Fred M. Kay, county clerk, to furnish and deliver 1,000 or more cubic yards of crushed rock on the Fickle road near Arcata, in Road District No. 5. Certified check 5% required with bid. Specifications obtainable from county surveyor at Eureka.

KING CITY, Monterey Co., Cal.—Due to protests of property owners, city council has abandoned proceedings under Res. of Intention No. 5, to improve portions of Mildred Ave., 7th and Bassett Sts., etc., involving grading; 5-in. hyd. conc. pave.; hyd. cem. conc. curbs, catchbasins, culverts.

PACIFIC GROVE, Monterey Co., Cal.—City council declares intention (3225) to improve 3rd, 5th, 7th, 8th, 9th and 16th Sts., between Ocean View Ave. and Lighthouse and 4th and 6th Sts. bet. Central and Lighthouse Aves. involving cement concrete gutters with integral curbs and oiled macadam surface, using "Duremulse" emulsified asphalt; surfacing to be laid on a 4-in. crushed rock base). 1911 Act. 1915 Bond Act. Hearing Aug. 21. W. G. Stubbs, city clerk.

SAN MATEO COUNTY, Cal.—Basich Bros., Title Insurance Bldg., Los Angeles, successful bidder at \$402,982, to grade and pave with cement concrete, 5.2 miles between South San Francisco and Burlingame, have awarded a contract to the South City Lumber & Supply Co., South San Francisco, to furnish rock, sand, cement and lumber in connection with the project. The work involves: 85,000 cu. yds. imported borrow; 300 cu. yds. struc. ex-

cavation; 123,100 sq. yds. subgrade for pave.; 32,050 cu. yds. class A Portland cem. conc. (pave.); 1025 tons asphalt conc.; 14,500 tons crusher run base (shoulders); 200 cu. yds. class A Port. cem. conc. (struc.); 876,000 lbs. bar reinf. steel (pave. and struc.); 2100 bbls. light fuel oil; 300 tons screenings; 2250 lin. ft. furnishing untreated Douglas fir piles; 50 each driving Douglas fir piles; 2.5 M ft. b.m. No. 1 common Douglas fir timber; 3000 tons light rip-rap; 660 each, remove add reset timber guide posts; 277 sta. finish rdwy.

SOLANO COUNTY, Calif.—A. Mitchell, Sacramento, submits low bid to district engineer, state highway commission, to construct property fences, etc., between Creston and Vacaville. See page five for tabulated listing of bids on this project.

LYON COUNTY, Nevada—As previously reported, bids will be received August 6, 2 P. M., by State Highway Commission, Carson City, to grade, construct structures and place surfacing material on 23.22 miles between 3 miles north of Wells and Thousand Springs Creek. Project involves: 154,500 cu. yds. excav., unclass.; 163411 yds. sta. overhaul; 23.21 miles prepare subgrade and shoulders; 50,600 cu. yds. crushed rock or crushed gravel in place; 500 cu. yds. crushed rock or crushed gravel in stockpile; 225 cu. yds. class A concrete; 194 cu. yds. class B concrete; 2694 lin. ft. install 18-in., 772 lin. ft. 24-in., 762 lin. ft. 30-in. and 324 lin. ft. 36-in. corr. metal pipe; 240 cu. yds. riprap; 80 monuments; 2 posts for Federal Aid markers; 750 lbs. bearing plates and rollers. The State of Nevada, Dept. of Highway, will furnish corrugated metal pipe culverts 1, o. b. cars, Mellandco Siding, Elko County. Plans obtainable from S. C. Durkee, state highway engineer at Carson City on deposit of \$15, of which \$10 is returnable. Plans on file in office of U. S. Bureau of Public Roads, 461 Market St., San Francisco. Certified check 5% required with bid.

PALO ALTO, Santa Clara Co., Cal.—In addition to the improvement of California Ave., involving an expenditure of \$130,000, the city council plans to improve two miles of streets, representing an area of 330,000 square feet, the cost of which is \$70,000. The projected paving program includes: Palo Alto Ave. from Fulton to Everett; Hale from Palo Alto Ave. to University; Dana in the Duffield subdivision; Forest in the same subdivision; Addison from Channing to Fife; alley in block B, bet. High and Alma, Addison and Lincoln Sts.; Santa Rita from Waverley to Cowper; Princeton from Cambridge to Stanford; Harvard from Stanford to California; Webster from Melville to Embaradero; Pope from Hamilton to University; Sherman from Second to

Thrd; Oberlin from College to California; Harker from Melville to Hutchinson, and Embaradero from Alma to Kingsley. J. F. Byxbee, Jr., is city engineer.

SANTA BARBARA, Cal.—Western Motor Transfer Co., 116 State St., submitted low bid to the city council at \$13,154.79 to improve Salo St., bet. San Andres St. and Mountain Ave. involving:

- (1) 45,995 sq. ft. 5-in. asph. concr. paving;
- (2) 28.4 ft. curb;
- (3) 195.4 sq. ft. gutter;
- (4) 9 ft. 6-in. sewer connections;
- (5) 9951 ft. 2-course walk;
- (6) 1 lampole and 4 manholes to be lowered.

The total bids were:

(A) Western Motor Transfer Co., \$13,154.79.

(B) Hunter & Richardson, \$13,530.03.

(C) Cornwall Constr. Co., \$13,448.56.

The unit bids were:

	(A)	(B)	(C)
(1)	\$215	\$22	\$22
(2)75	.80	.70
(3)23	.24	.22
(4)	35.00	37.00	40.00
(5)19	.20	.19
(6)	15.00	20.00	10.00

SAN FRANCISCO—Bureau of Engineering, Department of Public Wks., completes specifications to improve Quesada Ave. bet. Quint St. and Silver Ave., including crossing of Quesada Ave. and Quint St., involving:

- 500 cu. yds. excavation;
- 550 cu. yds. embankment;
- 475 lin. ft. unarmored conc. curb;
- 150 lin. ft. 6-in. V. C. P.;
- 150 lin. ft. 10-in. V. C. P.;
- 115 lin. ft. 2x8-in. redwood headers;
- 2,600 sq. ft. 1-course conc. sidewalk;
- 5 brick catchbasins;
- 13,700 sq. ft. asph. conc. pave., consisting of 2-in. asph. concrete surface with 6-in. class F concrete base.

Estimated cost, \$6,050.

SAN RAFAEL, Marin Co., Calif.—Until August 12, 11 A. M., bids will be received by Rob E. Graham, county clerk, to improve Lucas Valley road from the County Farm to the Big Rock, a distance of 3.6 miles, involving:

- (1) 18,000 cu. yds. excav. unclassified;
 - (2) 18,000 sta. yds. overhaul;
 - (3) 1,068 lin. ft. 12-inch corr. metal pipe;
 - (4) 180 lin. ft. 18-in. do.;
 - (5) 128 lin. ft. 24-in. do.;
 - (6) 150 lin. ft. 6-inch drain tile in place;
 - (7) 23 cu. yds. class A Portland cement concrete (headwalls);
 - (8) 400 lbs. reinf. steel (headwalls).
- County will furnish corr. metal pipe. Plans obtainable from County Surveyor Rodney Messner, Courthouse, San Rafael.

SAN FRANCISCO—Bureau of Engineering, Department of Public Wks., completes specifications to improve 22nd St. bet. Kansas and Rhode Island Sts., including crossing at Kansas St., involving:

- 500 cu. yds. excavation;
- 113 lin. ft. armored concrete curb;
- 90 lin. ft. 10-in. V. C. P.;
- 21 lin. ft. 6-in. V. C. side sewers;
- 554 sq. ft. 2-course conc. sidewalks;
- 525 sq. ft. 6-in. class C conc. pave.;
- 3 brick catchbasins;
- 4,684 sq. ft. asph. conc. pave., consisting of 2-in. asph. conc. surf. with 6-in. class F conc. base.

Estimated cost \$2,375.

GUSTINE, Merced Co., Calif.—City trustees cancel proceedings to improve various streets due to protests of property owners. The work was estimated to cost \$60,000. A. E. Cowell city engineer.

PLACER COUNTY, Cal.—Until Aug. 1, 2 P. M., bids will be received by C. H. Whitmore, district engineer, State Highway Commission, 502 State Office Bldg., Sacramento, to apply bituminous surface treatment on 2.9 miles between Roseville and Rocklin. See call for bids under official proposal section in this issue.

LYNWOOD, Los Angeles Co., Cal.—Until Aug. 5, 8 P. M., bids will be received by city council to improve Lewis Road, Standard Ave., etc., involving 90,400 sq. ft. 3-in. D. R. sub-base; 90,400 sq. ft. rock and oil surface pavement; water system complete; curbs, gutters, walks. 1911 Act. Bond Act 1915. Specifications obtainable from A. J. Bateman, city engineer, on payment of \$3.

MODOC COUNTY—State Highway Commission rejects bids received July 16 to grade and surface with untreated crushed gravel and stone, about 1.4 miles between 3 mi. and 4.4 mi. east of Alturas. C. N. Chittenden, Napa, at \$51,532 and Dunn & Baker, Klamath Falls, Ore., at \$74,875 were the only bidders.

SAN LUIS OBISPO COUNTY, Cal.—Until August 8, 2 P. M., bids will be received by L. H. Gibson, district engineer, State Highway Commission, Bank of Italy Bldg., San Luis Obispo, to grade and apply heavy fuel oil to shoulders on 9.4 miles between Paso Robles and Atascadero. Spec. obtainable from district engineer.

MARTINEZ, Contra Costa Co., Cal.—County Surveyor R. R. Arnold is making surveys to route the proposed industrial highway from Antioch to Richmond. Proposed roadway will be 40 ft. wide of a very heavy type of pavement. One proposal is that the present highway be followed from Antioch to a point east of Martinez, where a new highway would be built running south of Martinez and connecting with the Franklin Canyon highway near Muir station. Franklin Canyon would then be followed to the main highway and thence along the state highway to a point at the Tank Farm hill, from which point the road would swing into Richmond and connect with the proposed industrial highway from Richmond to San Jose along the waterfront.

NEVADA CITY, Nevada Co., Cal.—County Surveyor J. F. O'Connor is making surveys for new Colfax road. Three routes are proposed in connection with the project to eliminate the Woodpecker Creek horseshoe turn without cutting a new road through the Law or Henderson orchards.

SAN FRANCISCO—Until July 20, 2:30 P. M., bids will be received by S. J. Hester, secretary, Board of Public Works, to improve:

Portions of Rousseau, Bosworth, Lyell Sts., etc., involving construction of artificial stone sidewalks; estimated cost \$400.

Portions of 18th Ave., 5th Ave., Diamond St., etc., involving construction of artificial stone sidewalks; estimated cost \$800.

Southwest half of Mission St. near Lowell St., involving removal of sand from roadway and construction of bulkhead, 3-ft. high; estimated cost \$400.

South half of Trumbull St. near Craut St., involving removal of sand roadway and construction of bulkhead, 3-ft. high; (2 projects), cost each \$100.

Certified check 10% payable to the Clerk of the Board of Supervisors required with bid. Plans obtainable from Bureau of Engineering, 3rd floor, City Hall.

ALTURAS, Modoc Co., Cal.—City council declares intention (3) to improve Main St., bet. Carlo and Twelfth Sts., involving grading; hyd. cem. conc. sidewalks, curbs and gutters; corr. metal culverts; hyd. cem. concrete catchbasins; asphalt concrete pavement with crushed rock sub-base; c. l. water pipes and fittings. 1911 Act. Bond Act 1915. City will pay \$25,000 of total cost from General Fund in city treasury. Hearing August 4. E. E. Elliott, city clerk. S. A. Mushen, city engineer.

ALAMEDA COUNTY, Calif.—Until August 1, 3 P. M., bids will be received by John H. Skeggs, district engineer, State Highway Commission, State Bldg., San Francisco, to furnish and install perforated metal pipe underdrain between Dublin and Hayward.

See call for bids under official proposal section in this issue.

RIVERSIDE, Riverside Co., Calif.—The county supervisors have selected the Pinon Flats route for the proposed desert-mountain highway down the east slope of the San Jacinto Mountains. According to the county surveyor, A. C. Fulmer, the route selected will save about \$20,000 in construction costs over the Palm Canyon route. The Pinon Flats route will cost about \$384,000. The board's action followed the recommendations of the county surveyor.

SAN BERNARDINO COUNTY, Cal.—Until July 31, 3 P. M., bids will be received by E. Q. Sullivan, district engineer, State Highway Commission, 247 Third St., San Bernardino, to furnish and apply fuel oil as a dust layer on 23.8 miles between Sawmill and Bear Lake. Specifications obtainable from above.

SALINAS, Monterey Co., Cal.—Until August 4, 7:30 P. M., bids will be received by M. R. Keef, City Clerk, (90) to improve portions of Archer St., Homestead Ave., Buena Vista St. and Central Ave., involving grading; hydraulic cement concrete curbs; 5-in. hydraulic cement concrete pavement; 3½ in. hydraulic cement concrete sidewalks. Bond Act 1915. Imp. Act 1911. Certified check 10% payable to city required with bid. Plans on file in office of clerk at obtainable from Howard Cozzens, city engineer.

MARIPOSA COUNTY, Cal.—George Pollock, Forum Bldg., Sacramento, at \$65,937.75 submitted low bid to U. S. Bureau of Public Roads, San Francisco, to grade Section B, Fish Camp, Fourmile of Route 47, Oakhurst National Forest Highway in Sierra National Forest, 2,648 miles in length, involving: 17.3 acres clearing; \$5,240 cu. yds. unclassified excavation; 405 cu.

yds. unclassified excavation for structures; 12,705 sta. yds. overhaul; 2,648 miles finish earth graded road; 34 cu. yds. cement rubble masonry; 1,420 lin. ft. corr. galvanized metal culvert pipe in place; maintenance of existing road and 8 in. road accepted for traffic, estimated cost \$1500; 74 right of way monuments. Three low bids and engineer's estimate follow:

Geo. Pollock, Sacramento	\$67,937
Lewis Const. Co., Los Angeles	72,564
T. E. Connelly, San Francisco	77,093
Engineer's estimate	72,625

SALINAS, Monterey Co., Cal.—Until August 4, 7:30 P. M., bids will be received by M. R. Keef, City Clerk, (89) to improve Spring St., bet. Griffin and Summer Sts., involving grading hydraulic cement concrete curbs; 5-in. hydraulic cement concrete pavement; 3½ in. hydraulic cement concrete sidewalks. Bond Act 1915. Imp. Act 1911. Certified check 10% payable to city required with bid. Plans on file in office of clerk and obtainable from Howard Cozzens, city engineer.

MARIPOSA COUNTY, Cal.—George Pollock, Forum Bldg., Sacramento, at \$205,875 submitted low bid to U. S. Bureau of Public Roads, San Francisco, to grade 7.08 miles of Mariposa Grove Section of Wawona Route in Sierra National Forest, involving: 55.28 acres clearing; 320,000 cu. yds. unclassified excavation; 1346 cu. yds. structural excavation; 94,765 sta. yds. overhaul; 7.08 miles finishing; 121 cu. yds. cement rubble masonry; 5550 lin. ft. corrugated metal pipe in place; 195 cu. yds. hand laid riprap; maintenance of detours (est. cost, \$250); 0.5 mile moving existing fences. Three low bids and engineer's estimate follow:

Geo. Pollock, Sacramento	\$205,875
Lewis Const. Co., Los Angeles	208,017
Granfield, Farrar and Carlin	254,268
San Francisco	254,268
Engineer's estimate	271,369

SANTA BARBARA, Cal.—Until August 7, 1:30 P. M., bids will be received by S. B. Taggart, city clerk, to improve Cota Street, bet. Milpas St. and Soledad St. and Voluntario St., bet. Cota St. and Haley St., by grading, concrete cement pavement, cement concrete driveways, cement concrete sidewalk, vitrified salt glazed pipe side connection sewers, etc., under 1911 Act. Certified check 10% required with bid. Plans on file in office of clerk.

MILL VALLEY, Marin Co., Cal.—Until August 18, 8 P. M., bids will be received by Francis F. Seitz, Clerk, Mill Valley School District, to pave portion of the playground at the Old Mission School, specifically that part known as Utility Court. Specifications obtainable from the clerk.

SAN FRANCISCO.—Until July 30, 2:30 P. M., bids will be received by S. J. Heister, secretary, Board of Public Works, to improve:

Pennsylvania Ave. Ect. 433 ft. north of 23rd St. and 36-ft. south from 25th St., etc., involving vit. clay pipe sewers with wye branches, side sewers; brick manholes. Est. cost \$6,000.

Joost Ave. bet. Detroit and Edna Sts. (where not) involving armored concrete curb; art. stone walks; brick catchbasin; 12-in. ironstone pipe sewers; 6-in. conc. base pave. with 1½-in. asph. conc. surface. Est. cost \$2,800.

Certified check 10% payable to the Clerk of the Board of Supervisors required with bid. Plans obtainable from Bureau of Engineering, 3rd floor, City Hall.

SAN FRANCISCO.—Until July 30, 2:30 P. M., bids will be received by S. J. Heister, secretary, Board of Public Works to improve portions of streets in the Castro Street Addition and Glen Park Terrace, involving grading; armored concrete curbs; concrete walks; 2-in. asph. conc. surface pave. on 6-in. class F concrete base; brick catchbasins and manholes; side sewers. Estimated cost \$52,000.

Certified check 10% payable to the Clerk of the Board of Supervisors required with bid. Plans obtainable from Bureau of Engineering, 3rd floor, City Hall.

SANTA CRUZ, Santa Cruz Co., Cal.—Granite Const. Co., Watsonville, at \$5913 awarded contract by county supervisors to pave with oil bound macadam portions of Mandanona Road, Calabasas Highway and Brown Valley Road.

GILROY, Santa Clara Co., Calif.—City council rejects bids to improve portions of Hanna St., First St., Sixth Street, Alexander St., etc., involving grading; asphalt concrete pavement; cement concrete curbs, gutters, and walks; storm water sewer. Work under 1911 Act and Bond Act 1915. Additional streets will be included in the program and a new call for bids will be issued. Bids received under the last call were: Hanrahan Co., San Francisco, \$54,955; Union Paving Co., San Francisco, \$56,465; P. S. Harless, San Rafael, \$59,131; California Road and Street Imp. Co., Fresno, \$59,238; Central-California Roads Co., Oakland, \$64,384. Ray Fisher is city engineer.

BAKERSFIELD, Kern Co., Calif.—Until August 4, 5 P. M., bids will be received by V. Van Riper, city clerk, to construct concrete sidewalks in 18th St. bet. the Kruse Tract and point 132-ft. west of R St. Certified check 10% payable to city required with bid. Plans on file in office of clerk.

LOGGING OPERATIONS SLOW

Portland, Ore., reports that logging operations will slow up for a couple of months. There are now 300,000,000 ft. of logs in the Columbia river waiting to be sawn. Most of these have been sold, however, and are not a factor in the market prices now prevailing.

DOWD CONCRETE FORM SYSTEM IS PURCHASED

Masonite Corp., Chicago, Ill., has bought outright the Dowd Concrete Form System, Inc. The Dowd form system, utilizing Masonite Presswood, will be made available to all contractors, without charge. This service will be under the management of E. B. Bushnell, head of the concrete form department.

(Continued from Page 17)

MISCELLANEOUS CONSTRUCTION

FRESNO, Fresno Co., Cal.—Giant Manufacturing Co., Council Bluffs, Iowa, at approximately \$12,000 awarded contract by David E. Brown of Fresno, promoter, to install night lighting facilities in Firemen's Baseball Park. The system will involve the installation of 70 ft. poles furnishing 180,000 watts. The installation will be made under the supervision of I. D. Valentine, district manager for the Giant Company.

MISCELLANEOUS SUPPLIES AND MATERIALS

SEBASTOPOLE, Sonoma Co., Cal.—Until August 14, 7:30 P. M., bids will be received by J. B. Bridgeford, clerk, Andy Union High School District, to furnish tires and tubes for school automotive equipment for year 1930-31. Specifications and further information obtainable from clerk.

OAKLAND, Cal.—Until Aug. 4, 4:30 P. M., bids will be received by G. B. Hegardt, secretary, City Port Commission, 424 Oakland Bank Building, to furnish 32 cast steel 20-in. ball joints; Plummer or equal. Delivered to Oakland Harbor Terminal.

Certified check 10% required with bid. Bond in full amount of the contract price required of successful bidder. Specifications obtainable from secretary on deposit of \$5, returnable.

GLENDALE, Los Angeles Co., Cal.—Until 10 A. M., Aug. 7, bids will be received by the city council for delivering f.o.b. warehouse, Glendale: Item 1: Transite, in accordance with drawing No. 1360-E, sheet 14; Item 2: Ebony asbestos, in accordance with drawings No. 1360-E, sheets 17, 18 and 19. Cert. check 10%. G. E. Chapman, city clerk.

TOMALES, Marin Co., Calif.—Until August 12, 8 P. M., bids will be received by A. L. Cunningham, clerk, Tomales Joint Union High School District, to furnish and deliver (1) 5000 gallons of gasoline; (2) 15 truck tires and tubes, size 32x8, include specifications with the bid; (3) 20 tons of best grade furnace coal. Further information obtainable from clerk.

BUSINESS OPPORTUNITIES

SAN FRANCISCO—Names and addresses of the individuals or firms concerned in these opportunities will be furnished on request to the Business Opportunity Department of Daily Pacific Builder, 545-547 Mission Street, Phone Garfield 8744.

20334—Slate. Genoa, Italy. Manufacturers of slate for roofing, billiard tables, blackboards, etc., are desirous of forming connections with importers of these commodities in San Francisco. Price list and samples are available.

20335—Marble. San Francisco, Cal. Shippers of white and colored granulated marble produced in northern Italy, desire to communicate with interested firms in San Francisco. Price list and samples are available.

20336—Interweaving Machinery. San Francisco, Cal. Italian manufacturer of new type of machine for interweaving desires to communicate with firms interested in its importation. Catalogue on file.

20340—Machinery for Refining Soya Bean Oil. Tokyo, Japan. Company desires to get in touch with manufacturers of machinery or refining veg-

etable oils, particularly soya bean oil. Catalogs, price lists requested.

20341—Lumber. Washington, D. C. Party representing a Manila lumber firm is interested in finding local market among large wholesale dealers.

20342—Representation. Montevideo, Uruguay. Party located in Uruguay is desirous of representing local firms there.

20344—Yarn and Thread Machinery. Sinaloa, Mexico. Party desires to obtain modern machinery for manufacture of yarn and thread.

Harry N. Burhans, 75 Young Bldg., Honolulu, T. H., merchandise manager of a concern established in Hawaii, is desirous of securing the distributorship of high grade paint and varnish brushes for automobiles; also cheaper grade paint and varnish brushes, sand and emery paper and small paint sprays, in that territory. If interested communicate with Mr. Burhans direct.

C. C. King, Tacoma, Wash., desires to locate goods of National reputation to be sold in the Northwest direct from the manufacturers to the retailers. If interested communicate with him direct.

PEAVEY COMPANY TAKES OVER FLAX-LI-NUM COMPANY

Controlling interest in the Flax-linum Insulating Co., St. Paul, Minn., has been acquired by F. H. Peavey & Company, a grain marketing organization. The change in ownership has already taken effect.

H. B. Harden, for many years associated with the Johns-Manville Corporation, has been appointed general manager and sales director. J. B. Gillilan, president of Van Dusen-Harrington Co., one of the Peavey controlled corporations, has been made president. Harden is vice-president and general manager, and Frank Evans, secretary-treasurer.

The Flax-linum Insulating Company recently developed a new product, Bi-Flax, a new type of insulating plaster base. Bi-Flax is a combination of Flax-linum insulation, building paper and expanded metal lath. It enables the builder to handle metal lath and insulation as one unit.

RECESSED TYPE BATHROOM CABINET ANNOUNCED

The lighting of the bathroom is an important item in the modern home, apartment, and hotel—scientifically arranged light fixtures must be placed just right to give perfect vision for Dad's morning shave, for Bobby's "scrub," or for Mother's wave set—there must be no dark spots.

A new steel bathroom cabinet—recessed type—has been designed by the Welded Products Corp. of Kansas City, Mo., which provides these necessary lights as built-in fixtures. One at each side, these light fixtures—chromium plated—are placed to cast the best light reflection on the mirror—and are controlled by an individual switch. This modern electrical service also provides a "convenience" receptacle plug for attaching curling iron, heater, fan, or other electrical appliances.

All four outlets are serviced by a single electrical box. The cabinet, completely wired, eliminates the usual high cost of installing electrical fixtures. Finest French plate glass—plain or polished bevel—is used for the mirror door of the cabinet. Generously proportioned, the cabinet is electrically welded of 18 gauge steel.

The "Duotex" finish—durable and none-staining—may be had in standard white or in colors. The cabinet may also be had without the electrical fixtures if desired.

OFFICIAL PROPOSALS

STATE OF CALIFORNIA

DEPARTMENT OF PUBLIC WORKS

DIVISION OF HIGHWAYS

NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received by the Department of Public Works, Division of Highways, at the office of the District Engineer, Dis-

trict IV, Room 211 State Building, San Francisco, California, until 3 P. M. on Monday, August 4th, 1930, at which time they will be publicly opened and read, for performing work as follows:

Alameda County (IV-Ala-5-B), between Dublin and Hayward, perforated metal pipe underdrain to be furnished and installed.

Plans may be seen, and forms of proposal, bonds, contract and specifications may be obtained at the above address.

No bid will be received unless it is made on a proposal form furnished by the District Engineer. Each bid must be accompanied by a cash or a certified or cashier's check made payable to the Director of Public Works, for an amount equal to at least ten (10) per cent of the amount bid, such guaranty to be forfeited should the bidder to whom the contract is awarded fail to enter into the contract.

The Department of Public Works reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the State.

LABOR LEADERS DECIDE TO CUT WORKING HOURS

A five-day week with working hours cut two hours was the agreement reached at the Washington State Federation of Labor convention held at Spokane last week, according to Geo. D. Earley, secretary of the Seattle Building Trades Council.

An effort was made to reduce the working day to six hours generally, but since some trades were working as high as 10 hours a day it was decided to cut two hours from the present day. Thus, 10-hour days will be cut to eight, and eight-hour days to six.

Earley said trades in Seattle would not be immediately affected since the question was one for negotiation with employers.

A "Pittsburg" Automatic Water Heater installed in the Home indicates high quality throughout.

Recommended and specified by all the leading architects, plumbers and builders.

Consider the high merit of the Pittsburg coupled with "Pittsburg Perfect Service."

THIRTY DAYS OR \$100 BUCKS FINE—NO STATE LICENSE

"Those persons who regard the contractors' registration law of California as perfunctory, or merely a gesture on the part of the lawmakers of the state, will please take note of the conviction of a plumbing contractor of Beverly Hills who failed to comply with it," says Southwest Builder and Contractor. "A fine of \$100 or thirty days in jail was the punishment imposed by the Municipal Court of Los Angeles County upon the offending plumber. Sentence was suspended and the contractor was admonished by the court not to undertake any more contracts until he has secured a state license."

"This is the first prosecution undertaken for violation of the law. Perhaps the next offender will not be so lucky as to draw a suspended sentence. It should be a warning to any who think they can engage in the contracting business without a license and not be tripped up. The statute has been in effect now for almost a year and the Registrar of Contractors has given everyone amenable to its provisions an opportunity to comply with them. Many have been disposed to regard him as too lenient in his dealings with recalcitrants, but we are inclined to believe that his policy of persuasion has been more effective in creating a wholesome respect for the law than to have gone after all offenders roughshod."

"The chief purpose of the Contractors' Registration Law was to weed out the irresponsible and incompetent persons lured into the business by prospects of easy money and ready to take advantage of every opportunity to turn a dollar at the expense of the private owner or the public. This purpose has been achieved to a greater extent, we believe, than even the most optimistic regarded as possible at the outset. A millenium has not been created by the statute, but the results of the first year's operation have been so satisfactory to the construction industry and to the public that there has been no thought of anything except to strengthen some of the weak points that have developed so that there may be no loophole for anyone to evade his responsibility."

Simplified practice recommendations on Structural, Roofing and Blackboard Slate have been reaffirmed, by their respective standing committees of the industry, without change, for another year, according to a recent announcement by the Division of Simplified Practice of the Bureau of Standards, Department of Commerce. Surveys of the 1929 production of these commodities indicated that 64 per cent of the Structural Slate, and 95 per cent of both the Roofing and the Blackboard Slate, conformed to the simplified schedules.

STATE BUILDERS TO CONVENE AT RICHMOND

The annual convention of the California State Builders' Exchange will be held in Richmond, Contra Costa County, August 30, it is announced by Harry R. Cayford, secretary of the state organization.

The morning session will be called to order at 9:30 by P. M. Sanford of Richmond, president of the state body, and will be occupied chiefly with receiving reports from the various standing committees, such as Industrial Relations, Educational, Law and Legislative, Building Code and Finance.

During the afternoon session in short addresses will be heard. Time will also be allotted to open forum.

Officers of the California State Builders' Exchange are: P. M. Sanford of Richmond, president; Wm. T. Loesch of Pasadena, first vice-president; Dr. Geo. S. Plitcock of Berkeley, second vice-president; Harry R. Cayford of Fresno, secretary; Lou E. Webster of Los Angeles, treasurer; W. S. Fultz of Santa Barbara, sergeant-at-arms.

LASSEN LUMBER COMPANY CUTS WAGES

The Lassen Lumber & Box Company, operating at Susanville, cut the wages of all employees ten per cent on August 1.

Officials of the company announced that the wage slash affected all of the company's employees, to the number of approximately 200.

A statement accompanying the announcement of the reduction attributed the slash to depreciation of the lumber market.

The wage cut is the second to be announced by the lumber interests in California. The first was that of the Red River Lumber Company at Westwood, which put a 15 per cent wage cut in effect July 28.

Officials of the latter company stated that the wage cuts would be made generally by lumber companies on the Pacific Coast.

WEYERHAUSER LUMBER MILL REDUCES WAGES

The Weyerhaeuser Lumber Mills at Klamath Falls, Ore., one of the largest industries of its kind on the Pacific Coast, placed into effect its second wage cut this summer on Aug. 1.

The action of the Weyerhaeuser Co. follows similar action taken by the Lassen Lumber and Box Company in Susanville, and the Red River Lumber Company of Westwood.

All lumber mills in Klamath Falls are operating and some have put on ten-hour shifts. Several of the smaller logging companies in this vicinity have ceased operations until the lumber market improves.

The general feeling is that lumber will start moving more rapidly in October.

RED RIVER LUMBER CUTS WAGE SCALE 15%

Wages of 2,150 employees of the Red River Lumber Company at Westwood, Calif., in the various logging camps operated by the company, in the planing mill of the corporation at Reno, Nev., and in the lumber yards at Chicago, Minneapolis and Los Angeles, were reduced fifteen per cent on July 28.

The move is declared by officials of the company to be the forerunner of similar wage reductions to be made by all of the Pacific Coast lumber companies.

At Westwood the wage cut was accompanied by an order by the Red River Lumber Company reducing the cost of rent in the company's houses, and price reductions in the company's various mercantile and amusement enterprises in Westwood, from 15 to 20 per cent.

Under the new wage scale various classifications of labor employed by the lumber company and known generally as "common labor," will be paid at the rate of 30 cents an hour instead of 32½ cents an hour as formerly. Up to yesterday that classification of labor in Westwood was employed in an eight-hour-day basis for five days each week. Under the new order all labor will be employed 10 hours per day for six days each week.

JULY BUILDING IN SAN FRANCISCO REGISTERS \$1,086,936

Building construction undertaken in San Francisco during the month of July, 1930, involved an expenditure of \$1,086,936, according to figures compiled by John B. Leonard, superintendent of the Municipal Bureau of Building Inspection. Leonard's estimate is based on the building permits issued by his office. During July 484 permits were granted, of these 357 being for alterations and repairs costing \$133,322. The balance of the operations covered the erection of new structures.

July, 1929, operations called for the issuance of 575 permits for work costing \$3,973,981.

During the past seven months, Leonard reports 3,895 permits have been issued for improvements, aggregating an expenditure of \$15,635,765 as compared with 4,297 permits for the corresponding period in 1929 when the estimated cost of the improvements registered \$22,194,342.

Following is a segregated report of the July, 1930, activities:

Class	No. of Permits	Est. Cost
A	—	\$
B	2	67,000
C	11	130,375
Frames	112	536,495
Alterations	357	313,322
Public Bldgs.	2	39,644
Total	484	\$1,086,936

SURETY NOT RELIEVED BY FAILURE TO HOLD RETAINED PERCENTAGE, HIGH COURT RULES

If a retained percentage of the money involved in a contract is paid to the contractor contrary to its provisions, the surety company guaranteeing its completion is not released from its responsibility to finish the work in event of default or abandonment by the contractor, but is entitled to a credit of the amount that should have been retained. This ruling, says the Southwest Builder and Contractor, was made by the supreme court of the State of North Carolina in the case of J. L. Crouse vs. R. T. Stanley and Guy L. Dazey, trading as Stanley & Dazey, et al (No. 408, Supreme Court of North Carolina). The case presents some unusually interesting features set forth in the written opinion of the supreme court published herewith—Editor.

Statement of Facts Involved
The plaintiff is a contractor living in Guilford County, North Carolina, and on Nov. 1, 1917, made a contract to erect a high school in the city of Tampa, State of Florida.

The defendants were partners and engaged in the business of painting contractors.

On Nov. 1, 1927, the plaintiff entered into a contract with the defendants to the effect that the defendants would furnish all materials and perform all work necessary to complete the painting of the high school at Tampa, Fla. The contract price for said work was \$20,000 and required the giving of a surety bond to guarantee the faithful performance thereof. Thereupon, the defendants secured a bond from the Fidelity & Casualty Company of New York in the penal sum of \$10,000.

The sub-contract between the plaintiff and the defendants provided that payments should be made as follows: "Eighty per cent of all labor and material which has been placed in position by said sub-contractor, to be paid on or about the first of the following month, except the final payment, which the said contractor shall pay to the sub-contractor within 30 days after the sub-contractor shall have completed his work to the full satisfaction of said architect."

Contract Abandoned

The plaintiff alleged and offered evidence tending to show that the defendants abandoned the contract, "making it necessary for the plaintiff to take over the work and complete the same." There was evidence tending to show that the defendants abandoned the contract on or about Oct. 4, 1928, and notice was given to the surety company by the plaintiff on or about Oct. 8, 1928.

The plaintiff brought a suit against the defendants, Stanley & Dazey, sub-contractors, Greensboro Paint Co., the Fidelity & Casualty Co. of New York, and J. E. Comer. The amount claimed was \$6060.12, which said claim was made up of the following items: (a) Cost of completion in excess of contract price, \$2425.38; (b) 60 days' delay at \$20 per day, \$1200; (c) cost of materials, \$2434.74—total, \$6060.12.

The defendant, Stanley & Dazey, filed an answer denying the right of plaintiff to recover and alleging a

counterclaim in the sum of \$3500. The defendant, surety company, filed an answer denying liability and alleged that it was released as bondsman for the sub-contractors for the reason that the plaintiff contractor failed and neglected to preserve the retained percentage of 20 per cent.

Retained Percentage Not Preserved
Upon this contention the evidence tended to show that the retained percentage would have amounted to approximately \$4202.82.

The evidence further showed that the plaintiff had paid to the defendants or to banks and other parties for the benefit of defendants approximately the entire contract price. The plaintiff, admitting that the retained percentage was not preserved, explained that he "had guaranteed bills for them. I did not keep in hand 20 per cent until the work was finished and completed, for I could not under the conditions."

At the conclusion of the evidence the trial judge sustained the motion of nonsuit made by the defendant, casualty company, and other defendants, retaining the cause as to the defendant, Stanley & Dazey.

The jury answered the issues against the contentions of defendant, Stanley & Dazey, and awarded the plaintiff the sum of \$6060.12.

No evidence was offered connecting the defendant, Greensboro Paint Co., or J. E. Comer with the controversy.

Discussion by the Court

Brogden, J.—Did the failure of the plaintiff to preserve and hold the retained percentage release the defendant surety from any and all obligation upon its bond?

The legal status of retained percentage in contracts of the kind involved in this controversy has been thus declared in Insurance Co. vs. Durham County, 190 N. C., 58, 128 S. E., 469: "The contract provision that 85 per cent of the value of labor and material used during the previous month, as estimated by the architect, shall be paid by the owner to the contractor at the dates specified during the progress of the work creates in the 15 per cent reserve balance an equity in which the surety has a substantial right. While the owner also has an equity in this reserved balance, he has no right, without the consent of the surety to waive it, or to exceed the provisions of the contract in making payments to the contractor. The retained balance is well calculated to induce the contractor to complete the building, and it is valuable security against loss when a breach occurs." *Prairie State Bank vs. U. S.*, 164 U. S., 227, 41 L. Ed., 412; *Hamilton vs. Republic Casualty Co.*, 135 S. E., 259; *Williston on Contracts*, Vol. II, Section 1243.

Tendency To Hold Surety

Williston, supra, summarizing the decisions upon the subject, states: "Such payments in larger amounts, or at earlier times than the contract between the principal and his employer fixed discharges the surety. But the basis of the rule is equitable, and it should not be pushed beyond equitable limits, and especially in recent years the courts have shown a tendency to hold the surety where it

sufficiently appears that the overpayment of the principal has caused no loss." 115 N. W., 24; *Wakefield vs. American Surety Co.*, 95 N. E. 350.

Second, if the excess payments are made to satisfy the valid claim of laborers and materialmen who are included within the terms of the bond, the surety is not relieved. *U. S. Fidelity & Guaranty Co. vs. Trustees of Baptist Church*.

Attitude of Courts Differs

An examination of the authorities bearing upon the subject discloses that the courts have adopted various attitudes with respect to the application of the principle of releasing the surety from his obligations. First, some courts have held that, if the owner overpays the contractor upon forged or mistaken estimates or by reason of fraudulent substitution of inferior materials, the surety is not thereby released. *Van Buren County vs. American Surety Co.*, 102 S. W., 325. Third, a surety is not discharged by overpayment unless it is shown that such overpayment resulted in loss. *Lloyd Investment Co. vs. Illinois Surety Co.*, 160 N. W., 58; *Maine Central Railroad Co. vs. National Surety Co.*, 94 Atl. 929. Fourth, if the owner fails to retain the specified percentage, the surety is discharged pro tanto upon the theory that such reserve percentage creates a right in the surety to apply the same in exoneration of the loss sustained by the failure to pay laborers and materialmen. *Mfg. Co. vs. Blaylock*, 192 N. C., 407, 135 S. E. 136.

Surety Entitled To Credit

This court has adopted the pro tanto theory; that is to say, that in contracts of the kind involved in this case, the surety in obedience to equitable principles is discharged and relieved to the extent of the loss actually suffered and no further. Therefore, the final determination of the rights of the parties depends upon whether the surety suffered a loss in the case at bar.

When Stanley & Dazey defaulted it was the duty of the defendant surety company to complete the work in accordance with the terms of the contract. If the owner had complied with the agreement entered into between the parties he would then have in hand to turn over to the surety the sum of \$4202.82, and thereupon the surety would be entitled to said sum to apply upon the completion of the work. No such amount was available, and thus the surety was deprived a credit to which it was entitled under the law.

No evidence was offered connecting the defendant, Greensboro Paint Co., or the defendant, Comer, with the transaction, and the judgment of nonsuit as to such defendants is upheld. The judgment of nonsuit as to defendant surety company is reversed, and the cause remanded for trial in accordance with the rules of liability declared in this opinion.

HUGE POPLAR TREE

A giant yellow poplar tree near Asheville, N. C., has a circumference of 36 feet at a point six inches above the ground, and its first limb is 100 feet off the ground.

BUILDERS ORGANIZE TO AID CONSTRUCTION

A permanent organization for the purpose of solving the various problems confronting the construction industry was formed at a meeting of industrialists and financial leaders at Chicago July 30.

Julius H. Barnes, head of the national building survey formed by President Hoover after the market crash last fall, was named head of a committee chosen to perfect details of organization. The new group will be called the national conference on construction.

Barnes will enlist governmental cooperation in the work.

"The meeting was held for the purpose of reviewing the principal inter-group problems of the construction industry and to determine the practicability of developing a continuing organization to assist in the solution of such problems," said Barnes. "Aspects of realty finance, including problems of legislation, appraisals of property, methods of home financing and credit practices, were discussed. Possible means of securing greater stabilization of the industry, a number of aspects of taxation and practical methods of introducing economies in the building and financing of residences and income properties, were considered."

"The conference will be for the purpose of reviewing the outstanding common problems of the business and other interests identified with such construction to determine upon a program of activities, including factual studies of such problems and agree upon recommendations to the co-operating agencies, public and private, looking toward the solutions of the problems."

The movement, he explained, will bring the 67 branches of the industry into a machine which will function more promptly than they have been able to do separately in the present general business depression.

Among those at the meeting was Myers H. Holtby of Los Angeles, Cal., first vice-president, U. S. Building & Loan League.

NEW OFFICE EQUIPMENT FIRM ORGANIZED

The partnership of Coe, Howard & Di Vecchio consisting of Lynn S. Coe, J. H. P. Howard, Jr., and Emil T. Di Vecchio has been organized and appointed the exclusive agent for San Francisco and San Mateo counties, as distributors of Berloy and Van Dorn steel office equipment.

This appointment came from the Berger Manufacturing Company of Canton, Ohio, which firm is a wholly owned subsidiary of the Republic Steel Corporation of Youngstown, O., third largest of its kind in the United States.

Coe and Di Vecchio have both had many years' experience in the office equipment line; the former having resigned from A. Carlisle and Company, former Van Dorn agents, where he held the position of manager of the furniture department to enter the present partnership; and the latter having resigned from Yawman & Erbe Manufacturing Company for the same purpose. J. H. P. Howard, Jr., is a newcomer to the office equipment field, having left the American Trust Company where he served as assistant credit manager. In the new partnership he will take over the general office management and internal control, while his two partners will be in charge of the sales force.

In addition they are handling the Alby Laboratory Company line of metal laboratory equipment.

A. G. C. SCENIC CONVENTION TOUR TO S. F. IN 1931

A transcontinental tour by special train, with stops at the outstanding scenic attractions of the west is to feature the transportation to the Twelfth Annual Convention of the Associated General Contractors of America in San Francisco next January. By arrangement with the Santa Fe Railroad, an A. G. C. Special Flyer, made up of specially selected all steel coaches, compartment and drawing room cars, will pick up the assembled delegates at Chicago and points en route.

Among the sights, which already have been arranged for convention tourists to see will be the Garden of the Gods, the Seven Falls, the Cave of the Winds and South Cheyenne Canyon during the stop over at Colorado Springs. With the big special train as a base contractors with their wives and families will be provided with plenty of time to explore the Pike's Peak country in the first break in the train ride enroute to the Golden Gate.

At Santa Fe, New Mexico, the big train is again to be parked while contractors are afforded an opportunity to visit the hitherto almost inaccessible Puye and Frijoles Cliff Dwellings, the inhabited Indian Pueblos, the Black Mesa Potteries and scores of other attractions now readily available in the vicinity of the ancient Spanish city, since highway contractors recently paved the way.

The A. G. C. Special Train is also to be halted on the brink of the Grand Canyon from sunrise till after sunset for a full day while its occupants get their fill of one of the greatest spectacles afforded by nature.

In addition to these great sights, those attending the convention are to have a full twelve hours at Los Angeles, in which they can swim at Long Beach, visit the movie studios at Hollywood, sample Los Angeles night life or repose quietly in their berths or staterooms in the Santa Fe train. To cap the climax the last leg of the journey, from Los Angeles to San Francisco, is to be over the beautiful coastal route of the Southern Pacific.

Of the greatest of the scenic attractions of the west there will still remain the Yosemite valley to intrigue the convention arrival at San Francisco.

By equipping the A. G. C. special train with the highest grade locomotive and rolling stock the Santa Fe has provided transportation equipment which enables that railroad to pledge its ability to provide time for the leisurely stopovers, side trips and explorations that are planned and still deliver the convention delegates at their destination within 122 hours after leaving the Chicago station.

PLUMBING FIXTURES

June wholesale prices of standard plumbing fixtures for a 6-room house, as collected by the U. S. Department of Commerce from reports of 12 representative manufacturers and wholesalers, were \$39.25, as compared with \$105.93 in May and \$97.54 in June 1929.

There were only 142 miles of paved roads in the United States in 1904. This is compared with more than 600,000 miles of paved highways at the present time. Most of the paving in 1904 was brick, representing 126 miles of the total.

UNFAIR COMPETITIVE METHODS BANNED BY MANUFACTURERS

Details of fifteen agreements to discontinue unfair competitive methods signed by that many companies and individuals have been made public by the Federal Trade Commission. These stipulation proceedings cover organizations dealing in a variety of commodities, including building materials.

Names of the respondents are not made public as is the rule in all cases where they have signed agreements to cease and desist from the practices charged in lieu of formal proceedings.

In one case which involves a manufacturer of paints and varnishes, the details of the stipulation agreements are, briefly, as follows:

Paints and shellacs sold by a manufacturer will no longer be labeled as strictly pure, which means composed wholly of shellac, when such is not true, according to the stipulation agreement signed by this manufacturer.

Paints and varnishes will no longer be advertised by a manufacturer by means of the words, "lead" or "zinc," so as to deceive buyers into believing that the products so described are composed of white lead or of zinc or that white lead or zinc is the principal element therein, when such is not the fact.

In another case the agreement provides that window screens which roll up like a curtain to disappear into the window casing will not be advertised by a company manufacturing them in a way that would mislead buyers into the belief that the company is part of or connected with a competitor company.

INCREASE NUMBER OF HOME OWNERS IS PLAN OF MEET

Leaders of civic and trade organizations will meet at Washington soon to plan the conference called by President Hoover designed to increase the number of home owners and at the same time to relieve unemployment in the building trades.

These leaders will fix a date and frame the program of the conference which President Hoover desires should seek especially to improve present methods of financing home ownership. The credit system in home building "is not as soundly organized as other branches of credit," the president said. The conference is to be privately financed, but the source of the funds was not disclosed. From home ownership, the conference will branch out into such fields as design, equipment, city planning and transportation, with the prospect of development of new ideas in these related subjects.

SWIMMING POOL BOOKLET

"Swimming Pools" is the title of a 32-page illustrated booklet issued by the Portland Cement Association.

Factors influencing the selection of site, determination of size and shape, as well as the general arrangement of pool facilities are given detailed attention. Text devoted to ways of controlling condensation and a brief discussion of the acoustical treatment of the walls and ceilings of indoor pools add further to the booklet's practical value. Underwater and overhead lighting, pool sanitation, and the different methods of filtration and sterilization are outlined.

Copies of "Swimming Pools" may be obtained without cost from the Portland Cement Association, 33 West Grand Avenue, Chicago.

THE OBSERVER

What He Hears and Sees on His Rounds

During the month of July, 1930, the Los Angeles city building department issued 2748 permits with an estimated valuation of \$5,841,626 as compared with 2457 permits with an estimated valuation of \$7,942,133 issued during the same month a year ago. For June, 1930, the number of permits issued was 2524 and the estimated valuation was \$5,485,138. Los Angeles building total for 7 months of the current year was \$45,554,527 as compared with \$62,013,732 for the corresponding period in 1929.

The "own your own home" drives of building and loan associations will be supplemented shortly by efforts to help home-builders get more for their money. The American Building Association News, national organ of the loan companies, plans to distribute a book of Standard Specifications for Residential Construction.

Most builders of small and medium-sized homes are completely inexperienced in the intricacies of construction. Smaller contractors and designers, more expert, are still not so efficient in giving the home-builder as much as his money should provide. And there are irresponsible contractors and designers to add to his troubles.

With all this in mind, the loan associations have had standard specifications drawn up by a large group of expert architects. Numerous plans are included in their book, which may be ready for distribution to building and loan companies throughout the country within three or four weeks.

The associations, having almost all of their nine billion dollars assets invested in mortgages on thousands of homes throughout the country, have a selfish interest in seeing that builders get the most possible for their money. The rapid depreciation of a poorly constructed home injures all parties interested in it.

The extent to which the associations will use the booklet will vary. It was originally intended simply as a guide and adviser to the prospective builder. However, some associations may set up the standard specifications as a criterion for use in considering loan applications.

The projected power development and expansion program of the California-Oregon Power Company is one of the biggest hydro-electric undertakings on the Pacific Coast this year. This is indicated by its application, filed at Salem, Oregon.

It estimates \$27,000,000 expenditures, creating 245,420 horsepower in a fifteen-mile stretch of the Klamath River.

The main development is on the Oregon side of the line, southwest of Klamath Falls. Some of the work will be on the California side.

The undertaking is known as the Grant power site development. It will include six power plants. It is expected it will take twenty years to complete the system. The original application has been pending since 1924. It proposed to develop 70,000 horsepower, at an estimated cost of \$7,000,000.

Five additional applications have been filed with the Oregon state engineer. Each asks for 1500 second feet of water.

One application proposes the utilization of a 200-foot fall and the development of 34,091 horsepower, at a cost of \$4,000,000.

The second application proposes to utilize a fall of 214 feet to produce 36,477 horsepower, at an estimated cost of \$4,500,000.

The third application would use a fall of 384 feet to produce 65,465 horsepower, at an estimated cost of \$5,500,000.

The fourth application would use a fall of 100 feet to produce 17,045 horsepower, at an estimated cost of \$2,600,000.

The fifth application would use a fall of 166 feet to produce 22,295 horsepower at an estimated cost of \$4,000,000.

State Engineer Luper of Oregon says there is no doubt the applications will be granted, with the reservations to protect the irrigation interests above the power sites.

The California-Oregon Power Company has before the federal power commission the applications for rights-of-way on the federal land. It is understood it will be granted as soon as the state approval of the applications is received. The Oregon applications were accompanied by a \$5850 filing fee.

"Recession in building activity throughout the country is gradually ebbing, but if the public is to build more homes, steps must be taken to improve the character and lower the costs of American domiciles," said Thomas S. Holden, vice-president of the F. W. Dodge Corporation, New York City, speaking before the recent convention of the United States Building & Loan League at Grand Rapids, Michigan.

The appointment of N. Max Dunning of Chicago, Illinois, fellow of the American Institute of Architects, as chairman of a sub-committee to prepare a booklet which will acquaint prospective home buyers with the various points which should be considered in purchasing a house, is announced by Secretary of Commerce R. P. Lamont, who is chairman of the National Committee on Wood Utilization. The preparation of this booklet has been made one of the special projects of the National Committee on Wood Utilization.

"A better understanding on the part of the home-buying public in regard to the principal structural and architectural features of a house would give a decided impetus to home ownership," said Mr. Dunning, in commenting on the project for which his committee was organized. "The purchase of a home is the most important investment the average person undertakes. An understanding of materials and workmanship and of what constitutes good architecture, therefore, is of vital importance to him in safeguarding his investment. These factors and many others are to be studied in detail by the sub-committee, and the results of their findings incorporated in a bulletin under the title 'How to Judge a House.'"

The National Committee on Wood Utilization, which was organized by

Herbert Hoover as Secretary of Commerce, has for its object the furthering of efficient wood-using practices. The preparation of the Committee's bulletin on "How to Judge a House" is a logical step in this direction. This publication will discuss the planning, designing and construction of houses costing less than \$15,000 in connection with which wood is used as an important structural or finishing material.

National Ornamental Iron & Bronze Co., Inc., has filed application for membership in the San Francisco Builders' Exchange. San Jose Brick and Tile Company, manufacturers of common brick, and Nils E. Johanson, general contractor, are new members in the organization.

TRADE NOTES

Bolinders oil engines of the two-cycle, low-pressure type in sizes from 6 to 600 hp. are described in a series of leaflets issued by Bolinders Co., Inc. 33 Rector St., New York City. The engines are made in Sweden and are distributed through an American branch.

Connecticut Telephone & Electric Corp., Meriden, Conn., has issued an extensive catalog covering its signal systems and intercommunicating telephones. This catalog may be obtained by application to the Connecticut Telephone & Electric Corporation at Meriden, Conn.

In an elaborate and well-illustrated book of 72 pages, "The Protection of Oil and Gas Lines," the Wales Dove-Hermiston Corp., 17 Battery Place, New York City, discusses the necessity for pipe protection, the products available for this purpose and the methods used in application. Data is given on a number of important pipe lines protected with the products of the company.

The library of the National Bureau of Casualty and Surety Underwriters, New York, has issued in multigraphed form "Tentative List of State Regulations, Orders, Advisory Pamphlets and Labor Laws Relating to Safety in Industry." It is arranged under the names of the states in alphabetical order. Nearly 300 titles are listed.

Data explaining the theory, characteristics, operation and installation of centrifugal pumps are given in bulletin 401, a 48 page publication issued by Goulds Pumps, Inc., Seneca Falls, N. Y. This presents in more comprehensive, compact and up-to-date form the material contained in bulletins 122 and 124 of the same company, issued several years ago. The material has been compiled by F. G. Switzer, professor of hydraulic engineering at Cornell University.

Russell Ray was elected president of Santa Barbara Chapter, American Institute of Architects, for the ensuing year at the annual meeting of the Chapter. Harold Burket of Ventura, was chosen vice-president; E. Keith Lockard, secretary, and Leonard A. Cooke, treasurer.

A continuation of lectures sponsored by the Chapter to be offered the public through educational organizations in the chapter's territory is planned.

Members of Southern California Chapter will be entertained by the Santa Barbara group next month.

ALONG THE LINE

George Smith Long, vice-president of the Weyerhaeuser Timber Co., died suddenly at Klamath Falls, Ore., Aug. 2. Death was due to a heart attack.

Los Angeles Harbor Commission re-elected Walter B. Allen, president, and J. A. Crawford, vice-president, for the coming year.

Hugh McGuire, for ten years a member of the Board of Public Works of Los Angeles, has been re-elected president for another year. Carl Wirsching was re-elected vice-president.

O. A. Plier, chief assistant city engineer, has been appointed acting city engineer of Seattle. W. D. Barkhuff, city engineer, died July 26 as the result of injuries received in an automobile accident.

Ralph R. Arnold, county engineer of Contra Costa County, has been appointed a member of the Board of Trustees of the Alhambra Union High School District, succeeding T. S. Duane, chairman of the Board.

With the sanction of the directors of the San Francisco Builders' Exchange, William H. George, president of the organization, has filed his candidacy for the Board of Freeholders who are to be elected on August 26 to frame a new charter for the city of San Francisco.

A. J. Judge, Jr., for twenty years associated with the sales department of the Berger Manufacturing Company, selling building products, died in San Francisco August 4, following a brief illness. Mr. Judge had a wide circle of friends in the construction fraternity and notice of his death comes as a shock to his business associates.

Porter H. Albright, consulting engineer of Los Angeles; R. V. Melick, chief engineer of Turlock Irrigation District, and Franklin Thomas, professor of engineering at California Institute of Technology, Pasadena, have been selected to check the Los Angeles County Flood Control District's estimates of excavation made for a dam at The Forks in San Gabriel river. Appointment of the committee of experts was strongly urged by E. C. Eaton, chief engineer of the flood control district, in answer to claims that the actual amount of excavation was less than shown by the estimates on which payments to the contractors, Flisher, Ross, MacDonald & Kahn, Inc., were based.

PAGE FENCE CATALOG

Page Steel & Wire Company, an associate company of the American Chain Company, New York, has issued a new catalog, No. 534, featuring in picture and descriptive matter the "Galvanized After Weaving" Chain Link Fence and Aluminum Fences. Page fencing is used extensively for industrial plants, institutions, municipal property, estates and of late has entered the airport fields. The catalog also contains details of Page fencing and miscellaneous parts used in connection therewith.

Michel & Pfeffer Iron Works, Harrison and Tenth Sts., are Northern California distributors and erectors of Page fencing.

HERE — THERE — EVERYWHERE

Fall meeting of the American Welding Society will be held September 22-27 in New York City.

Washington State Good Roads Association will hold its annual convention at Wenatchee, Wash., November 21-22.

Semi-annual meeting of the Concrete Reinforcing Steel Institute will be held at Briarcliff Lodge, N. Y., on October 20-22.

Annual meeting of the National Safety Congress (Chicago), will be held in Pittsburgh, Pa., September 29 to October 3.

J. F. Shepherd, general contractor of Stockton, accompanied by his wife and son, sailed from San Francisco on the Steamer President Polk July 26 to tour Eastern cities. They will travel by the way of the Panama Canal and will be gone about 2 months. Shepherd, Jr., will not return to the Pacific Coast but will remain in Kansas City where he proposes to complete his schooling.

Geo. S. Pittock and Son, Ltd., capitalized at \$10,000, has filed articles of incorporation with the secretary of state. The company will engage in the construction business and will market building materials. Directors are: George S. Pittock of Berkeley; Paul M. Jones of Oakland; Ira S. Lillick of Atherton, and Frank J. Foran and J. C. Ewing of San Francisco.

STATE BUILDERS' EXCHANGE INCORPORATES

Organized to protect interests of the building trades industry, the California State Builders Exchange, Ltd., has filed articles of incorporation with Frank C. Jordan, secretary of state. The organization will be state-wide in scope and will include various builders' exchanges.

Objects are to protect welfare of the industry, to maintain efficiency and a high technical standard of workmanship, to promote public relations and to aid in the solution of disputes between capital and labor.

Directors are: William T. Loesch, Pasadena; Ralph E. Hermann, Los Angeles; W. H. George, San Francisco; H. C. Anderson, Berkeley; W. Milton McGrew, Long Beach; T. M. Robinson, Fresno; E. H. Grogan, Stockton; Carl S. Petersen, Santa Barbara; P. M. Stanford, Richmond; Wm. J. Moore, San Jose, and M. H. Golden, San Diego.

MYERS HEADS U. S. BUILDING AND LOAN LEAGUE

R. Holtby Myers of Los Angeles, was elected president of the United States Building and Loan League at the closing session of the annual convention in Grand Rapids, Mich., July 31. Myers succeeds Ernest A. Hale of Boston. Philadelphia was chosen as the 1931 convention city.

Other officers of the league are: Wm. E. Best, Pittsburgh, first vice-president; Ward B. Whitlock, Springfield, Ill., second vice-president, chosen under the policy of advancing officers each year. Directors elected were: John Warren, Jersey City, N. J.; L. P. McCullough, Columbus, Ohio; George E. McKinnis, Shawnee, Okla., and Lee C. Stidd, Portland, Ore.

TRADE LITERATURE

Paramount Building Corp., Ltd., of San Francisco, has been incorporated with the principal place of business in San Francisco. Incorporators are: S. A. Gulati, Don Itay and Charles Itay.

Independent Pneumatic Tool Co., Chicago, Ill., has opened a branch sales office in Los Angeles, in charge of Vernon Job, formerly manager of the San Francisco office. He will be assisted by B. J. Herron.

A petition to dissolve the corporation of the Merritt Concrete Products Company has been filed in the superior court at San Jose. The petition states that the dissolution is agreeable to all stockholders and directors, H. H. Patterson, Ernest O. Billwiller and C. V. Whalley.

Inertol Company, Inc., manufacturer of waterproofing compounds and paints, with headquarters' offices in New York City, and factory in Newark, New Jersey, has established Western headquarters at 447 Sutter street. A complete stock of products is carried here in several warehouses, a distribution will be made to all the Western territory from this branch. B. W. Mueller, is Pacific Coast Manager.

The appointment of A. H. Schaffert as vice-president has been announced by the Truscon Steel Company. Mr. Schaffert is manager of the main plant at Youngstown, Ohio, and has contributed much to the efficient production and superior quality of Truscon products. He is well known as an authority in mechanical engineering and as a genius in practical plant management.

PLAINTIFFS WIN MONOLITH CEMENT SUIT

Patent rights in a secret formula for making plastic cement are involved in a suit which Superior Judge Guerin of Los Angeles has decided for the plaintiffs, E. B. Wyman and E. G. Melklejohn, cement merchants, against Hans Olson, the inventor, and the Monolith Portland Cement Company.

Wyman and Melklejohn asserted that Olson obtained a patent on his process and in 1920 signed an agreement giving them sole rights to manufacture plastic cement by his formula. Later they continued the Monolith concern began to manufacture cement by this process without paying them royalty.

The defendants contended that because Wyman and Melklejohn failed to establish a plant the patent reverted automatically to the inventor, Olson. Judge Guerin ordered an accounting of royalties due after giving judgment for the plaintiffs.

STEEL FURNITURE

June shipments of steel-furniture stock goods, as reported to the U. S. Department of Commerce by 34 manufacturers in the "business group," totaled \$2,123,441 as compared with \$2,342,097 in May, \$2,544,037 in June 1929, \$3,008,239 in June 1928 and \$2,519,512 in June 1927. June shipments of shelving, compiled from reports of 10 companies, totaled \$705,041 as compared with \$751,521 in May, \$920,355 in June 1929, \$720,253 in June 1928 and \$657,927 in June 1927.

ARBITRATION IS PRACTICAL— SHOULD BE PROVIDED BY LAW

By Tom W. Holman, Attorney For
Pacific Northwest Branch, A. G. C.
of America

The question of arbitration clauses in construction contracts has long been one of serious discussion and one advocated by the Associated General Contractors of America. Opposition to arbitrating has grown from the belief that a mutually fair basis for a start cannot be reached. This is particularly true with public officials inexperienced in applying arbitration provisions. The difference toward considering the subject probably grows principally out of the fact that most of the states carry archaic provisions for arbitration in former days, one example from a midwestern state even providing that the fee of the arbitrator shall be \$2 per day.

The modern businessman, like the modern lawyer, has learned that there is no economy in a lawsuit. Litigants, who are best fitted for a part in the daily routine of industry, when dragged into court lay aside their duties and fly at each other's throats. An economic loss must certainly result to both parties concerned.

An extended correspondence with the highway engineers of the states of the Union has shown that arbitration in fact is being used to the benefit of the public over litigating.

The American Association of Highway Officials promulgated a clause on arbitration for insertion in public contracts. Several of the states, notably Georgia, have enacted legislation in support of this provision and the clause now inserted in all public contracts in Georgia requires that both parties agree as a condition precedent to commencing any action in court on a contract that the differences shall be referred to a board of arbitration consisting of three members, one selected by the contractor, one by the public official concerned, and the third selected by such two members, and that the results of the arbitration have the same general effect as a jury's or referee's finding of fact.

This has eliminated thousands of

dollars in preparation of technical data for trial and in heavy expenditure for expert testimony. Likewise, it has resulted in a saving of time incalculable in dollars and cents.

Minnesota, under its 1921 law, Section 2384, Mason's Minnesota State, 1927, carries this provision with respect to state highway contracts:

Subdivision 17 as provided: That controversies arising out of any contract for construction or repair of highways entered into by the commissioner of highways, or by his authority, shall be submitted to arbitration if the parties cannot otherwise agree. Three persons shall compose the arbitration board unless a lesser number is agreed on. If a lesser number is not agreed on each party shall name one arbitrator and those two shall name a third. This statute further provides for

an expeditious and thorough determination of the differences and elimination of the wastefulness and loss of time as resultant of litigation.

Public officials are falling in step with the progressive demands of modern business and are recognizing that a record victory, even with a subsequent recovery against the contractor or his surety of a fixed sum of money, does not make a satisfactory substitute for expeditious settlement during the progress of the work and a good will attitude in its performance. The rush of present day business will not tolerate the delay, the uncertainty and the ineffectual substitute of a law suit for the physical accomplishment desired.

The time has come when intelligence directs that differences shall be adjusted and forgotten and that the work shall progress. Concerted efforts on the part of this association can and should now bring about adequate provisions for arbitration in public contracts, the same as already adopted in every large private undertaking. Economy dictates and common sense supports it. Arbitration is practical and must be had.

SKILLFUL TIMING OF PUBLIC WORK VITAL TO ECONOMIC BALANCE

Skillful timing in the use of a comparatively small margin of public construction is far more important for practical influence on the economic balance than initiating new undertakings, in the opinion of the Committee on Recent Economic Changes of the President's Conference on Unemployment, expressed in a report just made public at Washington.

"As an unplanned form of emergency relief for unemployment," says the report, "public construction has long been tried and found in great measure wanting. Nor does it appear practicable or necessary on any large scale to withhold expenditures on public construction during years of prosperity in order to accumulate a reserve of work during business depressions."

Referring to the volume of contracts awarded for public works and utilities this year, the committee says that "to turn the course of public construction from a depressing to a stimulating influence is of the very

essence of usefulness of public works as a balancing factor," and "it is promptly and comprehensively expediting work on projects already planned, rather than initiating new undertakings, that the key to the problem lies."

Fact-Finding Survey

The committee's report is based on a fact-finding survey of the whole public construction situation, begun last July at the suggestion of President Hoover and carried on by the National Bureau of Economic Research of New York, with the assistance of the Department of Commerce. The survey was prepared by Dr. Leo Wolman of the staff of the research bureau.

The survey is a continuation of the study of post-war economic changes made by the National Bureau and issued a year ago, together with a report of the committee.

It is pointed out in the report that about \$3,500,000,000 is expended annually on public construction, employ-

ing approximately 900,000 workers, and that the trend is rising. These public expenditures represent, it is estimated, from 25 to 40 per cent of the total of all construction in the country.

Public roads in 1929, the largest single item, cost more than \$1,500,000,000. It was noted, and more than one-third of the public works outlay of the Federal government was expended on roads and more than one-half of the total on roads and shipbuilding together.

State governments spent most on road-building, grade crossings and public buildings, and cities spent their moneys largely on transportation facilities, schools and hospitals and on water supply and sewage disposal, according to the statement.

Improvement Programs Lag

"Today the principal spending agencies are behind in their programs for permanent improvements," says the report. "It is impossible to make a statistical estimate of the public expenditure on public works in the next few years, but it would appear that communities whose growth continues must make programs of construction requiring substantial outlays for traffic relief, water supply, sewage disposal and hospital and educational facilities. Though per capita debt burdens have increased in recent years, sampling studies of the margins of unused borrowing power indicate no financial embarrassment on the part of most of our governmental units."

"There are great public works to be built, there is money to do it, and in this country where future projects of permanent public improvements are so fixed and well defined, it is unnecessary to resort to makeshifts for additional work. Never have programs of poor relief or charity colored, to any appreciable extent, the American policy toward public works in relation to unemployment, and advocates of long-range planning favor active prosecution of projects which are economically desirable at the most desirable time. From the standpoint of the taxpayers, who provide the funds, and from that of labor, which may be employed upon the work, noneconomic reasons for public construction have not been favored."

"That declines in public works started during periods of depression have continued even after general business has revived is indicated by studies of the National Bureau of Economic Research. In recent months, however, this tendency has been measurably counteracted and public construction has been increased. Contracts awarded for public works and public utilities in the first four months of 1930 showed an increase of 30 per cent over the corresponding period of 1929. This is striking evidence of acceleration."

Trend of Public Construction

"Left to themselves contracts for public construction are not highly sensitive to the cyclical movements in business. Having started to decline during periods of depression, public works have continued to decline, sometimes all the way through the revival of the next cycle."

"To offset this natural tendency, to turn the course of public construction from a depressing to a stimulating influence, is of the very essence of the usefulness of public works as a balancing economic factor. And it is in promptly and comprehensively expediting work on projects already planned, rather than in initiating new undertakings, that the key to the problem lies."

"The amount of public construction which it is possible to rush forward in order to influence employment and the trend of business in a period of recession is less important than the timing of the acceleration. The psychological effect of advancing public construction at the right time suggests that here is to be found an im-

portant factor in the problem of maintaining a reasonable economic balance.

"If properly timed, as the pendulum of employment starts to swing in an unfavorable direction, the influence of the prompt expedition of public works is effective out of all proportion to its size. Timeliness multiplies the effectiveness of each project accelerated."

"Prompt action, before conditions become serious, can be assured only as there is developed a practical method of gauging the economic situation, so that unfavorable trends which threaten adversely to influence the economic balance may be anticipated and compensating factors influenced earlier than would be the case if natural forces were left to act in their own time and way. Skilled use of the time factor must, therefore, enter into a program of planning for stabilization."

BIDDING FOR ENGINEERING SERVICES CONDEMNED

The soliciting of bids from engineers by cities and corporations has aroused protests from engineering bodies, according to the American Engineering Council, of which Carl E. Grunsky of San Francisco, is president. The requirements of some municipalities that engineers post bonds for the faithful performance of contracts is also condemned.

The American Society of Civil Engineers and the American Institute of Consulting Engineers, both member organizations of the council, have adopted resolutions opposing these practices.

"Members of the engineering profession who respond to public invitations to submit bids for rendering engineering services," declared the institute, "thereby lower their individual and professional standing, and tend to bring indignity and discredit on an honorable profession."

SKYSCRAPERS FORCED BY CASABLANCA BOOM

The "Skyscraper Committee" is the latest organization created within the Casablanca (Morocco) City Council.

Although the early plans of the French Protectorate called for construction of a European town on a site larger than that of Bordeaux, so rapid has been the growth of the city that the area has been found inadequate and the authorities must prepare to "build in the air."

"American methods are necessary here," said Lucien Saint, resident-general of France in Morocco. "This has been a regular American mushroom city, so, for identical situations one must find similar solutions."

Building lots have doubled in price since the Armistice.

A simplified practice recommendation covering dimensions and allowable loads per linear foot of Open Web Steel Joists, was unanimously approved at a general conference of representatives of the industry, held under the auspices of the Division of Simplified Practice of the Bureau of Standards, Department of Commerce, at the Hotel Hollenden, Cleveland, Ohio, on July 15, 1930. A standing committee, composed of representatives of manufacturers and users, was appointed by the conference. It is expected that this simplification will greatly reduce existing confusion in the design of open web steel joist construction. The recommendation, subject to approval of the industry, will be effective as of October 1, 1930.

ESSENTIAL AND NOTEWORTHY FACTS ON WROUGHT IRON CITED

(By F. CREMER, Ph. D.)

In recent years the subject of how to prevent corrosion of ferrous metal has become of ever increasing interest. Similar lively attention has never been displayed in the more distant past, although it is reasonable to assume that our forefathers were keenly imbued with a true spirit for conversation and durability. Yet, even the mere word corrosion is barely ever mentioned in the written records of the past. What is the most obvious answer to this seeming puzzle?

It is the overwhelming number and great variety of many a choice and useful piece of metal craftsmanship, created generations ago, yet in perfect condition today, bearing silent, yet eloquent evidence to the skill that produced metals of unsurpassed merit, that "budded for posterity."

Wrought iron was the only metal of the ferrous group of that time. As we know today, wrought iron carries a natural immunity against progressive corrosion, a phenomenon not at all recognized in its full significance by the casual observer of that earlier period, but gaining recognition every day, while the test of time goes on in mother nature's laboratory, as the most important specific wrought iron virtue.

Resistance To Corrosion

Wrought iron, like all ferrous metal, will form at first a coat of rust upon exposure to weather. But this rust formation is stopped from further progress into the metal underneath. It is this resistance to progressive corrosion that makes wrought iron so practical in its new application to metal window sash, materially reducing maintenance costs where atmospheric conditions cut short the lives of other metals. What is the barrier to this progressive corrosion?

There is something in wrought iron, which is most evident to the man who "wroughts" it, but not so obvious to the man who sees only the finished article made from wrought iron and has never visited a wrought iron mill.

Wrought iron contains a large amount (about 6% by volume) of a non-corrodible substance, called "muck" by the old timer, which modern chemists have determined to be an iron silicate welding flux similar in its characteristics to glass.

This iron silicate welding flux is worked into a most perfect mechanical mixture with the metallic structure of the metal proper. It is so well dispersed, so minutely broken up into small parallel filaments, that only the microscope can reveal exactly how uniformly these noncorrodible filaments are distributed throughout the mass and how closely they are spaced apart.

In such minute subdivision the welding clinker produces a protective action upon its associate, the metallic iron. These corrosion resisting glass-like filaments become in the course of time a part of the very outer weather-beaten surface.

Set up like a grid, they hold the rust film, which forms first, anchored and lodged in place, prevented the corrosion from further progression.

Good wrought iron contains from 300 to 800 iron silicate filaments to the inch. The spacing between the

filaments can be likened to a 300 wire mesh sieve, which will carry water owing to the high surface tension of the latter. Therefore these filaments act as a water shed, and owing to the narrow spacing will keep the water from penetrating into the crevices of the surface with resulting progressive rust formation.

The peculiar surface of wrought iron and its fibrous fracture—both the result of the welding flux in the iron—are such familiar marks to men accustomed to handling scrap that they can readily and instantly identify wrought iron, without calling into consultation the painstaking chemist with his microscope.

Improved Methods

Modern wrought iron manufacturers, fully aware of the demonstrated virtue of wrought iron, have improved production methods of wrought iron of the old days and have succeeded.

As in the past, the wrought iron manufacturer of today produces as an original and most essential step of manufacture the wrought iron ball, with its typical spongy or porous structure, with the pores filled with molten iron silicate welding flux, with the metal particles clotted together like individual snow flake crystals. This ball is carefully compressed at a welding heat into a solid bloom. This is done not only to "wrought" with means to work or distribute the fluid welding flux uniformly throughout the mass, thereby eliminating the labor started in the welding furnace, but also to eject any harmful excess of flux by the squeezing process and to obtain shape, which is adapted to further elongating and rolling. Into bars, thereby developing in the direction of rolling the distinctly fibrous wrought iron structure, containing myriads of microscopically small slag filaments, indeed a unique combination of characteristics.

Wrought iron is therefore a ferrous metal product, which is obtained from a porous, spongy metal ball saturated with a molten iron silicate welding flux and developed into a metal with a distinct fiber structure in the direction of rolling. The chemical analysis and physical tests of wrought iron closely resemble very mild steel.

Uniformity of welding flux distribution and freedom from segregation are special qualities distinguishing different grades of wrought iron and are depending on the skill employed in the manufacturing process.

Nowhere do these astonishing virtues of wrought iron reveal themselves so clearly as in metal window sash where the slim bars are difficult to paint and protect from the atmosphere. With wrought iron the salt-laden slag wrought into the metal itself serves as the protective barrier to progressive corrosion and in itself is an economy long sought after by maintenance engineers.

CLAIMS PAVING TITLE

With a population of 8166 and 27 miles of paving, Mayfield, Ky., claims now paving per capita than any other city in the United States—17½ feet to each citizen.

Building News Section

APARTMENTS

Sub-Bids Being Taken.
APARTMENTS Cost, \$75,000
SAN FRANCISCO, NW Divisadero
and Jefferson Sts.

Three-story frame and stucco apart-
ments (Spanish type; brick base-
ment; 15 3-room apts.)

Owner and Builder—Viggo Rasmus-
sen, 2290 Francisco St., S. F.
Architect—Irvine & Ebbets, Call Bldg.,
San Francisco.

Construction has been started.

Plans Being Completed.
ALTERATIONS Cost, \$100,000
SONORA, Tuolumne Co., Cal.

Alterations and additions to present
three-story brick hotel (new lobby,
coffee shop, banquet rooms,
elevators, etc.)

Owner—Erick and Chas. Seterstrom,
Sonora.

Architect—Davis-Pearce Co., Grant
and Weber Sts., Stockton.

Bids will be taken in about two
weeks.

Completing Plans.
APARTMENTS Cost, \$16,000
SAN FRANCISCO Cabrillo St. E
Thirty-third Ave.

Two-story frame and stucco apart-
ments (4 3-room apts.)

Owner—Withheld.
Architect—Richard Irvine, Call Bldg.,
San Francisco.

Plans will be ready for bids in one
week.

Contract Awarded.
APARTMENTS Cost, \$175,000
SAN FRANCISCO, NE Buena Vista
Ave. and Waller St.

Six-story Class C basement and sub-
basement apartments (36 2 and 3-
room apts. and one 10-room apt.)

Owner—Sunical Investment Co.
Architect—Albert H. Larsen, 447 Sut-
ter St., San Francisco.

Contractor—Mission Concrete Co., 270
Turk St., San Francisco.

Contract Awarded.
APARTMENTS Cost, \$175,000
FRESNO, Fresno Co., Cal. Mariposa
and P Streets.

Four-story steel frame and brick
store and apartments.

Owner—H. A. Chalmers Co., 277 21st
Ave., San Francisco.

Plans by Wm. Symonds, 466 41st St.,
Oakland.

Contractor—Chas. Laughlin Constr.
Co., 421 Mills Bldg., San Fran-
cisco.

Contract Awarded.
APARTMENTS Cost, \$85,000
REDWOOD CITY, San Mateo Co., Cal.
No. 1 Duane Street.

Three-story and basement concrete
and frame apartments.

Owner—M. E. Ryan, 231 Main St.,
Redwood City.

Architect—None.
Contractor—Russell & Duncan, %
Owner.

Plans Being Prepared.
APARTMENTS Cost, \$150,000
SAN FRANCISCO, Pacific Ave. and
Baker St.

Three-story steel frame and concrete
semi-fireproof apts. (six 6-room
apts.)

Owner—W. R. Voorhies, Inc., 369 Pine
Street.

Plans by A. D. Janssen, 369 Pine St.
Plans will be completed in about 2
weeks.

Completing Plans.
APARTMENTS Cost, \$150,000
OAKLAND, Alameda Co., Cal. Mer-
ritt Avenue.

Six-story class C concrete apartments
(35 2-3- and 4-room apts.)

Owner—Name Withheld.
Architect—Chester Treichel, American
Bank Bldg., Oakland.

Sub-Bids Being Taken.
APARTMENTS Cost, \$45,000
SAN FRANCISCO, SE 14th Ave. and
Taraval St.

Three-story frame and stucco apts.
(six 2-room and six 3-room apts.;
brick basement.)

Owner and Builder—Harry J. Rock.
Architect—Irvine & Ebbets, Call Bldg.

Owner Taking Sub-Bids.
APARTMENTS Cost each, \$40,000
SAN FRANCISCO, W 25th Avenue S
Cabrillo St.

Two three-story and basement frame
and stucco apartments (6 2-room
and 6 3-room apts.)

Owner and Builder—Fred. Anderson,
1320 22nd Avenue.
Architect—Irvine & Ebbets, Call Bldg.

Plans Being Completed.
APARTMENTS Cost, \$50,000
SAN FRANCISCO, SE Pierce and Al-
hambra Sts.

Three-story and basement frame and
stucco apartments (12 3-4- and 5-
room apts.)

Owner—Paramount Building Corpora-
tion, Ltd., 200 Green St.

Architect—Richard Irvine, Call Bldg.
Bids will be taken with a few days.

BONDS

ALPAUGH, Tulare Co., Cal.—Elec-
tion will be held August 22 in the Al-
paugh School District to vote bonds
of \$9000 to finance school improve-
ments. Trustees of the district are:
Mrs. J. C. Kinsman, H. R. Leek and
Frederick G. Crowell.

A Demonstration of the SKILSAW PORTABLE ELEC- TRIC HAND SAW

Will solve your cutting problems.
(Four Models, 1/2 to 1 h. p.)

ELECTRIC HAMMERS ELECTRIC DRILLS GRINDERS, BUFFERS

PETER H. NELSON

Labor Saving Portable Electric
Tools.

1222 Mission St. UNDERHILL
San Francisco 1267

LAKEPORT, Lake Co., Cal.—Elec-
tion will be held August 22 in Sulphur
Banks School District to vote bonds of
\$8000 to finance erection of a new
school. Trustees of the district are:
Luella B. Carr, Albert F. Wolbert and
A. L. Story.

HAYWARD, Alameda Co., Calif.—
Federated Improvement Club has cal-
led a special meeting for August 14 to
discuss the proposal for a junior col-
lege. It is proposed to form a district
for such a purpose and purchase a
site in Southern Alameda County on
which to erect the proposed college.

CALISTOGA, Napa Co., Cal.—
Election will be held August 26 in
Calistoga Grammar School District to
vote bonds of \$70,000 to finance erec-
tion of a new grammar school. Two
previous elections for the purpose
were defeated by a slight margin.

MARYSVILLE, Yuba Co., Calif.—
Election will be held August 26 in
Linda School District to vote bonds
of \$9000 to finance erection of a new
school. Trustees of the district are:
A. R. Gledhill, M. S. Mitrovich and
Wm. Dinsmore.

CHURCHES

ROSEVILLE, Placer Co., Calif.—
Methodist Church Society will open
campaign to secure funds to finance
erection of a new church building,
estimated cost \$25,000.

Plans Being Completed.
CHURCH Cost, \$30,000
NORTH OAKLAND, Alameda Co.
Two-story frame and brick veneer
church (auditorium to seat 570).
Owner—Colored Baptist Church.
Architect—Charles W. McCall, 1404
Franklin St., Oakland.
Bids will be called for shortly.

Plans Being Prepared.
CHURCH Cost, \$65,000
PITTSBURG, Contra Costa Co., Cal.
NW Black Diamond and W 8th St.
Two-story reinforced concrete church
with steel roof trusses (120x42-ft.).
Owner—Roman Catholic Archbishop of
San Francisco, 110 Franklin St.,
San Francisco; & Corp. Sole. (St.
Peter Martyr Parish, Rev. Louis
A. Nasselli, rector).
Architect—Arnold Constable, 580 Mar-
ket St., San Francisco.
Will have full basement for Parish
Hall and auditorium will seat 700. Will
have stucco finish, the roof and be of
the Italian Romanesque style of archi-
tecture. Plans will be ready for bids
about October 15.

SAN FRANCISCO—Dinwiddie Con-
struction Co., Crocker Bldg., awarded
the cast stone contract to P. Grassi,
1945 San Bruno Ave., in connection
with the construction of Grace Cathe-
dral, located on Jones, Taylor,
Sacramento and California Sts. Plans
prepared by Architect Lewis F. Ho-
bart, Crocker Bldg.

FACTORIES AND WARE- HOUSES

Reinforcing Steel Contract Awarded.
LOADING PLANT Cost, \$37,669
LIVERMORE, Alameda Co., Cal.
Reinforced concrete washing, screen-
ing and loading plant.
Owner—Kaiser Paving Co., 1522 Lath-
am Square Bldg., Oakland.
Engineer—L. H. Nishkian, 525 Market
St., San Francisco.
Contractor—Schuler & McDonald, 1723
Webster St., Oakland.
Reinforcing Steel—Soule Steel Co.,
Rialto Bldg., San Francisco.

Working Drawings Being Prepared.
FACTORY BLDGS. Cost, \$500,000
FRUITVALE, Alameda Co., Cal.
Group of reinforced concrete factory
buildings.
Owner—Oliver United Filters Co., Inc.,
Fourth and Madison Sts., Oakland.
Architect—Reed and Corlett, Oakland
Bank of Savings Bldg., Oakland.
Bids will not be called for at least
sixty days.

Plans Prepared.
HANGAR, ETC. Cost, \$100,000
ALAMEDA, Alameda Co., Cal. Web-
ster St.
All-steel hangar and administration
building (120x140-ft.)
Owner—Alameda Bay Airframe (R. U.
St. John, field manager).
Architect—Not Given.
Contractor—Lindner and Swinerton,
Inc., 225 Bush St., San Francisco.
It is proposed to break ground about
Aug. 16. The structure will be 120 by
440 feet and will house shops and of-
fices, in addition to providing plane
storage space for 70 small planes or
15 tri-motored transports.

Plans Being Figured.
FACTORY Cost, \$25,000
OAKLAND, Alameda Co., Cal. 46th
and Telegraph Aves.
Two-story reinforced concrete fac-
tory and warehouse.
Owner—Margaret Burnham Candy Co.,
3800 Piedmont Ave., Oakland.
Plans by George E. Koster, 2355 Leav-
enworth St., San Francisco.

Bids Opened.
SHED Cost, \$90,000
SAN FRANCISCO, Pier No. 1.
One-story shed (reinforced concrete
construction; steel columns, wood
roof).
Owner—State Board of Harbor Com-
missioners.
Engineer—Frank White, Ferry Bldg.,
San Francisco.

Following is a complete list of
bids received:
Barrett & Hulp, 918 Harrison
St., San Francisco.....\$114,868
Spivock & Spivock.....114,900
MacDonald & Kahn.....115,000
F. C. Amoroso.....115,000
L. L. Hansen.....119,400
Healy-Tibbitts Constr. Co.....120,920
Schuler & McDonald, Oakland 121,981
Bids held under advisement.

Plans Being Completed.
CREAMERY Cost, \$—
SAN FRANCISCO. Eighteenth and
York Sts. (137-6x200-ft.)
Two-story and basement class E con-
crete creamery (foundations laid
for two additional stories to be
added later).
Owner—Challenge Creamery and But-
ter Assn., 807 Montgomery St.
Architect—Dodge Riedy, Pacific Bldg.
Plans will be ready for bids in about
two weeks.

Preliminary Plans Being Prepared.
WAREHOUSE Cost, \$125,000
SAN FRANCISCO. Eleventh and
Bryant Streets.

Central storage warehouse (type of
construction not determined).
Owner—City & County of San Fran-
cisco.
Architect—Dodge A. Riedy, Pacific
Bldg., San Francisco.

Sub-Contracts Awarded.
WAREHOUSE Cost, \$60,000
SAN MATEO, San Mateo Co., Cal.
Peninsula Ave. and Woodside Way
Warehouse, rock, sand and gravel
bunkers.
Owner—H. E. Casey Co. (H. E. Casey,
manager), San Mateo.
Architect—Eng. Dept. of Owner.
Contractor—A. M. Schulte, 120 Ban-
croft Road, San Mateo.
Steel—Pacific Coast Steel Co., 215
Market St., South San Francisco.
Steel Bunkers—Rodison Mfg. Co., 4401
San Bruno Ave., San Francisco.
Concrete—Gus Adolphson, 706 N.
Claremont St., San Mateo.

Contract Awarded.
WAREHOUSE Cost, \$12,000
PLACERVILLE, Eldorado Co., Calif.
One-story concrete warehouse.
Owner—Pacific Gas & Electric Co., 245
Market St., San Francisco.
Plans by Eng. Dept. of Owner.
Contractor—J. P. Morton, Placerville.

Contract Awarded.
WAREHOUSE Cost, \$20,000
TIRLOCK, Stanislaus Co., Cal.
Feed mill (40x50 ft.) 35 ft. in height;
warehouse (58x100 ft.) 12 ft. in
height and warehouse (50x100 ft.)
14 ft. in height (all of cement and
galvanized iron construction).
Owner—K. Knutsen.
Plans by Owner.
Contractor—Anderson & Wiman,
Turlock.

Will be equipped with latest type of
grinding and mixing equipment in
addition to a 15,000-gal. molasses tank
and mixer.

Contract Awarded.
INDUSTRIAL BLDG. Cost, \$15,000
SAN FRANCISCO. E Ninth St. 150
N Harrison St.
Two-story Class C reinforced concrete
industrial building (25x100 ft.)
Owner—W. C. Johnson.
Architect—O'Brien Bros. and W. D.
Peugh, 315 Montgomery St., San
Francisco.
Lessee—Marwood Electric Co.
Contractor—Industrial Constr. Co.,
815 Bryant St., San Francisco.
Sub-bids will be taken August 4.

Sub-Contracts Awarded.
PACKING PLANT Cost, \$20,000
SAN JOSE, Santa Clara Co., Cal.
Berryessa Road (15 acre site)
One and two-story reinforced concrete
meat packing plant and one and
two-story reduction plant of gal-
vanized iron and brick construc-
tion.
Owner—Continental Packing Co., Ltd.
(represented by W. H. Lehrback
and Geo. F. Cokely, 1217 Park
Ave., San Jose).
Architect—Lescher & Mahoney, Phoe-
nix, Arizona
Contractor—Thermotite Constr. Co.,
580 Stockton Ave., San Jose.
Lumber—Hubbard & Carmichael
Bros. Co., 384 W-Santa Clara St.,
San Jose.
Plumbing and Sheet Metal—Wm. F.
Serpa, 497 N-13th St., San Jose.
Electrical Wiring—Guilbert Bros., 250
W-Santa Clara St., San Jose.
Roofing—W. J. Porter, 1229 W-San
Carlos St., San Jose.
Miscellaneous Iron—Harold Hellwig,
577 W-Santa Clara St., San Jose.

Additional Sub-Contracts Awarded.
LABORATORY Cost, \$65,000
SAN FRANCISCO. N Fell Street, bet.
Van Ness Ave. and Polk St.
Three-story and basement reinforced
concrete and brick offices and labo-
ratory.
Owner—The Viavi Co., Van Ness Ave.
and Market St., San Francisco.
Architect—Willis Polk & Co., 277 Pine
St., San Francisco.
Contractor—Barrett & Hulp, 918 Har-
rison St., San Francisco.
Steel Sash—U. S. Metal Products Co.,
330 Tenth St., San Francisco.
Mill Work—Irannan St. Planing Mill,
San Francisco.
Cast Stone and Cast Plaster—John
Bichel, 209 Fell St., San Francisco.
Brick Work—Wm. Rainey, 323 Clem-
entina St., San Francisco.

Contract Awarded.
CREAMERY Cost, \$65,000
OAKLAND, Alameda Co., Calif. San
Pablo Ave. and Athens St.
One-story and two-story brick and tile
creamery.
Owner—Willow Brook Dairy.
Architect—Diggs and Marshall, Inc.,
Latham Square Bldg., Oakland.
Contractor—E. Campomenosi, 647 1/2
Broadway Terrace, Oakland.

Contract Awarded.
ADDITION Cost, \$350,000
LONG BEACH, Los Angeles Co., Cal.
One-story precast reinforced concrete
and brick addition to plant (480x56
ft., to house pressed steel plant).
Owner—Ford Motor Co., Detroit.
Architect—Albert Kahn, Inc., Detroit.
Contractor—Clinton Const. Co., Spring
Arcade Bldg., Los Angeles and
923 Folsom St., San Francisco.
Other contracts have been awarded
as follows: Electrical work to H. H.
Oberniller, 318 W 9th St., Los Ange-
les; sprinkler system to Fire Protec-
tion Eng. Co., 7451 Wiloughby, Los
Angeles; structural steel to Consoli-
dated Steel Corp., 1200 N Main St.,
Los Angeles.

Plans Being Prepared
MFG. PLANT Cost, \$150,000
SALINAS, Monterey Co., Cal. Spence
Switch, 7 miles south of Salinas.
First unit of sheet iron manufactur-
ing plant.
Owner—American Rubber Producers,
Inc. of California, M. W. Williams,
President.

Architect—Eng. Dept. of Owner
The California concern is a subsidi-
ary of the Inter-Continental Rub-
ber Co. of New York, of which G. H.
Cranahan is president. The site avail-
able for construction comprises 18
acres in addition to that on which
planting has already been started.
It is expected to start construction
in about 30 days

Planned.
WAREHOUSE Cost, \$750,000
LOS ANGELES, Cal. Second and
San Pedro Sts.
Five-story structural steel or reinforc-
ed concrete warehouse and labora-
tory building (250x150 feet.)
Owner—Brunswick Drug Co., 501 N
Main St., Los Angeles.
Architect—Not Selected.

Contract Awarded.
LABORATORY Cost, \$125,000
LOS ANGELES, Cal. N. 7020 Eo-
maline Street.
Two-story Class C brick and concrete
film laboratory (111x297 feet)
Owner—Multicolor, Ltd.
Architect—Eng. Dept. of Owner
Contractor—Myers Bros., 3467 San
Fernando Road, Los Angeles

Deep Well Turbine Pump and Boiler Bids Wanted.
INDUSTRIAL BLDG. Cost, \$—
SAN FRANCISCO. SE Russ St. and Howard St.
Three-story reinforced concrete industrial building.
Owner—Eng-Skell Co., 208 Mission St.
Engineer—A. C. Griewank, 203 Mission Street.

As previously reported, pile driving awarded to M. B. McGowan, Cal Bldg. Bids are now being received to furnish and install a deep well turbine pump and 60-horsepower boiler of 50 lbs. pressure.

GARAGES AND SERVICE STATIONS

Sub-Contracts Awarded.
SALES BLDG. Cost, \$20,000
NEWMAN, Stanislaus Co., Cal.
One-story brick auto sales and service building.

Owner—Thomas Rose.
Architect—H. G. Bissell, 421 E. Miner St., Stockton.

Contractor—Ray Krueger, Gustine.
Painting—Max Kidder, Gustine.
Wiring—Pete Buigard, Newman.
Roofing—San Joaquin Lumber Co., Stockton.

Mill Work—Union Planing Mill, Stockton.

Glass—Tyre Bros., Fresno.
Tile—Fresno Marble & Tile Co., Fresno.

Steel Sash—Michel & Pfeffer Iron Works, Harrison and Tenth Sts., San Francisco.

Structural Steel—Schrader Iron Wks., 1247 Harrison St., San Francisco.

Lumber—Yauncey Lumber Co., Newman.

Cement—Santa Cruz Portland Cement Co., Crocker Bldg., San Francisco.

To Be Done By Day's Work By Owner
SERVICE STATION Cost, \$11,000
SAN MATEO, San Mateo Co., Cal.
Lots 5 and 6 Blk 2, El Camino.

Brick gas supply and super-service station.
Owner—The Texas Co., 1731 Fir St., San Mateo.

Architect—Eng. Dept. of Owner.

Contract Awarded.
ALTERATIONS Cost, \$—
SAN FRANCISCO. No. 860 Howard Street.

Alterations and additions to reinforced concrete auto sales bldg.

Owner—Pacific Gillespie System, Inc., 852 Howard St., San Francisco.

Architect—Eng. Dept. of Owner.

Contractor—Willadsen Bros., 417 Market St., San Francisco.

Wrecking is now under way.

GOVERNMENT WORK AND SUPPLIES

SACRAMENTO, Cal. — See "Machinery and Equipment," this issue. Bids wanted by U. S. Engineer Office to furnish pneumatic wood boring machine, chipping hammers and miscellaneous tools.

PALO ALTO, Santa Clara Co., Cal. — Until August 23, 10 A. M., bids will be received by Supervising Superintendent of Construction, U. S. Veterans' Hospital, Palo Alto, for revisions and additions to the ground lighting system, involving cast iron lighting standards; lighting units for standards in place; installation of C. C., including control switch and step-down lighting transformers, parkway cable, including foundations, trenching, backfill, etc. Plans together with further information obtainable from Supervising Supt. of Veterans' Hospital, Palo Alto.

SAN DIEGO, Cal. — Until 11 A. M., August 27, bids will be received by the Bureau of Yards and Docks, Navy Dept., Washington, D. C., to furnish and install 55,000-bbl. steel tank and piping at the Naval Operating Base (Fuel Depot), San Diego. The work also involves earth and concrete work, steel and iron and electrical work. Spec. No. 6155. Bidding data obtainable from the Public Works Officer, Eleventh Naval District, San Diego, upon deposit of \$10.

Plans Being Figured—Bids Close Sept. 3, 11 A. M.
PIER EXTENSION Cost, \$—
SAN DIEGO, Calif. Naval Operating Base (Air Station).
Reinforced concrete pier extension.
Owner—U. S. Government (Specification No. 6239).

Engineer—Bureau of Yards and Docks, Navy Dept., Washington, D. C.
Plans obtainable from the Bureau of Yards and Docks on deposit of \$10, returnable.

SAN FRANCISCO—C. Jorgensen Co., 604 Mission St., at \$3385 submitted lowest bid to Constructing Quartermaster, Fort Mason, to enclose part of main Corridor No. 36 at Letterman General Hospital. Following is a complete list of bids received:

C. Jorgensen Co.	\$3385
E. G. Hart	3400
Lewis Henzel	3785
McCarthy & Johanns	3875
F. J. Reilly	3889
Clancy Bros.	3963
J. P. Fletcher	4061
Herman Wolter	4354
P. F. Spidell	4747
Joell Johnson	4836
J. F. Linder	4840
Farnocchia & Co.	6875
I. Epp & Son	6875

Bids held under advisement.
DENVER, Colo. — Until Aug. 14, bids will be received by the Bureau of Reclamation, Denver, for one 2-column motor operated hydraulic compressor machine of 2,000,000-lb. capacity.

Contract Awarded.
PAINTING Cost, \$890
SAN FRANCISCO, Presidio.
Interior painting of laundry building No. 24 at Letterman General Hospital.
Owner—United States Government.
Architect—Constructing Quartermaster, Fort Mason.
Contractor—E. Kahler, 723 Baker St.

YAKIMA, Wash. — Until August 18, bids will be received by Superintendent, U. S. Indian Irrigation Service, Yakima, to furnish and install two motor driven pumping units for Satus Pumping Plant. Specifications obtainable from above.

PHOENIX, Ariz. — Until August 15, bids will be received by Superintendent, U. S. Indian School, Phoenix, to furnish and deliver one concrete mixer for use at the sanatorium. Specifications obtainable from above.

PHOENIX, Ariz. — Until August 21, 2 P. M., bids will be received by Superintendent, U. S. Indian School, Phoenix, to furnish and deliver 180 seamless steel, hot roll boiler tubes, not less than 120-in. thick O. D. 3½-inx18-in. long. Further information obtainable from above. Specifications may be seen at U. S. Indian Warehouse in San Francisco.

QUARRY HEIGHTS, C. Z. — Until September 22, under Circular No. 1,

bids will be received by Department Quartermaster, Panama Canal Department, Quarry Heights, for constructing 3 field officers' quarters, 32 company officers' quarters, 27 duplex non-commissioned officers' quarters, 2 110-men a. c. barracks and 2 200-men a. c. barracks, including site grading involving earth and rock excavation, and the roads, walks, water lines, drainage, etc., Albrook Field, C. Z. Deposit of \$50 required for plans, obtainable from above. The work includes excavating and embankment, roads and walks, water distribution and fire protection, storm sewer system, sanitary sewer system, electrical distribution and lighting culvert under Gaillard highway and barracks area, etc.

DENVER, Colo. — Following bids received by U. S. Bureau of Reclamation, Denver, under Specification No. 512, for one 6000 horsepower vertical hydro-electric unit:

Item 1, 6000-horsepower turbine; 2, pressure regulator, 3, butterfly valve; a, combination bit, items 1, 2 and 3; 4, 5000 kva generator; 5, 4 1667 kva transformers; 6- switchboard and miscellaneous appurtenances; b, combination bid, items 4, 5 and 6.

Allis-Chalmers Mfg. Co., Milwaukee, Wis., item 1, \$45,900; 2, \$8100; 3, \$11,300; a, \$69,400; 4, \$81,331; 5, \$17,160; 6, \$5840.

Newport News Shipbuilding & Dry Dock Co., Newport News, Va., item 1 \$41,200; 2, \$7067; 3, \$10,133; a, \$53,750.
S. Morgan Smith Co., York, Pa., item 1, \$44,300; 2, \$7650; 3, \$11,250; a, \$61,500.

Pelton Water Wheel Co., San Francisco, item 1, \$45,125; 2, \$7780; 3, \$11,210; a, \$62,000.

Chapman Valve Mfg. Co., Indian Orchard, Mass., item 3, \$7790.

Joshua-Hendy Iron Works, San Francisco, item 3, \$5790.

Westinghouse Electric & Mfg. Co., East Pittsburgh, item 4, \$27,315; 5, \$16,564; 6, \$1550; b, \$48,429.

General Electric Co., Schenectady, N. Y., b, \$47,130.

BRIDGES

ALAMEDA-SAN MATEO COUNTIES, Cal.—Interstate Commerce Commission Examiners have recommended that the Western Pacific R. R., Mills Bldg., San Francisco, be authorized to construct railroad line from San Francisco to Niles, with a bridge across San Francisco Bay. The proposed line would cost \$8,000,000. The bridge, according to recommendations, would be built only in the event that the Western Pacific was unable to secure operating rights over the Southern Pacific's Dumbarton bridge and adjacent trackage on reasonable terms subject to the commission's approval.

It was further stipulated that no portion of the line between San Francisco and Redwood City shall be operated until either the portion between Redwood City and Niles, including the bridge over the bay, is built, or trackage rights have been obtained over such portion of the Southern Pacific between Redwood City and Niles, including Dumbarton bridge, as will give the road a continuous line from San Francisco to Niles.

A further recommendation was that trackage rights over the proposed new road on reasonable terms be granted to any other railroad operating 250 miles or more of railroad desiring to thus obtain an all-rail entrance into San Francisco for the purpose of gaining access to its own or other terminals in that city.

SAN JOSE, Santa Clara Co., Calif.—John Williams, San Jose, at \$3,000 awarded contract by county supervisors to construct reinforced concrete culvert on Blossom road at Clikker's place and for two corrugated iron culverts on Short road in Supervisor District No. 5. Other bids: Collins & Martin, San Jose, \$3100; Thermotite Const. Co., San Jose, \$3198; Walter Todd, \$3256. Surveyor's estimate \$3,000.

SAN JOSE, Santa Clara Co., Calif.—Collins and Martin, San Jose, at \$1725 awarded contract by county supervisors to construct reinforced concrete culvert on McAbee rd. near McAbee's Place in Supervisor District No. 4. Other bids: Thermotite Const. Co., San Jose, \$1860; Walter Todd, San Jose, \$2076; surveyor's estimate \$1700.

SACRAMENTO, Calif.—City Engineering Dept. is completing plans for proposed H Street subway; estimated cost \$98,000.

SAN JOSE, Santa Clara Co., Calif.—Wm. Radtke, Gilroy, at \$1900 awarded contract by county supervisors to construct reinforced concrete culvert on Canada road at Dexter's Place in Supervisor District No. 1. Other bidders were: Walter Todd, \$1950; Geo. G. Wood, \$2856; surveyor's estimate, \$1800.

SAN JOSE, Santa Clara Co., Calif.—Until September 2, 11 A. M., bids will be received by Henry A. Pfister, county clerk, to widen concrete bridge on Quilto road at Austin corner and on Fruitvale Ave. over Wildcat Creek,

and a reinforced concrete bridge at Ralsch's place on the Quilto road. Plans obtainable from County Surveyor or Robert Chandler.

SAN BERNARDINO COUNTY, Cal.—Following bids received Aug. 6 by State Highway Commission to construct three concrete bridges east of Ontario, one consisting of three 8-ft. 6-inch slab spans; another consisting of two 14-ft. 3-inch slab spans and a third consisting of one 15-ft. 6-inch slab span to be partially reconstructed and widened and the approaches to be widened and paved with asphalt concrete:
Oberg Bros., Los Angeles.....\$17,596
R. H. Travers, Los Angeles.....20,445

DREDGING, HARBOR WORKS & EXCAVATIONS

SANTA BARBARA, Cal.—County supervisors authorize appropriation of \$74,000 for the construction of a seawall along Cabrillo Blvd., from Milpas St. west to Santa Barbara St.

PITTSBURG, Contra Costa Co., Cal.—American Dredging Co., 255 California St., San Francisco, at \$3539 awarded contract by A. F. Bellomo for dredging in connection with Bay Point Yacht Harbor. Channel is to be dredged to a depth of 7 feet, 1,650 feet in length and widen from present width of 40-ft. to 100-ft. with turning basin to accommodate 100 boats.

OAKLAND, Alameda Co., Cal.—Following bids received by City Port Commission for levees for hydraulic fill, located at the west end of 14th St., involving: 7000 lin. ft. earthen dykes, in outer harbor area, approx. 5 ft. in height with a 3-ft. beam on natural slope:

IRRIGATION PROJECTS

CALIFORNIA.—Following permits were granted by the State Department of Public Works, Division of Water Resources, Sacramento, during the month of July, to appropriate water:

Permit 3510, Application 6489 (Sutter County) issued to M. J. and H. E. Newkom, Yuba City, for 3 cu. ft. per sec. from Feather River, for irrigation of 242.9 acres. Est. cost \$13,570.

Per. 3511, App. 6577 (Sutter Co.) M. J. and H. E. Newkom, for 3 cu. ft. per sec. from Feather River, for irrigation of 242.9 acres.

Per. 3512, App. 6490 (Sutter Co.) Estate of California E. Hale, Marysville, for 1.75 cu. ft. per sec. from Feather River, for irrigation of 140 acres. Est. cost \$4200.

Per. 3513, App. 6593 (Sutter Co.) Estate of California E. Hale, Marysville, for 1.75 cu. ft. per sec. from Feather River, for irrigation of 140 acres.

Per. 3514, App. 3846 (San Diego Co.) Fallbrook Irrigation Dist., Fallbrook, for 25,000 ac. ft. per annum from Santa Margarita River, for irrigation and domestic purposes on 10,000 acres. Est. cost \$1,400,000.

Per. 3515, App. 6620 (Yuba Co.) D.

N. Jones, Wheatland, for 0.5 cu. ft. per sec. from Dry Creek for irrigation on 50 acres. Est. cost \$1,000.

Per. 3516, App. 6394 (Lassen Co.) Richard Talbot, Portland, Ore., for 20,000 ac. ft. per annum from Deep Cut Creek for irrigation on 3890 acres. Est. cost \$45,000.

Per. 3517, App. 6572 (San Bernardino Co.) H. O. and F. G. Webber and Helen S. Webber, Highgrove, for 0.35 cu. ft. per second from waste and seepage water for irrigation on 27.84 acres.

Per. 3518, App. 6573 (San Bernardino Co.) Mayville Ranch, Highgrove, for 0.37 cu. ft. per sec. from waste and seepage water for irrigation on thirty acres. Est. cost \$500.

Per. 3519, App. 6613 (El Dorado Co.) L. F. Trumbull, San Francisco, for 0.01 cu. ft. per sec. from unnamed spring for domestic purposes.

Per. 3520, App. 6580 (Trinity Co.) R. E. Roberts, Burnt Ranch, for 2 cu. ft. per sec. from (1) West Fork Tule Creek and (2) Dixie Creek, for mining and domestic purposes.

Per. 3521, App. 6388 (El Dorado Co.) James M. Hill, Berkeley, for 0.01 cu. ft. per sec. from unnamed brook, for domestic purposes. Est. cost \$50.

Per. 3522, App. 6559 (Nevada Co.) F. C. Foote, Grass Valley, for 3 cu. ft. per sec. from China Flat Ravine, for mining purposes. Est. cost \$1850.

Per. 3523, App. 6632 (Tulare Co.) C. W. Gray, et al., North Hollywood, for 0.01 cu. ft. per sec. from Mosquito Creek, for domestic purposes. Est. cost \$350.

Per. 3524, App. 6615 (Mendocino Co.) Hooper Bros., Ukiah, for 1.5 cu. ft. per sec. and 10 ac. ft. per annum from Drainage Creek, for irrigation purposes on 120 acres. Est. cost \$1000.

Per. 3525, App. 6642 (Mendocino Co.) Murphey and Yarbrough, Redwood Valley, for 1 cu. ft. per sec. from Forsythe Creek, for irrigation purposes or 121.2 acres. Est. cost \$500.

Per. 3526, App. 6416 (Siskiyou Co.) Paul Harris, Walker, for 0.5 cu. ft. per sec. from Salt Creek, for irrigation on 30 acres. Est. cost \$300.

Per. 3527, App. 6598 (Trinity Co.) Anton Weber, Trinity Alps, for 0.75 cu. ft. per sec. from Elk Gulch, for irrigation on 60 acres. Est. cost \$120.

Per. 3528, App. 6678 (Sacramento Co.) G. H. Moreland, Sacramento, for 0.3 cu. ft. per sec. from Dry Creek for irrigation on 24.4 acres. Est. cost \$500.

Per. 3529, App. 6591 (Mendocino Co.) Hale Burnett, Yorkville, for 0.12 cu. ft. per sec. from Rancheria Creek, for irrigation on 10 acres. Est. cost \$1,000.

Per. 3530, App. 6550 (Plumas Co.) Quincy Lumber Co., Inc., Quincy, for 0.017 cu. ft. per sec. from Black Hawk Creek, for industrial purposes. Est. cost \$300.

Per. 3531, App. 6551 (Plumas Co.) Quincy Lumber Co., Inc., for 1.56 cu. ft. per sec. from Middle Fork Feather River, for industrial purposes. Est. cost \$1500.

Per. 3532, App. 6532 (Plumas Co.) Quincy Lumber Co., Inc., for 0.075 cu. ft. per sec. from West Branch Peoria Creek, for industrial purposes. Est. cost \$250.

Per. 3533, App. 6533 (Plumas Co.) Quincy Lumber Co., Inc., for 0.075 cu. ft. per sec. from East Branch Peoria Creek, for industrial purposes. Est. cost \$200.

Per. 3534, App. 6554 (Plumas Co.) Quincy Lumber Co., Inc., for 0.075 cu. ft. per sec. from unnamed spring, for

industrial purposes. Est. cost, \$250.

Per. 3535, App. 6559 (El Dorado Co.) U. S. El Dorado National Forest, Placerville, for 0.01 cu. ft. per sec. from unnamed spring for domestic purposes. Est. cost \$150.

Per. 3536, App. 6502 (Madera Co.) F. P. Burris, Fresno, for 3 cu. ft. per sec. from North Fork San Joaquin River, for power purposes. Est. cost \$750.

tions were filed with the State Department of Public Works, Division of Water Resources, Sacramento, during the month of July, for permits to appropriate water:

App. 6717 (San Bernardino Co.) Geneva Catherine Baxter, % Lucerne Valley Supply Company, Victorville, 0.50 cu. ft. per sec. from Silver Creek Canyon and Lone Pine Springs tributary to Mojave Desert for irrigation purposes. Est. cost, \$100.

App. 6718 (Monterey Co.) El Sur Land & Cattle Company, % Cozzens & Davies, Salinas, 12 cu. ft. per sec. from Big Sur River tributary to Pacific Ocean, for irrigation purposes. Est. cost, \$56,030.

App. 6719 (Mono Co.) Earl C. Dart, % Fred R. Smith, Bishop, 1 cu. ft. per sec. and 100 ac. ft. per annum from Heart Lake tributary to Owens River for mining and milling purposes. Est. cost, \$2000.

App. 6720 (Orange Co.) Louis Robinson, El Toro, 1.5 cu. ft. per sec. and 80 ac. ft. per annum from Trabucco Creek tributary to San Juan Creek for irrigation and domestic purposes. Est. cost \$24,750.

App. 6721 (Los Angeles Co.) Little-rock Creek Irrigation District, % W. C. Petcher, 731 Forum Bldg., Los Angeles, 3000 ac. ft. per annum from Little-rock Creek tributary to Antelope Valley for irrigation and domestic purposes. Est. cost \$65,000.

App. 6722 (Butte Co.) Herbert W. Barmann, Box 85, Chico, 10 cu. ft. per sec. from Main Drain of Drainage District #100, tributary to Butte Creek for irrigation purposes.

App. 6723 (Butte Co.) F. O. Cullen, Magalia, 3 cu. ft. per sec. and 9 ac. ft. per annum from Empire Creek tributary to West Branch Feather River for mining purposes. Est. cost, \$200.

App. 6724 (San Bernardino Co.) Burnham Chemical Company, % B. G. Burnham, President, 438 California St., San Francisco, 0.007 cu. ft. per sec. from 3 sources from Parsons and Barnett Canyon tributary to Seales Lake Watershed for industrial and domestic purposes. Est. cost, \$10,000.

App. 6725 (Monterey Co.) Samuel R. and C. C. Avila, King City, 23.37 ac. ft. per annum from Carlazo Spring tributary to Salispuedes Creek for irrigation and domestic purposes. Est. cost, \$2500.

App. 6726 (Sutter Co.) B. P. Lilienthal, Trustee, Alameda Sugar Company, % G. E. Springer, Secretary, 351 California St., San Francisco, 5 cu. ft. per sec. from Sacramento River tributary to Suisun Bay for irrigation purposes. Est. cost \$5000.

App. 6727 (El Dorado Co.) Ira W. Kibby, 3421 Curtis Park Drive, Sacramento, 200 gal. per day from Unnamed Spring, tributary to Bryant Creek for domestic purposes.

App. 6728 (Plumas Co.) W. H. Morrison, Indian Falls Lodge, 1.25 cu. ft. per sec. from two unnamed springs tributary to Indian Creek and Feather River for domestic purposes. Est. cost, \$3000.

App. 6729 (Mariposa Co.) Yosemite National Park, 2 cu. ft. per sec. from Raynor Creek tributary to Merced

liver for recreational and domestic purposes. Est. cost, \$30,190.

App. 6730 (El Dorado Co.) Mrs. Ida M. Raught, et al, % Mrs. Ida M. Raught, 2816 F St., Sacramento, 0.002 cu. ft. per sec. from unnamed spring tributary to South Fork of American River for domestic purposes. Est. cost, \$100.

App. 6731 (Yuba Co.) W. C. and A. Cunningham, % W. E. Wright, Nevada City, Calif., 0.62 cu. ft. per sec. from Mosquito Creek tributary to Oregon Creek for irrigation and domestic purposes. Est. cost, \$1000.

App. 6732 (Madera and Fresno Counties) George A. Haines, Hollywood, 3 cu. ft. per sec. from San Joaquin River, tributary to Suisun Bay for mining purposes.

App. 6733 (Fresno and Madera Counties) Fresno Irrigation District, 1901, Griffith McKenzie Bldg., Fresno, 750 cu. ft. per sec. and 200,000 ac. ft. per annum from San Joaquin River tributary to Suisun Bay for irrigation and domestic purposes.

App. 6734 (Los Angeles Co.) Southern Counties Land Company, % A. L. Sonderegger, 925 Central Bldg., Los Angeles, 800 ac. ft. per annum from Triunfo Creek tributary to Malibu Creek for irrigation and domestic purposes.

App. 6735 (Lake Co.) Arcile A. Price, Middletown, Lake Co., 0.17 cu. ft. per sec. from Lampley Creek Tributary to Putah Creek for power and domestic purposes. 1.5 T. H. P. to be developed. Est. cost \$500.

App. 6736 (San Bernardino Co.) Raymond M. Hart, Pine Knot, 0.025 cu. ft. per sec. from unnamed spring tributary to Big Bear Lake, for irrigation and domestic purposes on ¼ acre. Est. cost \$500.

App. 6737 (Amador Co.) Pacific Gas & Electric Company, 245 Market St., San Francisco, 75 cu. ft. per sec. from Tiger Creek, tributary to North Fork of Mokelumne River, for power purposes. (a) 60,000 K. V. A.; (b) 15,000 K. V. A.; (c) 60,000 K. V. A. Est. cost, \$40,000.00.

App. 6738 (Amador Co.) Pacific Gas & Electric Company, (a) 62.5 cu. ft. per sec., (b) 62.5 cu. ft. per sec. from (a) East Fork Panther Creek, (b) West Fork Panther Creek, tributary to North Fork of Mokelumne River for power purposes (60,000 K.V.A.) Est. cost, \$40,000.00.

App. 6739 (Fresno Co.) Fresno Irrigation District, % J. Allen Hall, Secretary, 1031 Griffith McKenzie Bldg., Fresno, 3600 cu. ft. per sec. from San Joaquin River tributary to San Francisco Bay for power purposes, 76,000 T.H.P. to be developed.

App. 6740 (Lake Co.) Martin Judge Jr. & Company, Crocker First Nat'l Bank Bldg., San Francisco, 175,000 ac. ft. per annum from North Fork of Cache Creek tributary to Cache Creek, for irrigation purposes on 50,000 acres. Est. cost \$1,000,000.

App. 6741 (Lake Co.) Martin Judge Jr. & Company, 250 cu. ft. per sec. and 175,000 ac. ft. per annum from North Fork Cache Creek tributary to Cache Creek for industrial and domestic purposes. Est. cost \$3,000,000.

App. 6742 (Mono Co.) Sarita Mining & Power Co., % Frank W. Stall, President, Bridgeport, 1 cu. ft. per sec. from Masonic Creek, tributary to East Walker River, for mining and domestic purposes. Est. cost \$750.

App. 6743 (Sutter Co.) McGrath Bros., et al, by D. C. Smith, E. I. McGrath and S. A. McKeehan, Agents, % S. A. McKeehan, Meridian, 131 cu. ft. per sec. from Butte Slough tribu-

tary to Sacramento River, for irrigation purposes on 5245 acres.

App. 6744 (Mono Co.) R. S. MacMillan, % Howard P. Hall, 510 W. 6th St., Los Angeles, 0.15 cu. ft. per sec. from unnamed spring for domestic purposes. Est. cost \$150.

App. 6745 (El Dorado Co.) Sacramento Municipal Utility District, Sacramento, 309 cu. ft. per sec. and 255,000 ac. ft. per annum from (a) South Fork of Silver Creek, (b) Silver Creek for municipal and domestic purposes. Est. cost \$26,500,000.

App. 6746 (El Dorado Co.) Sacramento Municipal Utility District, 350 cu. ft. per sec. and 240,000 ac. ft. per annum from (a) South Fork of Silver Creek and (b) Silver Creek, tributary to South Fork of American River for power purposes. 137,200 T.H.P. to be developed. Est. cost \$16,700,000.

App. 6747 (El Dorado Co.) Sacramento Municipal Utility District, 309 cu. ft. per sec. and 255,000 ac. ft. per annum from (a) South Fork of Silver Creek and (b) Silver Creek tributary to South Fork of American River for irrigation and domestic purposes. Est. cost \$26,500,000.

App. 6748 (San Joaquin Co.) Ralph and George Wesley Coffee, % T. P. Wittschen, 1406 Latham Square Bldg., Oakland, 10 cu. ft. per sec. from Lone Tree Creek tributary to French Camp Slough and San Joaquin River for irrigation purposes on 460 acres. Est. cost \$900.

App. 6749 (Lake Co.) Martin Judge Jr. & Company, Crocker First Nat'l Bank Bldg., San Francisco, 175,000 ac. ft. per annum from North Fork Cache Creek tributary to Cache Creek for industrial and domestic purposes. Est. cost \$3,000,000.

App. 6750 (Tulare Co.) George W. Dooley, 283 16th St., San Bernardino, 25 gals. per hour from unnamed spring tributary to White River for domestic purposes. Est. cost \$150.

App. 6751 (San Bernardino Co.) J. Richard Haas, 502 E. Maple St., Glendale, 200 gals. per day from unnamed spring tributary to Baldwin Lake watershed for domestic, stock and garden purposes. Est. cost \$50.

App. 6752 (Trinity Co.) Charles Roderic Delaney, Forest Glen, Trinity County, 2.5 cu. ft. per sec. from Little Rattlesnake Creek tributary to Rattlesnake Creek, thence South Fork Trinity River for mining and domestic purposes. Est. cost, \$100.

App. 6753 (San Mateo Co.) Bear Gulch Water Co., % Calkins Hagar, Hall & Linforth, Crocker Bldg., San Francisco, 25 cu. ft. per sec. and 1500 ac. ft. per annum from Bear Gulch Creek tributary to San Francisco Bay for municipal purposes. Est. cost \$325,000.

App. 6754 (Humboldt Co.) Mrs. Celia Norton, Star Route, Arcata, 0.1 cu. ft. per sec. from Underwood Creek tributary to Main Underwood Creek, thence Pacific Ocean for irrigation and domestic purposes on 8 acres. Est. cost \$250.

App. 6755 (Butte Co.) A. A. McCullen, % Sutter Independent Yuba City, 1.0 cu. ft. per sec. from Branch of Ram Creek tributary to Ram Creek, thence French Creek, thence North Fork of Feather River for irrigation and domestic purposes on 8 acres.

App. 6756 (El Dorado Co.) Mrs. Ida M. Scott, 1112 S. Alvarado St., Los Angeles, 0.005 cu. ft. per sec. from unnamed stream tributary to South Fork of American River for domestic purposes. Est. cost \$300.

STREET LIGHTING SYSTEMS

PAILO ALTO, Santa Clara Co., Cal.—Until August 28, 10 A. M., bids will be received by Supervising Superintendent of Construction, U. S. Veterans' Hospital, Palo Alto, for revisions and additions to the ground lighting system, involving cast iron lighting standards; lighting units for standards in place; installation of C. C., including control switch and step-down lighting transformers, parkway cable, including foundations, trenching, backfill, etc. Plans together with further information obtainable from Supervising Supt. of Veterans' Hospital, Palo Alto.

SOUTH SAN FRANCISCO, San Mateo Co., Cal.—City council plans installation of ornamental street lighting system in Grand Ave. Two types of standards are being considered, the concrete standards as manufactured by P. Grassi Company in San Francisco, and the cast iron type of manufacture by the Enterprise Foundry Company of South San Francisco.

RICHMOND, Contra Costa Co., Cal.—Due to protests, the city council has deferred action on installation of electric trolley system in Tenth St. bet. Ripley Ave. and Cutting Blvd.

SANTA BARBARA, Cal.—Until 1:30 P. M., August 14, new bids will be received by the city council to construct lighting system in West Cabrillo Blvd., bet. State St. and Castillo St., involving cast iron standards, with all appurtenances; 1911 Act. E. B. Brown, city engineer. S. B. Taggart, city clerk. Previous bids were rejected. Note: Date has been changed from Aug. 7 to Aug. 14.

REDWOOD CITY, San Mateo Co., Cal.—City council declares intention (M-13) to install ornamental lighting system in Main St., bet. Maple St. and El Camino Real, involving 4 single light standards and 41 2-light standards of Union Metal Mfg. Co., design No. 8092, together with underground system. 1911 Act. Bond Act 1915. Hearing August 18. E. E. Myers, city clerk. C. L. Dimmitt, city engineer.

MACHINERY AND EQUIPMENT

SACRAMENTO, Cal.—City Manager Jas. S. Dean has recommended to city council that \$2000 be included in the 1931 budget to finance the purchase of equipment for spraying trees and \$1000 for the purchase of spraying materials.

DENVER, Colo.—Until Aug. 14, bids will be received by the Bureau of Reclamation, Denver, for one 2-column motor operated hydraulic compressor machine of 2,000,000-lb. capacity.

PHOENIX, Ariz.—Until August 15, bids will be received by Superintendent, U. S. Indian School, Phoenix, to furnish and deliver one concrete mixer for use at the sanatorium. Specifications obtainable from above.

BERKELEY, Alameda Co., Cal.—City Engineer Harry L. Goodridge recommends to city council the purchase of a motor driven street sweeping machine.

OAKLAND, Alameda Co., Cal.—Following bids received by City Port Commission to furnish and deliver one new Industrial Type tractor:

J. I. Chase Co.	\$1390
Sherman Tractor Co.	1580
O. R. Peterson	1675
R. Baron Co.	1717

Bids held under advisement.

SACRAMENTO, Cal.—Until August 15, 3 P. M., under Order No. 2265-1657, bids will be received by U. S. Engineer Office, California Fruit Bldg., to furnish and deliver Rio Vista, Solano County:

One pneumatic wood boring machine, reversible, for boring holes in wood up to 1" dia., average working speed 700 R. P. M., spade handle bit chuck with set screw and wrench for square shank drill hits, to be equipped with fitting with ribbed shank to enter 1/2" leader hose. It is desired to purchase the most efficient and durable machine and the machine with the fewest working parts. A type similar and equal to Ingersol Rand D. D. W. is desired.

One pneumatic chipping hammer, suitable for general chipping work; 3" piston stroke, closed handle, length overall 13", round nozzle, outside type throttle valve. It is desired to purchase the most efficient and durable machine and a machine with the fewest working parts. A type similar and equal to Ingersol Rand size "3 R" is desired.

Miscellaneous tools to work with chipping hammer.

Further information obtainable from above.

RAILROADS

ALAMEDA-SAN MATEO COUNTIES, Cal.—See "Bridges," this issue Niles-San Francisco extension of Western Pacific Railroad, as recommended by examiners of Interstate Commerce Commission.

LAS VEGAS, Nevada.—Acting Secretary Dixon of the Interior Department has signed a contract with the Los Angeles and Salt Lake Railroad for the construction of thirty mile of railroad from Las Vegas, Nev., to the site of Boulder Dam. (The Los Angeles and Salt Lake Railroad is a subsidiary of the Union Pacific Railroad). Under the terms of the contract the railroad will construct and operate 22.39 mile of railroad at its own expense to a point known as The Summit. The railroad will also build one-third of a mile of track for a delivery yard at The Summit, with the Government to pay one-half of the cost of the construction and renewal maintenance, repair and renewal costs plus 10 per cent of construction cost. The Government contracted with the railroad to build the remaining 7.13 miles to the dam site from The Summit at Government expense.

FIRE EQUIPMENT

WILLITS, Mendocino Co., Cal.—City trustees will purchase for \$4500 a used 750-gal. pump fire engine from American La France Company, paying one-third down and the balance over a 5-year period.

PIPE LINES, WELLS, ETC.

OAKLAND, Alameda Co., Cal.—Following bids received by City Port Commission to furnish pontoon pipe, delivered Oakland Harbor Terminal: 29 pieces 20-in., 40-ft long; 2 pieces 20-in., 48-ft. long:

Pacific Coast Eng. Co., Foot of 14th St., Oakland \$6700
Western Pipe Steel Co., S. F. 6865
Bids held under advisement

SEWERS AND SEWAGE DISPOSAL PLANTS

SAN MATEO, San Mateo Co., Cal.—Oakland Sewer Construction Co., Oakland, at \$2177.50 awarded contract by city council to construct sewer in Poplar Ave., bet. Delaware and Humboldt Sts. Complete list of bids follows:

Oakland Sewer Constr. Co.	\$2177
J. P. Lawler	2403
Oakland Constr. Co.	2561
C. B. Cowden	2714
P. & H. Constr. Co.	2895

SAN FRANCISCO.—E. J. Treacy, Call Bldg., at \$5,125 submitted low bid to Board of Public Works to improve Pennsylvania Ave. bet. 433 ft. north of 23rd St. and 36 ft. south from 25th St., etc., involving vit. clay pipe sewers with wye branches, side sewers, brick manholes. Complete list of bids follows:

E. J. Treacy	\$5,125
M. J. Lynch	5,316
C. B. Eaton	5,714
C. L. Harney	5,794
A. G. Halsdorf	5,912
Pay Imp. Co.	6,704

EL SINORE, Riverside Co., Cal.—The \$22,500 bond issue for extensions and additions to the existing sewer system carried at election July 29. Glenn Graham is the city engineer.

SAN BRUNO, San Mateo Co., Cal.—George A. Kneese, city engineer, Courthouse, Redwood City, is completing plans for proposed new Joint San Bruno-Lomita Park and South San Francisco outfall sewer, comprising the construction of two pumping plants and a central outfall sewer to the bay.

LOS ANGELES, Cal.—P. J. Akmadzich, 3025 Gilroy St., Los Angeles, at \$72,199 awarded contract by county supervisors to construct sanitary sewers in Blanchard St., Dwiggins Sts., etc., involving 8-inch vitrified pipe, portions of which to have concrete cradle.

WATER WORKS

SAN DIEGO, Cal.—Until 11 A. M., August 27, bids will be received by the Bureau of Yards and Docks, Navy Dept., Washington, D. C., to furnish and install \$5,000-lb. steel tank and piping at the Naval Operating Base (Fuel Depot), San Diego. The work also involves earth and concrete work, steel and iron and electrical work. Spec. No. 6155. Bidding data obtainable from the Public Works Officer, Eleventh Naval District, San Diego, upon deposit of \$10.

BEVERLY HILLS, Los Angeles Co., Cal.—Until 8 P. M., August 26, bids will be received by the city council for constructing a conduit line with automatic magnetic starter, for raising the water from reservoir No 1 to No 3. B. J. Firminger, city clerk

LOS ANGELES, Calif.—Fairbanks, Morse & Co., 427 E Third St., submitted the low bid of \$16,765 on item A1 to the Los Angeles harbor department to furnish and install three 5,000 G. P. M. salt water pumps, one 250-gallon centrifugal pump, motors and incidental equipment.

LIVINGSTON, Merced Co., Calif.—Until August 11, 8 P. M., bids will be received by E. J. Hicks, city clerk, to remove 4-in. and install 6-in. cast iron water pipe with fittings, hydrants, etc. in connection with municipal water system extension to Livingston High School property. W. E. Bedesen, engineer, Shafter Bldg., Merced. Certified check 10% payable to city clerk required with bid. Specifications obtainable from engineer. **NOTE**—This work is exclusive of that for which bids are being received by the Merced Union High School District for similar work at the same school.

YAKIMA, Wash.—Until August 18, bids will be received by Superintendent, U. S. Indian Irrigation Service, Yakima, to furnish and install two motor driven pumping units for Satus Pumping Plant. Specifications obtainable from above.

SAN FRANCISCO—Until August 18, 3 P. M., under Proposal No. 618, bids will be received by Leonard S. Leavy, city purchasing agent, 270 City Hall, to furnish and deliver cast iron pipe fittings as may be ordered by San Francisco Water Department during fiscal year 1930-31. Specifications obtainable from above.

SAN FRANCISCO—Until August 11, 12 noon, bids will be received by E. P. Lamb, Secretary, Park Commission, Park Lodge, Golden Gate Park, to furnish and install centrifugal pump and motor at Sharp Park, Salada Beach, San Mateo County. Union Paving Co.....	51,525
Eaton & Smith.....	55,663

BUSINESS OPPORTUNITIES

SAN FRANCISCO—Names and addresses of the individuals or firms concerned in these opportunities will be furnished on request to the Business Opportunity Department of Daily Pacific Builder, 545-547 Mission Street, Phone GARfield 7744.

20350—Cranes. San Francisco, Calif. A French manufacturer of cranes suitable for loading and unloading trucks seeks an agent in San Francisco.

20355—Asphalt. Havana, Cuba. Company is offering asphalt, both brilliant and dark, at \$24 per ton double sacked in sugar sacks, dockside, Havana. Samples and terms on file.

20357—Printing Presses. Guayaquil, Ecuador. Party desires to communicate with manufacturers of small hand presses for stamping envelopes, letters, maps, cards, loose leaves, periodicals, etc., with all the necessary accessories.

20358—Representation. New York, N. Y. Corporation with sales organization in England, Union of South Africa, and India, is desirous of representing local houses in these countries. American references.

Kay Engineering Co., Inc., John B. Yates, president, 103 Park Ave., New York City, is desirous of securing representation of a manufacturing concern that needs a New York office with a skilled selling force of scientific men.

National Electric Corp., J. C. Keane, vice-president, Pittsburgh, Pa., desires to secure connection with man familiar with heating and contracting work.

Mr. Phillip P. Glick, 3733 Gindell Blvd., St. Louis, Mo., is desirous of making a business connection. This gentleman is a graduate in mechanical engineering and has had nine years

of practical experience covering purchasing, production and service department management.

C. A. Rex, The Coffield Washer Co., Dayton, Ohio, is desirous of negotiating with someone with a view to their manufacturing a washer under license for reselling in the Pacific Coast States.

E. A. Costello, San Jose, Calif., wishes to secure some building material firm in San Francisco who wishes to expand their business down the Peninsula.

Geo. Berchek & Assn., 2619 Chippewa St., St. Louis, Mo., has a small, competent organization which can meet the demands of parties interested in representation in St. Louis.

Loren Risk, 626 Plymouth Building, Minneapolis, Minn., tire pump manufacturer, wishes to contact manufacturer for the purpose of marketing and manufacturing his product. Will be in San Francisco within a few weeks.

GROSSMANN WINS DEGREE

Marcus A. Grossmann, chief assistant to F. J. Griffiths, president of the Republic Research Co., research subsidiary of the Republic Steel Corp., has been presented with the degree of Doctor of Science by Harvard University. The degree follows on work in studying the quality and behavior of special steels.

In collaboration with E. C. Bain, Grossmann has written a book on high speed steels, which is now on the press. He has been chosen to give the annual lecture before the American Society for Steel Treating in Chicago in September. Dr. Grossmann will sail for Europe July 24 in company with Mr. Griffiths to spend the next few weeks in Europe studying the alloy steel situation.

TO MEASURE IMPACT OF MOTOR BUS ON ROADS

Tests of the impact of motor busses on modern highway surfaces will be initiated early next month by the Bureau of Public Roads, U. S. Department of Agriculture in co-operation with the Society of Automotive Engineers and the Rubber Manufacturers Association. The War Department has made available for the test a stretch of concrete paving at the Aberdeen Proving Grounds, Aberdeen, Md., and a manufacturer has loaned a large bus of interurban type which will be operated at speeds up to 50 or 60 miles an hour. It is expected that the test will continue for about two months.

Apparatus developed in connection with the bureau's previous co-operative studies of motor-truck impact will be used to determine the magnitude of the impacts produced by large, heavily loaded busses equipped with various types and sizes of tires. The tires for the tests are to be furnished by the tire manufacturers and include both high-pressure and balloon types of the latest designs.

These studies of the impacts of bus traffic are the latest of a series of impact investigations the bureau has been making for the last ten or eleven years. The earliest studies dealt with the destructive effect on pavements of heavily loaded motor trucks, especially those with poor tire equipment. These tests demonstrated in a striking manner the protection afforded to pavements by the pneumatic tire and by the six-wheel vehicle, both of which are widely used today.

OFFICIAL PROPOSALS

STATE OF CALIFORNIA

DEPARTMENT OF PUBLIC WORKS

DIVISION OF HIGHWAYS

NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received by the Department of Public Works, Division of Highways, at the office of the District Engineer, District III, Room 502, State Office Building, Sacramento, California, until 2 P. M., on Wednesday, August 13, 1930, at which time they will be publicly opened and read, for performing work as follows:

El Dorado County, between Fresh Pond and $\frac{3}{4}$ mile East of Riverton, (III-E.D.-XI-F.G.), a distance of about six and two-tenths (6.2) miles, bituminous surface treatment to be applied.

Plans may be seen, and forms of proposal, bonds contract and specification may be obtained at the above address.

No bid will be received unless it is made on a proposal form furnished by the District Engineer. Each bid must be accompanied by cash or a certified or cashier's check made payable to the Director of public Works for an amount equal to at least ten (10) per cent of the amount bid, such guaranty to be forfeited should the bidder to whom the contract is awarded fail to enter into the contract.

The Department of Public Works reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the State.

The revised simplified practice recommendation No. 72—Solid Section Steel Windows may now be considered as in effect, according to a recent announcement made by the Division of Simplified Practice of the Bureau of Standards, Department of Commerce. This statement was prompted by the Division's receipt of a sufficient number of signed acceptances from manufacturers, distributors and users of Steel Windows to insure the general adoption of the program by the industry as a whole. The most important changes made in this revised program are the substitution of nomenclature of commodity products in lieu of dealer stock; the addition of several sizes in both the pivoted and projected window groupings, and changes of types and eliminations in projected architectural windows.

TIMBER SURVEY MADE

A photographic survey by airplane of 200 square miles of timbered territory near Susanville, conducted by the United States forest service as a fire prevention measure, has been completed. The pictures will be utilized in determining fire protection methods, advisable location of trails and other topographical data essential to forest conservation.

A "Pittsburg" Automatic Water Heater installed in the Home indicates high quality throughout.

Recommended and specified by all the leading architects, plumbers and builders.

Consider the high merit of the Pittsburg coupled with "Pittsburg Perfect Service."

"Hot water quick as a wink."

Pittsburg Water Heater Co.

Makers of "Pittsburg Automatic"—"Bungalow Automatic" Storage Systems and "Lyon" Tank Water Heaters.

Jurisdictional Strikes In Building Trades Are Eliminated by Agreement

Elimination of jurisdictional labor disputes among building trade unions is believed to have been accomplished by the establishment of a national board of claims to dispose of such disputes, at a meeting of the executive committee of the National Association of Building Trade Employers and the building trades division of the American Federation of Labor held in Atlantic City on July 31, says Engineering News-Record. The agreement to establish such a board was signed immediately by officials of the builders' association and is expected to be signed by the trades group at the October meeting of the American Federation of Labor in Boston.

By the terms of the agreement, the national board will hear petitions of only international unions. Local and sectional fights will be decided by the international unions, although they may turn them over to the board of claims.

In a dispute between two or more international unions the board may decide the matter or may refer it to arbitrators. In the latter case each union is to appoint an arbitrator, these two to agree upon an umpire. If an umpire cannot be agreed upon, one is to be appointed by the board from three names submitted by the unions. In the case of arbitration the findings will be turned over to the board of claims, which will make effective the decision.

If a union fails to comply with the board's decision, the trades division of the American Federation of Labor is to decide upon a penalty. Where the failure to comply involves an employer, the penalty is to be decided upon by the National Association of Building Trade Employers.

Strikes are absolutely forbidden in the agreement.

PUBLIC IS WARNED AGAINST UNLICENSED ENGINEER

The public has lost thousands of dollars through employment of unqualified and unlicensed engineers, says A. B. Carter, secretary of the Oregon State Board of Engineering Examiners. He warns the public to make certain whether any engineer they consider employing is a registered engineer under the provisions of the state law.

Carter mentioned two cases where prosecutions are being conducted against unlicensed engineers, in one of which cases the claim is for \$60,000 for damage caused by inefficient engineering work, and in another where a school building collapsed after it had been built without supervision of a registered engineer or architect.

SIXTY-NINE BRICK PLANTS NOT OPERATING

"Although there are some hopeful signs in the general business of the country, the construction industry has not yet been affected," says the monthly digest of the Common Brick Manufacturers Association.

"When there is a flood, it is most encouraging to have it stop raining, although the high water and destruction may continue for some time after. It perhaps has stopped raining as far as the destructive tide in business is concerned, but many industries are still under water. The construction industry is perhaps in the deepest valley of all."

"The one encouraging indication from the current reports of brick manufacturers is that the depression is not quite as general as it was. In a few spots there is actually a pick-up in construction. An analysis, however, shows that the influences are largely local, and the so-called 'turn in the road,' so far as construction is concerned, probably has not been reached."

"There is a high volume of government work under way and this is wide-spread. Nearly all the states are getting some portion of the improvements paid for by Federal money."

"Unemployment in the brick industry is at the highest point it has been in since 1918, when many plants were closed as a war measure. Out of 208 plants reporting from the current tabulation, 69 are not operating. There are brick plants in the country which have not turned a wheel in more than a year and some of these still have brick on hand."

"The old law of supply and demand is having its effect upon the price of brick and in some sections there is destructive warfare between the manufacturers."

"Building materials in general are lower in cost than they have been for 7 or 8 years and unquestionably this is a more favorable time to build than the country will witness for some time to come."

"The stocks of brick on hand are larger than they have been in recent years. The 208 concerns reporting have more than 600,000,000 brick, both burned and unburned, in the sheds on July 1st."

HIGHWAYS IMPROVED IN 1929

Highways improved by the various states of the Union last year totaled a distance of one and one-third times around the world, it is shown in reports of the United States Department of Agriculture. In the 48 states a total of 32,322 miles of roads were improved. The expenditures for this huge job totaled over \$310,000,000. Of the money expended on the roads motor vehicle fees contributed \$278,000,000 and the gasoline receipts \$287,000,000, or more than 58 per cent of the total.

Housing Boulder Dam Workers To Be Problem

Just how and where 5000 men and their families will be housed when Boulder Dam construction activity is in full swing, is the principal problem facing Las Vegas, Nevada, says E. A. Ferron, Las Vegas business man, who recently went to Salt Lake City to confer with business interests relative to the establishment of reciprocal business relations between the two cities.

Construction of the 28-mile railroad from the Nevada city to the Boulder dam site alone will require 2000 men, and by January 1 it is estimated, the population of Las Vegas will be increased by 5000 as the direct result of the Boulder dam activity, according to Ferron.

Gus P. Backman, secretary of the Salt Lake Chamber, who conferred with Ferron, announced that a Salt Lake trade group would visit Las Vegas in the near future to confer with the Las Vegas Chamber and also the greater Las Vegas Club.

COUNTY ENGINEERS TO MEET AT VANCOUVER, WASH.

Officials of the Washington State Association of County Commissioners and the Washington State Association of County Engineers have completed a tentative program for the annual convention to be held at Vancouver, Wash., September 18-19-20.

A number of prominent speakers have been invited to participate in the program. Effort will be made to justify an attendance equal to the record turnout recorded at Walla Walla last year, when by far the outstanding convention in the organizations' history was staged by commissioners and engineers of that county.

At that convention 37 of the state's 39 counties were represented by 91 registered county commissioners. Grant and Waukegan were the only counties not represented. Twenty-six of the 39 county engineers were present.

OPEN WEB STEEL JOIST SIMPLIFICATION

Representatives of the industry, at a general conference held recently under the auspices of the Division of Simplified Practice of the Bureau of Standards, U. S. Department of Commerce, proposed and approved a simplified practice recommendation covering dimensions and allowable loads per linear foot of Open Web Steel Joists. In accordance with the usual practice of the Division, mimeographed copies of a summary report of this conference have been mailed to all interests for their consideration and signed acceptance. The recommendation, if adopted by the industry, is to become effective October 1, 1930.

"BARK" OF THE TARIFF WORSE THAN ITS "BITE"

(By Wallace Thompson, Editor, Ingenieria Internacional, New York)

The new tariff, as regards foreign trade, is a good deal like the well known canine whose bark was worse than his bite. With this exception, that the bark of the tariff, during the fifteen months of debate when it was mostly "bark" stirred up the alleged victims a good deal more than the bark of the dog usually does.

It will be noted that since the tariff has been passed and signed, there has been little talk and no actual moves toward retaliation, the talk and such moves as were made were during the "barking" period. Even France, where the threats of retaliation were loudest, has not only piped down since the tariff was finished up and made a law, but has openly stated that no steps will be taken to "get even" with us until after the flexibility clause has had a chance to show what it can do.

In other words, now that nothing further can be done to scare our Congress, or to convince the French people that their political leaders are "saving them from American tariff oppression," there are other things to occupy French political energy.

Before going a little further into this matter of foreign retaliation, let us take a sketchy glimpse of the kind of tariff we have received. Primarily it is an agricultural tariff, although "agriculture" in this case has seemed to include everything made of anything that is not mineral—shoes, for instance, and carpets.

The new tariff also has increased rates on certain mineral products, notably cement. It has also increased various rates to make it more profitable to package foreign imports, such as olive oil, in the United States, rather than abroad, inducing bulk shipments and more work for American plants in putting the goods in shape for retail distribution. But primarily it is an agricultural tariff, and the countries whose produce is going to pay the increased duties are the new countries, the pioneer countries—or so it seems, for we are a long way from knowing, yet, whether it will affect the imports from those countries, even in the slightest degree.

Included in the tariff—and this is distinctly the reason why President Hoover signed it, as he said volubly and convincingly in his statement on the eve of putting his signature on the dotted line—is a new and greatly advanced flexibility clause. Under this provision, the newly constituted Tariff Commission, on review on request, under instruction from Congress or the President, or even at its own initiative, any tariff schedule written into the law. It can authorize any change, up or down, within generous limits, and it can review any number of schedules at the same time.

The old tariff commission could take up but one schedule at a time, could only recommend, and to get information, was also forced to send out commercial investigators into foreign countries to make us more enemies than any diplomat or hard working business man could convert to friends; the Commission now gets its information by more gentlemanly means.

Moreover, the new flexibility clause can take into consideration—and this is a point that no commentator has brought forward—not only the differences in costs or production abroad, but, also, as the law states, "other relevant factors that constitute an advantage or disadvantage in competition."

It is not violating any confidence to

will the much talked-of and threatened retaliations of foreign markets as a result of this country's new tariff policy tear down the good will and halt the growing business which manufacturers of industrial equipment and materials have been building since the war?

One manufacturer recently estimated that the passing of the new tariff would cost his company a half million.

The author of this article (republished from Class and Industrial Marketing), who knows foreign markets through personal contact over a period of years, presents a different view of the situation, and gives his reasons for believing that manufacturers who have undertaken constructive marketing projects overseas have little to fear as a direct result of this country's tariff program.—Editor.

state that the President feels that this clause gives the Tariff Commission the right to consider the effect on our export trade of any tariff rate against imports from a customer country that "constitute a disadvantage in competition," that is in our competition in that particular foreign field. That is some power, and things are going to be most interesting when the Tariff Commission takes it into consideration.

So much for the new tariff law itself—one can read reams more about it in a dozen places, but these are the chief points that concern us in the broad picture of its possible effect on our export trade.

Retaliation has been talked of in many countries—thirty-seven of them protested against proposed schedules during the "barking" period of tariff building. Many of those protests were heeded, or else they were made against tariffs that never had a chance (as we look back on it now), of being enacted, like the proposed duty on bananas which the apple and potato farmers thought would force the American people to eat more apples and potatoes if it could be enacted. The lace schedule against which France protested and held parades and orations up to the day of enactment of the tariff, had been amended months before, and France had nothing on earth to protest over at the end. The same thing was true as to the tariffs on silks, which was finally raised only a tiny fraction above the old tariff.

Some protests were against tariffs destined from the first to go into effect, like that on Czechoslovakian shoes, and against what the manufacturers of tinware in this country call "Chinese" copies of our own clever kitchen utensils. The tariff on Swiss watches was bound to come, also, and the cement tariff, against Belgium and Norway in Sweden, chiefly, is now to be studied by the Tariff Commission; it virtually shuts foreign cement out of the only markets it had, the cities of the Atlantic seaboard.

The protests on the agricultural schedules were justified, but, equally truly, those schedules were destined to go in, and everybody knew it. It remains, however, a very moot question as to what will be the final state of those agricultural tariffs and how much harm they will do anyway. Can-

ada did the first and most thorough job of retaliation, by putting on the identical tariffs we did, on farm products, and we are feeling it already, and the Tariff Commission, at the request of the American farmer himself, may very well be doing something about it, and soon.

But tariffs are not likely to increase production here, even on the farms, and as we are still a large exporter of virtually all farm products (about 30% of all we produce), we shall continue to import the agricultural specialties we want. The chief final effect may well be that the American consumer pays more to the American farmer, and that is about all. As a matter of fact, that was probably the only object of the agricultural schedules in the first place.

This much seemingly needed to be said to give the picture of the tariff situation in the light of the present, which is less than a month after the bill became a law. The readers of Class & Industrial Marketing are interested in what is just one step ahead of the present, however, in the probable, and possible, effects of the tariff on exports of American machinery, industrial supplies and materials.

It is an interesting fact that so far there has been no talk, even, of retaliation abroad against any commodity in that industrial group, with the exception, speaking generally, of automobiles, and motion pictures. These are tremendous items in our export figures, and yet it has seemed to me from the beginning of the tariff agitation that even the talk of retaliation against these exports of ours has been due more to the pressure of reviving manufacture in Europe than to any feeling that politicians abroad could get away with the increased prices which a retaliatory tariff would inflict on their own people who want to buy cheap and good American cars, or American movies.

Trade barriers have been growing all over the world since the end of the war, but they have probably been hastened or raised little, if at all, by the new American tariff. If they have, the economic lever of time and public demand will tend to even them up again before too long a period passes.

But our most important markets for industrial machinery, materials and supplies definitely do not lie in the countries where local manufacturers have competing products which they demand be protected. Those greater markets lie in the pioneer countries, in the British Dominions, in part, and yet in vaster portion in Asia and in Latin America. And most of all in Latin America. More and more, when men talk of export markets they mean markets south of us, and other markets only secondarily.

There are good reasons for this, and they constitute a set of influences on our export trade and actually on our home manufacture that are as vast and far reaching in their own way, as the cataclysmic forces of the World War. They cannot be gone into here, but no one will deny that for the immediate future, even if not now, the new great market of the world is the Central field of Mexico, the West Indies, the countries where there is always a surplus, and where every step is forward—two points well worth remembering, through the thick and the thin of our own personal business year after year, with those countries.

The problems of the effect of our tariff on those markets are very different from the effect of the tariff in Europe and even in the British Dominions.

In the plunger countries the chief trade question is the marketing of their products, which are raw materials and agricultural produce, and which furnish the money with which to buy our exports. The tariff for the moment seems to reduce those markets, and these is some hardship envisioned. But one fact is always to be kept in view, and passed on to Latin American customers, if you will, and that is that the new tariff which was designed and so far as we know will have the sole effect, of attacking the pocketbook of the American consumer, who will pay more for things and thus increase the revenue of the American farmer, and without permanently affecting imports. In the beginning there will be some blows at the sales of certain products of those foreign markets.

We may raise a little more linseed, and may turn a little more of our skimmed milk into casein, and we may save a few extra hides because the price is a dollar a hide more, and we may try to raise some more beet sugar, but in the long run this country is industrializing, and will import more and more from abroad, of foodstuffs and agricultural raw materials, and with greater purchasing power will buy more and more luxuries and more and more of the specialties which even today the little factories of Argentina and of Mexico and Cuba are making for our markets. But the effort to raise newly protected produce will not last in all of these directions.

We shall abandon our flaxseed farms because it ruins the soil, and we shall soon be back feeding the skimmed milk to the pigs, and the best sugar farms will probably diminish because there is no way to put machinery to work pulling beets and man power is getting expensive—too expensive to compete with the magnificent machines we are inventing to sell abroad to make sugar more cheaply in tropical canefields.

More than this, our machines go abroad, also, to make the little factories grow into big ones and through these machines of ours, the peoples of the new lands rise rapidly in living standards and so in purchasing power. The United States is leading the world in machinery exports, not because of any love that any nation has for us, but because we make better machinery and materials and supplies. Poor indeed would any nation be in the export field if it counted its markets only amongst its devoted friends. We never have and we do not now.

A people who will buy from chain stores in spite of all the talk and discussions against them should not deceive themselves with the idea that they sell abroad only on the basis of friendship. That is good, and it is important, but the friendship that counts is service, and it is the only kind.

Through all our export history, and increasingly in the years since the war when our greatest growth has come, we have been competing against forces much more destructive than tariffs and talks of retaliation. We have been competing, I mean, against lower prices, better terms, better merchandising methods. And in spite of those, we have built our tremendous export business.

If we can expand and get new markets where the Germans are offering lower prices, and the French are working the culture theme with a skill we can never approach, and where the British are using their financial links as our bankers will never let us use ours, and where better selling methods and better representations have been the rule of our competitors—if we can do that (as we have), we can weather a tariff storm without being seriously aware of it.

Particularly will this be true, I believe, in the next two or three years, when new investments (in public works and in private industry in Latin America), with larger sums than ever to spend on American machinery, seem so definitely indicated in the trend of the money market today.

during July, as indicated by last month's shipments of basic construction materials, exceeded that of June showing a gain of 8 points to index Number 129, according to a statistical analysis just completed by the Associated General Contractors of America.

The July 1930 volume, however, was 8 3/5 per cent below that for the corresponding month last year, while the composite index number for the first seven months was 24 points, or 11 3/7 per cent below the comparative index number of 156 for 1929.

In commenting on the analysis Edward J. Harding, assistant general manager of the association, pointed out that the July volume more closely approximated that of the corresponding month last year than has that of any month of the current year since March. A continuation of this trend during the next four months, he said, could very nearly offset the decrease of 12 per cent in construction volume reported for the first half of the year.

The association's analysis shows that long term state municipal bond issues as reported by The Bond Buyer, averaged \$125,000,000 a month during the first half of the year as compared with \$116,300,000 per month for the corresponding period of 1929, and that concrete surface pavement awards totaled \$2,821,000 square yards, or an increase of 13 per cent as compared with the first six months of 1929.

The average of construction costs in the principal construction centers in July was 3 points less than the cost index figure for the same month a year ago, standing at index number 129, the association reports.

For the purpose of acquainting cities with tested methods that have proven successful in the financing of industrial development, a decision was made by the Industrial Property Division of the National Association of Real Estate Boards at the Division's meeting at the Association's recent Toronto convention to undertake an intensive survey of community financing of industry as practiced by leading American cities. Members of the Division authorized George C. Smith, St. Louis, Missouri, Division chairman to appoint a committee to make the investigation. Among the plans for attracting industry to a given community that are to be studied are those which are now successfully operated by the Baltimore Industrial Corporation, a civic enterprise organized some time ago, and the Easton, Pennsylvania, fund of \$1,000,000 available for the financing of industries arranging to locate in that city, and the Louisville, Kentucky, Foundation.

The Philadelphia Building Congress in its investigation of shopping of bids found that much of the trouble in the industry was caused through sub-contractors having submitted two bids—one that was submitted when the estimates were called in at a certain date and a lower figure when the "sub" was told he had a chance to get the job if—?

The Congress suggests that if the vicious practice of shopping of bids and price-cutting is to be eliminated and the industry is to benefit through its efforts the sub-contractor must make his first bid the lowest possible. There must be no second bid or a third one.

The "sub" knows as well as anybody else that he can't do something for nothing and that when he submits a figure lower than the bid he is sure to lose the job. He knows that if he is injuring the whole industry with himself being the chief sufferer

THE OBSERVER

What He Hears and Sees on His Rounds

Select your architect as you would select a physician or a lawyer, says the T-Square. In this age of specialization many architects, though not all, confine themselves rather closely to certain kinds of work. A man whose practice consists for the most part of banks, for example, may not be the one you would select to do a country house. Many architects refuse to do country house work, either large or small. Others whose practice consists mainly of ecclesiastical work may decline a commission to design a hospital, just as a throat specialist would send you elsewhere for an appendicitis operation.

If the project is a large and complicated one, it will probably be well to choose an architect familiar with that particular kind of work. If, on the other hand, the project is small, you will probably secure much more personal attention by engaging one of the younger men who still has his reputation to make.

There are advantages, of course, in the services of a nationally known established practitioner. There are other advantages in the services of the younger man whose reputation is as yet unmade.

One of the worst ways of selecting an architect is by inviting several to present sketches. The one who happens to be the best salesman, or who appears with the prettiest pictures (which he may have had some one else prepare) may win the commission. The better architects will not descend to such a way of getting business, just as the better lawyers or physicians will not compete for a case on the basis of tentative briefs or competitive prescriptions.

In some instances, where public work seems to require the final choice of an architect in a manner free from any suggestion of personal preference, competitions are held, but these will be entered by reputable practitioners only when conducted under approved methods of procedure, and usually when each competitor is paid for the study and work that these preliminary drawings necessitate. Details of such competition procedure may be had from reputable architects or from the American Institute of Architect, The Octagon, Washington, D. C.

For the first time since 1927 the volume of construction performed

ALONG THE LINE

Martin Tillman has been appointed chief engineer of the Antioch municipal water works system, succeeding John Fred Linwood, deceased. Tillman was formerly chief assistant to Linwood.

E. A. Hoffman, city engineer of Richmond, has been appointed by the Richmond city council to represent that city on a committee of engineers and city officials to work out the traffic problems connected with the proposed bridge over San Francisco Bay.

B. W. Creim, electrical engineer for the Modesto Irrigation District, will act as consulting engineer for the Tulare Utility District, now in process of organization, according to an announcement of C. L. Straub, engineer in charge of the new district. The Tulare district proposes to generate electricity with steam plants heated with natural gas and will supply the town of Tulare and surrounding territory.

A. R. Smith has been appointed executive engineer of the turbine engineering department of the General Electric Company to succeed the late William J. Delles. Mr. Smith will retain his responsibility as engineer of the construction engineering department. He has been with the General Electric Company since 1897, and with the construction engineering department since 1908.

John D. Twohy, 45, a member of the firm of Twohy Brothers, general engineering contractors, died in a San Francisco hospital following an illness of two weeks from pneumonia.

He was the son of the late John Twohy, founder of the firm of Twohy Brothers in Spokane, which handled construction of the Great Northern, Northern Pacific, Canadian Pacific and Southern Pacific railways and many other big construction projects of the West.

Twohy is survived by his widow, Genevieve, and four children, Patricia, Mary Lou, John and Robert. He also leaves his mother, Mrs. Mary A. Twohy, now a resident of Los Angeles, and two sisters and two brothers.

DELEGATES TO INTERNATIONAL CONGRESS OF ARCHITECTS

Six delegates will represent the United States at the twelfth international congress of architects to be held in Budapest in September, the Department of State announced.

The royal Hungarian government, having invited the government of the United States to send delegates to the twelfth international congress of architects to be held at Budapest in September, the following have been named to represent this government at that meeting:

John Mead Howells, Class Gilbert, Prof. William A. Boring, New York City; George Oakley Totten, Washington, D. C.; Dr. C. Howard Walker, Boston, Mass.; Frank C. Baldwin, The Octagon, Washington, D. C.; alternate delegate, Prof. Warren P. Laird, Philadelphia, Pa.

Southern Pacific Company has been directed by the Railroad Commission to refund to Lassen Lumber and Box Company all charges collected in excess of 5 cents per 100 pounds, minimum carload weight 80,000 pounds, or 60,000 pounds according to car capacity, for the transportation of rough sawn ties from Susanville to Lasco.

\$20,676,703 IS PACIFIC COAST BUILDING EXPENDITURE FOR JULY

According to reports received from building department executives in the principal cities of the Pacific Coast section, California building activities in July, 1930, involved an expenditure of \$16,116,176 as compared with \$34,991,195 for the corresponding period in 1929.

Washington is the only state comprised in the Pacific Coast area reporting increased construction for the past month. In July of this year,

Washington reports an expenditure of \$2,636,869 as compared with \$2,378,413 for the same period in 1929.

Oregon reports improvements involving an expenditure of \$518,213 for July of this year as compared with \$2,283,207 for July, 1929.

The following is a complete report of Pacific Coast building permit activities for the month of July, 1930, together with the month of July, 1929, for comparative purposes:

ARCHITECTS' LICENSE LAW CITED IN REDWOOD CITY CASE

From time to time requests come to Building & Engineering News for interpretation of the law regulating the practice of architecture in the State of California. To enlighten those not yet thoroughly familiar with the requirements of the measure, now being rigidly enforced throughout the State, William T. Sweigert, San Francisco attorney, was requested to prepare a brief on the important angles of the law. His explanation is published herewith.—Editor.

On July 7th one J. G. Lehman was arrested in Redwood City for violation of the state law regulating the practice of architecture.

It appears that Lehman had consulted the Board of Trustees of the First Baptist Church of Redwood City, regarding plans and specifications for the erection of a new building. He was employed to draw them for five hundred dollars and, after completing some of them, was paid two hundred dollars, on account.

It was later learned that Lehman was not an architect holding a certificate to practice under the laws of this state. He had not, however, informed the Board of Trustees to that effect in writing. Complaint was made. A representative of the state board investigated the case. The arrest was made; the charge was prosecuted and Lehman, on July 13th, was found guilty by the Justice Court at Redwood City, and sentenced to a fine of two hundred dollars, or in lieu thereof, twenty days in the county jail.

Under the state law it is a misdemeanor for any person to practice architecture without a certificate. The law formerly provided, however, that nothing in it would prevent any person from furnishing plans or other data for buildings, if such person fully informed the person for whom the

plans or data were furnished that he was not a certified architect. Under this provision, a person would not have violated the law, if the person for whom the plans or specifications were drawn was orally informed that the person drawing the plans was not a certified architect.

On April 6th, 1929, the legislature amended the law in an important respect. The law as it now stands, makes it a misdemeanor, punishable by a fine of not less than fifty nor more than five hundred dollars, or by imprisonment in the county jail not exceeding six months, or by both such fine and imprisonment, for any person to practice architecture in this state without a certificate, or to advertise or put out any sign or card or other device which might indicate to the public that he is an architect or that he is qualified to engage in the practice of architecture.

The proviso formerly contained in the law has been narrowed to require that an uncertified person, furnishing plans, drawings, or specifications, instruments of service, or other data for buildings, must prior to accepting employment or commencing work fully inform his employer in writing that he is not an architect. In other words an uncertified person furnishing such data is not now fully protected, merely by orally informing the person employing him that he is not an architect. The uncertified person must give that information in writing in order to comply with the law.

The law now does not apply to persons furnishing plans, drawings, specifications, instruments of service or other data for labor and materials to be furnished for store fronts, interior alterations or additions, fixtures, cabinet work, furniture, or other appliances or equipment, or for

any work necessary to provide for their installation, or for any alterations or additions to any building necessary to or attendant upon the installation of such work. In other words, uncertified persons may furnish plans and specifications for work of this limited type.

The law still provides, of course, that any person may make plans or drawings for his own buildings.

With respect to practicing architecture without a certificate it should be remembered that, in addition to the criminal aspect, no recovery may be had in a civil action for services rendered by an uncertified person in violation of the law.

\$65,000 SOUGHT TO "SELL" EAST BAY DISTRICT

The Alameda County Board of Supervisors has been asked by a group of civic organizations of the county to include in the next budget an item of \$65,000 for an advertising campaign to "sell" the Eastbay to Eastern investors and manufacturers looking for a place to establish new industries and to invest money.

Besides advertising, the appropriation would provide a means for sending a personal representative East when necessary to make personal contact with investors and manufacturers.

It is to be a campaign of "one for all and all for one," to benefit the entire Eastbay.

The supervisors referred the request to the committee working on the items of the budget, which is to be presented next month.

CONTROL FOR REVERSING SMALL MOTORS

The General Electric Company announces a convenient reversing equipment for small motors, CR-7009-15-19. This switch is designed to handle squirrel cage motors rated 1 1/2 horsepower at 110 volts, and 2 horsepower at 220, 440, 550 and 600 volts, 25 to 60 cycles.

The switch consists of two contactors mechanically interlocked and having four sets of contacts and terminals. Three of these contact sets are for power circuits and the remaining one is for the holding circuit of the coil. The terminals are front connected and are marked to facilitate wiring.

The equipment is mounted on a compound base for mounting in an enclosing case. The case is suitable for wall mounting and has removable cover and knockouts for the incoming and outgoing leads. A three-button ("Forward," "Reverse," "Stop") push-button station is recommended for a control switch.

California forestry is to be taught in the schools of this state. To meet the demand for fact information regarding California's forests, the California State Chamber of Commerce has published an edition of 50,000 forest handbooks for California. The text designed for use in grammar and high schools, was written by forestry experts, and outlines in simple language, a course in forestry education as applied to California conditions. The Handbook has received final approval for use in the public schools by the State Department of Education in accordance with the state law which permits teachers to devote a portion of class time to the study of Forestry. The Forest Handbook for California will be furnished to anyone requesting it for educational purposes, it is stated.

HERE — THERE — EVERYWHERE

The Bricklayers' Union in Chicago has made objection to the use of hollow tile in load-bearing walls of buildings, as permitted under the present municipal ordinance. It is claimed that such walls are deficient in strength and in fire-resistant properties.

Salaries of all city employees of Asheville, N. C., beginning with the mayor, who loses \$1,500 annually, have been slashed 20 per cent as part of an economy program. This will effect a substantial reduction in the tax rate.

U. S. Senator McNary, following a conference with Congressman W. C. Hawley and Oregon lumbermen at Salem, Ore., telegraphed Assistant Secretary of the Treasury Lohman, urging him to use every effort to have Russian lumber and pulpwood excluded from the United States. McNary told the lumbermen if the treasury department did not assure them protection against imported lumber he would be ready to join the Oregon congressional delegation in carrying on the fight.

The International City Managers' Association will hold its annual convention in San Francisco, September 24 to 27. Sessions will be held at the Palace Hotel with a one-half day session at the University of California. Hollis Thompson, city manager of Berkeley, is chairman of the local convention committee.

Citizens of Colby, Kan., will have to worry along another year with no municipal taxes to grow indignant over. For the third successive year the city council voted to let the municipal water plant wash away the city's bills. During two years, earnings of the plant have paid administration bills, providing \$200,000 for pavements, paid for new equipment and placed a balance of \$45,000 in the city treasury.

Specifications and instructions for using and testing Quikard cement are given on a 16-page illustrated booklet issued by the Ash Grove Lime & Portland Cement Co., Kansas City, Mo.

CIVIL SERVICE EXAMINATIONS FOR BOULDER DAM WORK

The U. S. Civil Service Commission announces open competitive examinations for positions in connection with the boulder dam project and also in connection with design and specifications for the proposed All-American Canal of the U. S. Reclamation Service. The positions to be filled and the salaries are: Principal civil engineer, \$5,600 to \$6,400; senior civil engineer, \$4,600 to \$5,200; senior electrical engineer, \$4,600 to \$5,200; senior mechanical engineer, \$4,600 to \$5,200; civil engineer, \$3,800 to \$4,400; mechanical engineer, \$3,800 to \$4,400.

Applications must be on file with the Civil Service Commission at Washington, D. C., not later than Sept. 10. Competitors will not be required to report for examinations, but will be rated on their education, experience and fitness. Full information may be obtained from the U. S. Civil Service Commission, Washington, D. C., or from the secretary of the U. S. Civil Service board of examiners at the post office or custom house in any city.

TRADE LITERATURE

The Paradon chlorinizer, for the application of chlorine solution to small water supplies, swimming pools and sewage plants, is described in a four page leaflet issued by the Paradon Mfg. Co., Arlington, N. J.

Reprints of two articles dealing with the use of automatic drainage gates are available from the California Corrugated Culvert Co., West Berkeley, Calif. One of these deals with land drainage and protection in the Brazos Valley of Texas; the other with the remodeling of the sewage-treatment plant at Houston, Texas.

A new booklet entitled "Bridge Designing" has just been issued by the American Institute of Steel Construction. This is illustrated with reproductions of the drawings submitted by the engineering and the architectural students in the recent prize competition held by the Institute. Ten drawings by architectural students and seven drawings by engineering students submitted in the final judgment are published in the booklet.

Bar-X-Lath, a new product combining diamond mesh lath with reinforcing rods, is described in a 4-page folder issued by the Consolidated Expanded Metal Companies, Wheeling, West Virginia.

Three illustrated catalogs of the St. Paul Corrugated Co., St. Paul, Minn., deal with steel decking, skylights and ventilators, and corrugated metal culverts and well curbing.

"Bleaching Powder as an Auxiliary Treatment of Sewage," an article by Herbert P. Bell, manager of the sewage-works at Barnsley, England, has been reprinted by Innis, Speiden & Co., 117 Liberty St., New York City.

Catalog 83-R, describing the Sullivan line of portable gasoline-engine-driven compressors of two- and four-cylinder units ranging in capacity from 66 to 210 cu. ft., has been issued by the Sullivan Machinery Co., Chicago.

WESTINGHOUSE HAS NEW TYPE OF STREET LIGHT

The Westinghouse Electric and Manufacturing Company announces the Type TC Titan Luxsolite, an ornamental suspension type luminaire designed for bracket mounting, for use with series street lamps of 4,000, 6,000, 10,000, or 15,000 lumens operating on the secondary of safety coils or with multiple street lamps of 300, 500, 750, or 1,000 watts.

This fixture is quite simple in construction, consisting of an adjuster tapped for a 1½ inch pipe, a cast iron canopy, a spun copper case, a globe holder, a globe, and a socket mounted on adjustable supports. It is provided with gaskets which render it thoroughly weather and dust proof.

The adjuster which is attached to the canopy consists of a casting which houses a universal joint. This joint permits the fixture to adjust itself to a true vertical position after it is mounted on a bracket.

The globe is hinged to provide accessibility for cleaning and relamping.

TRADE NOTES

Naldrett Plumbing Co. has opened new shop and office quarters at 847 Emerson Street, Palo Alto. The shop is operated by James E. Naldrett.

Standard Sheet Metal Works, operated by V. Christensen, has opened new quarters at 917 C Street, Hayward. The firm will engage in general repair and contract work.

Moorehead Lumber Co., Ltd., of San Francisco, capitalized for \$50,000, has been incorporated. Incorporators are: Chas. C. Moorehead, C. N. Winslow, and G. M. Harrington.

Jas. P. Marsh & Company, Chicago, a division of the Commercial Instrument Corporation, announce the appointment of E. L. Aikins of the Marsh Sales Company as district representative for the states of Washington, Oregon, Montana, Idaho and British Columbia. The Marsh Company manufactures heating systems and units, industrial instruments, automatic air valves and gauges.

Roy Barto, president and manager of the Cadwalader - Gibson Company of Los Angeles, recently returned from the Philippines where he spent several months at the hardwood mills of the company.

Phil. B. Hart has joined the sales force of the Schumacher Wallboard Corporation of Los Angeles. He will maintain headquarters in San Francisco.

The joint board of directors of the C. Pardee Works and the Matawan Tile Company have announced the formation, effective August 1, of a new selling company, the Pardee-Matawan Tile Company. This company will handle the sales of these two companies in their respective fields of wall and floor tiles.

The Pardee-Matawan Company will have offices in New York City, Perth Amboy, N. J.; Matawan, N. J.; Boston, Philadelphia, Buffalo, Detroit, Cincinnati, Chicago, Dallas, Los Angeles and Atlanta.

SURETY BOND METHOD URGED BY OAKLAND PLUMBERS

Using the questionnaire method of securing the opinions of Oakland plumbers concerning proposed changes in the city plumbing law, Plumbing Inspector A. R. Cordan learns that the plumbers do not wish to retain the present cash-deposit system but prefer surety bonds for the faithful performance of all work done within the city limits.

At present the plumbers put up a \$100 cash deposit to the city, and the money remains in the city treasury unless the plumber goes out of business.

The plumbers also object to paying their special license fee, and are not in favor of the general license idea. The results of the questionnaire were as follows:

1. Shall we retain the present \$100 cash deposit? For, 48; against, 57.
2. Are you in favor of a surety bond? For, 57; against, 47.
3. Are you in favor of the present annual city plumbing license? For, 49; against, 56.
4. Are you in favor of being licensed on the basis of all other business as licensed in the city of Oakland? For, 49; against, 52.

Bldg., Eddy and Powell Sts., San
Francisco.

Contractor—K. E. Parker, 135 South
Park, San Francisco.

Structural Steel—Judson-Pacific Co.,
609 Mission St., San Francisco.

Additional Sub-Contracts Awarded.

STORE Cost, \$150,000
OAKLAND, Alameda Co., Calif. 20th
St. and Broadway.

Three-story class A store.

Owner—I. Magnin & Co., Grant Ave.
and Geary St., San Francisco.

Architect—Weeks and Day, Financial
Center Bldg., San Francisco.

Contractor—Chas. Heyer, Mills Bldg.,
San Francisco.

Structural Steel—Judson-Pacific Co.,
609 Mission St., San Francisco.

Architectural Terra Cotta—N. Clark &
Son, 116 Natoma St., San Fran-
cisco.

Marble—Vermont Marble Co., 244
Brannan St., San Francisco.

Ornamental Iron and Steel Sash—Mi-
chel & Pfeffer Iron Works, Har-
rison and 10th Sts., San Francisco.

Elevators—Spencer Elevator Co., 166
7th St., San Francisco.

Elevator Contract Awarded.

ADDITION Cost approx., \$250,000
SAN FRANCISCO. Clay and Mont-
gomery Streets.

Class A addition for offices and bank.
Owner—Bank of Italy, premises.

Architect—H. A. Minton, Bank of Italy
Bldg., Eddy and Powell Sts.

Contractor—K. E. Parker, 135 South
Park.

Elevators—Spencer Elevator Co., 166
7th Street.

As previously reported, structural
steel awarded to Judson-Pacific Co.,
609 Mission St.

Preparing Plans.

STORES Cost, \$150,000
LOS ANGELES, Cal. SE Washington
and Rimpau Sts.

Two-story and basement Class C
brick stores & offices (160x140 ft.)

Owner—Trabue Pittman.

Architect—S. Charles Lee, Petroleum
Securities Bldg., Los Angeles.

Plans Being Figured—Bids Close Aug.
16th, 12 Noon.

STORE, ETC. Cost, \$17,000
NEWMAN, Stanislaus Co., Cal.

One-story brick and hollow tile store and warehouse (50x125-ft.)
Owner—A. M. Souza.
Architect—Hardman & Russ, Berkeley Bank Bldg., Berkeley.

Sub-Contracts Awarded.
ALTERATIONS Cost, \$40,000
SANTA ROSA, Sonoma Co., Cal.
Alterations and additions to concrete bank building (add two stores, 60x50 feet, etc.)

Owner—Bank of Italy.
Architect—H. A. Minton, Bank of Italy Bldg., Eddy and Powell Sts., San Francisco.

Structural Steel—Schrader Iron Works 1247 Harrison St., San Francisco.

Plumbing—George Mitchell, Santa Rosa.

Electric Work—L. A. Drake, Santa Rosa.

Marble—Joseph Musto Sons-Keenan Co., 535 North Point St., San Francisco.

Bank Fixtures—S. Kulchar & Co., 731 E-Tenth St., Oakland.

Miscellaneous and Ornamental Iron—Federal Ornamental Iron Works, 16th St. and San Bruno Ave., San Francisco.

SAN FRANCISCO.—The San Francisco Bank, 526 California St., has purchased the property adjoining their present bank on California St., extending through to Sacramento, with a frontage of 45 ft. on Sacramento St., and 41x51 on Spring St. Just what improvements will be made is not made public at this time.

THEATRES

Specifications Being Written.
THEATRE Cost, \$250,000
SAN FRANCISCO, Ocean Avenue bet. Fairfield and Lakewood Aves.
Class A steel frame and reinforced concrete theatre and (6-8) stores; theatre seating 1800.

Owner—Samuel Levin.
Architect—Miller & Pfeiffer, 580 Market St.

Bids will be taken in three or four weeks. Structure will have a seating capacity of 1800 and contain six or eight stores. It will have a frontage of 182 feet on Ocean Ave.

Commissioned To Prepare Plans.
THEATRE Cost, \$300,000
PHOENIX, Arizona First and Washington Sts.

Two-story Class A reinforced concrete theatre (150x200 ft.) (to seat 1700).

Owner—Fox West Coast Theatres, Inc. Architect—S. Charles Lee, Petroleum Securities Bldg., Los Angeles.

SAN FRANCISCO.—Until August 25 3 P. M., under Proposal No. 620, bids will be received by Leonard S. Leavy, city purchasing agent, 270 City Hall, to furnish and install stage fittings and draperies in Roosevelt Junior High School. Specifications and further information obtainable from above.

Sub-Contracts Awarded.
REMODELING Cost, \$20,000
VALLEJO, Solano Co., Cal.
Remodel theatre building.

Owner—Fox West Coast Service Corp., Washington St. and Vermont Ave., Los Angeles.

Architect—Bach and Stanbery, Film Exchange Bldg., Los Angeles.

Contractor—A. J. Hopper, 1769 Pleasant Valley Ave., Piedmont.

Plumbing—J. J. Looney, Vallejo.

Concrete Work—E. L. Johnston, Vallejo.

Sash and Doors—Western Door & Sash Co., 5th and Cypress Sts., Oakland.

Steel Toilet Partitions—Albatross Steel Equipment Co., Los Angeles, and 557 Market St., San Francisco.
Heating and Ventilating—C. R. Watts, 1156 Spruce St., Berkeley.
Electric Work—Alta Electric Co., 938 Howard St., San Francisco.

Plans To Be Prepared.

THEATRE Cost, \$175,000
STOCKTON, San Joaquin Co., Calif. 200 block N Sutter St. (100x150).

Two-story fireproof theatre (to seat 2000).

Owner—National Theatres Syndicate, San Francisco.

Architect—Not Given.

In all probability Bliss & Fairweather, Balboa Bldg., San Francisco, will be the architects. More definite information will be given later.

WHARVES AND DOCKS

SAN FRANCISCO.—Alta Roofing Co. 976 Indiana St., awarded contract by State Harbor Commission, Ferry Bldg. for laying roofing on Shed of Pier No. 44, involving approximately 840 squares of which 420 squares on the north side of the shed are provided for in Contract A and approximately 420 squares on the south side, as provided for in Contract B.

L. S. Sheppe, Tulare, will be the contractor. In addition to a swimming pool and clubhouse, various recreational facilities will be provided.

To Be Done By Day's Work By Owner
GOLF COURSE Cost, \$4500
OAKLAND, Alameda Co., Cal. On 48th and Telegraph Ave.

Twenty-seven-hole miniature golf course.

Owner—Jos. Franklin, San Leandro.

Plans by L. F. Hyde, 372 Hanover St., Oakland.

To Be Done By Day's Work By Owner
GOLF COURSE Cost, \$3500
OAKLAND, Alameda Co., Cal. 44th and Telegraph Avenue

Eighteen-hole miniature indoor golf course.

Owner—Rogers & La Franke, Prem. Plans by L. F. Hyde, 372 Hanover St., Oakland.

Bids will be taken on finish hardwood and carpet.

Contract Awarded.
STABLES Cost, \$—
SANTA CRUZ, Santa Cruz Co., Cal.

Construct stables, etc.

Owner—Marian Hollins, Santa Cruz.

Architect—W. W. Wurster, 260 California St., San Francisco.

Contractor—Palmer & Balsiger, Santa Cruz.

To Be Done By Day's Work By Owner
GOLF COURSE Cost, \$4500
HAYWARD, Alameda Co., Cal.

Twenty-seven-hole miniature golf course.

Owner—Lansom & Smith, Hayward.

Architect—L. F. Hyde, 372 Hanover St., Oakland.

Bids will be taken on cement, wood, etc.

Preparing Sketches.
MAUSOLEUM Cost, \$—
INGLEWOOD, Calif. Redondo Blvd.

Reinforced concrete mausoleum (65x150-ft.; 10,000 crypts; chapel and 50-ft. tower).

Owner—Inglewood Park Cemetery Association.

Architect—John P. Krempel and W. E. Erkes, Bank of Italy Bldg., Los Angeles.

August 14, 1930
Lumber Contract Awarded.

GRANDSTAND, ETC. Cost, \$1,250,000
SAN FRANCISCO, Fifteenth St. and Potrero Avenue.

Baseball Park, class A steel and concrete grandstand, 160 ft. long

Owner—San Francisco Baseball Club, 15th and Valencia Sts.

Engineer—H. J. Brunner, Sharon Bldg.

Contractor—Lindgren-Swinerton, Inc., 225 Bush St.

Lumber—Christensen Lumber Co., 5th and Hooper Sts.

As previously reported lawn sprinkler system awarded to The Turner Co., Tehama St.; excavation to Shiley Grading & Teaming Co., 16th and Lenders Street.

The three-day convention will close with the Annual Banquet on Thursday evening at which Governor Green of Michigan will be the principal speaker.

Engineering News Section

BRIDGES

OROVILLE, Butte Co., Calif.—Until August 18, 2 P. M. bids will be received by C. F. Belding, county clerk, for improvements in Road District No. 1, involving the construction of a causeway, consisting of:

(a) Construction of causeway on a rolled earth fill approximately 30 ft. high and 230 ft. long, containing 8400 cu. yds. of embankment of assorted materials from three different sources:

1. 5000 cu. yds. of selected earth borrow to be placed in the rolled fill portion of the causeway.

2. 1100 cu. yds. of solid rock from the Swayne Logging Railway and the highway cut at the east end of the proposed fill, material to be placed on slopes of fill.

3. 2300 cu. yds. of rock and granular material from the widening of Lakeside Way, materials to be placed on the slopes of fill and in highway approaches to fill.

(b) Clearing and grubbing timber and brush on site and approaches and moving present highway bridge.

(c) Stripping site of fill to bedrock to required width.

(d) Construction of cut-off trench to width required.

(e) Construction of 18 inches inside diameter reinforced concrete drainage conduit with timber control gate stand and placing control gate from outlet from old dam.

(f) Constructing three tube reinforced concrete syphon drainage culverts.

(g) Constructing highway approach at each end of fill.

(h) Reconstructing Swayne Logging Railroad (narrow gauge). Taking up and relaying 1400 ft. of main line track and 90 ft. of siding track. Moving and resetting water tank and camp buildings, tent floors and grading new camp sites.

(i) Rergrading road connecting with Lakeside Way.

(j) Furnishing all material and labor, hauling, mixing, placing, laying out, assembling of materials, and all construction work either temporary or permanent in connection with the work and delivering the entire work complete and ready for use.

(k) Constructing and maintaining a suitable detour of the present county road during construction of causeway.

Work under County Improvement Act of 1921. Certified check 10%, payable to County required with bid. Plans on file in office of clerk.

LOS ANGELES COUNTY, Cal.—Until September 3, 2 P. M., bids will be received by State Highway Commission to construct a reinforced concrete girder bridge across Castaic Creek about ½ mile north of Castaic Junction, composed of seven 35-ft. spans on concrete bents and concrete abutments with pile foundations.

See call for bids under official proposal section this issue.

YREKA, Siskiyou Co., Cal.—County surveyor is making surveys for a new bridge over the Klamath River to supplant the old suspension bridge near Walker. The new structure will be 320 ft. long and will cost \$25,000. The cost will be borne by the county, the U. S. Forest Service and the state.

SANTA BARBARA COUNTY, Calif. Silvera and Robins, Ventura, at \$20,152 awarded contract by State Highway Commission to construct reinforced concrete girder bridge over Nojomi Creek, 7½ miles south of Zaca, composed of four 42-ft. 6-in. spans on concrete bents and an abutment.

PLACERVILLE, El Dorado Co., Cal.—Dector Williamson, Placerville, at \$625 awarded contract by county supervisors to construct reinforced concrete girder bridge over Youngstown Creek and at \$2,750 for a reinforced concrete girder bridge over Perry Creek, both located near Fairplay.

SACRAMENTO, Cal.—Until August 18, 10 A. M., bids will be received by Harry W. Hall, county clerk, to construct timber bridge (Hagle Bridge) over Laguna Creek. Certified check 10% payable to Chairman of the Board of Supervisors required with bid. Plans obtainable from Chas. Deterding, Co. Engineer, at Sacramento.

SAN FRANCISCO—State Highway Commission, C. H. Purcell, chief engineer, is preparing preliminary plans for the proposed Rincon Hill-Goat Island-Key System pier site bridge over San Francisco Bay for submission to the U. S. War Department. The cost of construction is placed at \$75,000,000.

Governor Young announces he will call an early meeting of the California Toll Bridge Authority, a body of state officials which is charged with the issuance of revenue bonds to finance toll bridges. Financing the bay bridge will be handled in this manner and in time will revert to the state.

LOS ANGELES, Cal.—County Bridge Engineer W. E. Armstrong, Hall of Records, is completing plans for a bridge over the Los Angeles river at Atlantic Ave. north of Maywood; estimated cost \$175,000. Will have seven 60-ft. spans with 60-ft. roadway and two 5-ft. sidewalks. Alternate bids will be asked on a reinforced concrete arch bridge and on a steel plate girder bridge with reinforced concrete deck. Bids will be asked in about a week.

RIVERSIDE, Riverside Co., Calif.—According to figures of City Engineer Brown, the improvement of Ivy St. will include two overhead structures on the Union Pacific Ry. and the Santa Fe Ry., at a total cost of between \$60,000 and \$75,000. The estimated cost of the complete improvement project is \$125,000.

EUREKA, Humboldt Co., Cal.—Smith Bros., Eureka, at \$8466 submitted low bid to county supervisors to construct Moseley Slough Bridge with alternative bid of \$6768. Henry Padgett and Fred J. Maurer & Son, were other bidders. Taken under advisement.

SANTA ROSA, Sonoma Co., Cal.—See "Streets and Highways," this issue. Fiscal year 1930-1931 road and bridge projects to be undertaken in Sonoma county.

REDWOOD CITY, San Mateo Co., Cal.—Frank M. Brown, Palo Alto, at \$13,157.50 awarded contract by city

council to construct six bridges and culverts in various sections of the city, involving: 520 cu. yds. concrete, 18,100 lbs. reinf. steel; 1850 cu. yds. excavation; 832 cu. yds. filling and backfill; 1405 sq. ft. asphalt conc. pave., 315 lin. ft. 2 inch galv. iron railing, 19 catchbasins; 50 lin. ft. 6-in. black dipped steel pipe; 50 lin. ft. 8-in. do., 22 lin. ft. 12-in. galv. corr. steel pipe. Following is a complete list of bids received:

Frank M. Brown	\$13,157
W. A. Tyson and L. M. Pollard,	
Redwood City	13,729
Walter Todd, Oakland	13,460
Thermotte Constr. Co., San	
Jose	13,842
Carl French, San Francisco	14,060
Geo. Ulrich Con. Co., Modesto	14,141
W. A. Dontanville, Salinas	14,848
C. M. Dearborn, Redwood City	15,045
H. C. Vensano Co., S. F.	18,723

BITTE COUNTY, Cal.—Until August 27, 2 P. M., bids will be received by C. H. Whitmore, District Engineer, State Highway Commission, 502 State Office Bldg., Sacramento, to construct a reinforced concrete bridge over the State Highway 1 mile east of Oroville, consisting of one earth filled arch span, 46 ft. long.

See call for bids under official proposal section in this issue.

NAPA, Napa Co., Cal.—Harry Thorsen, St. Helena, at \$3170 awarded contract by county to construct arch extension to Highway bridge near the Myrtledale Hot Springs. Project involves: 80 cu. yds. struc. excav., unclass.; 300 cu. yds. fill approach; 142 cu. yds. class A concrete; 10,200 lbs. reinforcing steel. Only other bid submitted by C. H. Gildersleeve, at \$3471.

SAN LUIS OBISPO, San Luis Obispo Co., Cal.—Irving L. Ryder, San Luis Obispo, and San Jose, at \$18,799 awarded contract by city council for the following bridge construction: French street bridge over San Luis Obispo Creek, involving removal of old bridge and replacing with two 30-ft. spans with roadway, 27-ft. wide; regrading approaches, Santa Rosa St. bridge, 22-ft. roadway, rebuild and widen Chorro St. bridge.

LOS ANGELES COUNTY, Calif.—Following three low bids received Aug. 13 by State Highway Commission to construct a reinforced concrete girder bridge over the San Gabriel river near Seal Bench, consisting of seven 57 foot spans on concrete piers with pile foundations:

J. F. Knapp, Oakland	\$13,977
Oberg Bros., Los Angeles	125,151
Carpenter Bros., Inc., Beverly Hills	127,179

HUMBOLDT COUNTY, Cal.—Following three low bids received August 13 by State Highway Commission to construct overhead crossing over tracks of the Northwestern Pacific Ry. about 2½ miles north of Beatrice, consisting of two 61 ft. 7 in. through plate girder spans, one 40 ft. steel beam span and approximately 450 ft. of timber trestle approach:

F. J. Maurer & Son, Inc., Eureka	\$50,324
Merrill Fraser Co., Eureka	51,693
Smith Bros. Const. Co., Eureka	55,817

SANTA ROSA, Sonoma Co., Cal.—County Surveyor E. A. Finch is completing plans for three timber trestles over Santa Rosa Creek and for a concrete culvert on the Paula Road in the Petaluma Township; also for a fill at the Ballou Ranch.

EUREKA, Humboldt Co., Cal.—Henry Padgett, Eureka, nt \$9367 submitted low bid to county supervisors to construct Riverside bridge with alternative bid at \$4384 using one span of the present structure. Smith Bros. and Fred J. Maurer & Son, Eureka, were other bidders. Taken under advisement.

CARSON CITY, Nevada—O. G. Ritchie, San Jose, awarded contract by the State Highway Department at \$9373 to construct reinforced concrete bridge, including approaches, the bridge to be constructed across the East Walker River, at a point 7½ miles south of Yerington in Lyon County, involving 53 cu. yds. excav. unclass.; 300 cu. yds. structure excav.; 40 cu. yds. load, haul and spread gravel; 225 cu. yds. class A concrete; 27,600 lbs. reinforcing steel; 750 lbs. bearing plates and rollers; 4 monuments; 2 furnishing and installing posts for federal aid markers. Crushed rock or gravel for surfacing roadway furnished by the state in stockpile to the right of station 394+50. Other bids were: A. D. Drumm Jr., \$10,534.50; Ora Bundy, \$11,246.40; J. S. Jensen, \$13,001.

DREDGING, HARBOR WORKS & EXCAVATIONS

STOCKTON, San Joaquin Co., Cal.—Until August 18, 3 P. M., under Circular Proposal No. 31-29, Specifications No. 2257, bids will be received by U. S. Engineer Office, California Fruit Bldg., Sacramento, to clear brush and trees from certain areas along the San Joaquin river between Turners Cut and Criminal Point, about 8½ miles and 16½ miles respectively, below Stockton. Specifications and further information obtainable from above.

SACRAMENTO, Cal.—Until August 18, 3 P. M., under Order No. 2261, bids will be received by U. S. Engineer Office, California Fruit Bldg., to furnish, deliver and place rip-rap stone along the Sacramento river, in the vicinity of Chicory Bend. Specifications and further information obtainable from above.

SAN FRANCISCO.—Healy-Tibbitts Const. Co., 64 Pine St., at \$257,615, submitted low bid to Islais Creek Reclamation District, 375 City Hall, to construct rock bulkhead wall in trench at Islais Creek Channel, involving:

- (1) 325,000 cu. yds. material to be dredged and disposed of;
- (2) 475,000 tons of rock to be furnished, transported and placed. The work is located along the north side of Islais Creek Channel west of Third St. and along the east side of the Southern Pacific Company's trestle. Complete list of bids follows:
- (1) Healy-Tibbitts Const. Co., (1) 18c;
- (2) 42c; total \$257,615;
- George Pollock, (1) 20c; (2) 47c; total, \$237,580.
- Industrial Land & Development Co. (1) 20c; (2) 63c; total, \$363,376.
- Merritt, Chapman & Scott, (1) 25c; (2) 63c; total, \$330,815.
- Kern and Kibbe, Inc., (1) 19c; (2) 72c; total \$408,135.

Bids taken under advisement.

STREET LIGHTING SYSTEMS

SAN FRANCISCO.—Bids will be asked shortly by Board of Public Works to furnish and deliver standards for lighting 19 miles of San Francisco boulevards, involving 856 standards in all, 562 to be metal and 294 of concrete construction.

OAKLAND, Cal.—City council declares intention to install ornamental street lighting system in East 12th St., bet. Lake Shore Ave. and 13th Ave., involving 77 duplex lighting standards together with underground system. 1911 Act. Hearing August 28. Frank C. Merritt, city clerk. Walter N. Frickstad, city engineer.

PORTERVILLE, Tulare Co., Calif.—Until August 19, 3 P. M. bids will be received by W. R. means, city clerk, (134) to install ornamental electrolux system in Main St. bet. Olive and Morton Sts., involving 56 two-light standards together with underground system. Union Metal Mfg. Co.'s standards, Design No. 2381. 1911 Act. Bond Act 1915. Certified check 10% payable to city required with bid. Plans on file in office of clerk and obtainable from F. W. Pease, city engineer.

OAKLAND, Cal.—Until August 21, 12 noon, bids will be received by Frank C. Merritt, city clerk, to install lighting system in 38th Ave. bet. Alameda Ave. and Liese Ave., involving 21 single-light standards together with underground system. 1911 Act. Certified check 10% payable to city required with bid. Plans on file in office of clerk. Walter N. Frickstad, city engineer.

SAN FRANCISCO—Until August 25, 11 A. M., bids will be received by Constructing Quartermaster, Fort Mason, to extend street lighting system and install new street lighting standards at Letterman General Hospital. Specifications obtainable from above.

MACHINERY AND EQUIPMENT

NAFA, Napa Co., Cal.—Until August 18, bids will be received by H. H. Thompson, City Clerk, to furnish and deliver one 1½-ton Ford dump truck for street department. H. A. Harrold, city engineer.

TUSTIN, Orange Co., Cal.—Until 12 o'clock noon, August 18, bids will be received by the Tustin Union High School District for furnishing the following: one 20-inch shaper; one 8-foot variable speed wood lathe; four 32x½-inch bus tires; six 36x½-inch bus tires; six 36-8.25 inch bus tires. W. J. Cheney, Clerk.

ALAMEDA, Alameda Co., Cal.—Following bids taken under advisement by Board of Education to furnish and install a radial drill in connection with shop department at high school:

- C. F. Bulotti, 829 Folsom St., San Francisco, \$3399; alt. \$3399.
- Planagan Machinery Co., 321 Clay St. (second hand), \$1375.
- Harron, Rickard and McConne, 1600 Bryant St., San Francisco, \$4192.
- Jenison Machinery Co., Fremont St., San Francisco, \$3419.
- Pratt & Whitney, 917 Howard St., San Francisco, \$3504.

PHOENIX, Ariz.—Until August 25, 2 P. M., bids will be received by Jno. B. Brown, superintendent, U. S. Indian School, Phoenix, to furnish

and deliver one sliding head sensitive drill so constructed as to accurately and quickly drill holes from 6 to ½ inch in mild steel. Further information obtainable from above.

EL CERRITO, Contra Costa Co., Cal.—Bids are being received by H. M. Nissen, commissioner of the Police and Fire Departments to furnish and install a gasoline pump in fire station. Further information obtainable from above.

OAKLAND, Cal.—Until August 27, 8 P. M., bids will be received by John H. Kimball, secretary, East Bay Municipal Utility District, 512 Sixteenth St., to furnish one portable gasoline engine driven 200 Amp. electric welder mounted on steel skids with complete equipment as per Proposal No. 239. Specifications obtainable from above.

BAKERSFIELD, Kern Co., Cal.—Until August 23, 12 noon, bids will be received by Reginald F. Waters, Clerk, Rosedale School District, to furnish one 35 passenger school bus mounted on a Model AA Ford chassis. Specifications and further information obtainable from clerk.

PHOENIX, Ariz.—The Arizona highway commission has announced that bids will be asked (to be received probably about Sept. 2) for one 10-ton truck, ten 2- and 3-ton dump trucks, and one ¾-yd. shovel. W. C. Lane, state engineer.

CHINO, San Bernardino Co., Cal.—Until 7:30 P. M., Aug. 19, bids will be received by the city council for furnishing a new turbine pump for Well No. 1, City of Chino Municipal Water System. Specifications may be seen at the office of M. L. Birnie, city clerk.

RAILROADS

LAS VEGAS, Nev.—Until 11 A. M., September 5, bids will be received by the chief engineer of the Union Pacific System, Pacific Electric Bldg., Los Angeles, for grading, trestles and culverts for the 22-mile branch line to be built from a point on the main line of the Union Pacific, 7 miles south of Las Vegas, to Summit, the designation given the junction of the Union Pacific branch line and the 7-mile line to be built by the government to the main construction center of the Boulder Dam project on the Colorado River. The work will involve: 218,000 cu. yds. of common excavation, 23,400 cu. yds. of loose rock, 64,600 cu. yds. of solid rock, 36 pile trestles, 6 frame trestles and 62 corr. iron pipe culverts. Materials for the trestles and culverts will be supplied by the Union Pacific. Time required for completion is six months with work to start on or about October 1. Junction of the branch and main lines is 327 miles from Los Angeles. Under the initial Boulder Dam appropriation of \$10,660,000 the government has allocated \$2,500,000 to provide rail facilities, \$900,000 for the Union Pacific branch line and switching track at Summit and \$1,600,000 for the 7-mile government line to the dam site. Work on the government line will probably not be started until completion of the Union Pacific branch.

LOS ANGELES, Cal.—Hauser Construction Co., 1201 Security Bldg., Long Beach, awarded contract by the

county supervisors at \$16,000 to lay 2000 ft. railroad track and placing 12,500 tons rip-rap, West Levee of Los Angeles River.

FIRE ALARM SYSTEMS

ARCATA, Humboldt Co., Cal.—Until August 22, 8 P. M. bids will be received by Lester A. Johnson, city clerk, to furnish and deliver 500 ft. 2½-in. fire hose and 100 ft. 1½-in. fire hose. Further information obtainable from above.

FIRE EQUIPMENT

ALHAMBRA, Los Angeles Co., Cal.—Gamewell Co. submitted only bid to the city commission at \$7000 to furnish and install extensions to fire alarm system. Bid was referred to the city manager and to Fire Chief F. A. Boyet.

RESERVOIRS AND DAMS

TURLOCK, Stanislaus Co., Calif.—Tentative plans and specifications have been approved by the directors of the Turlock Irrigation District to increase the height of the La Grange Dam on the Tuolumne river by two feet. The present height of the dam is 127 feet.

CROCKETT, Contra Costa Co., Cal.—R. P. Easley, Antioch, awarded contract by California and Hawaiian Sugar Corp. to construct a reservoir and dam on the Solano county shore adjoining the Carquinez Straits bridge. Reservoir will have capacity of 15,000,000-gals. and will be used for storage of water drawn from the Sosscol Works in Napa county.

PIPE LINES, WELLS, ETC.

OAKDALE, Stanislaus Co., Cal.—Pacific Gas & Electric Co., has authorized extension of natural gas mains to serve Oakdale and Riverbank, involving approval 5 miles of 6½-in. main to Riverbank and from that point another 4½-inch main will be extended to Oakdale.

SAN JOSE, Santa Clara Co., Cal.—Pacific Gas & Electric Co., I. B. Adams, district manager, has provided approximately \$20,000 to finance installation of 14,500 ft. 4-in. high pressure gas main in the Stevens Creek road from Portal to Saratoga Ave. and 2700 ft. of 3-in. high pressure main in Saratoga Ave. from Stevens Creek road and 3000 ft. 2-in. main in Miller Ave.

SEWERS AND SEWAGE DISPOSAL PLANTS

ALAMEDA, Alameda Co., Cal.—Until August 19, 8 P. M. bids will be received by W. E. Varcoe, city clerk, to construct storm water sewer. Certified check 10% payable to city required with bid. Plans obtainable from city engineer on deposit of \$10, returnable.

MOUNTAIN VIEW, Santa Clara Co., Cal.—Until August 18, bids will be received by city council to construct sewage disposal pumping plant; estimated cost from \$6000 to \$10,000. C. C. Kennedy, consulting engineer, Call Bldg., San Francisco. Plans on file in office of clerk and obtainable from engineer.

SAN FRANCISCO—E. J. Treacy, Call Bldg., at \$5125 awarded contract by Board of Public Works to improve Pennsylvania Ave., bet. 433 ft. north of 23rd St. and 36 ft. south from 25th St., etc., involving vit. clay pipe sew-

ers with wye branches, side sewers, brick manholes.

RICHMOND, Contra Costa Co., Cal.—Thiden Lumber Co., Richmond, has been awarded a contract by the Jasper-Stacy Co. of San Francisco to furnish all lumber involved in the construction of sewers in the industrial district for which the San Francisco firm has the contract on a bid of \$139,946.

WATER WORKS

VALLEJO, Solano Co., Cal.—City council provides \$37,500 in 1930-31 budget to finance installation of a 24-inch water main extension from the Fleming Hill reservoir to the Sonoma street extension. T. D. Kilkeny, city engineer. Alf. E. Edgumbe, city clerk.

HAYWARD, Alameda Co., Calif.—Castro Valley Water Commission has signed a tentative agreement with the East Bay Municipal Utility District for a water supply. The agreement is subject to the decision of a legal question regarding Castro Valley's right to join the East Bay Utility District and its right to bond itself for the purchase of equipment and water lines. Pipe lines 25 miles in length would be required in addition to three large storage tanks, one near Foothill Blvd., another on the high level of the north boundary line of the district and a third on the Jensen road.

CLOVERDALE, Sonoma Co., Cal.—J. J. Ongaro Constr. Co., at \$16,580 awarded contract by City Council to construct extensions to water system, involving 4-in. c. i. mains.

SANTA ROSA, Sonoma Co., Cal.—Until August 19, 5 P. M. bids will be received by N. L. Donovan, city clerk, for cleaning water mains of the municipal water system. Cert. check 10% required with bid. Specifications obtainable from city engineer.

ARCADIA, Los Angeles Co., Cal.—An election will be held within the next few months to vote on a water bond issue for extensions and additions to the present water supply and distribution system.

STRAFORD, Kings Co., Calif.—An election will be held shortly to vote on a \$30,000 bond issue for the extension of the water distribution system and for the construction of a tank and pipe line.

SANTA MONICA, Los Angeles Co., Cal.—Until 10 A. M., August 19, bids will be received by the city council for furnishing nine 30-in. hub-end, iron body, bronze mounted, double disc, non-rising stem gate valves, for 175-pound working pressure, each equipped with 6-in. by-pass and beveled gears, to be housed in cast-iron grease case. Valves to be delivered at trenches on Sawtelle Blvd., between Pico Blvd. and Venice Blvd., within 75 days after execution of the contract. Certified check, 5%, payable to Frank A. Helton, commissioner of Finance. John A. Morton, commissioner of public works.

STRAFORD, Kings Co., Calif.—Stratford Public Utility District votes bonds of \$30,000 to finance purchase and improvement of water distributing system owned by Mrs. W. N. Stratford. Jack N. Darrell is secretary of the district.

LIVINGSTON, Merced Co., Calif.—United Concrete Pipe Co., Merced, awarded contract by city trustees to

remove 250-ft. of 4-in. pipe line at \$75 and install 6-in. c. i. pipe at \$119 ft. gate valves, \$28 1' L. Burr, only other bidder at \$98, \$125 and \$16 respectively. W. E. Hedeen, engineer, Shafter Bldg., Merced.

PLAYGROUNDS & PARKS

Plans Being Figured Bids Close September 5, 2 P. M.
BASKET BALL COURT COST 1—OFTLAND, Sacramento Co., Cal. Construct basket ball court.
Owner—Bates Joint Union School District, L. C. Peck, Clerk.
Architect—W. E. Coffman, 437 Forum Bldg., Sacramento.
Certified check 10% payable to district required with bid. Plans obtainable from the architect.

STREETS AND HIGHWAYS

LINCOLN COUNTY, Nevada—Until August 27, 2 P. M. bids will be received by State Highway Commission, Carson City, to furnish asphaltic fuel oil and apply to crushed rock or crushed gravel surface on 19.94 miles between Caliente and a point 20 miles north. Certified check 5% required with bid. Plans obtainable from S. C. Durkee, state highway engineer, Carson City.

RED BLUFF, Tehama Co., Cal.—County Supervisors approve report to F. J. Man, engineer for Joint Highway District No. 11, covering the construction of the Weed-Klamath Falls Highway, estimated to cost \$540,000 for the entire 41 miles with \$6000 additional for surfacing. The first unit 2.8 miles near Weed will cost \$67,000 of which Tehama County will pay \$1,848.95, Siskiyou county, \$46,737 and Shasta county \$18,195.

NAPA, Napa Co., Cal.—Until Aug. 18, bids will be received by city council to furnish and deliver one tank car of asphalt. Specifications obtainable from City Engineer H. A. Harrold.

LOS ANGELES AND ORANGE COUNTIES, Cal.—Following three low bids received Aug. 12 by State Highway Commission to grade and pave with Portland cement concrete and bituminous macadam, 3.1 miles between Anaheim St and Seal Beach:
C. M. Morgan Paving Co., Los Angeles \$191,604
J. F. Knapp, Oakland 198,554
John B. Bressi, Los Angeles, 203,053

SAN DIEGO COUNTY, Calif.—Following three low bids received Aug. 13 by State Highway Commission to furnish and apply heavy fuel oil to roads on 8.4 miles between La Posta and Tecate Divide:
L. C. Pulley, Long Beach \$13,356
Gilmere Oil Co., Los Angeles 15,171
California Road Oil Service Co., Wilmington 15,329

RED BLUFF, Tehama Co., Cal.—County supervisors approve report of Engineer Martin C. Polk, Chico, for proposed Proberta-Los Molinos Highway, estimated cost \$16,15, which estimate includes the construction of an overhead crossing 270 ft. south of the present Proberta Crossing.

OAKLAND, Cal.—Until August 20, 4 P. M. bids will be received by G. R. Hegardt, Secretary, City Department, 424 Oakland Bank Bldg., for approximately 22,000 sq. ft. bituminous paving on Ninth Avenue. Plans obtainable from above.

FIRENA, Humboldt Co., Cal.—J. C. Kjer, Arcata, at \$2.35 cu. yd. awarded contract by county supervisors to furnish crushed rock for Pickle Hill road improvement, involving approximately 1000 cu. yds.

MONO COUNTY, Cal.—Kennedy-Bayles Construction Co., Biggs, Calif., at \$161,510 awarded contract by State Highway Commission to grade 12.9 miles between Sonora Junction and Coleville.

SAN DIEGO COUNTY, Cal.—Jahn & Bressi, Los Angeles, at \$171,475 awarded contract by State Highway Commission to pave with Portland cement concrete, 5.4 miles between Balboa Ave. and Torrey Pine road.

ALAMEDA COUNTY, Cal.—Arisss Knapp Co., Oakland, at \$603.30 awarded contract by State Highway Commission to furnish and install perforated metal pipe underdrain between Dublin and Hayward.

KING CITY, Monterey Co., Cal.—Until August 20, 8 P. M., (date advanced from August 11), bids will be received by J. A. Wasson, city clerk, (6) to improve portions of First St., involving grading; hyd. concrete curbs; 5-in. hyd. cem. conc. pavement. 1911 Act. Bond Act 1915. Certified check 10% payable to city required with bid. Plans on file in office of clerk. Howard Cozens, Court House, Salinas, engineer.

SAN BERNARDINO COUNTY, Cal.—Gilmore Oil Co., Los Angeles, at \$405⁸⁰ awarded contract by State Highway Commission to furnish and spread fuel oil on 23.8 miles between Sawmill and Bear Lake on the San Bernardino-Bear Lake Lateral.

SANTA BARBARA, Cal.—Western Motor Transfer Co., 118 State St., awarded contract by the county at \$14,147.50 to grade and construct necessary drainage of Section 1 of the Goleta Foothill Blvd., between Sta. 0 +00 and Sta. 45+00. Other bids were: Henry C. Dalessi, \$15,765.10; Hunter & Richardson, \$15,816.56.

PLACER COUNTY, Cal.—Following three low bids received Aug. 13 by State Highway Commission to construct 531 lin. ft. of tunnel and about 1.0 mile of roadway to be graded and surfaced with crusher run base and oil treated crushed gravel or stone surfacing:

C. M. Morgan Paving Co., Los Angeles \$209,755
W. F. Meade, Oakland 241,627
Geo. Pollock, Sacramento 249,999

SANTA BARBARA & SAN LUIS OBISPO COUNTIES, Cal.—Following three low bids received Aug. 13 by

State Highway Commission to grade and surface with oil treated crushed gravel or stone, 37.9 miles between the second crossing of the Cuyama River and the east boundary of San Luis Obispo County:
Lang Transportation Co., Los Angeles \$261,612
M. J. Bevanda, Stockton 283,740
G. W. Ellis, Los Angeles 312,880

ORANGE COUNTY, Cal.—Following three low bids received August 13 by State Highway Commission to grade and pave with Portland cement concrete, 3.3 miles from Seal Beach to Sunset Beach:
C. M. Morgan Paving Co., Los Angeles \$ 98,432
Mattich Bros., Elsinore 106,113
Jahn & Bressi, Los Angeles 111,866

INDEPENDENCE, Inyo Co., Cal.—Standard Oil Co. at \$1.14 per bbl. f. o. b. Laws, Calif., awarded contract by county supervisors to furnish 60,000 gals. of road oil. Other bids: Gilmore Oil Co., \$1.906; Union Oil Co., \$1.067; Richfield Oil Co., \$1.906; Shell Oil Co., \$2.15.

RED BLUFF, Tehama Co., Cal.—Tehama-Butte Joint Highway District plans to place permanent surface on 12-mile lateral from the Pacific Highway at Proberta to the Capital Highway near Los Molinas. Surveys are being made by Engineer Martin Polk, Chico.

REDWOOD CITY, San Mateo Co., W. A. Dontanville, Salinas, at \$4,862.01 awarded contract by city council (M-9) to improve Maple St. bet. Main St. and Dillers. Addition, involving grading; 6-in. hydraulic cement concrete surface pavement; 3-in. broken stone base and 1-in. sand cushion; hydraulic concrete cement curbs; 4-in. hydraulic cement concrete sidewalks; two hydraulic cement concrete storm water inlets; cement concrete gutters. W. O. Tyson, Redwood City, only other bidder at \$5,288.39.

SAN FRANCISCO—Until September 3, 2:20 P. M., bids will be received by S. J. Hester, secretary, Board of Public Works, to improve:

Portions of 21st Ave., bet. Lawton and Moraga Sts., and 32nd Ave., bet. Kirkham and Lawton Sts., involving armored concrete curbs; side sewers; 6-in. concrete pavement with 1½-in. asphaltic concrete surface. Est. cost, \$6400.

42nd Ave., bet. Judah and Kirkham Sts. (where not), involving armored concrete curbs; concrete gutters; 6-in. concrete pave with 1½-in. asphaltic surface. Est. cost \$800.

Certified check 10% payable to clerk of the Board of Supervisors required with bid. Plans obtainable from Bureau of Engineers, 3rd Floor, City Hall.

SAN CARLOS, San Mateo Co., Cal.—Chris L. Jordan, Belmont, at \$6375 awarded contract by city trustees to improve Holly street from old County Road north to Bayshore Highway. W. O. Tyson, Redwood City, only other bidder at \$6725. County will pay \$4500 of total cost.

Naval Radio Compass Station at Point St. George, Crescent City. Specifications obtainable from Island Navy Yard.

MARYSVILLE, Yuba Co., Cal.—Until August 18, 10 A. M., bids will be received by W. M. Strief, county clerk, to pave portion of Feather River Blvd. extending across Plumas Lake. Cert. check 10% payable to county clerk required with bid. Plans obtainable from clerk on payment of \$1, not returnable.

MARYSVILLE, Yuba Co., Cal.—Until August 18, 10 A. M., bids will be received by W. M. Strief, county clerk, to pave a shoulder 2½ feet wide along the west edge of District Ten Highway. Certified check 10% payable to county clerk required with bid. Plans obtainable from clerk on payment of \$1, not returnable.

SAN FRANCISCO—C. B. Eaton, 715 Ocean Ave., at \$20,663 awarded contract by Board of Public Works to improve Ulloa St. bet. 35th and 38th Aves., and 36th and 37th Aves., between Taraval and Vicente Sts.

SAN FRANCISCO—C. B. Eaton, 715 Ocean Ave., at \$46,338 awarded contract by Board of Public Works to improve portions of streets in the Castro Street Addition and Glen Park Terrace, involving grading; armored concrete curbs; concrete walks; 2-inch asphalt concrete surface pavement on 6-in. class F concrete base; brick catchbasins and manholes; side sewers.

ELKO COUNTY, Nevada—Utah Construction Co., Ogden, Utah, at \$117,683.54 awarded contract by State Highway Commission to grade, construct structures and place surfacing material on 23.22 miles between 3 miles north of Wells and Thousand Springs Creek. Project involves: 154,500 cu. yds. excav., unclassified; 163,441 yds. sta. overhaul; 23.21 mile prepare subgrade and shoulders; 50,600 cu. yds. crushed rock or crushed gravel in stockpile; 235 cu. yds. class A concrete; 194 cu. yds. class B concrete; 2694 lin. ft. install 18-in., 772

lin. ft. 24-in., 762 lin. ft. 30-in. and 324 lin. ft. 36-in. corr. metal pipe; 240 cu. yds. riprap; 80 monuments; 2 posts for Federal Aid markers; 750 lbs. bearing plates and rollers; Dodge Bros., Fallon, Nev., bid \$121,308. Engineer's estimate \$135,852. California Corrugated Culvert Co., West Berkeley, Calif., at \$5379.40 awarded contract for culverts in connection with this project. Engineer's estimate \$6028.80.

MENDOCINO COUNTY, Cal.—E. C. Coates, Sacramento, at \$35,289 awarded contract by State Highway Commission to grade and surface with untreated crushed gravel or stone and construct timber bridges on two miles between McDonald and Wendling.

HAYWARD, Alameda Co., Cal.—Until August 20, 8 P. M., bids will be received by M. B. Templeton, city clerk, (805) to improve portions of Smalley and Laurel Aves. and Belmar and Princeton Sts., involving:

- (1) 165,450 sq. ft. 6-in. full penetration emulsified asphalt macadam paving (including grading);
- (2) 10,723 lin. ft. concrete curbing;
- (3) 21,202 sq. ft. concrete gutter;
- (4) 42,850 sq. ft. concrete sidewalks;
- (5) 1,297 lin. ft. 6-in. vitrified sanitary sewer;
- (6) 1,350 lin. ft. 4-inch vitrified side sewer;
- (7) 36 48-in. wye branches;
- (8) 4 vit. pipe lampholes with concrete and c. i. frames;
- (9) 340 lin. ft. concrete and part circle corr. iron drain culverts
- (10) 157 lin. ft. r'dwood header boards. 1911 Act. Certified check 10% payable to Arthur E. Manter, mayor of Hayward, required with bid. Specifications obtainable from Jesse C. Holly, city engineer, on deposit of \$5, returnable.

OWNER ENTITLED TO DAMAGES FOR LUMBER SUBSTITUTION

A recent ruling of the Minnesota supreme court permitted an owner to recover damages for substitution of west coast hemlock for Douglas fir on a building job, according to the Master Builder of Milwaukee. A dwelling was erected by Thomas Bean, defendant, at Green Isle, Minn. He purchased the lumber therefor from the Midland Lumber & Coal Co., plaintiff, at that place, and specified fir for the studding, sheathing and subflooring. A carpenter and contractor were employed to do the work. The lumber company delivered hemlock instead of the specified fir for the studding, sheathing and subflooring.

After the building was completed and occupied defects appeared. Mr. Bean made a claim against the carpenter, but the latter claimed that the defects were caused by the shrinking of the hemlock lumber. The lumber company filed a lien for the balance due on the purchase price of the lumber and sought to foreclose the lien. Mr. Bean set forth a counterclaim for damages because the company had furnished hemlock instead of fir.

The court held that the evidence was sufficient to support the finding that the defects resulted from the use of hemlock, and that Mr. Bean had no knowledge of the substitution until after the completion of the building. Since the hemlock used had to be retained, Mr. Bean was held to be entitled to damages resulting from its inferior quality, despite the company's showing that under the grading rules of the West Coast Lumbermen's Association, fir and west coast hemlock were used interchangeably in the grades and classes of lumber in question. (Midland Lumber & Coal Co. vs. Bean et al; Minn. Sup. Ct., June 6, 1930).

OFFICIAL PROPOSALS

STATE OF CALIFORNIA

DEPARTMENT OF PUBLIC WORKS

DIVISION OF HIGHWAYS

NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received by the Department of Public Works, Division of Highways, at the office of the District Engineer, 502 State Office Building, Sacramento, California, until 2:00 o'clock P. M. on August 20, 1930, at which time they will be publicly opened and read, for performing work as follows:

Colusa County, between Bear Creek and 8 miles west of Williams, a distance of about nine (9) miles, road III-Col-15-D, constructing property fence.

Plans may be seen, and forms of proposal, bonds, contract and specifications may be obtained at the above address.

No bid will be received unless it is made on a proposal form furnished by the District Engineer. Each bid must be accompanied by cash, or a certified check made payable to the Director of Public Works, for an amount equal to ten (10) per cent of the amount bid, such guaranty to be forfeited should the bidder to whom the contract is awarded fail to enter into the contract.

The Department of Public Works reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the State.

DEPARTMENT OF PUBLIC WORKS,
DIVISION OF HIGHWAYS.

C. H. PURCELL,
State Highway Engineer.
By C. H. WHITMORE,
District Engineer, Dist. III.

Dated: August 8, 1930.

NOTICE TO BIDDERS

(Improvements at Naval Radio Compass Station)

SEALED BIDS, indorsed "Bid for Improvements at the U. S. Naval Radio Compass Station, Farallon Islands, California, Specification No. 6216," will be received at the office of the Public Works Officer, Navy Yard, Mare Island, California, until 11:00 o'clock A. M., on September 3, 1930, and then and there publicly opened, for fire protection, concrete walks, sewer, tank hoops and weatherstripping.

Specification No. 6216 and accompanying drawing may be obtained on application to the Commandant, Navy Yard, Mare Island, California.

Deposit of a check or postal money order for \$10.00, payable to the Chief

of the Bureau of Yards and Docks, is required as security for the safe return of the drawing and specification.

A. L. PARSONS,
Chief of Bureau.

August 8, 1930.

L. A. TO VOTE ON POWER BOND ISSUE

At the general election to be held November 4, voters of Los Angeles will be asked to sanction a \$19,000,000 bond issue to defray the expenses of a three-year construction program for power development. For the construction proposed \$31,000,000 will be required, but of that amount \$12,000,000 is to be derived from power revenues.

Major items of the \$31,000,000 construction program and their cost include: Two small power plants with a total capacity of 9,100 kw. in Owens Valley and a 222-mile, 110-kv., steel-tower transmission line, \$4,885,000; a 14,000-kv. third unit in plant No. 2 on the aqueduct, \$925,000; additions and improvements to present generation and transmission system within the city, \$3,725,000; new line and receiving substation, \$3,075,000; additions to city distribution system, largely preparatory to distribution of Boulder Canyon power, \$14,665,000; general equipment, warehouse, shops, etc., \$1,200,000; Boulder Canyon transmission rights-of-way and attendant engineering, \$2,525,000.

CLAY TILE REPORT IS BEING DISTRIBUTED

A summary report of the recent meeting of the standing committee of the industry, which approved the modification of Simplified Practice Recommendation No. 61 on Clay Tile for Floors and Walls (originally White Glazed Tile and Unglazed Ceramic Mosaic), has just been mailed to all interests, for their consideration and written approval, by the Division of Simplified Practice of the Bureau of Standards, Department of Commerce.

Among the several important changes made in the recommendation by the revision conference are: the enlarging of the scope of the recommendation so as to include all floors and wall tile with the exception of faience, which necessitated a change in the name of the recommendation from "White Glazed Tile and Unglazed Ceramic Mosaic" to "Clay Tiles for Floors and Walls," and the reducing of the grades of tile from three to two whereby the committee discarded the terms "Selected" and "Commercial" and recommended the adoption of "Standards" and "Seconds" as the only two grades of tile to be produced and marketed.

Package grade certificates were also eliminated as it was felt that the master grade certificates would serve the purpose for identification and grading. New minimum grade specifications for ceramic mosaic, accompanied by tentative definitions of terms resulted from the deliberations of this committee. Other minor changes to bring the recommendation in accord with this major revision completed the work of the committee.

PORTLAND SEEKS TO REVIVE HOMEBUILDING

In view of the fact that one-third of the construction industry is involved in the house building business and since one-third of the material outlet goes into this field, the Portland Chapter of the Associated General Contractors is undertaking to act to bring about a revival of this section of the industry.

As a means of creating interest in home building in the minds of the public the chapter is cooperating with other Portland building organizations in bringing out a booklet which will contain full information about the problems which the prospective home builder faces.

The groups which are participating in the preparation of the booklet are: Oregon Chapter of the American Institute of Architects, Portland Chamber of Commerce, Heating & Piping Association, Furnace Heating Association, Master Plumbers Association, Realty Board, Building Material Dealers' Credit Association and the Portland Chapter of the Associated General Contractors together with its affiliated Builders Division.

ARCHITECTURE—A CAREER FOR WOMEN

(Editorial in S. F. Call)

One of the few remaining professions which women have not invaded to any great extent is architecture. There are, of course, several women architects. But not many.

That seems strange when you think of it—for woman's chief work throughout the ages has been that of homemaker, and homemaking is the primal business of architecture. Probably a majority of interior decorators are women, but architecture itself remains largely a masculine profession.

There are, however, signs of a change. Some New York firms are already employing girls along with men. Miss Eleanor Herron, a niece of the late Chief Justice Taft, is one of several young women now engaged in drawing plans for a new skyscraper going up on Broad street. Girl "draftsmen," their employers say, are as competent as anybody else and it is only a question of time before they are relatively as numerous as stenographers.

Young women trying to decide on a "career" might well consider architecture. It is a profession requiring brains, tact, good taste and patience.

Men have no monopoly of those qualities.

George Burdett Ford, internationally known architect and city planner, died in New York, August 13, from complications resulting from an operation.

Gates-Tatterson Take Over Specialty Department

August 1st saw a change of considerable interest in the building and construction field when Norman W. Tatterson, who had built up and directed the Building Specialty Department of Badt-Falk & Company took over their lines and associated with Gates-Tatterson-Co., Inc., who will continue doing business from the same address and offices used by Badt-Falk & Company.

According to Ray G. Falk the group of lines the Gates-Tatterson-Co., Inc., have are second to none, each being the best of its kind; besides this, the information and engineering service this organization is in position to render should be of great value to the architect, engineer, contractor, and builder.

Mr. Falk says that "Linofelt" and "Fibrofelt," their line of sound control and insulating materials made by the Union Fibre Co., Inc., Winona, Minn., have proven most satisfactory and that because of this recognized fact most of the larger apartments and buildings requiring such treatment have these favored materials incorporated in their construction.

Besides, "Linofelt" and "Fibrofelt" these builders have repeatedly used the "Heimbach" 20 th Century Garage Incinerators which are kept in stock for immediate delivery.

Such other outstanding national products as "Crittall" Windows and Doors; "Browne" Windows; "Ather" Weatherstrip and Sills; "Airoilite" Ventilating Louvres; together with outstanding connections for hollow metal doors, windows, and trim, fire and elevator doors makes it possible for them to give a unique and complete service.

Gen. H. Gates while not so well known on the West Coast was special representative of the Union Fibre Co., Inc., for many years, paying particular attention to sound control, insulation, and acoustical correction problems, he being one of the charter members of the Acoustical Society of America.

HOO HOO CHAPLAIN PASSES

The Rev. P. A. Simpkin, known to lumbermen throughout the country as "Parson" Simpkin, chaplain of the Order of Hoo Hoo since 1920, died at the home of his son, Dr. John M. Simpkin, at Marshfield, Ore., Aug. 1, after a long illness. He was born in England 64 years ago, became a student preacher and coming to America at 21 was admitted to the Methodist ministry. He affiliated with the Congregational church later. He preached frequently at Santa Monica during the 2 years prior to taking on active work for the Order of Hoo Hoo nine years ago.

PHILADELPHIA'S NEW LAW TO REGULATE SELECTION OF BIDDERS ON PUBLIC PROJECTS

(Reprint from The Constructor)

The accompanying draft of the new prequalification ordinance of the City of Philadelphia was passed by the City Council on July 2. This ordinance was written to include certain provisions which the Supreme Court of Pennsylvania held to be essential when it declared the first prequalification ordinance of the city to be unconstitutional.

The Supreme Court although holding the ordinance of June 14, 1929 invalid did state clearly that the principle of prequalification was entirely legal. The point to which the court objected was the provision that when an appeal was made from the decision of the awarding officer to a board of three judges that board was not allowed to review the questionnaires submitted by other bidders on the same project for purposes of consideration or comparison, nor could it remove from the list of qualified bidders any names which the awarding official had placed on it.

The new ordinance corrects this point by providing that the records of all bidders on a project shall be submitted to the board when there is an appeal. It is believed that this provision will meet the objections raised by the court and that the present law will be entirely satisfactory.

The ordinance has not as yet been approved by the mayor but it is expected that it will be signed by him at an early date.

An ordinance relating to and regulating proposals for work and material to be furnished to the City of Philadelphia; providing the amount, character and disposition of deposits to be made with such proposals; providing for the prequalification of prospective bidders for contracts for construction work by requiring answers to inquiries or questionnaires in advance of bidding showing the fitness of such prospective bidders to perform the said contracts; authorizing the refusal to receive or schedule bids where such information is refused or not given or when it appears that the said proposed bidder is not sufficiently qualified and fitted to perform the said contracts; providing for appeals from the decision of an awarding officer and repealing ordinances inconsistent herewith.

Section 1. The Council of the City of Philadelphia ordains. That every advertisement for proposals for work to be furnished for or on behalf of the city shall state the requirements that all bids must be accompanied by a certified check on a responsible bank or trust company or by a certificate of deposit issued by a responsible bank or trust company, to the order of the city treasurer. Said check or certificate of deposit shall be in the following amount:

\$100 when the total sum bid does not exceed \$1,000.

\$500 when the total sum bid exceeds \$1,000 and does not exceed \$5,000.

\$800 when the total sum bid exceeds \$5,000 and does not exceed \$10,000.

\$1,200 when the total sum bid exceeds \$10,000 and does not exceed \$25,000.

\$2,500 when the total sum bid exceeds \$25,000 and does not exceed \$50,000.

\$5,000 when the total sum bid exceeds \$50,000 and does not exceed \$100,000.

\$7,500 when the total sum bid exceeds \$100,000 and does not exceed \$150,000.

\$20,000 when the total sum bid exceeds \$150,000 and does not exceed \$500,000.

\$10,000 when the total sum bid exceeds \$500,000 and does not exceed \$1,000,000.

\$75,000 when the total sum bid exceeds \$1,000,000 and does not exceed \$2,500,000.

\$100,000 when the total sum bid exceeds \$2,500,000 and does not exceed \$5,000,000.

\$300,000 when the total sum bid exceeds \$5,000,000.

Said schedule covering the amount

of the check or certificate of deposit required shall be set forth either in the advertisement or in the proposal or specifications thereof. Such certificates of deposit shall be held by the director or other city official in charge of awarding such contract. Such checks shall be collected and the proceeds thereof deposited by the city treasurer of Philadelphia in a special account to be maintained for that purpose. Immediately upon the depositing of the said certified checks, the city treasurer shall draw a city treasurer's check in favor of each bidder in the amount of the individual certified check so deposited and shall return the said city treasurer's check or checks to the director or other city official in charge of awarding such contract. Should the successful bidder refuse or omit to enter into the contract when so required the amount so received from such bidder through such check or certificate of deposit or so much thereof as may be necessary to reimburse the city for the difference between the amount of the said bid and the actual cost to the city of the doing of the work or furnishing the material, together with any other expenses and costs that may be incurred by the city, shall be and become the property of the city as liquidated damages.

Section 2. Not later than one week prior to the time of the opening of the bids for the construction of public in charge of letting any contract, a sworn statement in answer to a questionnaire or inquiry in standard form, showing all the facilities, experience and financial resources the prospective bidder has to perform the work in a proper and satisfactory manner within the time stipulated. Such statements must designate and describe the plant, equipment and facilities of the bidder, relate his experience in doing the same or similar work and disclose his financial resources specifying the amount of his liquid and other assets and liabilities and the number and amount of his other existing contracts or commitments, including and indicating those with the city. Such statements shall be and remain confidential. No bid shall be received from any person, firm or corporation who has not submitted the sworn statement as above required. The director or other official in charge of letting the contract shall thereupon, within 48 hours, examine the said statements and shall make such investigation by personal interview with the prospective bidders or in such other manner as in his discretion appears necessary and shall

notify, by registered mail at the address given in that statement, each of the persons, firms or corporations that have submitted statements whether or not they are qualified for the work required and whether or not bids will be received from them and in addition shall notify them who have been qualified by him for the work. Any prospective bidder may within 24 hours after the receipt of such notice request a review of the matter before a board of three members to be composed of the said awarding officer and two other heads of departments, chiefs of bureaus of other departments or other city officials to be designated by the mayor, or in the absence of the mayor, or by a director of a city department in accordance with the order prescribed by Section 1 of Article III of the Act of Assembly approved June 25, 1919, entitled "An Act for the better government of this commonwealth," as amended. Such appeal shall place at issue before the board de novo the responsibility and qualifications of all those who have filed statements. The board shall hold a hearing at which any prospective bidder who has filed a statement shall be entitled to be heard and to submit any additional information to the board upon the matters and subjects covered by the questionnaire. Thereafter the board shall review the matter of the responsibility of all prospective bidders who have filed statements considering both the statements and the additional information given at the hearing and shall prepare and certify to the director or other awarding officer a list of those of the prospective bidders who are found qualified by the board or a majority thereof to perform the work. The director shall immediately notify all prospective bidders of the action of the board by registered mail as aforesaid. Bids shall be received only from the persons, firms or corporations named upon this list. Should any of the matters or things set forth in said statement or questionnaire or which may be submitted at such hearing be found to be false, deceptive or fraudulent, the certified check or certificate of deposit furnished by the said prospective bidder as required by the first section of this ordinance, shall be retained by the city as liquidated damages to reimburse it for loss or damage thereby sustained: Provided, That when the successful bidder shall be notified that the contract has been awarded to him the amount of the check or certificate of deposit shall be returned to the other bidders and the amount of the check or certificate deposited by the successful bidder shall be held as above set forth until the contract shall have been duly executed when it shall be returned to the contractor.

Section 3. Sections 1 and 2 of an ordinance approved June 14, 1929, entitled "An ordinance relating to and regulating proposals for work and material to be furnished to the City of Philadelphia; providing the amount, character and disposition of deposits to be made with such proposals; providing for the prequalification of prospective bidders for contracts for construction work by requiring answers to inquiries or questionnaires in advance of bidding showing the fitness of such prospective bidders to perform the said contracts; authorizing the refusal to receive or schedule bids where such information is refused or not given or when it appears that the said proposed bidder is not sufficiently

qualified and fitted to perform the said contracts; and repealing ordinances inconsistent herewith," and all other ordinances or parts of ordinances inconsistent herewith be, and the same are hereby, repealed: **Provided, however,** That Section 3 of the ordinance of March 21, 1928, and Section 3 of the ordinance of June 14, 1929, shall be and remain in full force and effect.

Standard Long Term Lease Agreement Plan of Real Estate Board

In making a long term lease how can both the owner and the tenant be sure that every ramification and condition contributing to the value of that property is considered when the lease is drawn, and that the agreement covers every question which may arise in regard to the property while it is under the long term lease? Do both the owner and the tenant have available a complete picture of the provisions covering new building fire clauses, taxes, security, condemnation, right to assign, maintenance and care of the buildings, repairs, insurance, and some forty other phases of the agreement which should be settled definitely in the long term lease?

It is to give such a panoramic picture of the long term lease to the owner of the property, to the tenant leasing the property, to the real estate broker negotiating the lease, and to lawyers and appraisers consulted concerning the property that the Brokers Division of the National Association of Real Estate Boards has prepared and adopted a standard outline of data for the agreements entered into in creating, selling or appraising long term leases. This standard outline, which represents more than a year of research and work on the part of a committee composed of men who have had extensive experience in dealing with long term leases, was officially approved by the Board of Directors of the National Association at the Association's recent Toronto convention.

The outline, providing as it does for the presentation of comprehensive and detailed data on the lease, while it is not a legal agreement, makes it possible to assemble all the facts relative to the lease and to be certain that no information germane to the negotiation has been omitted, according to Mark Levy, Chicago, chairman of the Brokers Division. Copies of the agreement form have been placed in the hands of every member of the Brokers Division, Mr. Levy announced.

Harold L. Reeve, Chicago, was chairman of the committee who drew up the standard outline. Other members of the committee were: Frazier O. Reed, San Jose, Calif., John J. Wagner, Cedar Rapids, Iowa, and Harold D. Hayward, Tacoma, Washington.

PACIFIC N. W. ELECTRICAL INSPECTORS TO MEET

The Northwestern Section of the International Association of Electrical Inspectors will hold its fifth annual convention next Monday, Tuesday and Wednesday at the Hotel Leopold, Bellingham, Washington. In connection with the convention a manufacturers' exhibit will be maintained featuring a display of all types of electrical fixtures and appliances

THE OBSERVER

What He Hears and Sees on His Rounds

The California State license law for contractors is receiving attention in the East. *Engineer-News Record*, New York, says:

"Legislatures have rarely been willing to enact contractors' license laws which are as drastic as their advocates demand or as has been found necessary after experience in their operation. It is not unexpected, therefore, that after about a year's operation of the California contractors' license law the official who has had the task of its administration is calling for changes. One is to extend the requirement for licensing by decreasing from \$200 to \$50 the amount of the contract that can be undertaken without a license. This change is tantamount to eliminating all unlicensed contracting. Another suggested change signifies more, however: to the effect that the contractor, in his application for license or renewal, shall name five persons as references, two of whom can testify to his credit standing and three to his past performance. In short, experience has indicated that some test of qualification is desirable. There is cheer in the conclusion, even though the test proposed is comparatively easy to satisfy. It may be recalled at this time that the license law originally drafted provided for pre-qualification by examination, but the California solons refused to approve a provision so drastic. The substitute of five references now asked, though far from satisfying the original demand for qualification, is an approach to that purpose. Perhaps it will prove to be the forerunner of a real measure of qualification. The citizen who accepts his state's certification of a legal contractor has a right to expect that it guards him in some measure against error in choosing his builder."

Bad news for the convention, maybe, but good news for the country.

Herbert M. Bierce of Winona, Minn., secretary-treasurer of the National Association of Referees in Bankruptcy, which opened its annual conference in Chicago, Aug. 18, reported bankruptcy on the wane.

Petitions are increasing in number in the cities, he said, but most of them involve small business. Comparatively few large concerns have failed recently. In the country districts the number of bankruptcy petitions is rapidly decreasing.

Some improvement in building situation throughout the United States was noted during July, according to official reports of building permits issued in 589 leading cities and towns compiled by S. W. Straus & Co. July volume of planned construction was \$187,570,714, against \$184,665,439 in June, a gain of about 1.6 per cent.

Normally there is a decline of close to 13 per cent between the two months. However, July declined 36 per cent from the \$292,912,550 volume of permits issued in July, 1929, indicating that building generally is far from normal.

These reports bring assurance of increasingly sounder conditions in the field of improved real estate, says the Straus survey.

With a view to avoidance of over-subdivision in American cities, and to gather accurate data of primary importance to the city and to the realtor subdivider, the Home Builders and Subdividers Division of the National Association of Real Estate Boards has passed a resolution authorizing the appointment of a committee to conduct research and investigation of the present and future needs for further subdivision in cities throughout the United States and Canada.

The Division expects to make the survey through local real estate boards. These latter organizations will be asked to collect the following data from their cities for inclusion in the nation-wide survey:

(1) Figures on anticipated population growth. Such data, the Division points out, now is being acquired constantly by the telephone industry to protect it in its plans for future extension and could be accumulated likewise by real estate boards.

(2) Measurements of the total area and a report on the total number of recorded subdivision lots which are not now being utilized, data to be presented for each section of the cities reporting.

(3) Statistics as to how many of these unutilized lots have street improvements in and are ready for use.

(4) Such other data as would aid in establishing a reasonable relation between city growth and supply of residential lots.

A committee of five Division members who will assume the responsibility for conducting the investigation is to be appointed by W. C. Miller, Washington, D. C., chairman of the Home Builders and Subdividers Division.

The wholesale price index number of the Bureau of Labor Statistics of the United States Department of Labor is here presented. Of the 550 commodities or price series for which comparable information for June and July was collected, increases were shown in 37 instances and decreases in 236 instances. In 257 instances no change in price was reported.

This index stands at \$1.0 for July, compared with \$0.6 for June. This is on the basis of the average for 1926 equalling 100. Based upon these figures the purchasing power of the 1926 dollar represented \$1.19 in July, 1930.

In the group of fuel and lighting materials there were slight advances in anthracite and bituminous coal, while petroleum products declined, causing a small net decrease for the group.

Metals and metal products again averaged lower, with small declines in most iron and steel products and larger declines in nonferrous metals, including aluminum, copper, lead, tin and zinc.

Building materials continued to decline, lumber, structural steel, and paint materials averaging lower than in June.

Little Giant electric tools for many diversified purposes, varying from small drills weighing 6½ lbs. to heavy reamers weighing 36 lbs., are described in a new catalog, No. 898, issued by the Chicago Pneumatic Tool Co., 6 East 44th St., New York City. This company has also published a 12-page bulletin, No. 865, on pneumatic demolition tools and sheeting drivers.

Total awards for concrete pavements for this year in the United States passed the 100,000,000 square yard mark August 2, according to Wm. M. Kinney, general manager of the Portland Cement Association. This mark was reached three weeks ahead of last year and the total was greater than that of any previous year. Mr. Kinney declares that this is in response to the urgent need for more motorizing space and that it expresses confidence in American economic conditions. Of the total awards 77,700,000 square yards are for concrete roads, and 23,000,000 square yards for streets and alleys. August 2 of last year concrete road awards totalled 62,190,000 square yards and in the record year of 1928, 62,400,000 square yards. The 1930 road total of this date, is therefore, over 15,000,000 square yards ahead of last year and the record breaking year of 1928.

Unemployment of trade unionists during the month of July changed little from June, says The Business Week. Of every 100 union workers, 21 are looking for jobs, according to American Federation of Labor figures for 24 cities. During June the unemployed were 20%.

The building trades suffer most with 37% out of work. The printing trades show only 7%; the metal trades show 21%.

The customary spring and summer improvement in building employment did not occur this year. In the printing trades unemployment gradually increased from 5% in January. Unemployment in the metal trades increased from 15% in January.

Altogether, there are roughly two and a half times as many trade union members now unemployed as there were a year ago.

FIR-TEX INSULATING BOARD PLANT OPERATING

The Fir-Tex Insulating Board Company, St. Helens, Oregon, is now operating. Its \$2,500,000 plant just completed.

The plant has a daily capacity of 3,000,000 square feet of 3/4" rigid board, and 150,000 square feet of 1" board, the latter an entirely new product, described as not-laminated, semi-rigid wood fibre superinsulate made in one piece.

J. H. Burnside is sales manager for the company. He was for fourteen years engaged in the wholesale lumber business in Denver, Colorado, and for eight years, previous, sales manager of the St. Paul and Tacoma Lumber Company at Tacoma.

Officers of the Fir-Tex Company are C. E. Dant, chairman; H. F. McCormick, president; A. E. Millington, vice president and general manager; C. A. Millington, superintendent; Kenneth Dawson, secretary-treasurer; K. J. Carney, assistant secretary-treasurer.

The Fir-Tex plant occupies six and one-half acres of ground, has 450,000 square feet of concrete floor space, is 1700 feet long, straight line operation, and has a 300-foot 8-deck Coe dryer.

ORDERS FOR ELECTRICAL GOODS SLUMP

New orders booked during the second quarter of 1930, as reported to the U. S. Department of Commerce by eighty-one manufacturers of electrical goods, were \$276,756,039, as compared with \$258,733,208, for the first quarters of 1930, and \$340,863,112 for the second quarter of 1929.

HERE — THERE — EVERYWHERE

The San Jose city council is holding special meetings to investigate paving costs. According to reports, prices for street paving in San Jose have long been felt in excess of the fair price and after a heated meeting last month, the council voted to investigate the reason for costs being higher in that community than in surrounding localities.

The Los Angeles board of public works has recommended to the city council that a bond issue of \$6,490,000 be placed on the November ballot for the construction of approximately 65 miles sewers to serve 53,580 acres. The proposal includes special items such as central outfall construction, disposal works for the Harbor District and an outfall system for the San Fernando Valley above Van Nuys.

The standardization and development committee of the Cast Iron Research Association has retained J. R. Dangler as secretary to look after all standardization and development work of the cast-iron pipe industry. His office will be located at 923 Union Trust Building, Cleveland, O. Dangler was formerly vice-president and general manager of the Massillon Iron & Steel Co. and later was assistant to the president of the Central Alloy Steel Co., of Massillon, Ohio.

Building of new hotels in Switzerland is to be forbidden in all cities under 100,000 population, until Dec. 31, 1933, according to a report received in the Department of Commerce from Acting Commercial Attache, Henry E. Stebbins, at Berne.

This law is an extension of the law of Oct. 16, 1924, put in effect by the Swiss Federal Council. As there are only four cities over 100,000 population in the country, namely, Zurich, Basel, Geneva and Berne, the law will affect chiefly the large tourist resorts where many of the best hotels are located, the report states.

Bond proposals of \$5,850,000 will be on the November ballot for the decision of San Francisco voters. For airport development an issue of \$4,000,000 is proposed. For a new garbage incinerator, \$1,000,000 is needed and for a new county jail, \$350,000. Of the airport bond issue, \$1,050,000 will make the final payment on the purchase of the site.

An associated Press dispatch from Mexico City, dated August 14, says that President Ortiz Rubio has directed the drafting of a law which will give all owners of vacant lots in Mexico City a stated period in which to construct buildings, with expropriation the penalty for failure. It was said the president's decision was due to his belief too many vacant lots had become rubbish heaps, harmful to the city's beauty.

Recommendation that the contractors on the three new grammar schools now in course of construction at Santa Cruz, use whenever possible local material and labor, is made by the directors of the Santa Cruz Chamber of Commerce. The schools will cost in the neighborhood of \$300,000. The action was taken on motion of J. B. Wilson, chairman of the Industrial Committee.

TRADE NOTES

The Building Specialties Co., 4711 Ballard Ave., Seattle, has been appointed distributor in Western Washington for "Ry-Lock," a newly patented door lock manufactured by the Ry-Lock Company, Ltd. of San Leandro.

The lock is installed by boring two holes, inserting lock and drawing up screws. Briefly described: No screws in rows; spindle extends clear through latch, making action permanently smooth, quiet, positive; double stop-lugs, special locking plate, and steel housing co-ordinated in patented arrangement which prevents locked knob being turned by force; five pin-tumbler cylinder key way.

A. M. Byers Co., manufacturer of wrought iron pipe, with headquarters office and factory at Pittsburgh, Pa., established a branch office in San Francisco several months ago to serve the Pacific Coast States. Offices are located at 1004 Crocker First National Bank Bldg. H. K. Browning is Division Manager.

Jenison Machinery Company, 58 Fremont St., San Francisco, has taken over the sales and service of the Wolf portable timber sawing machine, manufactured by the Reed-Prentice Corporation of Worcester, Mass. The saws are available in AC and DC electric and air operated types. The machines are used for timber cutting, sawing off piles, and for similar work.

ALONG THE LINE

J. F. Burton, 83, pioneer resident of Fresno and formerly a building contractor, died in that city August 12. Burton had been in California since 1857, coming over the northern trail from Missouri by ox team.

F. M. Clough, builder of the Chico plant and for many years Pacific Coast manager of the Diamond Match Company, died in Los Angeles last week following an operation.

Louis C. Hill, consulting engineer of Los Angeles, and W. E. Anderson of San Benito, former water commissioner, have been appointed consulting engineers on the America Section of the International Water Commission of the United States and Mexico. Karl F. Keeler, of Provo, Utah, will continue as associate engineer with headquarters at El Paso, Texas.

Larue Woodson, is now manager of the Nicolai Door Sales Co., as subsidiary of the Wheeler-Osgood Co., with headquarters at San Francisco.

George L. Hoxie, civil engineer and timberland expert, died at his home in Oakland, August 18. Hoxie was born in Fort Millerton, Fresno County, and was reputed to be one of the first children of American parentage born in that county. He held positions as county surveyor of Fresno County and city engineer of Fresno, but during his later years specialized in timber lands and became an authority on timber properties.

PITTSFIELD GARAGE FEATURES BATTLESHIP FLOOR CONSTRUCTION

An automatic arc welding machine, crawling along by its own power, has demonstrated its value in the construction of a new type of steel floor for buildings. The Wendell Garage, owned by the Berkshire Auto Company in Pittsfield, Massachusetts, is the first to use this machine on what is known as the "battleship type of floor construction." It was used at a considerable saving in cost in the erection of a two-story addition to the garage, soon to be completed.

The American Institute of Steel Construction is the sponsor for the new kind of flooring. It was first announced at a convention of that body in Biloxi, Mississippi, November 14, 1929. At that time the possibilities of the scheme were outlined and a demonstration was made of an automatic welding device developed by the General Electric Company for the application. Proponents of the method showed the new flooring involves much less weight than other types and is able to stand every kind of service.

Unusual Problems Faced

Justification for these claims was found in the Pittsfield application. Unusual construction problems confronted the owners, and these were entirely solved through the use of the welded floor, and its advantages over the conventional concrete slab floor were demonstrated. The architect, George E. Haynes, found it necessary to erect a two-story addition in the angle of a one-story building with a ramp leading from the ground floor of the existing building to the second floor of the new structure. The space available for the ramp was of limited length and, as it was essential that the practical rise should not be exceeded, these facts determined the height of the second floor. It was required that the first floor be without columns. As the depth of the second floor construction determined the ceiling height of the first floor, it was obvious that the ordinary concrete slab method of floor construction would have made the height in the clear less than that required by the owner. The span had to be cleared across the 60 foot width and the girders not less than 20 feet on centers.

Computations

Computations showed requirements of a 6-inch concrete slab and a 36-inch girder, making a total of 42 inches from the top of the second floor to the under side of the girder. This was more than could be used. The weight of the concrete was 75 pounds per square foot and the girder was 300 pounds to the foot, in addition to the other steel.

The battleship floor was investigated and it was immediately apparent that the height of the girder plus the thickness of the plate would be the total thickness of the floor. This showed a 33-inch, 200-pound girder representing a saving of 80 pounds per square foot on girders and of 9 inches in the depth of the floor.

The battleship floor consists of 5-inch, 10-pound I-beams, spaced 24 inches on centers with 3/4-inch steel plates placed from the center line of one I-beam to the center line of the adjoining I-beam and from center to center of girders. An allowance of 1/4-inch between plates was made. The battleship construction weighs

15 pounds per square foot as contrasted with 75 pounds per square foot of concrete slab construction. This startling decrease in dead load was surprising to construction men. It resulted in reduced column requirements and footings. The footings were very important as, in order to avoid cantilever, the footings extended under the existing walls at the column point.

The fabricators procured plates stretched and squared with a limitation of 1/8 inches plus or minus. The plates arrived on the premises by truck and were independently hoisted to the second floor and laid in place. The plates lay evenly at all points. This was done before any masonry work was done on the walls and without securing the plates in any way. The resulting platform was used by the other building trades for the construction of the walls, placing the roof on the trusses, etc. It was found that no movement of the plates took place at any time. It was only necessary to sweep the floor in order to clear the joints and to make them ready for welding.

There was used a total of 193 separate plates each 2 feet wide by 20 feet long, making a total area of 40x160 feet, or 6400 square feet.

Deflection Slight

Deflection in the floor is very slight, and mostly in the center. Normally garages have floors built up in the center to drain water from ice-covered cars to side gutters. It was impossible to do this with the battleship floor, so the center plate in each panel is cut out for a simple drain. This drain is connected with 1 1/2-inch pipe on the ceiling below to the side wall, and drains to two feet above the gutter of the first floor.

Deflection occurred only under load, and there is 100% recovery on removal of load. The floor is found to be clear and easily kept so; it is water tight and prevents any dripping on cars below.

Although the battleship floor can be covered with any material such as cement, rubber tile, linoleum, cork, etc., it was unnecessary in the Pittsfield garage as the steel floor provided enough friction to prevent skidding.

The total storage capacity on the battleship floor is 64 cars. The total capacity of the garage with the addition is approximately 500 cars.

The contract for the steel was given to the Haarmann Steel Co. of Holyoke, Mass., who sublet the erection of the steel and the welding of the floor to Farrell & Gregory of Pittsfield.

The General Electric welding machine used is a three-wheeled, self-propelled vehicle driven by an adjustable-speed motor. On the frame-work are mounted a welding wire feeding device, a reel of welding wire, the travel motor and the control devices. A gas engine-generator installed on a truck on the ground below supplied, through a trailing cable, the current for welding and for operating the travel motor. An auxiliary control panel is used at the point of welding.

The machine once started on a seam was almost entirely automatic in operation, following the seam accurately and feeding the electrode to the weld. About 30 minutes were required to weld 20 feet of the 1 1/2-inch

seam using 5/32-inch electrode.

Various types of welds are possible, but the one used at Pittsfield was a flush weld presenting a smooth surface all the way across the entire floor. The welds not only join the steel plates but also weld them permanently to the I-beam below, making an unusually rigid joint and one which is very resistant to stresses of all sorts.

PROVISIONS OF NEW TARIFF LAW APPLY TO LUMBER IMPORTS

Following are the provisions of the new tariff law which affects imports of lumber from Canada and other foreign countries to the United States:

Par. 401. Timber hewn, squared, or squared, otherwise than by sawing, and round timber used for spars or in building wharves; sawed lumber and timber not specially provided for; all the foregoing, if of fir, spruce, pine, hemlock or larch, \$1 per thousand feet, board measure, and in estimating board measure for the purpose of this paragraph no deduction shall be made on account of planing, tonguing and grooving; provided that there shall be exempted from such duty boards, planks and deals of fir, spruce, pine, hemlock or larch, in the rough or not further manufactured than planed or dressed on one side, when imported from a country contiguous to the Continental United States, which country admits free of duty similar lumber imported from the United States.

Par. 402. Maple (except Japanese maple), birch and beech: Flooring, 8 per centum ad valorem.

Par. 404. Cedar commercially known as Spanish cedar, lignumvitae, lancewood, ebony, box, granadilla, mahogany, rosewood, satinwood, Japanese white oak and Japanese maple: In the form of sawed boards, planks, deals and all other forms, not further manufactured than sawed, and flooring, 15 per centum ad valorem.

Par. 405. Veneers of wood, 20 per centum ad valorem, plywood, 40 per centum ad valorem, and in addition thereto on birch and alder plywood, 10 per centum ad valorem, wood unmanufactured, not specially provided for, 20 per centum ad valorem.

Par. 406. Hubs for wheels, heading bolts, stove bolts, last bolts, wagon blocks, car blocks, heading blocks and all like blocks or sticks, rough hewn or rough shaped, sawed or bored, 10 per centum ad valorem.

Par. 407. Casks, barrels and hogheads (empty), sugar-box shoeks and packing boxes (empty) and packing-box shoeks, of wood, not specially provided for, 15 per centum ad valorem.

Par. 408. Boxes, barrels and other articles containing oranges, lemons, limes, cranfruit, shadblows or pomeles, 25 per centum ad valorem provided that the thin wood, so-called, comprising the sides, tops and bottoms of fruit boxes of the growth or manufacture of the United States, exported as fruit-box shoeks, may be reimported in completed forms, filled with fruit, by the payment of duty at one-half the rate imposed on similar boxes of entirely foreign growth and manufacture. But proof of the identity of such shoeks shall be made under regulations to be prescribed by the Secretary of the Treasury.

HAVE YOU A "GRIEF" BOOK IN YOUR OFFICE?

Many engineering offices maintain a file or book for recording special difficulties arising on any job. In preparing specifications for a new job similar to one already built it is customary in one office to bring out the trouble or "grief" book, and by its help to work out a better or simpler detail or substitute a new design. Sometimes a full office conference is held and the brains of the combined staff are focused on the problem which the incident has brought to the front. The value of such a method of recording difficulties and their handling is especially apparent in case of personnel which changes from year to year, says Engineering News-Record.

Sometimes a grief book leads to the production of a manual of procedure and action with reference to many things aside from pure engineering. Government staffs like that of the U. S. Coast and Geodetic Survey have many such manuals continually being revised. Special Publication 140 on First Order Leveling is a good example. How to handle a definite difficult recurring political situation is quite as important as how to correct a faulty design. Failure to deal with the proper officials may cause as much irritation as building manholes whose tops do not remain level with the pavement, or letting crosswalks abut against the curb so that curb breakage results—the latter one of the commonest and worst sins in the municipal engineer's catalog.

Grief books in some form have been kept for years. So long as there is room for improvement, whether in human relations or in engineering details, such recording of troubles and their disposal should continue. Some lesson can be learned from each entry; and conscientious study of the record would soon do away with a world of paste-put specifications.

JULY CEMENT OUTPUT IS 17,080,000 BARRELS

The Portland cement industry in July, 1930, produced 17,080,000 barrels, shipped 20,147,000 barrels from mills and had in stock at end of month 26,298,000 barrels, according to the United States Bureau of Mines.

The production of Portland cement in July, 1930, showed a decrease of 1.4 per cent and shipments of decrease of 0.8 per cent against July, 1929. Portland cement stocks at the mills were 7.2 per cent higher than a year ago.

Relation of production to capacity for July was 77.8 per cent against 81.4 per cent for June, and for the 12 months period ended July, 66.1 per cent against 68.9 per cent for similar period ended July, 1929.

GEORGE KELLY, LUMBERMAN, PASSES

George H. Kelly, 63, Pacific Coast lumberman and general contractor of Portland, Ore., died in that city August 14, following a heart attack suffered two weeks previous while supervising construction work on the Lewis River power project in Washington.

Following his return from France, where he was a lieutenant colonel in command of the 20th engineers and supervised extensive lumber operations, he formed the Western Oregon Lumber Company at West Fir, Oregon. He was chairman of the board.

In 1923 he also organized the Kelly-Sullivan Company of which he was head.

He was born at Springfield, Ore., and is survived by his widow and four daughters.

CEMENT CONTRACTORS ORGANIZE IN LOS ANGELES

Cement Contractors' Association of Los Angeles was organized last week by prominent cement contracting firms in the Southern city.

Organization was perfected with A. O. Miller acting as temporary chairman. The constitution and by-laws of the association were adopted and the next meeting, for the purpose of electing permanent officers, will be held August 26.

The purpose of the organization is "To create a standard specification for the laying of cement floors, adopt a code of ethics, maintain high standards in the conduct of cement work, to combat unfair and dishonest practices, and to oppose unreasonable and excessive prices."

The charter members of the association include R. A. Wittick of the Kalman Floor Co., S. L. Martinez, W. A. Buxton and Rosa, of Buxton & Rosa, Gus Odemar, L. E. Meisner, Davis & Davis, and A. O. Miller of A. C. Horn Co.

A. H. MEYN ENTERS FIELD FOR HIMSELF

Arthur H. Meyn, former salesmanager for the United States Metal Products Company of San Francisco and for fifteen years associated with the construction industry, is now in business for himself, operating under the firm name of Arthur H. Meyn Company with headquarters at 163 Second Street.

Meyn Company will be Pacific Coast distributors for the following manufacturers and their products: Steel windows, Mesker Brothers Iron Company; rolling and fireproof doors, Variety Rolling Door Company; ornamental and architectural bronze, The Newman Manufacturing Co.; steel lockers and shelving, Northwestern Steel Products Company, and heating and cooling tubes, Thermal Units Co.

In addition to handling lines of high class products for the building interests, Mr. Meyn will feature personal service with all sales.

SWIMMING POOLS MUST BE LICENSED

Every swimming pool in the state, whether public or private, must have a license from the state board of health, Attorney General U. S. Webb ruled in an opinion to Dr. W. M. Dickie, state director of public health.

Webb declared all pools were embraced within the terms of the law, which went into effect July 27, 1927, giving the state board of health supervision over sanitation and safety of all swimming pools and bath houses.

The law provides it is unlawful to build or operate a swimming place without a proper permit. Board of health inspectors are empowered to inspect premises at all reasonable times to see that provisions of the act are enforced. Violation of the act is a misdemeanor, punishable by a fine of from \$25 to \$500, a county jail term of not more than six months, or both.

National Equipment Corp., Milwaukee, Wis., is distributing the new pictorial catalog. This catalog illustrates the complete N. E. C. line of equipment.

Contractor Liable For Poor Materials, Tennessee Court Rules

A contractor is liable in damages to the owner for any depreciation to the property resulting from supplying building material not suited for the intended purpose, unless the contract clearly relieves the contractor from responsibility. Also, a manufacturer is liable under the same circumstances to the owner. This interesting point of the law was held in Tennessee Co. v. Ely, 21 S. W. (2d) 398, says The Constructor.

A manufacturer sold cinder building blocks under a contract containing a warranty that the blocks were made of cement and cinders that were free from combustible matter.

The owner refused to pay when he discovered that the blocks were not fireproof. The court held the owner not bound to pay the contract price, and held the seller liable for \$640 damages. This court said:

"In the case of breach of warranty of quality, such loss, in the absence of special circumstances showing proximate damages of a greater amount, is the difference between the value of the goods at the time of delivery to the buyer and the value they would have had if they had answered to the warranty."

SEEK FIVE-DAY WEEK ON CITY PROJECTS

To relieve unemployment the San Francisco local of the United Bridge, Iron Workers and Pipe Fitters' Union, in a communication to the Board of Supervisors, requested that the five-day working week be enforced on all municipal construction. City employees now operate on the five and one-half day week.

The San Francisco Builders' Exchange and the Building Trades Council, the union cities in the communication, has endorsed the five-day week.

SOUTHERN BUILDERS PROMOTE BUILDING FINANCE CONTEST

A contest for the best solution to the problem of the regulation of building finance, sponsored by the Southern California Conference of Builders' Exchanges, is to be held under a direction of a special legislative committee. Prizes amounting to \$350 will be awarded the winners. Contestants are expected to be attorneys and law students.

The committee consists of George W. Israel, Pasadena; Frederic Sanford, Santa Ana, and Gene Bradbury, Long Beach.

DE LONG IS PACIFIC COAST MANAGER FOR GRINNELL

With the elevation of Frank B. DeLong, for several years manager of the Seattle branch office of Grinnell Company of the Pacific, to the position of Pacific Coast manager, Seattle automatically becomes the head office of the company on the Pacific Coast. R. F. Wadick, who has been Seattle manager of the fire protection division of the company, has been promoted to the office of manager of these divisions of all Pacific Coast branches. Offices are located in Seattle, San Francisco, Oakland and Los Angeles.

Advantages of the Barnes plunger sludge pumps, and details of design, are given in bulletin 21W of the Barnes Mfg. Co., Mansfield, Ohio.

APARTMENTS

Sub-Figures Being Taken By Owner.
APARTMENTS Cost, \$250,000
 SAN FRANCISCO. SW California St. and Octavia St.

Six-story and basement class C brick apartments (43 3-4 and 5-room apts.)

Owner and Builder—H. D. Hogrefe & Son, 2999 California St.

Architect—E. E. Young, 2002 California St.

Reinforced concrete curtain walls, tar and gravel roof, two elevators, steam heating system.

Architect Taking Segregated Bids.
APARTMENTS Cost, \$175,000
 OAKLAND, Alameda Co., Cal. Merritt Ave. near Cleveland St.

Six-story Class C concrete apartments (35 2-3 and 4-room apts.)

Owner and Builder—Rockwell & Nelson, 38th and Manila, Oakland.
 Architect—Chester Treichel, American Bank Bldg., Oakland.

Bids are wanted on all portions of the work.

Construction To Start Shortly.
APARTMENTS Cost, \$100,000
 LOS ANGELES, Cal. No. 745 S. Normandie Avenue.

Five-story and basement Class B brick apartments (60x113 feet).

Owner and Builder—Irrving Siegel, 6235 S. St. Andrews Place, Los Angeles.

Architect—Max Maltzman, Union Bk. Bldg., Los Angeles.

Plans Prepared.
APARTMENTS Cost, \$45,000
 SANTA BARBARA, Santa Barbara Co., Cal. Ambassador Park Tet

Two-story frame and stucco apartments (95x125 feet).

Owner and Builder—Umberto Dardi, 530 Plaza Rubio, Santa Barbara.

Architect—Not given.
 Tile roof, ornamental iron work, electric refrigeration, tiled bathrooms, closet beds, garages, etc.

Painting Contract Awarded.
APARTMENTS Cost, \$37,500
 SAN FRANCISCO. Greenwich and Franklin Streets.

Three-story frame and stucco apartments.

Owner—Mrs. Sara Schwalbe, 1597 Greenwich St., San Francisco.

Plans by Contractor.
 Contractor—Laughlin Constr. Co., Rm. 421, Mills Bldg., San Francisco.

Painting—W. G. Thompson, 336 Church St., San Francisco.

As previously reported, stairs awarded to P. O. Lund, 2745 16th St., S. F.; wiring to F. F. Goodman, 350 Waller St., S. F.; electric refrigeration to Frigidaire Corp., 16th and Harrison Sts., S. F.; mill work to Portman Planing Mills, 1019 Mission St., S. F.

Sub-bids are being taken on plastering, roofing and sheet metal work.

August 16, 1930
 Working Drawings Being Prepared.
APARTMENTS Cost, \$—
 CALIFORNIA. Location Withheld.

Seventeen-story and basement Class A steel frame and concrete apartment-hotel, 152 hotel rooms with baths and 40 apartments of 2, 3,

4 and 5-rooms each; 11 stores, etc.

Owner—Withheld until plans are further advanced.

Architect—Oscar R. Thayer, 110 Sutter St., San Francisco.

The ground floor will be occupied by lobby, dining room, 11 stores of which six will be arcade stores, in addition to offices for the hotel management. The site, building and furnishings will involve an expenditure of \$1,000,000. Plans will be completed about September 15, when bids for construction will be asked.

Construction Postponed Indefinitely.
APARTMENTS Cost approx. \$50,000
 SAN FRANCISCO. Haight and Steiner Streets.

Five-story steel frame and concrete apartments.

Owner—Mrs. L. Hagmaler, 222 Fillmore Street.

Architect—Bliss & Fairweather, Balboa Bldg.

Plans Being Prepared.
APARTMENTS Cost, \$300,000
 LOS ANGELES, Cal. S Gramercy Place.

Eight-story Class A reinforced concrete apartments (40x122 ft.)

Owner and Builder—Peter Elvad, 6231 Afton Place, Los Angeles.

Architect—Thomas P. Barber and Paul Kingsbury, Union Insurance Bldg., Los Angeles.

Sub-Bids To Be Taken In One Week.
APARTMENTS Cost, \$250,000
 SAN FRANCISCO. N Vallejo St. and W Franklin St.

Six-story concrete apartments (two basements, 48 3-4 and 4-room apts.)

Owner and Builder—W. Van Herrick, 50 Laguna St.

Engineer—J. G. Little, Company, 251 Kearny St.

Plans Being Completed.
APARTMENTS Cost, \$150,000
 SAN FRANCISCO. Pacific Ave. and Baker Street.

Three-story steel frame and concrete semi-fireproof apartments (six 6-room apts.)

Owner and Builder—W. R. Voorhies, Inc., 369 Pine St., San Francisco.

Plans by A. D. Janssen, 369 Pine St., San Francisco.
 Sub-bids will be taken within a few days by owner.

A Demonstration of the

SKILSAW PORTABLE ELECTRIC HAND SAW

Will solve your cutting problems.
 (Four Models, 1/2 to 1 h. p.)

ELECTRIC HAMMERS ELECTRIC DRILLS GRINDERS, BUFFERS

PETER H. NELSON

Labor Saving Portable Electric Tools.

1222 Mission St. Underhill
 San Francisco 1267

Sub Contracts Awarded.

APARTMENTS Cost, \$75,000
 OAKLAND, Alameda Co., Cal. South Glenn 500 W Linda St.

Three-story frame and stucco apartments with full concrete basement (66 rooms).

Owner—Leo Lesser, 805 Syndicate Bldg., Oakland.

Plans by Builder.
 Contractor—F. A. Muller, Syndicate Bldg., Oakland.

Tile and composition roofing, steam heating system and all modern conveniences.

Excavating—J. Catucci, 1212 15th Ave., Oakland.

Concrete—J. H. Fitzmaurice, 354 Hobart St., Oakland.

Pans & Reinforcing Steel—Soule Steel Co., Rialto Bldg., San Francisco.

Plumbing, Heating & Electric—Scoss, Roebuck Co., 2633 Telegraph Ave., Oakland.

Sheet Metal—East Bay Sheet Metal Works, 1101 Market St., Oakland.

Plastering—D. F. Driscoll, 937 57th St., Oakland.

Roofing—A. K. Goodmundson, 25th & Clement St., Oakland.

Mill Work—W. D. Herrick, 82 Franklin St., Oakland.

Contract Awarded.
APARTMENTS Cost, \$782,000
 LOS ANGELES, Cal. San Marino and Serrano Sts.

Eight-story and basement Class A reinforced concrete apartments.

Owner—Jacob Braunstein.

Architect—F. A. Brown, 1489 W. Washington St., Los Angeles.

Contractor—Far West Construction Co., 315 W. Ninth St., Los Angeles.

Plans Being Prepared.
APARTMENTS Cost, \$150,000
 OAKLAND, Alameda Co., Cal. Crescent Ave. near Santa Clara.

Three-story frame and stucco apartments with Class C concrete garage.

Owner and Builder—R. E. Mayer, 1129 McKinley St., Oakland.

Architect—Douglas Stone, Great Western Power Bldg., Oakland.

Sub-bids will be taken in about three weeks.

Contemplated.
APARTMENTS Cost, \$—
 SAN MATEO, San Mateo Co., Cal. Baywood Park.

Twelve-story apartments (type of construction not determined)

Owner—Robert S. Atkins, 150 Sutter St., San Francisco.

Architect—Not Selected.

Architect Taking Sub-Bids.
APARTMENTS Cost, \$175,000
 SAN FRANCISCO. NE Buena Vista Ave. and Waller St.

Six-story class C basement and sub-basement apartments (55 2- and 3-room apts. and one 6-room apt.)

Owner—Sunset Investment Co.

Architect—Albert H. Larsen, 447 Sutter St.

Contractor—Mission Concrete Co., 270 Turk Street

Sub-bids are being received by architect on all portions of the work, except excavation, reinforcing steel, concrete work, rough carpentry, metal

work, lathing and plastering, which are being handled by the general contractor.

Contract Awarded.
APARTMENTS Cost, \$30,000
AKLAND, Alameda Co., Cal. S
 Athol E B-18th Street.
 Three-story frame and stucco apart-
 ments (30 rooms).
 Owner—C. H. Morehouse, 176 Athol
 Ave., Oakland.
 Architect—None.
 Contractor—C. W. Leekens, 176 Athol
 Ave., Oakland.

Plans Being Completed.
APARTMENTS Cost, \$15,000
HURLINGAME, San Mateo Co., Cal.
 Two-story frame and stucco apart-
 ments (2 4-room apts.)
 Owner—Edward Stack.
 Architect—Edwards & Schary, 525
 Market St., San Francisco.
 Bids will be taken in about two
 weeks.

Sub-Bids Wanted.
APARTMENTS Cost, \$45,000
SAN FRANCISCO, N North Point
 St. 90 E Broderick St.
 Three-story frame and stucco apart-
 ments with brick basement (12 3
 room apts.)
 Owner & Builder—Robinson & Johns-
 ton, 871 31st Ave., San Francisco.
 Plans by Lawrence Ebbets, Call Bldg.
 San Francisco.

Will have steam heating system,
 Kewanee boilers, composition 10-year
 roof and terra cotta tile, kelvinator
 refrigeration, canvas walls and cell-
 ings.

BONDS

MODESTO, Stanislaus Co., Calif.—
 Sale of the \$21,000 bond issue of the
 Grayson School District has been post-
 poned to August 29 by the county su-
 pervisors; proceeds of the sale are to
 finance erection of a new school.

CHURCHES

Completing Plans.
CHURCH Cost, \$50,000
POMONA, Los Angeles Co., Cal.
 Gibbs and Alvarado Streets.
 Masonry church (118x160 feet) (Sun-
 day school, banquet hall, kitchen
 and vicarage).
 Owner—St. Paul's Episcopal Church
 Rev. Bertram A. Warren, Pastor)
 Architect—Carleton M. Winslow, Ar-
 chitects Bldg., Los Angeles.

Sub-Bids Will Be Taken Next Week.
REMODELING Cost, Approx. \$25,000
SAN FRANCISCO, California and
 Franklin Streets.
 Remodel Sunday school.
 Owner—First Church of Christ
 Scientist.
 Architect—Henry H. Gutterson, 526
 Powell St., San Francisco.
 Contractor—Moore & Madsen, 557
 Market St., San Francisco.

Planned.
CHURCH Cost, \$200,000
PASADENA, Los Angeles Co., Cal.
 Lake Ave. and Maple St.
 Church plant.
 Owner—Lake Avenue Congregational
 Church (Rev. James Henry Hut-
 chinson, Pastor)
 Architect—Marston-Maybury, 25 S.
 Euclid Ave, Pasadena

Contract Awarded.
CHURCH Cost, \$100,000
LOS ANGELES, Cal. No. 7501 Holly-
 wood Blvd.
 One-story Class C concrete church
 (48x98 ft.)
 Owner—St. Thomas Parish.
 Architect—Harold H. Martin, Slavin
 Bldg., Pasadena

Contractor—Robert S. Martin, 522 E.
 Broadway, San Gabriel.
 Cast stone trim, copper gutters, pipe
 organ.

Contract Awarded.
CHURCH Cost, \$15,000
REDWOOD CITY, San Mateo Co., Cal.
 James and Hudson Sts.
 One-story, basement and mezzanine
 floor frame and stucco church (au-
 ditorium to seat 325; six Sunday
 school rooms, ladies' parlor, pas-
 tor's study and dining room).
 Owner—First Baptist Church (Rev. C.
 H. Gatchell, pastor).
 Architect—G. Hodgson, Daniel Staf-
 ford Bldg., Redwood City.
 Contractor—J. W. Cabbage, Palo Alto.
 Building permit applied for.

FACTORIES AND WARE- HOUSES

Plans Being Figured—Bids Close Sept.
 2nd.
HANGAR Cost, \$—
STOCKTON, San Joaquin Co., Calif.
 Municipal Airport.
 Frame and galvanized hangar (4 plane
 capacity; 50x60-ft.)
 Owner—City of Stockton.
 Plans by Lyle Payton, city engineer,
 City Hall, Stockton.
 Plans are on file in the office of the
 city clerk, M. E. Page.

SAN FRANCISCO—E. Anderson,
 762 Clementina St., as \$2460 awarded
 contract by State Board of Harbor
 Commissioners, for painting shed on
 Pier No. 28. Frank White, Engineer,
 Ferry Bldg.

Working Drawings Being Prepared.
WAREHOUSE Cost, \$125,000
SAN FRANCISCO, Eleventh and
 Bryant Streets.
 Two-story reinforced concrete central
 storage warehouse (flat slah
 construction).
 Owner—City and County of San Fran-
 cisco.
 Architect—Dodge A. Reidy, Pacific
 Bldg., San Francisco.

Plans Being Prepared.
PRINTING SHOP Cost, \$—
NEWMAN, Stanislaus Co., Cal.
 One-story brick printing shop.
 Owner—Newman Index Company.
 Architect—Harcman & Russ, Ber-
 keley Bank Bldg., Berkeley.

MAYWOOD, Los Angeles Co., Cal.
 —Consolidated Steel Corp., 1200 N.
 Main St., has broken ground prepar-
 atory to the construction of the cor-
 poration's new plant on a 50-acre site
 at Slauson and Eastern Aves. May-
 wood. The plant will provide for
 structural steel operations and the
 production of Gallagher pontoon
 decks and bolted tanks and will in-
 clude the following buildings: main
 structural shop, 222x600 ft., pontoon
 deck plant, 135x475 ft., template shop
 and powerhouse, 75x275 ft., ware-
 house, 50x220 ft., maintenance and
 rivet-making building, 75x220 ft.,
 truck garage, 75x90 ft., blacksmith
 shop, 75x65 ft., washroom and lockers,
 22x60 ft., shop office, 42x50 ft., and a
 110-ft. 100,000 gallon water tower and
 tank. All buildings will be steel
 frame structures with corrugated iron
 sides and roofing, steel sash and con-
 crete footings. Receiving and ship-
 ping yards will be equipped with 18
 double-girder type cranes. Cost will
 be approximately \$1,000,000. The
 owner will handle construction with
 its own forces with the exception of
 underground and overhead piping,
 electrical work, road work and rail-
 roads, for which contracts may be
 awarded. In the event contracts are
 awarded for the work mentioned bids

will be taken through the owner's
 purchasing department.

Bids Being Taken.
INDUSTRIAL BLDG. Cost, \$—
SAN FRANCISCO, SE Russ St. and
 Howard St.
 Three-story reinforced concrete in-
 dustrial building.
 Owner—Eng-Skell Co., 208 Mission St.,
 San Francisco.
 Engineer—A. C. Grievank, 208 Mission
 St., San Francisco.

Bids are now being received on deep
 well, turbine pump and boiler, steel
 sash and electric work.
 As previously reported, pile driving
 awarded to M. B. McGowan, Call
 Bldg., San Francisco.

Contract Awarded.
WAREHOUSE Cost, \$1,000,000
SEATTLE, Wash. Foot of Vine St.
 Pier and warehouse.
 Owner—American Can Co., New York
 City, New York.
 Engineers—Engineering Department
 to Owner, C. J. Pries, Chief Engi-
 neer, New York, N. Y.
 Contractor—A. W. Quist Co., Hoge
 Bldg., Seattle.

Both structures will be of Class A
 construction. The pier will be 160x
 576 ft. and the warehouse proper 132x
 550 ft., two and three stories in
 height. The three-story portion of
 the building will be 130x300 ft. The
 pier portion is designed to carry 1060
 pound live load per square foot and
 the warehouse 400 pounds per square
 foot. The foundation award has been
 given to Henry & McFee, Northern
 Life Bldg., Seattle, and the flooring
 contract to the Redwood Block
 Flooring Co. of San Francisco.

MODESTO, Stanislaus Co., Calif.—
 The pipe yard committee has recom-
 mended to the board of directors of
 the Modesto Irrigation District, that
 the district purchase and install ma-
 chinery at the Woodland Ave. yard
 for the manufacture of concrete pipe.
 The committee members are: J. S.
 West, A. W. Stratton and J. B. Fis-
 calini.

Structural Steel Contract Awarded.
SHED Cost, Price, \$14,868
SAN FRANCISCO, Pier No. 1.
 One-story shed (reinforced concrete
 construction; steel columns, wood
 roof).

Owner—State Board of Harbor Com-
 missioners.
 Engineer—Frank White, Ferry Bldg.,
 San Francisco.
 Contractor—Barrett & Hilp, 918 Har-
 rison St., San Francisco.
Structural Steel—Moore Drydock Co.,
 Balfour Bldg., San Francisco.

Plans Being Figured—Bids Close Sept.
 16, 2 P. M.
SHOP, ETC. Cost, \$—
IONE, Amador Co., Cal. Preston State
 School of Industry.
 One-story balcony brick shop building
 with steel roof construction and
 slate roof; floor area 3,000 sq. ft.,
 and two-story and part basement
 brick and frame superintendent's
 cottage (10 rooms).

Owner—State of California.
 Architect—State Department of Pub-
 lic Works, Division of Architec-
 ture, Public Works Building, Sacra-
 mento.

Bids are wanted for (a) general con-
 tract and (b) mechanical work. Me-
 chanical work includes plumbing, heat-
 ing, ventilation and electric work.
 Separate bids will be received for elec-
 trical work and for plumbing, heating
 and ventilating work. Combined bids
 will also be received for all three
 branches of the work.

See call for bids under official pro-
 posal section in this issue.

Sub-Contracts Awarded.

ALTERATIONS Cost, \$15,000
SAN FRANCISCO. SW 11th and Mission Streets.

Alterations to greasing sales shop and two 1-story and mezzanine floor buildings.

Owner—J. H. and H. Herbst, 1524 Mission Street.

Engineer—N. B. Green, Sharon Bldg.
 Contractor—F. R. Siegrist, 604 Mission Street.

Reinforcing Steel—Gunn, Carle & Co., Ltd., 441 Market St.

Brick Work—Emil Hogberg, 249 Edge-wood Ave.

Electrical Work—Pacific Electric Construction Co., 1496 Mission St.

Structural Steel—Judson - Pacific Co., 609 Mission St.

Kern & Kibbe, Inc., (1) 19c; (2)

72c; total \$403,135.

STOCKTON, San Joaquin Co., Cal. A. Mitchell, Sacramento, at \$30,500 submitted low bid to U. S. Engineer Office, Sacramento, under Proposal No. 31-40, Specifications No. 2280, to clear brush and trees from certain areas along the San Joaquin river between Burns Cut-Off and Turners Cut, about 3½ miles and ¾ miles, respectively, below the city of Stockton. P. D. Maritsas, Sacramento, only other bidder at \$34,590. Taken under advisement.

STOCKTON, San Joaquin Co., Cal. A. Mitchell, Sacramento, at \$43,560 submitted low bid to U. S. Engineer Office, Sacramento, under Specification No. 2241, to clear brush and trees from certain areas along the San Joaquin River, between Mormon Channel, at the city of Stockton, and Burns Cut-Off, a distance of about 3½ miles. P. D. Maritsas, Sacramento, only other bidder at \$46,700. Taken under advisement.

SAN FRANCISCO—M. B. McGowan, 74 New Montgomery St., has awarded the following sub-contracts in connection with the construction of wooden box drains for the Islais Creek Reclamation District:

Douglas Fir Lumber—Loop Lumber Co., Central Basin

Redwood Lumber—Union Lumber Co., Creeker Bldg., San Francisco.

Hardware—Bayne's Bolt Works, 201 Main St., San Francisco.

Excavation—McClure & Chamberlain, 608 Octavia St., San Francisco.

McGowan was awarded this contract on a bid of \$120,568. The project involves 45,000 lin. ft. wood piling (below cutoff); 3500 lin. ft. 14x8 ft. wooden box drain; 50 lin. ft. 10x8 ft. wooden box drain; appurtenances for drains. Project is located in the vicinity of Selby street from Oakdale to Evans ave. and along and under the Southern Pacific Company's tracks to Islais Creek Channel and along Tulare St. adjacent to Islais Creek Channel.

IRRIGATION PROJECTS

MERCED, Merced Co., Cal.—R. L. Underhill, 9 Tamalpais Ave., Berkeley consulting engineer in agriculture, has been in the El Nido district for several days evaluating the property of each of the 119 individual places in the district. The survey was made to determine if they are economically able to support a \$135,000 bonded indebtedness that it has been estimated will be required to finance complete construction of the engineering system which is to bring gravity water to 9400 acres of farm lands south of Merced.

Mr. Underhill will report next week to the State Bond Commission in Sacramento, the body which will have final jurisdiction as to the feasibility of the El Nido project. W. A. Wright is secretary of the El Nido District.

STREET LIGHTING SYSTEMS

GUSTINE, Merced Co., Cal.—Until September 8, 8 P. M. bids will be received by W. H. Chappell, city clerk, to install 37 electroliters together with underground system. Certified check 10% payable to the Chairman of the Board of Trustees required with bid. Plans obtainable from city clerk on deposit of \$10, returnable. A. E. Cowell, city engineer.

PORTERVILLE, Tulare Co., Cal.—R. A. Wattson, 1026 McCadden Street, Los Angeles, at \$21,252 awarded contract by city council (134) to install ornamental electroliter system in Main St. bet. Olive and Morton Sts., involving 56 two-light standards, together with underground system. Union Metal Mfg. Co.'s standards, Design No. 2881, 1911 Act. Bond Act 1915. Complete list of bids will be published shortly. Seven bids, in all, were received.

SANTA CRUZ, Santa Cruz Co., Cal.—Citizens' Committee has been named by Mayor Fred W. Swanton to interview property owners in Pacific Ave. with regard to the installation of a modern electroliter street lighting system. Roy Fowler is city engineer.

MACHINERY AND EQUIPMENT

MARTINEZ, Contra Costa Co., Cal.—Until Aug. 27, 8 P. M., bids will be received by Raymond E. Johnson, City Clerk, to furnish and deliver one 1930 New Six Cylinder one and

one-half-ton Truck with enclosed cab, Overhead valve engine, equipped with Air cleaner, Crankcase breather, A. C. Fuel pump, semi-elliptic spring dual wheels in rear, 30 x 5 Tires all around, Remountable slide dump body of 1 1/4 yard capacity level full with slides and two yards level with ends supplied with mechanical power hoist. Each side made to lift out. Body to be of No. 10 gauge steel plate, electrically welded without spare tire. Further information obtainable from clerk.

EL CERRITO, Contra Costa Co., Cal.—Until August 25, 8:30 P. M., bids will be received by Alice M. Walker, city clerk, to furnish and install one gasoline pump, complete. Further information obtainable from clerk.

SUNNYVALE, Santa Clara Co., Cal.—Until September 6, 7:30 P. M., bids will be received by Fred T. Butler, clerk, Sunnyvale Grammar School District, to furnish and deliver a motor school bus, complete chassis and body. Specifications and further information obtainable from clerk.

HOLLISTER, San Benito Co., Cal.—County supervisors contemplate the purchase of a steam shovel in connection with county road improvements; estimated cost \$8500. Elmer Dowdy, county clerk.

SACRAMENTO, Cal.—Until August 27, 2 P. M., bids will be received by R. H. Greeley, superintendent of equipment, Shop No. 3, State Highway Commission, for the sale of the following equipment no longer required by the commission:

CHC 1876 F. W. D. 2-ton truck chassis only.
CHC 43 5' Rawls Highway Mower.
CHC 44 5' Rawls Highway Mower.
CHC 15 Hadfield-Penfield McCormick Deering Tractor Grader.
CHC 14-69 Spearswell McCormick Deering Tractor Grader.

Bidders may make offers for one or more items but must state prices offered for each item. No lump sum bids will be considered.

All equipment may be inspected at the Division of Highways yards at 1852 24th St., Sacramento, Calif., from 8:30 A. M. to 4:30 P. M. on any working day.

FRESNO, Fresno Co., Cal.—Until August 27, 2 P. M., bids will be received by R. J. Carlisle, superintendent of equipment, Shop No. 6, State Highway Commission, Fresno, for the purchase of the following equipment no longer required by the commission:

CHC No. 1745 Liberty Dump Truck.
CHC No. 2034 Liberty Dump Truck.

CHC No. 1, Sullivan Drill Sharpener
1 Solar blue print frame complete with plate-glass 29 inches by 42 inches and felt.

Bidders may make offers for one or more items but must state price offered for each item. No lump sum bids will be considered.

All equipment may be inspected at the Division of Highways yards at 645 West Olive Avenue, Fresno, Calif., from 8:30 A. M. to 4:30 P. M., on any working day.

SAN LUIS OBISPO, San Luis Obispo Co., Cal.—Until August 27, 2 P. M., bids will be received by R. P. Hamlin, superintendent of equipment, Shop No. 5, State Highway Commission, San Luis Obispo, for the purchase of the following equipment, no

longer required by the commission:
CHC No. 238 Austin Mft. leaning wheel rubber tired grader,
CHC No. 21 Inley type C excavator
CHC No. 2078 Cleveland 1-ton hand dump truck,

CHC No. 35 4x6-in. Pump, Gould Triplex.

CHC No. 36 5x6-in. Pump, Gould Triplex.

CHC No. 37 3-inch Pump, American Centrifugal;

CHC No. 41 4x5-in. Pump, Myers model 553;

CHC No. 3 Steam Engine, 7 1/2 in. single cyl. 12 H.P. F. M.

CHC No. 4E Concrete Mixer, Foote No. 16-E with 10 H.P. Novo Eng.

Three 2-wheel Scrapers.

One conical Sand Screen with cast base and driving gears length 6-ft., diameter 5x4-ft., 5-16" holes.

One 1-yard Drng Line Bucket, Sauerman.

Two 1-yard Car Unloaders.
CHC No. 25 Gas Engine, 30 H.P. Doak, 152 3-16"x20"x18" Steel Traffic Plates. 8 3-16"x20"x12" do.

Bidders may make offers for one or more items but must state price offered for each item. No lump sum bids will be considered.

All equipment may be inspected at the Division of Highways yards at San Luis Obispo from 8:30 A. M. to 4:30 P. M. on any working day, except Gas Engine, 30 H.P. Doak, CHC No. 25, which may be inspected at the Highway yards at Paso Robles, and the 160 steel traffic plates, which may be inspected at the yards at San Juan Bautista.

EUREKA, Humboldt Co., Cal.—Until August 27, 2 P. M., bids will be received by W. H. Pierce, superintendent of equipment, Shop No. 1, State Highway Commission, for the purchase of the following equipment, no longer required by the commission: CHC 2312 Dodge Touring Car; CHC 235 Grader, Austin Giant 8-ft.

Bidders may make offers for one or more items but must state price offered for each item. No lump sum bids will be considered.

All equipment may be inspected at the Division of Highways yards at Eureka, California, from 8:30 A. M. to 4:30 P. M. on any working day.

SALINAS, Monterey Co., Cal.—Until August 28, 7:30 P. M., bids will be received by Buena Vista School District, to furnish and deliver school bus, 1930 Chevrolet 14-ton chassis, 131-in. wheel base, six cylinder motor, four-speed transmission, four-wheel brakes, heavy channel bumper in front, 32x6 truck type tires rear, 30x5 truck type tires front, one 32x6 truck type tire spare. Body to be Wayne Bus Body type 30 No. 310, length 10'-10", outside width 66", inside length 60", seating 18 to 20 pupils and driver, painted, lettered and ready for use. Further information from clerk of district. J. J. Bandour and Mrs. J. Secondo are trustees of the district.

EUREKA, Humboldt Co., Cal.—Two bids received by county supervisors to furnish and install laundry equipment in new county hospital now being completed, have been taken under advisement until August 20. The bids were:

American Laundry Machinery Co., San Francisco, \$8,156.05 on Prop. 1, and \$7,108.25 on Prop. 2.

Troy Laundry Machinery Co., San Francisco, \$7,130.

SAN FRANCISCO—Until Aug. 27, 2 P. M., bids will be received by J. W. Grace, superintendent of equipment, Shop No. 4, California State Highway Commission, for the sale of the following equipment no longer required by the commission:

CHC No. 1—Asphalt Plant, Warren Portable No. 90, located at San Jose Highway Yard

- CHC No. 76—Burner, Pavement, 24x 96 in., located at San Jose Highway Yard.
- CHC No. 60—Grader-Tractor-Attachment, International Duplex 13-foot Road Maintainer, located at Fruitvale Highway Yard.
- CHC N. 35—Mixer, Concrete, 1/4-sack, Foot No. 4-E, located at San Jose Highway Yard.
- CHC No. 27—Pump, 2-in. Centrifugal, G. W. Price type, located at Petaluma Highway Yard.
- CHC No. 4—Roller, Road, Steam, 12-ton Buffalo—Pitts, 3-wheel, located at Hopland Highway Yard.
- CHC No. 38—Scarifier, Darling Disc, located at Petaluma Highway Yard.
- CHC N. 80—Trailer, Detroit, 3-ton, cargo, 4-wheel, located at Fruitvale Highway Yard.
- CHC N. 84—Trailer, Detroit, 3-ton, cargo, 4-wheel, located at Fruitvale Highway Yard.
- CHC No. 85—Trailer, 5-ton, S. & S., 4-wheel, Shop Made, located at Fruitvale Highway Yard.

Bidders may make offers for one or more items but must state price offered for each item. Lump sum bids will be considered.

All equipment may be inspected at the Division of Highways' yards as noted after each item, between the hours of 8:30 A. M. and 4:30 P. M. on any working day.

RAILROADS

KLAMATH FALLS, Ores.—A. Guthrie Co., Sherlock Bldg., Portland, Ore., at approximately \$3,356,000 awarded contract by Great Northern Railroad to construct new line from Klamath Falls, Oregon, to Bieber, Lassen Co., Calif., a distance of 88 miles. The line will connect with the unit now under construction for the Western Pacific Railroad, the contract for which has been awarded to W. A. Bechtel & Co. of San Francisco and the Utah Construction Co. of Ogden, Utah.

STOCKTON, San Joaquin Co., Cal.—City council has voted to drop negotiations with the Southern Pacific, Santa Fe and Western Pacific Railroads with regard to railroad lines in connection with the deep water project and has instructed the city attorney to file a certificate for the city to build the immediate port terminal lines and a line to Rough and Ready Island along the deep water project, tapping the area over which the railroads have been fighting. The rail project, as planned by the city, will cost between \$300,000 and \$400,000.

FIRE EQUIPMENT

INGLEWOOD, Los Angeles Co., Cal.—Until 8 P. M., Aug. 25, bids will be received by the city council for 1000 ft. 2 1/2-inch double jacket fire hose, lengths of approximately 50 ft., equipped with P. C. T. couplings ready for use. Otto H. Duelke, city clerk.

PIPE LINES, WELLS, ETC.

SAN FRANCISCO.—Robt. Forbes, at \$3,400 submitted low bid to Board of Public Works to install Pleasanton Wells System, involving the drilling of a gravel envelope well; single well, 200 ft. in depth, involving: 30 in. ft. sinking test bore; 60 in. ft. 30-in. conductor pipe; 250 in. ft. reaming bore and furnishing and installing 14-in. casing with gravel envelope; 1 test pump and appurtenances; 24 hours operating test pump. Western Well

Drilling Co., at \$4,046 only other bidder.

SAN FRANCISCO.—Western Well Drilling Co., at \$4,046 awarded contract by Board of Public Works to install Pleasanton Wells System, involving the drilling of a gravel envelope well; single well, 200 ft. in depth, involving: 250 in. ft. sinking test bore; 60 in. ft. 30-in. conductor pipe; 250 in. ft. reaming bore and furnishing and installing 14-in. casing with gravel envelope; 1 test pump and appurtenances; 24 hours operating test pump.

CRESCENT CITY, Del Norte Co., Cal.—Until September 3, 11 A. M., under Specification No. 6261, bids will be received by Public Works Officer, Navy Yard, Mare Island, for improvements to fire protection and deepening of the existing well at the U. S. Naval Radio Compass Station at Point St. George, Crescent City. Specifications obtainable from Commandant at the Mare Island Navy Yard and obtainable on deposit of \$5, returnable, checks for same to be made payable to Chief of the Bureau of Yards and Docks.

SEWERS AND SEWAGE DISPOSAL PLANTS

OAKLAND, Cal.—Until September 4, 12 noon, bids will be received by Frank C. Merritt, City Clerk, to construct main outlet sewer extension southwest of Fifth Ave. to water front, involving:

40.92 cu. ft. 36-inch reinforced concrete pipe sewer with concrete saddle and timber foundations, excepting piles;

15.42 lin. ft. steel pipe sewer, with concrete saddle and timber foundations;

495 lin. ft. creosoted wooden-stave pipe sewer, with steel bands, shoes, etc.;

1 concrete manhole with c. i. top and steel locking device;

700 lin. ft. (500 ft.) piling;

1 concrete end wall with automatic tide gates, etc.;

17.55 lin. ft. existing concrete sewer to be removed.

Bond of \$3000 required of successful bidder. Plans on file in office of city clerk and obtainable from Walter N. Frickstad, city engineer.

REDWOOD CITY, San Mateo Co., Cal.—County supervisors approve plans of County Surveyor Geo. A. Kneese for district on the north end of the county to provide for the disposal of sewage from South San Francisco, San Bruno, Lomita Park and Capuchino in San Francisco Bay. The project will be known as Acquisition and Improvement District No. 21 and will involve an expenditure of \$125,000.

ALAMEDA, Alameda Co., Calif.—Heafey-Moore, 344 High St., Oakland, at \$6,588.55 submitted low bid to city to construct storm water sewer. J. T. Clinch, \$6,622 and L. L. Page, \$6,967, next two low bidders. Taken under advisement.

SAN FRANCISCO.—Until September 17, 2:30 P. M., bids will be received by Board of Public Works, to construct College Hill Tunnel Sewer, known as Section K; estimated cost, \$520,000. Project involves in the main: 6,500 ft. reinf. conc. sewer ranging in size from 4-ft. by 6-ft. 6-in. to 6-ft. circular, 4,300 ft. of which will be in tunnel. The work extends from the Mission Viaduct to Valencia and Army Sts. Time for completion, 450 days. Deposit of \$10 required for plans, ob-

tainable from Bureau of Engineering, 3rd floor, City Hall. Deposit is returnable.

SAN FRANCISCO.—Board of Public Works has requested the supervisors to adopt an ordinance authorizing a call for bids to construct the Army Street Main Sewer from Pennsylvania Ave. to Mississippi Street, and an outlet to Marin Street, involving 826-ft. of 2-ft. 6-in. by 3-ft. 9-in. reinforced concrete sewer. Estimated cost, \$15,000.

MOUNTAIN VIEW, Santa Clara Co., Cal.—C. Dudley DeVelbliss, 354 Hobart St., Oakland, at \$6,924 submitted low bid to city trustees to construct sewage pumping plant with cast iron discharge main emptying into Mountain View Slough involving: 530 cu. yds. excavation; 3,700 cu. ft. concrete; 11,700 lbs. reinforcing steel; Two sewage pumping plants, including pumps, motors, etc.; 340 ft. 12-in. cast iron pipe pressure line; 700 ft. B. M. redwood timber; Galvanized iron pump hose, wiring, etc.

Complete list of bids, all taken under advisement, follow:

C. D. DeVelbliss, Oakland.....\$6,924
P. L. Burr, San Francisco.....3,900
Pacific Coast Const. Co.....9,173
C. C. Kennedy, Cal Bldg, San Francisco, engineer.

LOS ANGELES, Cal.—The Board of Public Works has recommended to the city council that a bond issue of \$6,940,000 be placed on the November ballot for construction of about 65 miles of sewers to serve 53,550 acres. The proposal includes special items such as central outfall reconstruction, disposal works for the Harbor District, and an outfall system for San Fernando Valley above Van Nuys. J. J. Jessup is the city engineer.

MOUNTAIN VIEW, Santa Clara Co., Cal.—As previously reported, bids will be received by B. L. Hays, city clerk, August 18, 7:30 P. M., to construct sewage pumping plant with cast iron discharge main emptying into Mountain View Slough. Projects involves:

530 cu. yds. excavation;
3,700 cu. ft. concrete;
11,700 lbs. reinforcing steel;
Two sewage pumping plants, including pumps, motors, etc.;
340 ft. 12-in. cast iron pipe pressure line;
700 ft. B. M. redwood timber;
Galvanized iron pump house, wiring, etc.

This is a cash job. Certified check 10% payable to city required with bid. Plans on file in office of clerk and obtainable from engineer on payment of \$3, not returnable.

See call for bids under official proposal section in this issue.

SAN FRANCISCO.—Until September 3, 2:30 P. M., bids will be received by Board of Public Works for construction of Section C of the Alameda Storm Drain; estimated cost, \$148,000, to be financed from the Sewer Bond Fund. Time for completion 120 days. Project involves:

(1) 915 lin. ft. 2-compartment 8-ft. 6-in. x 11-ft. reinforced concrete storm drains exclusive of piles;
(2) 354 lin. ft. 2-ft. 6-in. x 3-ft. 9-in. reinforced concrete sewer exclusive of piles.
(3) 310 lin. ft. 8-in. V.C.P. under-drain covered with concrete or embedded in broken rock;
(4) 620 lin. ft. 10-in. C.V.P. under-

drain covered with concrete or embedded in broken rock;
(5) 900 lin. ft. 12-in. V.C.P. under-drain covered with concrete or embedded in broken rock;
(6) 8 manholes, complete, on concrete sewers;

(7) 138,000 lin. ft. of timber piling. Certified check 10%, payable to the Clerk of the Board of Supervisors required with bid. Plans obtainable from Bureau of Engineering, 3rd floor, City Hall, on deposit of \$10, returnable.

SAN FRANCISCO.—Until September 8, 2:30 P. M., bids will be received by Board of Public Works to construct Section D of the Alemany Storm Drain estimated to cost \$60,000. To be financed from the Sewer Bond Issue Fund. Project involves:

- (1) 16,200 lin. ft. timber piling;
- (2) 1,195 lin. ft. 14-in. by 8-ft. wooden box sewer excluding piling;
- (3) 600 lin. ft. timber center partitions
- (4) 226 lin. ft. 3-ft. x 4-ft. 6-in. wood box sewer excluding piles;
- (5) 188 lin. ft. 12-in. V.C.P. sewer;
- (6) 125 lin. ft. 10-in. V.C.P. culvert;
- (7) 4 timber manholes;
- (8) 3 side connection posts;
- (9) 1 connection from 14-ft. by 8-ft. box section to 2-compartment concrete section.

Certified check 10% payable to Clerk of the Board of Supervisors required with bid. Plans obtainable from Bureau of Engineering, 3rd floor, City Hall.

REDWOOD CITY, San Mateo Co., Calif.—County supervisors approve plans of R. A. Klassen, engineer, Courthouse, Redwood City, to construct outfall sewer system to serve portions of South San Francisco, San Bruno, Lomita Park and Caupcheno, into San Francisco Bay; estimated cost \$120,500. Project involves:

- Vitrified Salt Glazed Sewer Pipe**
- 2,700 lin. ft. 4-in.
 - 100 lin. ft. 6-in.
 - 5,300 lin. ft. 8-in.
 - 6,900 lin. ft. 10-in.
 - 9,900 lin. ft. 12-in.
 - 1,400 lin. ft. 15-in.
 - 8,400 lin. ft. 18-in.
 - 3,150 lin. ft. 21-in.

- Cast Iron Pipe Sewer**
- 96 lin. ft. 8-in.
 - 3,420 lin. ft. 10-in.
 - 144 lin. ft. 12-in.
 - 4,272 lin. ft. 14-in.
 - 120 lin. ft. 18-in.

- Vitrified Salt Glazed Wyes**
- 60 8x4-in.
 - 120 10x4-in.
 - 140 12x4-in.
 - 60 15x4-in.
 - 130 manholes.

- 28 M. ft. b.m. redwood pile trestle.
- 2 pump sumps.
- 2 pump houses.
- 4 air and vacuum valves.
- 4 pressure air valves.
- 4 400 GPM pumps, complete.
- 2 400 GPM pumps, complete.
- Project will be known as Acq. and Imp. District No. 21.

WATER WORKS

LOS ANGELES, Cal.—Until August 25, 2 P. M., bids will be received by county supervisors to furnish 5000 ft. 2-inch standard wrought iron black pipe for Big Tujunga Dam. Specifications obtainable from county clerk.

DENVER, Colo.—Until 2 P. M., Aug. 26, bids will be received by the Bureau of Reclamation, 1441 Welton St., Denver, for furnishing a pump and motor for the Owyhee Project, under No. 16160-B. The specifications ask for bids on one direct connected vertical turbine pump and motor (220 volt, 3 phase, 60 cycle), capacity 50 gals. per minute under total pumping head of 200 ft., including suction and friction

head; similar and equal to Byron-Jackson deep well turbine pump. The pump will be mounted on timbers over an open pit, with normal water surface 10.5 feet below the pump base. Provision shall be made for a draw-down of 2 feet, with the pump bowls properly submerged, and for 5 feet of suction pipe and a strainer connected to the bottom bowl. A suitable switch for across-the-line starting shall be included. Bids shall state make, shipping weight, and descriptive matter showing design, efficiency, and make and capacity of motor. A Mcd. Brook, purchasing agent.

SANTA BARBARA, Cal.—City Water Commission recommends that \$25,000 be made available for immediate repairs to municipal water system, plans for which are being prepared by the Municipal Water Department.

YREKA, Siskiyou Co., Calif.—Until September 4, 7:30 P. M., bids will be received by U. P. Brown, city clerk, to furnish and deliver 1,420-ft. 4-in., 660-ft. 6-in., 500-ft. 8-in. and 400-ft. 2-in. Class 150 bell and spigot pipe, together with miscellaneous fittings as more completely described in official proposal. Pipe to be in 16-ft. lengths of either A.W.W.A. specifications or pipe made by the Horizontal Sand Cast of the Centrifugal Method of classes as specified, both with open bell and precast joints. Certified check 10% required with bid.

HAWTHORNE, Nevada.—Until September 10, 11 A. M., under Specification No. 6150, bids will be received by Bureau of Yards and Docks, Navy Department, Washington, D. C., to construct an irrigation system at Naval Ammunition Depot, Hawthorne, Nevada. The work consists of a lawn sprinkler system and water supply mains, and includes earthwork, concrete, steel and iron work, and all piping, valves, fittings, sprinkler heads, and accessories necessary to install the sprinkling system. Plans and specifications may be obtained from the District Public Works Officer, Room 513, 100 Harri-

son Street, San Francisco, on deposit of a \$115 check or money order payable to the Chief of the Bureau of Yards and Docks.

SAN FRANCISCO.—Enterprise Foundry, 2902 19th St., at \$9487.50, submitted low bid to the Board of Supervisors to furnish approx. 210,000 lbs. of cast iron fittings for the San Francisco Water Department. Other bids: Bethlehem Steel Corp., 57c; Joshua Hendy Iron Works, 6c; Golden State Miners Iron Works, 6c; Steiger & Kerr, 6c. Taken under advisement.

SANTA ROSA, Sonoma Co., Calif.—Water Works Supply Co., San Francisco, at \$5,893.54 awarded contract by city council to clean water mains. Approximately 2,000 ft. of 8-in. mains will be cleaned.

SAN FRANCISCO.—Board of Supervisors rejects bids received June 9 to furnish sixteen deep well turbine pumps for the San Francisco Water Department.

PLAYGROUNDS & PARKS

Preliminary Studies Being Made.
MEMORIAL PARK Cost, \$—
SANTA ROSA, Sonoma Co., Cal. 20-acre site.
Lay out memorial park.
Owner—City of Santa Rosa.
Landscape Architect—Howard Gilkey, Howden Bldg., Oakland.
Work involves playground, recreation buildings. Provisions will also be made for boating and canoeing.

STREETS AND HIGHWAYS

SAN JOSE, Santa Clara Co., Cal.—Until September 2, 11 A. M., bids will be received by Henry A. Pfister, County Clerk, for improvement of North Tenth St., from Gish road to Taylor St., in supervisor district No. 3, and for improvement of Locust St., Vine St., Lick Ave., Alma Ave., and the San Jose and Almaden road in supervisor's district No. 2. Specifications obtainable from Robert Chandler, County Surveyor, at San Jose.

SAN FRANCISCO.—Western Pipe and Steel Co., 444 Market St., at \$7,771.60 submitted low bid to Board of Public Works, to furnish and install riveted steel pipe between Armour and Chapman Sts., South San Francisco, for the Municipal Water Department. Unit bids follow:
(a) Western Pipe and Steel Co., 444 Market St., San Francisco, \$7,771.60.
(b) Montague Pipe and Steel Co., 1900 Third St., San Francisco, \$8,201.70.

REDDING, Shasta Co., Calif.—Bids received August 15 by directors of the Joint Highway District No. 11 to construct the Weed-Klamath road project (1st unit), comprising Section from Station 0 to 00 to 142 plus 15, have been rejected and new bids have been ordered received under revised specifications which will bring cost within the amount of money available. New bids will be received by the directors at Redding on August 27. Bids received under the last call were:

- J. P. Brennan, Redding, \$52,525; F. C. Cuffe, San Rafael, \$57,825; W. C. Colley, Berkeley, \$60,998. Engineer's estimate \$58,005. The project involves:
- (1) 9.8 acres clearing;
- (2) 51.44 cu. yds. unclass. excavation;
- (3) 113 cu. yds. unclass. excavation for structures.
- (4) 21,803 sta. yds. overhaul;
- (5) 2.8 miles finish earth graded road;
- (6) 8.52 cu. yds. class C concrete;
- (7) 81 lbs. reinforcing steel;
- (8) 582 lin. ft. 18-in. G. C. M. P.

Plans obtainable from Carl F. Mau, district engineer at Redding.

SANTA BARBARA, Cal.—Hunter & Richardson, 525 E. Haley St., awarded contract by the city at \$16,456 to improve Cota St. bet. Milpas and Soledad Sts., involving grading, concrete pavement, concrete driveways, walk, vit. house sewers.

SOUTH SAN FRANCISCO, San Mateo Co., Cal.—Until September 3, 7:30 P. M., bids will be received by Daniel McSweeney, city clerk, (71) to improve Linden Ave., between Railroad Ave. and Southern Pacific Company's Bay Shore Line involving grading; hydraulic cement concrete sidewalks, gutters, curbs; pavement consisting of 3-inch asphaltic concrete base; 6-in. waterbound rock macadam sub-base on cushion and 2-inch asphaltic concrete wearing surface; two steel reinforced hydraulic concrete bridges; concrete box culvert; vitrified salt-glazed ironstone pipe sanitary sewer; brick manholes, catchbasins, electrolitters, cement concrete wall. Estimated cost \$100,000. Improvement Act 1911. Bond Act 1915. Certified check 10% payable to city required with bid. Plans on file in office of clerk. Geo. A. Kneese, city engineer.

PACIFIC GROVE, Monterey Co., Cal.—City council declares intention (3233) to improve Junipero Ave. bet. Forest Ave. and east city limits, involving grading; conc. curbs and gutters; asphalt. conc. pave.; storm drains; conc. catchbasins. 1911 Act. Bond Act 1915. Hearing Sept. 4. W. G. Stubbs, city clerk.

FRESNO, Fresno Co., Cal.—Thompson Bros., Fresno, awarded contract by city council for improvements under Res. of Intention. No. 105-D, involving cem. conc. walks, \$19 sq.

ft.; conc. curb, \$60 lin. ft.; 5-in. conc. driveway approach, \$28 sq. ft.

REDDING, Shasta Co., Cal.—Until September 2, 7 P. M., bids will be received by M. E. Luton, clerk, Shasta Union High School District, for grading and excavation in connection with extension of Magnolia Ave. from Eureka Way to 9th St. Specifications obtainable from clerk at 2054 Market St., Redding.

SAN RAFAEL, Marin Co., Cal.—City council declares intention (525) to improve Mission Ave. from Alice St. westerly, and Belle Ave. bet. Alice and Mission Aves. Project involves:

- (1) 800 cu. yds. excavation;
- (2) 23,258 sq. ft. 4-in. rock sub-base;
- (3) 23,258 sq. ft. 5-in. hydraulic concrete pavement;
- (4) 1,604 lin. ft. conc. curb and gutter;
- (5) 164 lin. ft. 4-in. I. S. pipe side sewers;
- (6) 10 cu. yds. shallow sewer protection;
- (7) 2 manholes with c. i. frames & covers;
- (8) 28 lin. ft. 10-in. C. I. pipe;
- (9) 110 lin. ft. 12-in. C. I.
- (10) 4 standard catchbasins.

1911 Act. Bond Act 1915. Hearing August 30. Eugene W. Smith, city clerk. Herbert K. Brainerd, city manager.

MILL VALLEY, Marin Co., Cal.—Town trustees declare intention (755) to improve portions of Summit Ave. and other streets involving vitrified pipe sewer; hydraulic concrete manholes; lampholes; wye branches and lateral; hydraulic concrete retaining wall; arch culverts; hydraulic conduit inlet. Project involves approximately 250,000 sq. ft. of hydraulic concrete pavement. Previous bids, providing for asphalt conc. pavement were rejected and new proceedings started for the improvement. A. G. Raichsch of San Francisco, submitted low bid at \$88,232. 1911 Act. Bond Act 1915. Hearing August 27. Will Falley, town clerk. Quantities of materials involved will be published shortly.

SAN LUIS OBISPO COUNTY, Cal.—Santa Maria Const. Co., Santa Maria, at \$11,344.65 submitted low bid to district engineer, State Highway Commission, to construct borders of crusher run base and oil treated surface on four miles between El Capitlan Creek and one mile south of Tujuglas. Taken under advisement.

PLACER COUNTY, Calif.—T. M. Morgan Paving Co., Los Angeles, at \$269,755 awarded contract by State Highway Commission to construct 531 lin. ft. of tunnel and about one mile of roadway to be graded and surfaced with crusher run base and oil treated crushed gravel or stone surface.

MARYSVILLE, Yuba Co., Cal.—Hemstreet & Bell, Marysville, at \$12,441 (plant mix) awarded contract by county supervisors to pave a shoulder 2½ feet wide along the west edge of District Ten Highway. Other bids: L. C. Seidel, Oakland, \$14,214; Teichert & Son, Sacramento, (bitumuls), \$17,005.

MARYSVILLE, Yuba Co., Cal.—Hemstreet & Bell, Marysville, at \$2635 (plant mix) awarded contract by county supervisors to pave portion of Feather River Blvd. extending across Plumas Lake.

SANTA BARBARA, Cal.—City Engineer E. B. Brown is checking petitions for the widening of 12 Canon Perdido St. bet. Milpas and Salsipuedes Sts. three blocks, and the paving of Canon Perdido bet. Milpas and Santa Barbara Sts., seven blocks. Pavement will probably be of cement concrete.

SANTA BARBARA & SAN LUIS OBISPO COS., Cal.—Lang Transportation Co., 5501 Santa Fe Ave., Los Angeles, at \$261,612 awarded contract by State Highway Commission to grade and surface with oil treated crushed gravel or stone, 37.9 miles bet. second crossing of the Cuyama river and the east boundary of San Luis Obispo County.

RICHMOND, Contra Costa Co., Cal.—Union Paving Co., Cal. Bldg. San Francisco, at approximately \$132,126.95 submitted only bid to city council (476) to improve Pullman Ave. bet. Cutting Blvd. and Panhandle Blvd., and Panhandle Blvd. bet. Pullman Ave. and Del Norte Place, and portions of Cutting Blvd., 45th, 47th and Monterey Sts., involving grading; pave with 4-in. broken stone cushion with three-course asphalt concrete pavement, consisting of two-course base of 6-inch asphalt conc. and 2-inch asphalt conc. surface; cem. conc. curbs with galv. steel curb bars; cem. conc. gutters, walks; corr. iron pipe inlets; corr. iron and cem. conc. culverts.

SAN LUIS OBISPO COUNTY, Cal.—As previously reported, bids will be received September 10, by State Highway Commission to apply seal coat to existing bituminous macadam surfacing on 1.7-miles west of Shandon and the east boundary. Project involves: 2,030 tons screenings; 170 tons asphaltic road oil.

SAN JOSE, Santa Clara Co., Cal.—Granite Construction Co., Watsonville, at \$47,861 awarded contract by county supervisors to improve Hecker Highway in Supervisor District No. 1. A. J. Raichsch, 46 Kearny St., San Francisco only other bidder at \$62,631. Estimate of Robert Chandler, county surveyor, \$53,969.

SACRAMENTO COUNTY, Cal.—Following bids received Aug. 13 by R. E. Pierce, district engineer, State Highway Commission, Sacramento, to improve highway between Twin Cities School and 1½ miles northeast of Herald, 4.6 miles in length, involving crushed gravel or stone borders with bituminous surface treatment to be constructed 3 ft. wide on both sides of existing pavement:

Perry & Reed, Tracy.....	\$ 7,224
J. R. Reeves, Sacramento.....	9,294
A. Teichert, Sacramento.....	9,567
L. C. Seidel, Oakland.....	10,390

NAPA, Napa Co., Cal.—Shell Oil Co., at \$12 ton, awarded contract by city council to furnish one carload of asphalt for street department.

OROVILLE, Butte Co., Cal.—F. A. Sewell, Gridley, at \$6,435 (1944 cu. yd.) awarded contract by county supervisors to construct Fell Road extension.

REDWOOD CITY, San Mateo Co., Cal.—McClure & Chamberlain, 608 Octavia St., San Francisco, at \$19,635 awarded contract by county supervisors (23) to improve Oak Knoll Dr. from Lake Blvd. and Vista Dr. northerly, involving grading; 4-inch waterbound rock macadam base with 3-in. asphalt. conc. surface; guard rails; 6-in. vit. san. sewers; 30-in. hyd. cem. conc. pipe spillway or storm drain; brick manholes. W. A. Dantanville, Salinas, only other bidder at \$21,904.

SAN RAFAEL, Marin Co., Cal.—A. G. Ralsch, 46 Kearny St., San Francisco, at \$18,357 awarded contract by county supervisors to pave roads in Fairfax Heights District.

SAN RAFAEL, Marin Co., Cal.—Highway Builders, Ltd., 640 Redhill Ave., San Anselmo, at \$9660 awarded contract by county supervisors to surface Point San Pedro road from Point San Pedro School to Santa Venetia, 5.8 miles in length, involving 552,000 sq. ft. emulsified asphalt and screenings in place.

SAN RAFAEL, Marin Co., Cal.—Highway Builders, Ltd., 640 Redhill Ave., San Anselmo, at \$3586 awarded contract by county supervisors to surface the Olema-Bollinas road, from 1 mile south of Olema to Five Brooks, 2.8 miles in length, involving 266,000 sq. ft. of emulsified asphalt and screenings in place.

SAN RAFAEL, Marin Co., Cal.—Highway Builders, Ltd., 640 Redhill Ave., San Anselmo, at \$3519.75 awarded contract by county supervisors to surface the Upper Novato-Black Point road from the Redwood Highway to the Lower Black-Point road, 1.9 miles in length, to be surfaced with 180,500 sq. ft. emulsified asphalt and screenings in place.

BERKELEY, Alameda Co., Cal.—Until September 2, 11 A. M., bids will be received by Regents of the University of California, to construct Cross Campus Road on grounds of the University. Plans obtainable from Cashier's Window, California Hall, University of California, Berkeley, on deposit of \$50, returnable.

See call for bids under official proposal section in this issue.

KEDDIE, Plumas Co., Cal.—Morris-Knudsen Co., 219 Broadway, Boise Idaho, has been awarded a contract by the Western Pacific Ry. at about \$600,000 for the construction of five miles of roadway near Keddie.

W. H. Puckett Co., Boise, Idaho, has been awarded contract at about \$400,000 for constructing fifteen miles of roadway at the northern end of the Western Pacific Keddie cut-off, near Bieber.

HOLLISTER, San Benito Co., Cal.—Until September 2, 2 P. M., bids will be received by Elmer Dowdy, county clerk, to improve Bolsoa Road in Supervisor District No. 1, Lucy Brown Lane in Supervisor District No. 2 and the Hamilton Road, South Side Road, Hollister and Bird Creek Road and Riverside Ave. in Supervisor District No. 3, in all, approximately 1.8 miles, involving graveling and oiling; estimated cost, \$22,000. Plans on file in office of clerk.

SAN RAFAEL, Marin Co., Cal.—City council declares intention (528) to improve Second St. bet. A and E Sts. Project involves:

- (1) 1,857 cu. yds. excavation;
- (2) 59,746 sq. ft. 5-inch hydraulic concrete pavement;
- (3) 59,746 sq. ft. 4-inch stone sub-base;
- (4) 2,095 lin. ft. concrete curb;
- (5) 499 lin. ft. conc. curb and gutter;
- (6) 258 lin. ft. 4-in. I. S. pipe sewer;
- (7) 42 lin. ft. 6-in. do;
- (8) 70 lin. ft. 8-in. do;
- (9) 90 lin. ft. 12-in. do;
- (10) 1 standard manholes complete including frames and covers;
- (11) 30 cu. yds. shallow sewer protection;
- (12) 18 lin. ft. 10-in. C. I. pipe;
- (13) 34 lin. ft. 6x6x24-in. arch culvert, complete;
- (14) 224 lin. ft. 6x6x30-in. do;
- (15) 324 lin. ft. 21-in. concrete pipe;
- (16) 1 standard gutter inlet with 15-sq. grating;
- (17) 1 special catchbasin.

1911 Act. Bond Act 1915. Hearing August 30. Eugene W. Smith, city clerk. Herbert K. Brainerd, city manager.

SAN RAFAEL, Marin Co., Cal.—City council declares intention (528) to improve Second St. bet. A and E Sts., involving grading; 4-inch stone sub-base with hyd. concrete pavement of various thicknesses; 4-in. and 6-in. ironstone pipe side sewers; 6-in., 8-in. and 12-in. ironstone pipe sewers; hyd. concrete manholes; corr. iron pipe storm drains; hyd. conc. and corr. iron arch culverts; 21-in. centrifugally spun hyd. conc. storm sewer.

1911 Act. Bond Act 1915. Hearing August 30. Eugene W. Smith, city clerk. Herbert K. Brainerd, city manager.

SAN RAFAEL, Marin Co., Cal.—City council declares intention (525) to improve Mission Ave. from Alice St. westerly, and Belle Ave. bet. Alice and Mission Aves., involving grading; 4-inch rock cushion base with hydraulic concrete surface; comb. hydraulic concrete curb and gutter, manholes; 10- and 12-in. corr. iron culverts; 4-in. ironstone pipe side sewers.

1911 Act. Bond Act 1915. Hearing August 30. Eugene W. Smith, city clerk. Herbert K. Brainerd, city manager.

REDWOOD CITY, San Mateo Co., Cal.—Until August 25, 8 P. M., bids will be received by B. E. Myers, city clerk (M-12) to improve portions of Hawes St., involving grading; 5-inch cement concrete paving on 3-in. broken stone cushion on 1-in. sand base; cement concrete curbs; portions of Ruby St., involving 4-ft. by 5-ft. reinforced cement concrete box culverts, etc. one timber bridge; vit. sewers, etc. 1911 Act. Bond Act 1915. City will pay \$7000 of cost from 1930 Bond Fund. Certified check 10% payable to city required with bid. Plans on file in office of clerk. C. L. Dimmitt, city engineer.

SAN LUIS OBISPO COUNTY, Cal.—Until September 10, 2 P. M., bids will be received by State Highway Commission, to furnish and apply seal coat to existing bituminous macadam surfacing on 15.4 miles between 1.7 miles west of Shandon and the east boundary.

See call for bids under official proposal section in this issue.

SAN LUIS OBISPO, San Luis Obispo Co., Cal.—The County Supervisors have agreed to secure rights-of-way for the construction of a new Atascadero-Morro Road, following announcements by the supervisors of districts Nos. 2 and 5. The new road will follow surveys made two years

ago by J. B. Woodson of Fresno. The road will be 19 miles in length, but as 6 miles are in the Santa Barbara national forest, the districts will construct but 13 miles, the balance to be built by the bureau of public roads. Proposed grading and surfacing with gravel will be paid for in cash.

GILROY, Santa Clara Co., Cal.—City declares intention and will ask bids about August 21 to improve portions of Hianna, Romanna and other streets, involving: 500,82 sq. ft. 3-in. asphalt pavement; 41,515 sq. ft. 2-ft. gutter; 3736 lin. ft. curb; 4500 sq. ft. sidewalk; 3052 lin. ft. 6-in. conc. storm sewer; 9 catchbasins, 10,318 cu. yds. excavation.

1911 Act. Bond Act 1915. R. W. Fisher, engineer, 74 North First St., San Jose.

SAN FRANCISCO.—Until September 3, 2:30 P. M., bids will be received by Board of Public Works to improve, under Contract No. 21, Section B of Sunset Blvd. bet. Santiago Ave. and York St., estimated cost, \$90,000. This project will consist of grading and paving that section of the boulevard lying between 26th and 37th Aves. from Santiago Ave. to Sloat Blvd., involving in the main \$4,000 cu. yds. of excavation and 92,000 sq. ft. of asphalt macadam pavement. There will be provision for a 30-ft. roadways, two 15-ft. pedestrian walks and one 15-ft. equestrian drive. Certified check 10% payable to Clerk of the Board of Supervisors required with bid. Plans obtainable from Bureau of Engineering, 3rd floor, City Hall, on deposit of \$10, returnable.

SAN FRANCISCO.—Board of Public Works has requested the supervisors to authorize a call for bids to construct Section C of the Sunset Blvd. under Contract No. 23, involving the grading and paving of that section between 36th and 37th Aves., from Santiago Ave. to Noriega St.; estimated cost, \$135,000.

PLUMAS COUNTY, Cal.—Finnell Co., Inc., Sacramento, at \$18,365, submitted low bid to District Engineer, U. S. Bureau of Public Roads, to furnish and apply oil to 12.66 miles of the Quincy-Beckwith National Forest Highway, Plumas National Forest, involving:

- 12.04 miles mixing oil treated crushed rock surfacing;
- 151,500 gals. asphaltic oil, furnished and applied.

A. Teichert & Son, Inc., Sacramento only other bidder at \$19,388.10.

PITTSBURG, Contra Costa Co., Cal.—Until August 25, 8 P. M., bids will be received by A. V. McPaul, secretary, Pittsburg High School District, for surfacing area fronting high school building. Alternate bids will be considered for (1) oil macadam and (2) concrete surfacing. Specifications on file in the office of the City Superintendent of Schools.

PITTSBURG, Contra Costa Co., Cal.—Until August 25, 8 P. M., bids will be received by Armand Stow, clerk, Pittsburg School District, for oil macadam surfacing of certain portion of S-mers St. west of the Junior High School. Specifications on file in office of the City Superintendent of Schools at the High School.

SANTA BARBARA, Cal.—City council declares intention to grade Ortega St. bet. Garden and Quarantina Sts., Costa St. bet. Laguna and Olive Sts., and Quarantina St. bet. Haley and Costa Sts., and Salsipuedes St. bet. Haley and Ortega St. 1911 Act. Projects Sept. 4.

WATSONVILLE, Santa Cruz Co., Cal.—Until August 27, 7:30 P. M., bids will be received by M. M. Swisher, City Clerk, to improve Madison St., between California and Prospect Sts., involving grading; macadamize with asphaltic oil; concrete curbs and gutters. Certified check 10% payable to city required with bid. Plans on file in office of clerk. H. B. Kitchen, city engineer.

VALLEJO, Solano Co., Cal.—J. E. Johnston Savings & Loan Bldg., Stockton, awarded contract by city council to improve Florida St., bet. Sonoma Ave. and Alameda St., including crossings, involving: 2,010 cu. yds. grading (excavation) \$11.10 cu. yd.;

79,107 sq. ft. subgrade, \$.03 sq. ft.; 79,107 sq. ft. 4-in. asphaltic concrete base pave, \$.14 sq. ft.; 79,107 sq. ft. 2-in. asphaltic concrete surface, \$.09 sq. ft.; 78 lin. ft. house lateral sewers, \$1 lin. ft.

WATSONVILLE, Santa Cruz Co., Cal.—Until August 27, 7:30 P. M., bids will be received by M. M. Swisher, City Clerk, to improve Lincoln St., between Third and Bridge Sts., involving grading; macadamize with asphaltic oil; concrete curb and gutters. Certified check 10% payable to city required with bid. Plans on file in office of clerk. H. B. Kitchen, city engineer.

BERKELEY, Alameda Co., Cal.—City Council declares intention (651) to improve portions of La Loma Ave. and Glendale Ave., involving grading; paving with oiled macadam and portions to be re-macadamized; conc. curbs and gutters, concrete walls, walks and steps, rubble masonry walls, highway fences; catchbasins; corr. iron pipe culverts and vit. sewer. 1911 Act. Bond Act 1915. Hearing Sept. 2. Florence E. Turner, city clerk.

SAN LUIS OBISPO, Cal.—Hartman Construction Co., Bakersfield, submitted low bid to the State Highway Commission at \$6277.40 for highway work in San Luis Obispo county, between Paso Robles and Atascadero (VI-SLO-2-B), about 9.4 miles in length, heavy fuel oil to be furnished, applied to the shoulders. The work involves:

- (1) 8.4 miles preparing shoulders and mixing after application of oil;
- (2) 2110 bbls. heavy fuel oil in place. The bids were:
- Hartman Const. Co., (1) \$376; (2) \$1.30; total, \$6277.40.
- M. J. Bevanda, (1) \$320; (2) \$2.10; total, \$7433.
- V. R. Dennis Const. Co., (1) \$500; (2) \$1.70; total \$8287.
- Irving L. Ryder, (1) \$490; (2) \$1.75; total \$5298.50.
- Steele Pinley (1) \$650; (2) \$1.50; total \$9275.

A. Telchert & Son, Inc., (1) \$595; (2) \$2.73; total, \$11,259.30.

OFFICIAL PROPOSALS

STATE OF CALIFORNIA

DEPARTMENT OF PUBLIC WORKS

DIVISION OF HIGHWAYS

NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received at the office of the State Highway Engineer, Public Works Building, Sacramento, California, until 2 o'clock P. M. on September 10, 1930, at which time they will be publicly opened and read, for construction in accordance

with the specifications therefor, to which a special reference is made, of portions of State Highway, as follows:

San Luis Obispo County, between 1.7 miles west of Shandon and the Easterly boundary (V-SLO-35-B & C), about fifteen and four-tenths (15.4) miles in length, seal coat to be applied to the existing bituminous macadam surfacing.

Proposal forms will be issued only to those Contractors who have furnished a verified statement of experience and financial condition in accordance with the provisions of Chapter 644, Statutes of 1929, and whose statements so furnished are satisfactory to the Department of Public Works. Bids will not be accepted from a Contractor to whom a proposal form has not been issued by the Department of Public Works.

Plans may be seen, and forms of proposal, bonds, contract and specifications may be obtained at the said office, and they may be seen at the offices of the District Engineers at Los Angeles and San Francisco, and at the office of the District Engineer of the district in which the work is situated. The District Engineers' offices are located at Eureka, Redding, Sacramento, San Francisco, San Luis Obispo, Fresno, Los Angeles, San Bernardino and Bishop.

A representative from the district office will be available to accompany prospective bidders for an inspection of the work herein contemplated, and Contractors are urged to investigate the location, character and quantity of work to be done, with a representative of the Division of Highways. It is requested that arrangements for joint field inspection be made as far in advance as possible. Detailed information concerning the proposed work may be obtained from the district office.

No bid will be received unless it is made on a blank form furnished by the State Highway Engineer. The special attention of prospective bidders is called to the "Proposal Requirements and Conditions" annexed to the blank form of proposal, for full directions as to bidding, etc.

The Department of Public Works reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the State.

Dated August 6, 1930.

NOTICE TO CONTRACTORS

Mechanical Work

SEALED BIDS will be received by Geo. B. McDougall, State Architect, Public Works Building, 11th and P Streets, Sacramento, California, up to 2 o'clock P. M., Tuesday, September 16, 1930, said bids thereafter on said day to be publicly opened and read, for the installation and completion of the Mechanical Work for the Industrial Shop Building and Superintendent's Cottage, Preston School of Industry, Near Ione, California, in accordance with plans and specifications therefor.

Mechanical Work includes Plumbing, Heating, Ventilation and Electrical Work. Separate bids will be received for "Electrical Work" and for "Plumbing, Heating and Ventilation Work." Combined bids will also be received covering all four branches of the work.

Plans and specifications are on file for examination in the office of the Division of Architecture, Public Works Building, Sacramento, California, and also at Room 1025 Associated Realty Building, Los Angeles, and at the principal California Cities Builders' Exchange Offices.

Plans, specifications, and proposal forms may be secured by licensed Contractors who have qualified or who will qualify by furnishing a verified statement of experience and financial condition as required by the provisions of Chapter 644, Statutes 1929, and whose statements so furnished are satisfactory to the Department of Public Works. Questionnaire forms may be secured from the Division of Architecture.

Bids will not be accepted from a Contractor to whom a proposal form has not been issued and all bids must be on proposal forms supplied by the State.

Requests for plans shall be accompanied by a deposit of twenty-five (\$25.00) dollars. Check shall be made payable to the Department of Public Works, Division of Architecture. Deposit will be returned upon receipt of the set in good condition at Sacramento Office of the Division within 30 days after opening bids, otherwise it will be forfeited to the State.

All bids must be filed at the office of the State Architect on or before the time heretofore stated and in accordance with the "Rules for Bidding" accompanying the proposal form.

No bid will be considered unless cash, a bidder's bond made payable to the State of California, or a certified check made payable to the "State Engineer, Department of Public Works," in the sum of at least ten per centum (10%) of the amount of the bid is enclosed with the bid.

The Division of Architecture, State Department of Public Works, reserves the right to reject any or all bids and to waive any informality in any bid received.

STATE DEPARTMENT OF PUBLIC WORKS

GENERAL WORK

SEALED BIDS will be received by Geo. B. McDougall, State Architect, Public Works Building, 11th and P Streets, Sacramento, California, up to 2 o'clock P. M., Tuesday, September 16, 1930, thereafter on said day to be publicly opened and read for the erection and completion of the Building and Superintendent's Cottage, Preston School of Industry, Near Ione, California, in accordance with plans and specifications therefor.

The Industrial Shop Building is a one-story and balcony brick structure with steel roof construction and slate roof. The floor area is approximately 3000 square feet.

The Superintendent's Cottage is a two-story with partial basement brick and frame structure of ten rooms.

Plans and specifications are on file for examination in the office of the Division of Architecture, Public Works Building, Sacramento, California, and also at Room 1025 Associated Realty Building, Los Angeles, and at the principal California Cities Builders' Exchange Offices.

Plans, specifications, and proposal forms may be secured by licensed General Contractors who have qualified or who will qualify by furnishing a verified statement of experience and financial condition as required by the provisions of Chapter 644, Statutes 1929, and whose statements so furnished are satisfactory to the Department of Public Works. Questionnaire forms may be secured from the Division of Architecture.

Bids will not be accepted from a Contractor to whom a proposal form has not been issued and all bids must be on proposal form supplied by the State.

Requests for plans shall be accompanied by a deposit of twenty-five (\$25.00) dollars. Check shall be made payable to the Department of Public Works, Division of Architecture. Deposit will be returned upon receipt of the set in good condition at Sacramento Office of the Division within 30 days after opening bids, otherwise it will be forfeited to the State.

All bids must be filed at the office of the State Architect on or before the time heretofore stated and in accordance with the "Rules for Bidding" accompanying the proposal form.

No bid will be considered unless cash, a bidder's bond made payable to the State of California, or a certified check made payable to the "State Engineer, Department of Public Works," in the sum of at least ten per centum (10%) of the amount of the bid is enclosed with the bid.

The Division of Architecture, State Department of Public Works, reserves the right to reject any or all bids and to waive any informality in any bid received.

STATE DEPARTMENT OF PUBLIC WORKS

DIVISION OF ARCHITECTURE
GEO. B. McDOUGALL,

State Architect.

B. B. MEEK,

Director of Public Works.

Mesker Bros. Iron Co., St. Louis, Mo. has issued a bulletin on Mesker Heavy Duty Cruciform Industrial Windows

PLUMBING FIXTURE PRICES

July wholesale prices of standard plumbing fixtures for a six-room house, as collected by the U. S. Department of Commerce from reports of 12 representative manufacturers and wholesalers, were \$98.18, as compared with \$99.25 in June and \$97.94 in July, 1929.
